"Buying and selling a business is a challenging process. It involves rituals and interactions that are sometimes eerily similar to the courtship dynamic between a human couple. While many business courtships end in an economic marriage, plenty of others fail and for a variety of reasons. Many unsuccessful business negotiations could have made sense, but ultimately floundered, because negotiations went badly awry at some crucial point. CCH's brand-new Practical Guide to Mergers, Acquisitions and Business Sales by seasoned business transaction attorney and author, Joseph B. Darby III, J.D., not only explains the

tax aspects of buying and selling a business, but examines the special art of closing major business transactions successfully through an understanding of the tax consequences of the deal. ; There also are two other parties with a major economic stake in a business merger, acquisition or sale: the federal government and (usually at least one) state government. The role of a tax adviser on an business acquisition transaction is to make everyone aware that there are two "silent partners" in the room at all times and that the Buyer and Seller have a common interest in cutting the silent partners out of the deal or reducing their take. The purpose and mission of Practical Guide to Mergers, Acquisitions and Business Sales is to teach practitioners and business stakeholders how to pare the tax costs of transactions to the absolute minimum, within the boundaries of ethical and appropriate tax reporting."-- Publisher's website. The tz'u, or lyric, reached its full maturity in China during the eleventh century and the first quarter of the twelfth. Until now this important poetic genre has been little known to English readers, and James J. Y. Liu's book is the first to deal systematically and critically with it. He does so by examining the work of six representative poets of the period. The poems are analyzed in terms of their "exploration of worlds," by which the author means the poet's probing of the natural world and the human world in which he lives, as well as of his own mind. This leads into a discussion of the poet's "exploration of language," his incessant effort to embody the worlds he explores in complex verbal structures and to realize the potentialities of the Chinese language as a medium of poetic expression. Preceding the general discussion of each lyricist's poetry are examples of the work of each in four forms: first in the original Chinese text, then in a romanization, next in a word-for-word translation, and finally in an idiomatic translation. Each poem is accompanied by a metrical diagram, explanatory notes, and a critical commentary. Attention is focused on poetic qualities and features such as diction, imagery, syntax, and prosody.
