Arne Grøn's reading of Søren Kierkegaard's authorship revolves around existential challenges of human identity. The 35 essays that constitute this book are written over three decades and are characterized by combining careful attention to the augmentative detail of Kierkegaard's text with a constant focus on issues in contemporary philosophy. Contrary to many approaches to Kierkegaard's authorship, Grøn does not read Kierkegaard in opposition to Hegel. The work of the Danish thinker is read as a critical development of Hegelian phenomenology with particular attention to existential aspects of human experience. Anxiety and despair are the primary existential phenomena that Kierkegaard examines throughout his authorship, and Grøn uses these negative phenomena to argue for the basically ethical aim of Kierkegaard's work. In Grøn's reading, Kierkegaard conceives human selfhood not merely as relational, but also a process of becoming the self that one is through the otherness of self-experience, that is, the body, the world, other people, and God. This book should be of interest to philosophers, theologians, literary studies scholars, and anyone with an interest not only in Kierkegaard, but also in human identity. Every year, the Technical University of Munich, the Bundeswehr University, and the University of Applied Sciences in Munich invite researchers and practitioners to join the Munich Symposium on Lightweight Design. Experts from industry and academia discuss design tools, applications, and new developments. Topics include, e.g., composite structures, SHM, microstructures, material modelling, design for additive manufacturing, numerical optimization and in particular topology optimization in aerospace, automotive and other industries. The talks are summarized in short articles and presented in this volume. The collected essays provide a cross section of Hans-Martin Schenkes immense work in the field of New Testament, Gosticism, and Coptology that span a lifetime of scholaship in which he produced highly valued Coptic text editions as well as theological writings. Vol. 48- published in two parts: Allgemeiner Teil, and Technischer Teil. Knowledge and education are key factors for a successful future in modern, globalised times. This applies especially to the resource-poor Baltic Sea region and its small and medium sized enterprises. Without excellent qualified staff and executives they cannot compete on a global scale. The authors of this book - scientists, entrepreneurs and journalists - address the main problems of our education systems, ranging from schools to vocational training and universities. But not only do they analyse these diverse systems but also develop strategies for successfully meeting the challenges ahead of us.
