Master the GRE: Practice Test  
2 Practice the ASSET!

The CliffsTestPrep series offers full-length practice exams that simulate the real tests; proven test-taking strategies to increase your chances at doing well; and thorough review exercises to help fill in any knowledge gaps. See PDF example Once you've made the decision to apply for Officer Candidate School (or Officer Training School), CliffsTestPrep Officer Candidate Tests offers you a complete guide to test preparation. This book will help you develop skills while adding some knowledge about the types of questions you will

encounter on the Air Force Officer Qualifying Test (AFOQT) U.S. Navy and Marine Corps Aviation Selection Test Battery (ASTB) Armed Services Vocational Academic Battery (ASVAB) This guide covers the careers and specialties in the U.S. Armed Forces; officer qualifications, training, and advancement procedures; and the format of the tests. You'll find basic, successful strategies for all three exams and every subject area. You'll also get practice exams, answers, and explanations in each chapter to improve your skills in Verbal communication Reading comprehension Mathematics Scale reading Data interpretation Mechanical

comprehension With guidance from the CliffsTestPrep series, you'll feel at home in any standardized-test environment! Provides a review of the relevant math topics, test-taking tips, and five practice tests with answers. Over 400 brand new questions Despite the enormous capacity of the human brain, we only use a fraction of our potential brainpower. And while most of us believe there is little we can do to improve the brain we were born with, it has been proven that thought processes can be improved and sharpened by attempting various types of test. This new title from IQ expert Philip Carter consists of tests and

exercises designed to stretch and exercise, as well as entertain, the mind. The concept of IQ is broadening to include different types of intelligence, such as creativity and emotional intelligence; this book reflects that shift. As well as IQ tests it contains tests in the areas of : Verbal intelligence Spatial appreciation Numerical calculation Logical reasoning Memory Creativity Lateral thinking Mental agility Personality Through practice it is possible to improve your IQ rating or performance at psychometric tests, and this book provides an ideal opportunity for doing just that. Practice makes perfect! Prep

Smarter. Now that the College Board's redesigned SAT is in effect, there's nothing like a lot of practice to help build the necessary edge to increase your score. 8 Practice Tests for the SAT 2017 provides more practice tests than any other guide on the market. 8 Practice Tests for the SAT 2017 features: \* 8 realistic full-length practice tests with detailed answer explanations \* 450+ Math Grid-Ins and Multiple-Choice questions \* 400+ Evidence-Based Reading questions \* 350+ Writing and Language questions \* 8 Essay Prompts, complete with model essays and a self-grading guide \* Detailed answer explanations written by test experts to help

you determine your strengths and weaknesses and improve your performance. Prepare for the SAT with confidence! With more than 75 years of experience and more than 95% of our students getting into their top-choice schools, Kaplan knows how to increase your score and get you into your top-choice college! Presents a review of subjects, sample questions and answers, and six full-length practice tests. SAT Subject Test Math 1 Prep, 3rd Edition provides students with step-by-step problem solving strategies, comprehensive review of all essential content, including Algebra I & II, Geometry, and Probability, practice problems

with detailed information for every type of problem on the test, 2 full-length practice tests, and much more. This 3rd edition includes a new quick-look Study Guide, expanded answer explanations, and access to a new Online Student Tools section with additional college admissions help and info Master the SAT II Math Level IC Subject Test and score higher... Our test experts show you the right way to prepare for this important college exam. REA's SAT II Math Level IC test prep covers all Math Level IC topics to appear on the actual exam including in-depth coverage of geometry, trigonometry, algebraic laws, and more. The book features 6

full-length practice SAT II Math Level IC exams. Each practice exam question is fully explained to help you better understand the subject material. Follow up your study with REA's proven test-taking strategies, powerhouse drills and study schedule that get you ready for test day. DETAILS - Comprehensive review of every Math Level IC topic to appear on the SAT II subject test - Flexible study schedule tailored to your needs - Packed with proven test tips, strategies and advice to help you master the test - 6 full-length practice SAT II Math Level IC Subject tests. Each test question is answered in complete detail with easy-to-follow, easy-to-grasp

EXCERPT About Research &  
Education Association  
Research & Education  
Association (REA) is an  
organization of educators,  
scientists, and engineers  
specializing in various  
academic fields. Founded in

1959 with the purpose of  
disseminating the most  
recently developed scientific  
information to groups in  
industry, government, high  
schools, and universities, REA  
has since become a successful  
and highly respected publisher  
of study aids, test preps,  
handbooks, and reference  
works. REA's Test Preparation  
series includes study guides for  
all academic levels in almost all  
disciplines. Research &  
Education Association  
publishes test preps for  
students who have not yet  
completed high school, as well  
as high school students  
preparing to enter college.  
Students from countries  
around the world seeking to

attend college in the United States will find the assistance they need in REA's publications. For college students seeking advanced degrees, REA publishes test preps for many major graduate school admission examinations in a wide variety of disciplines, including engineering, law, and medicine. Students at every level, in every field, with every ambition can find what they are looking for among REA's publications. While most test preparation books present practice tests that bear little resemblance to the actual exams, REA's series presents tests that accurately depict the official exams in both degree of difficulty and types of

questions. REA's practice tests are always based upon the most recently administered exams, and include every type of question that can be expected on the actual exams. REA's publications and educational materials are highly regarded and continually receive an unprecedented amount of praise from professionals, instructors, librarians, parents, and students. Our authors are as diverse as the fields represented in the books we publish. They are well-known in their respective disciplines and serve on the faculties of prestigious high schools, colleges, and universities throughout the United States

and Canada. CHAPTER 1 - ABOUT THE SAT II: MATH LEVEL IC SUBJECT TEST ABOUT THIS BOOK This book provides you with an accurate and complete representation of the SAT II: Math Level IC Subject Test. Inside you will find a complete course review designed to provide you with the information and strategies needed to do well on the exam, as well as six practice tests based on the actual exam. The practice tests contain every type of question that you can expect to appear on the SAT II: Math Level IC Subject Test. Following each test you will find an answer key with detailed explanations designed to help you master the test

material. ABOUT THE TEST  
Who Takes the Test and What  
Is It Used For? Students  
planning to attend college take  
the SAT II: Math Level IC  
Subject Test for one of two  
reasons: (1) Because it is an  
admission requirement of the  
college or university to which  
they are applying; OR (2) To  
demonstrate proficiency in  
Mathematics. The SAT II: Math  
Level IC exam is designed for  
students who have taken more  
than three years of college  
preparatory mathematics (two  
years of algebra and one year  
of geometry). Who Administers  
The Test? The SAT II: Math  
Level IC Subject Test is  
developed by the College Board  
and administered by

Educational Testing Service  
(ETS). The test development  
process involves the assistance  
of educators throughout the  
country, and is designed and  
implemented to ensure that the  
content and difficulty level of  
the test are appropriate. When  
Should the SAT II: Math Level  
IC be Taken? If you are  
applying to a college that  
requires Subject Test scores as  
part of the admissions process,  
you should take the SAT II:  
Math Level IC Subject Test by  
November or January of your  
senior year. If your scores are  
being used only for placement  
purposes, you may be able to  
take the test in the spring. For  
more information, be sure to  
contact the colleges to which

you are applying. When and  
Where is the Test Given? The  
SAT II: Math Level IC Subject  
Test is administered five times  
a year at many locations  
throughout the country; mostly  
high schools. The test is given  
in November, December,  
January, May, and June. To  
receive information on  
upcoming administrations of  
the exam, consult the  
publication Taking the SAT II:  
Subject Tests, which may be  
obtained from your guidance  
counselor or by contacting:  
College Board SAT Program  
P.O. Box 6200 Princeton, NJ  
08541-6200 Phone: (609)  
771-7600 Website:  
<http://www.collegeboard.com> Is  
There a Registration Fee? You

must pay a registration fee to take the SAT II: Math Level IC. Consult the publication Taking the SAT II: Subject Tests for information on the fee structure. Financial assistance may be granted in certain situations. To find out if you qualify and to register for assistance, contact your academic advisor. What Kind of Calculator Can I Use? Your calculator should be, at the minimum, a scientific calculator. It can be programmable or non-programmable. Bear in mind, however, that for perhaps 60 percent of the test items, the calculator will afford you no advantage and, moreover, may actually work against you. No

pocket organizers, hand-held minicomputers, paper tape, or noisy calculators may be used. In addition, no calculator requiring an external power source will be allowed. Finally, no sharing of calculators will be permitted - you must bring your own. Make sure you are thoroughly familiar with the operation of your calculator before the test. Your performance on the test could suffer if you spend too much time searching for the correct function on your calculator.

#### HOW TO USE THIS BOOK

#### What Do I Study First?

Remember that the SAT II: Math Level IC Subject Test is designed to test knowledge that has been acquired

throughout your education. Therefore, the best way to prepare for the exam is to refresh yourself by thoroughly studying our review material and taking the sample tests provided in this book. They will familiarize you with the types of questions, directions, and format of the SAT II: Math Level IC Subject Test. To begin your studies, read over the review and the suggestions for test-taking, take one of the practice tests to determine your area(s) of weakness, and then restudy the review material, focusing on your specific problem areas. The course review includes the information you need to know when taking the exam. Be sure

to take the remaining practice tests to further test yourself and become familiar with the format of the SAT II: Math Level IC Subject Test. When Should I Start Studying? It is never too early to start studying for the SAT II: Math Level IC test. The earlier you begin, the more time you will have to sharpen your skills. Do not procrastinate! Cramming is not an effective way to study, since it does not allow you the time needed to learn the test material. The sooner you learn the format of the exam, the more comfortable you will be when you take the exam.

FORMAT OF THE SAT II:  
MATH LEVEL IC The SAT II:  
Math Level IC is a one-hour

exam consisting of 50 multiple-choice questions. Material Tested The follo Consisted of 10 practice tests. The writer of this book has created practice tests based on his 7 years of test-taking experience. The problems in this book contain necessary and important concepts. The difficulty and words are similar to the actual exam. Among all books on Math Level 2, this can be seen as the closest to actuality today. The solutions are also provided in this book. Taking the Math Level 2 SAT Subject Test(tm)? Score Higher with REA's Test Prep for SAT Subject Test(tm): Math Level 2 with Practice Tests on CD Our bestselling SAT Subject

Test(tm): Math Level 2 test prep includes a comprehensive review of algebra, solid geometry, trigonometry, and more. Each chapter contains examples and practice questions that help you study smarter and boost your test score. The book includes 6 full-length practice tests that replicate the exam's question format. Two of the book's practice exams are offered on our TestWare CD with the most powerful scoring and diagnostic tools available today. Automatic scoring and instant reports help you zero in on the topics and types of questions that give you trouble now, so you'll succeed when it counts. Each practice test

comes with detailed explanations of answers to identify your strengths and weaknesses. We don't just say which answers are right - we also explain why the other answer choices are incorrect - so you'll be prepared. The book also includes study tips, strategies, and confidence-boosting advice you need for test day. This test prep is a must for any high school student taking the Math Level 2 SAT Subject Test(tm)! For students preparing for the ACT exam, a helpful resource includes two full-length practice tests, along with additional practice questions with complete answer explanations and an

informative overview of the material covered on the exam. Original. Excel Test Skills - Selective Schools and Scholarship Writing Tests Years 5-6 is a comprehensive study guide for the English part of the selective schools and scholarship tests (usually undertaken in Year 6). The book contains mostly multiple choice questions, based on a wide variety of text types, so students can prepare fully for the exam. In this book your child will find: an introductory section on the types of questions and resource material used over sixty tests using cloze passages, spelling and grammar application, and vocabulary and editing

exercises tips to help you in test situations a convenient lift-out answers section with explanations that help you understand the skills required for each type of question Note: Excel Test Skills - Selective Schools and Scholarship Writing Tests Years 5-6 is the same book as Excel Test Skills - Selective Schools and Scholarship English Tests Years 5-6. Only the title has changed. The definitive preparation book for the TOPIK exam! Test Guide to the New TOPIK Series This series is designed to help those who are preparing for TOPIK (the Test of Proficiency in Korean), which was recently reorganized in July 2014. The series covers

approaches to different types of test questions for each section and learning strategies and the 3 practice tests included come with clear and detailed explanations as well as translations. Key Features - Study guide for beginning, intermediate, and advanced level students to effectively prepare for the TOPIK - Useful analyses and study strategies for approaching each section by type: Listening, Writing, and Reading - Three practice tests together with complete English explanations TOPIK

TOPIK 1 - Listening, Writing, Reading, and Math - 300 questions  
 TOPIK 2 - Listening, Writing, Reading, and Math - 300 questions

CHAPTER 1 - ABOUT THE SAT II: CHEMISTRY SUBJECT TEST ABOUT THIS BOOK This book provides you with an accurate and complete representation of the SAT II: Chemistry Subject Test. Inside you will find a

complete course review designed to provide you with the information and strategies needed to do well on the exam, as well as six practice tests based on the actual exam. The practice tests contain every type of question that you can expect to appear on the SAT II: Chemistry test. Following each test you will find an answer key with detailed explanations designed to help you master the test material. ABOUT THE TEST Who Takes the Test and What Is It Used For? Students planning to attend college take the SAT II: Chemistry Subject Test for one of two reasons: (1) Because it is an admission requirement of the college or university to which they are

applying; "OR" (2) To demonstrate proficiency in Chemistry. The SAT II: Chemistry exam is designed for students who have taken one year of college preparatory chemistry. Who Administers The Test? The SAT II: Chemistry Subject Test is developed by the College Board and administered by Educational Testing Service (ETS). The test development process involves the assistance of educators throughout the country, and is designed and implemented to ensure that the content and difficulty level of the test are appropriate. When Should the SAT II: Chemistry be Taken? If you are applying to a college that requires

Subject Test scores as part of the admissions process, you should take the SAT II: Chemistry Subject Test toward the end of your junior year or at the beginning of your senior year. If your scores are being used only for placement purposes, you may be able to take the test in the spring of your senior year. For more information, be sure to contact the colleges to which you are applying. When and Where is the Test Given? The SAT II: Chemistry Subject Test is administered five times a year at many locations throughout the country; mostly high schools. To receive information on upcoming administrations of the exam, consult the

publication Taking the SAT II: Subject Tests, which may be obtained from your guidance counselor or by contacting: College Board SAT Program P.O. Box 6200 Princeton, NJ 08541-6200 Phone: (609) 771-7600 Website: <http://www.collegeboard.com> Is There a Registration Fee? Yes. There is a registration fee to take the SAT II: Chemistry. Consult the publication Taking the SAT II: Subject Tests for information on the fee structure. Financial assistance may be granted in certain situations. To find out if you qualify and to register for assistance, contact your academic advisor. HOW TO USE THIS BOOK What Do I

Study First? Remember that the SAT II: Chemistry Subject Test is designed to test knowledge that has been acquired throughout your education. Therefore, the best way to prepare for the exam is to refresh yourself by thoroughly studying our review material and taking the sample tests provided in this book. They will familiarize you with the types of questions, directions, and format of the SAT II: Chemistry Subject Test. To begin your studies, read over the review and the suggestions for test-taking, take one of the practice tests to determine your area(s) of weakness, and then restudy the review material, focusing on

your specific problem areas. The course review includes the information you need to know when taking the exam. Be sure to take the remaining practice tests to further test yourself and become familiar with the format of the SAT II: Chemistry Subject Test. When Should I Start Studying? It is never too early to start studying for the SAT II: Chemistry test. The earlier you begin, the more time you will have to sharpen your skills. Do not procrastinate! Cramming is not an effective way to study, since it does not allow you the time needed to learn the test material. The sooner you learn the format of the exam, the more comfortable you will be

when you take the exam. **FORMAT OF THE SAT II: CHEMISTRY** The SAT II: Chemistry is a one-hour exam consisting of 85 multiple-choice questions. The first part of the exam consists of classification questions. This question type presents a list of statements or questions that you must match up with a group of choices lettered (A) through (E). Each choice may be used once, more than once, or not at all. The exam then shifts to relationship analysis questions which you will answer in a specially numbered section of your answer sheet. You will have to determine if each of two statements is true or false and if the second statement is a

correct explanation of the first. The last section is composed strictly of multiple-choice questions with choices lettered (A) through (E). Material Tested The following chart summarizes the distribution of topics covered on the SAT II: Chemistry Subject Test. Topic / Percentage / Number of Questions Atomic & Molecular Structure / 25% / 21 questions States of Matter / 15% / 13 questions Reaction Types / 14% / 12 questions Stoichiometry / 12% / 10 questions Equilibrium & Reaction Times / 7% / 6 questions Thermodynamics / 6% / 5 questions Descriptive Chemistry / 13% / 11 questions Laboratory / 8% / 7 questions The questions on the SAT II:

Chemistry are also grouped into three larger categories according to how they test your understanding of the subject material. Category / Definition / Approximate Percentage of Test 1) Factual Recall / Demonstrating a knowledge and understanding of important concepts and specific information / 20% 2) Application / Taking a specific principle and applying it to a practical situation / 45% 3) Integration / Inferring information and drawing conclusions from particular relationships / 35% STUDYING FOR THE SAT II: CHEMISTRY It is very important to choose the time and place for studying that works best for you. Some

students may set aside a certain number of hours every morning to study, while others may choose to study at night before going to sleep. Other students may study during the day, while waiting on line, or even while eating lunch. Only you can determine when and where your study time will be most effective. Be consistent and use your time wisely. Work out a study routine and stick to it! When you take the practice tests, try to make your testing conditions as much like the actual test as possible. Turn your television and radio off, and sit down at a quiet desk or table free from distraction. Make sure to clock yourself with a timer. As you complete

each practice test, score it and thoroughly review the explanations to the questions you answered incorrectly; however, do not review too much at any one time. Concentrate on one problem area at a time by reviewing the questions and explanations, and by studying our review until you are confident you completely understand the material. Keep track of your scores. By doing so, you will be able to gauge your progress and discover general weaknesses in particular sections. You should carefully study the reviews that cover your areas of difficulty, as this will build your skills in those areas. TEST TAKING TIPS

Although you may be unfamiliar with standardized tests such as the SAT II: Chemistry Subject Test, there are many ways to acquaint yourself with this type of examination and help alleviate your test-taking anxieties. Become comfortable with the format of the exam. When you are practicing to take the SAT II: Chemistry Subject Test, simulate the conditions under which you will be taking the actual test. Stay calm and pace yourself. After simulating the test only a couple of times, you will boost your chances of doing well, and you will be able to sit down for the actual exam with much more confidence. Know the directions and format

for each section of the test. Familiarizing yourself with the directions and format of the exam will not only save you time, but will also ensure that you are familiar enough with the SAT II: Chemistry Subject Test to avoid nervousness (and the mistakes caused by being nervous). Do your scratchwork in the margins of the test booklet. You will not be given scrap paper during the exam, and you may not perform scratchwork on your answer sheet. Space is provided in your test booklet to do any necessary work or draw diagrams. If you are unsure of an answer, guess. However, if you do guess - guess wisely. Use the process of elimination

by going through each answer to a question and ruling out as many of the answer choices as possible. By eliminating three answer choices, you give yourself a fifty-fifty chance of answering correctly since there will only be two choices left from which to make your guess. Mark your answers in the appropriate spaces on the answer sheet. Fill in the oval that corresponds to your answer darkly, completely, and neatly. You can change your answer, but remember to completely erase your old answer. Any stray lines or unnecessary marks may cause the machine to score your answer incorrectly. When you have finished working on a

section, you may want to go back and check to make sure your answers correspond to the correct questions. Marking one answer in the wrong space will throw off the rest of your test, whether it is graded by machine or by hand. You don't have to answer every question. You are not penalized if you do not answer every question. The only penalty results from answering a question incorrectly. Try to use the guessing strategy, but if you are truly stumped by a question, remember that you do not have to answer it. Work quickly and steadily. You have a limited amount of time to work on each section, so you need to work quickly and

steadily. Avoid focusing on one problem for too long. Before the Test Make sure you know where your test center is well in advance of your test day so you do not get lost on the day of the test. On the night before the test, gather together the materials you will need the next day: - Your admission ticket - Two forms of identification (e.g., driver's license, student identification card, or current alien registration card) - Two No. 2 pencils with erasers - Directions to the test center - A watch (if you wish) but not one that makes noise, as it may disturb other test-takers On the day of the test, you should wake up early (after a good

night's rest) and have breakfast. Dress comfortably, so that you are not distracted by being too hot or too cold while taking the test. Also, plan to arrive at the test center early. This will allow you to collect your thoughts and relax before the test, and will also spare you the stress of being late. If you arrive after the test begins, you will not be admitted to the test center and you will not receive a refund. During the Test When you arrive at the test center, try to find a seat where you feel most comfortable. Follow all the rules and instructions given by the test supervisor. If you do not, you risk being dismissed from the test and having your

scores canceled. Once all the test materials are passed out, the test instructor will give you directions for filling out your answer sheet. Fill this sheet out carefully since this information will appear on your score report. After the Test When you have completed the SAT II: Chemistry Subject Test, you may hand in your test materials and leave. Then, go home and relax! When Will I Receive My Score Report and What Will It Look Like? You should receive your score report about five weeks after you take the test. This report will include your scores, percentile ranks, and interpretive information. Master the SAT II Physics

Subject Test and score higher... Our test experts show you the right way to prepare for this important college exam. REA's SAT II Physics Subject test prep covers all Physics topics to appear on the actual exam including in-depth coverage of vectors, kinetic theory, mechanics, magnetism, and more. The book features 5 full-length practice SAT II Physics exams. Each practice exam question is fully explained to help you better understand the subject material. Use the book's glossary for speedy look-ups and smarter searches. Follow up your study with REA's proven test-taking strategies, powerhouse drills and study schedule that get you

ready for test day. DETAILS - Comprehensive review of every physics topic to appear on the SAT II subject test - Flexible study schedule tailored to your needs - Packed with proven test tips, strategies and advice to help you master the test - 5 full-length practice SAT II Physics Subject exams. Each exam question is answered in complete detail with easy-to-follow, easy-to-grasp explanations. - The book's glossary allows for quicker, smarter searches of the information you need most

Detailed Explanations of Answers EXCERPT About Research & Education Association Research & Education Association (REA) is an organization of educators, scientists, and engineers specializing in various academic fields. Founded in 1959 with the purpose of disseminating the most recently developed scientific information to groups in industry, government, high schools, and universities, REA has since become a successful and highly respected publisher of study aids, test preps, handbooks, and reference works. REA's Test Preparation series includes study guides for all academic levels in almost all

disciplines. Research & Education Association publishes test preps for students who have not yet completed high school, as well as high school students preparing to enter college. Students from countries around the world seeking to attend college in the United States will find the assistance they need in REA's publications. For college students seeking advanced degrees, REA publishes test preps for many major graduate school admission examinations in a wide variety of disciplines, including engineering, law, and medicine. Students at every level, in every field, with every ambition can find what they are

looking for among REA's publications. While most test preparation books present practice tests that bear little resemblance to the actual exams, REA's series presents tests that accurately depict the official exams in both degree of difficulty and types of questions. REA's practice tests are always based upon the most recently administered exams, and include every type of question that can be expected on the actual exams. REA's publications and educational materials are highly regarded and continually receive an unprecedented amount of praise from professionals, instructors, librarians, parents,

and students. Our authors are as diverse as the fields represented in the books we publish. They are well-known in their respective disciplines and serve on the faculties of prestigious high schools, colleges, and universities throughout the United States and Canada. ABOUT THE TEST The SAT II: Physics Subject Test is developed by the College Board and administered by Educational Testing Service (ETS). The test development process involves the assistance of educators throughout the United States, and is designed and implemented to ensure that the content and difficulty level of the test are appropriate.

Although some colleges require SAT II: Subject Tests as part of their admissions process, most colleges use the scores from the SAT II: Subject Test for student placement purposes. Test scores are used as a means of determining a student's aptitude for a particular course of study. The SAT II: Subject Test in Physics is one hour in length and consists of 75 multiple-choice questions. These questions are designed to measure your knowledge of physics and your ability to apply that knowledge. The general difficulty level of the test is designed for students who have taken a one-year introductory course in high school physics. To assist

you in preparing for the exam, the College Board has provided the following list of exam topic percentages: mechanics (34-38% of exam); electricity and magnetism (22-26%); waves (15-19%); heat, kinetic theory, and thermodynamics (8-12%); modern physics (8-12%); miscellaneous (measurement, math skills, laboratory skills, history of physics, 2-4%). Concept application percentages are also provided: recall (20-33%); single-concept problem (40-53%); multiple-concept problem (20-33%). Primarily, the test assesses your knowledge and understanding of the most significant concepts in physics and your ability to

apply that knowledge. Laboratory experience will contribute to your understanding of some of the questions on the test. Since the mathematical calculations are limited to simple algebraic, trigonometric, and graphical relationships, students are not permitted to use electronic calculators or slide rules during the test. For the majority of the test, metric units are used. For information on upcoming administrations of the exam, consult the publication Taking the SAT II: Subject Tests, which can be obtained from your guidance counselor or by contacting: College Board SAT II Program P.O. Box 6200 Princeton, NJ

[www.collegeboard.org](http://www.collegeboard.org) ABOUT  
THE REVIEW The topical  
review in this book is designed  
to refresh your knowledge and  
further your understanding of  
the test material. It includes  
problem-solving techniques you  
can use to enhance your scores  
on the exam. Also included in  
the review are extensive  
discussions and examples to  
sharpen your skills in physics.  
Topics covered in the review  
include: - Vectors and Scalars -  
Mechanics - Electricity and  
Magnetism - Waves and Optics  
- Physical Optics - Heat, Kinetic  
Theory, and Thermodynamics -  
Modern Physics SCORING THE  
TEST When you take the actual

Physics Test, your test will be  
scored electronically by a  
scanning machine. For each  
correct answer, you will  
receive one point. For each  
incorrect answer, you will lose  
one-fourth of a point. This  
method compensates for  
random guessing. Unanswered  
questions will not be counted.  
Nothing builds confidence like  
practice. We have closely  
modeled our examples,  
practices, and 6 full-length  
tests on the College Board's  
actual Redesigned SAT  
questions. Completing the  
practices and tests in this book  
will help you approach your  
SAT test date with a calm sense  
of knowing exactly what to  
expect. Master the GRE:

Practice Test 2, part of  
Peterson's Master the GRE, is a  
full-length practice test  
designed to help you figure out  
which areas of study you need  
to pay special attention to  
when preparing for taking the  
revised GRE. This practice test  
consists of five sections, each  
with its own time allotment and  
specific instructions. You will  
encounter each type of question  
that is also on the official test.  
Finally, there are sample  
essays and detailed answer  
explanations that will reinforce  
your knowledge and help you  
learn from your mistakes. A  
hidden history of the South  
emerges when a worldly  
teacher leads Threestep, GA, to  
reinvent itself, setting in

motion events that lead to triumph and tragedy for the black teenager who happens to be the smartest person in Piedmont County, Georgia, in 1938-39. As an epigraph from *The Souls of Black Folk* by W. E. B. Du Bois reminds us at the start of this novel, "Throughout history, the powers of single black men flash here and there like falling stars, and die sometimes before the world has rightly gauged their brightness." Protagonist Theo Boykin is a genius, an artist, an inventor, a Leonardo DaVinci-type, whose talents are sought after by local blacks and whites alike, but even this is not enough to save him. He falls victim to "the tragedy of

ignorance and the damage caused by fear," in the words of poet Rita Dove—the first African American to serve as U.S. Poet Laureate and a member of the jury that conferred on The Cailiffs of Baghdad, Georgia the 2011 Anisfield-Wolf Award for books that "make a significant contribution to our understanding of racism and our appreciation for the diversity of human cultures." You won't forget Theo Boykin, nor will you forget his friends the Cailiffs, especially Gladys, who tells this story with love and bewilderment, and the teacher, Miss Spivey, who changes all their lives. Review every skill and question type

needed for SAT success - now with eight total practice tests. The 2018 edition of *The Official SAT Study Guide* doubles the number of official SAT® practice tests to eight - all of them created by the test maker. As part of the College Board's commitment to transparency, all practice tests are available on the College Board's website, but *The Official SAT Study Guide* is the only place to find them in print along with over 250 pages of additional instruction, guidance, and test information. With updated guidance and practice problems that reflect the most recent information, this new edition takes the best-selling SAT guide and makes it

even more relevant and useful. Be ready for the SAT with strategies and up-to-date information straight from the exam writers. The Official SAT Study Guide will help students get ready for the SAT with:

- 8 official SAT practice tests, written in the exact same process and by the same team of authors as the actual exam
- detailed descriptions of the math and evidenced based reading and writing sections
- targeted practice questions for each SAT question type
- guidance on the new optional essay, including practice essay questions with sample responses
- seamless integration with Official SAT Practice on Khan Academy

The

rapidly growing field of behavioral ethics shows that dishonest acts are highly prevalent in all walks of life, from corruption among politicians through flagrant cases of doping in sports, to everyday slips and misdemeanors of ordinary people who nevertheless perceive themselves as highly moral. When considered cumulatively, these seemingly innocuous and ordinary unethical behaviors cause considerable societal damage and add up to billions of dollars annually. Research in behavioral ethics has made tremendous advances in characterizing many contextual and social factors that promote

or hinder dishonesty. These findings have prompted the development of interventions to curb dishonesty and to help individuals become more committed to ethical standards. The current e-book includes studies that test and advance current theory and deepen our understanding of the cognitive and physiological processes underlying dishonest behavior, discuss possible implications of findings in behavioral ethics research for real life situations, document dishonest behavior in the field and/or directly examines interventions to reduce it. Helps learners acquire the skills they need to succeed on the Test of English as a Foreign Language.

Prepare for the SAT with confidence! With more than 75 years of experience and more than 95% of our students getting into their top-choice schools, Kaplan knows how to increase your score and get you into your top-choice college! Prep Smarter. Not Harder. Kaplan's SAT Math Prep provides everything you need to master the challenging Math on the SAT! It reviews every concept from basic Algebra to Advanced Trig and will help you focus your studies on the most important math topics to increase your score! This focused guide includes in-depth coverage of every math concept tested on the SAT as well as effective score-raising

methods and strategies for building speed and accuracy from Kaplan's top math experts. Kaplan's SAT Math Prep contains many essential and unique features to help improve test scores, including:

- \* 16 comprehensive Math Practice Sets with detailed explanations
- \* More than 250 practice questions with expert explanations
- \* Methods and Strategies to improve your Math score
- \* Techniques for Multiple Choice, Grid-In, and Extended Thinking questions
- \* Review of important Math Concepts Kaplan provides you with everything you need to improve your Math score—guaranteed. Kaplan's Math Workbook for the SAT is

the must-have preparation tool for every student looking to score higher and get into their top-choice college! Kaplan's 8 Practice Tests for the SAT provides printed practice exams and expert explanations to help you face the SAT with confidence. More than 1,200 realistic practice questions help you get comfortable with the exam format so you can avoid surprises on Test Day. We are so certain that 8 Practice Tests for the SAT offers the practice you need that we guarantee it: After studying with our book, you'll score higher on the SAT—or you'll get your money back. The Most Practice Eight realistic full-length practice tests More

than 1,200 practice questions help you increase speed and accuracy with all the different SAT question types More than 450 Math Grid-Ins and Multiple-Choice questions More than 400 Evidence-Based Reading questions More than 350 Writing and Language questions Eight Essay Prompts, complete with model essays and a self-grading guide Detailed answer explanations written by our experts help you determine your strengths and weaknesses and improve your performance. publications. For college  
students seeking advanced  
degrees, REA publishes test  
preps for many major graduate  
school admission examinations  
in a wide variety of disciplines,

including engineering, law, and medicine. Students at every level, in every field, with every ambition can find what they are looking for among REA's publications. While most test preparation books present practice tests that bear little resemblance to the actual exams, REA's series presents tests that accurately depict the official exams in both degree of difficulty and types of questions. REA's practice tests are always based upon the most recently administered exams, and include every type of question that can be expected on the actual exams. REA's publications and educational materials are highly regarded and

continually receive an unprecedented amount of praise from professionals, instructors, librarians, parents, and students. Our authors are as diverse as the fields represented in the books we publish. They are well-known in their respective disciplines and serve on the faculties of prestigious high schools, colleges, and universities throughout the United States and Canada. ABOUT THE BOOK This book provides you with an accurate and complete representation of the SAT II: Subject Test in Literature. It is composed of six complete practice tests based on the most recently administered Literature tests. Each test is

modeled after the actual exam and takes one hour to complete. The tests cover every type of question that can be expected to appear on the exam. Following each test is an answer key complete with detailed explanations designed to clarify the material for the student. By studying the review sections, completing all six tests, and studying the answer explanations, students can discover their strengths and weaknesses and prepare themselves for the actual exam in Literature. ABOUT THE TEST The SAT II: Subject Test in Literature is designed to test the student's ability to read and understand literature in English. Each exam consists of

approximately sixty multiple-choice questions based on six to eight short reading comprehension passages. The passages are drawn from: - English literature (40-50%) - American literature (40-50%) - Other Literature written in English (0-10%) Each test covers material from: - Renaissance and 17th century (30%) - 18th and 19th centuries (30%) - 20th century (40%) Each test contains: - poetry selections (45-50%) - prose selections (45-50%) - drama and other selections (0-10%) The Literature test does not require any specific knowledge of literature in English. The student is expected to possess a working knowledge of basic

literary terms and to use analytical skills derived from high school literature studies to answer the test questions. The number of questions in a set is related to the length and complexity of the poem or passage. Generally, each group of questions based on a passage or poem consists of several questions about meaning, including effect and argument or theme, and several questions about form, including structure, generic properties, and method of organization. Where appropriate, the questions may also consider the narrative voice and the tone. The questions have five answer choices, and they can be

categorized into three types: the regular multiple-choice question, the NOT/EXCEPT question, and the Roman numeral question. ABOUT THE REVIEW SECTION The reviews in this book are designed to further students' understanding of the test material. Each review includes techniques students can use to enhance their reading and analyzing abilities to earn higher scores on the exam. The reviews also discuss extensively the variety of literary genres, terms, and devices which the student will be required to know for the exam. The three review sections in this book correspond with the three

topics covered on the SAT II exam. **READING PROSE** - This review covers the various forms of prose the student may encounter on the SAT II exam, including novels, short stories, essays, and satire. Also included is a section covering general rules and ideas about fiction and non-fiction, as well as tips on how to analyze prose passages for the test. **READING POETRY** - Every type of poetry the student can encounter on the SAT II exam is described in detail with examples. Genre, structure, convention, and poetic form are all given ample discussion. Definitions and examples appear in this section for such terms as onomatopoeia,

masculine/feminine rhyme, paradox, allusion, and many others, as well as study hints to help the student analyze poetry for the test. **READING DRAMA** - This review gives extensive samples of the types of questions which could be asked about drama on the SAT II exam. The various types of drama, including conflict, character, and types of plays are discussed at length with examples. Classic works such as *Antigone*, *The Glass Menagerie*, and *Death of a Salesman* are used to illustrate the topics covered. **ABOUT THE INDEX OF LITERARY WORKS** In the back of this book you will find an extensive index which lists all of the

literary works which are mentioned in this book. In addition to helping you find where specific works are located in the test, this index also serves as a suggested reading list of many of the literary classics you should read to help familiarize yourself with all the terms and genres you will need to know. Reading the works is excellent preparation for taking the SAT II: Literature Test. Score higher on the GED with this book + online practice If you're preparing for this all-important exam, *GED Test For Dummies with Online Practice* gets you up and running on everything you can expect on test day, from overviews of the test

sections to invaluable reviews and test-taking strategies for all the subjects covered—and everything in between. In the book, you'll find hands-on, digestible information for navigating your way through the Language Arts/Reading and Writing Tests, Social Studies Test, Mathematics Test, and Science Test. Whether you're looking to perfect your grammar and punctuation skills, get familiar with the types of fiction and nonfiction passages you'll encounter, take the fear out of math and science, put the social in your studies, or answer multiple-choice questions with confidence, this unintimidating guide makes it easy to score

higher and pass this vital exam. The accompanying online experience helps you further your skills by providing practice questions with answers and full explanations. This new edition has been fully updated to reflect the latest version of the GED. Includes 2 full-length practice tests with detailed answer explanations and walkthroughs. Offers clear overviews of all the topics covered on the GED. Includes special considerations if English is your second language. It's all at your fingertips! Prepare for the test, improve your chances of success, and increase your earning power and job prospects with the help of GED

About Research & Education  
Association Research &  
Education Association (REA) is  
an organization of educators,  
scientists, and engineers  
specializing in various  
academic fields. Founded in  
1959 with the purpose of  
disseminating the most  
recently developed scientific  
information to groups in  
industry, government, high  
schools, and universities, REA  
has since become a successful  
and highly respected publisher  
of study aids, test preps,  
handbooks, and reference  
works. REA's Test Preparation  
series includes study guides for  
all academic levels in almost all  
disciplines. Research &

Education Association  
publishes test preps for  
students who have not yet  
completed high school, as well  
as high school students  
preparing to enter college.  
Students from countries  
around the world seeking to  
attend college in the United  
States will find the assistance  
they need in REA's  
publications. For college  
students seeking advanced  
degrees, REA publishes test  
preps for many major graduate  
school admission examinations  
in a wide variety of disciplines,  
including engineering, law, and  
medicine. Students at every  
level, in every field, with every  
ambition can find what they are  
looking for among REA's

publications. While most test preparation books present practice tests that bear little resemblance to the actual exams, REA's series presents tests that accurately depict the official exams in both degree of difficulty and types of questions. REA's practice tests are always based upon the most recently administered exams, and include every type of question that can be expected on the actual exams. REA's publications and educational materials are highly regarded and continually receive an unprecedented amount of praise from professionals, instructors, librarians, parents, and students. Our authors are

as diverse as the fields represented in the books we publish. They are well-known in their respective disciplines and serve on the faculties of prestigious high schools, colleges, and universities throughout the United States and Canada. ABOUT THE BOOK This book provides you with an accurate and complete representation of the SAT II: English Language Proficiency Test (ELPT). The four sample tests are based on the most recently administered ELPT examination. Our reviews are designed to prepare you for the types of questions you can expect to see when taking the actual test. You will be given one hour to complete each

sample test. The sample tests contain every type of question that you may expect to appear on the actual exam. Following each test you will find an answer key and detailed explanations which are designed to help you understand the test material. Copies of this book include audio cassettes, containing the listening comprehension sections from the four sample tests. These tapes will help you improve your listening skills and prepare you for the listening comprehension portions of the ELPT. ABOUT THE TEST Who Takes the Test and What is it Used for? Any American secondary school student with English as a

second language or limited English proficiency who has had at least two years of high school study in the United States can take this exam. The English Language Proficiency Test is used to measure your reading and listening skills in English. Unlike English tests that focus on grammar and language structure, the ELPT uses everyday-life examples to test a student's ability to function in an English-speaking environment. The test is used by colleges and universities as an indicator of a student's ability to use English in life situations. It can also be used as a measure for academic placement. Students entering the workforce can use the

ELPT to demonstrate their ability to understand written and spoken English. Who Administers the Test? The ELPT is developed and administered by the Educational Testing Service (ETS). The questions for the ELPT are developed by language specialists who follow standardized procedures which ensure a high quality of work. All questions are reviewed by many people, revised as necessary, and then are administered in trial test situations, before being compiled into a test format. According to ETS, the tests are then reviewed, using specific procedures, to ensure that they are free from cultural bias and

that they will properly measure student's knowledge. When Should the ELPT Be Taken? The ELPT should be taken by American high school students who have completed two to four years of training in an English as a Second Language program or an English enrichment course. The examination should be taken prior to graduation from high school. When and Where is the Test Given? The ELPT is administered twice a year, once at SAT test centers and once at participating high schools. The first test administration date is in November at SAT test centers. The second administration date is in April at participating high schools.

To receive information on upcoming administrations of the exam, consult the publication *Taking the SAT II: Subject Tests*, which can be obtained from your guidance counselor or by contacting: College Board SAT Program P.O. Box 6200 Princeton, NJ 08541-6200 Phone: (609) 771-7600 Website: <http://www.collegeboard.com> You must pay a registration fee to take the SAT II: English Language Proficiency Subject Test. Consult the publication *Taking the SAT II: Subject Tests* for information on the fee structure. Financial assistance may be granted in certain situations. To find out if you qualify and to register for

assistance, contact your academic advisor. **HOW TO USE THIS BOOK** What Do I Study First? Before you do anything else, you should take the first practice test which appears after the two review sections. After you complete this test, you will be able to determine what areas are causing you difficulty and should be studied first, so that you can strengthen your weaknesses. After you have thoroughly studied the areas with which you are having problems, you may want to retake Test 1 to gauge your improvement in these areas. When you feel comfortable with the areas which have previously caused you

difficulty, you should then begin reviewing and preparing for each section of the ELPT. When should I start studying? It is never too early to start studying for the ELPT, the earlier the better. You should start studying as soon as possible so that you will be able to learn more. Make sure you take the first practice test before you start studying can help you strengthen your problem areas before you run out of time to study. Last minute studying and cramming is not an efficient way to study and does not allow you to learn the material which you will need to know for the exam. How else can I improve my English speaking and writing

skills while preparing for the test? In addition to using Test 1 to determine your problem areas, make sure you study all of the reviews. The reviews will cover the information you will need to know for the exam. You should also test yourself by completing as many of the practice tests as you possibly can. Besides using this book, there is one way you can familiarize yourself with written English - READ! Reading will help you improve your writing skills because you will have become acquainted with correct structure and phrasing in written English. You should read newspaper and magazine articles and advertisements. Read the

college admissions material and college catalogs of the schools to which you are applying. You should also read books of interest to you. Just make sure you read, read, READ! There are many ways you can familiarize yourself with spoken English. If you are in your car, turn on the radio. Listening to radio newscasts and weather reports can also help prepare you for the test. You should watch television documentaries, go to lectures, and even go to the movies. Doing all of these things will help your perception of spoken English and will help prepare you for the listening comprehension sections, and may even aid in building your

vocabulary. **FORMAT FOR THE ELPT Section / Time Allotted / Questions**  
Part A: Listening Comprehension - Rejoinders / 10 minutes / 14 questions  
Part B: Reading Comprehension - Realia / 30 minutes / 42 questions  
Part C: Listening Comprehension - Narratives and Dialogues / 20 minutes / 28 questions  
The ELPT will take about one hour to complete, plus about 20 minutes of administration time. All of the questions in the ELPT will be multiple choice. Each question is rated as either superior, advanced, or intermediate. These ratings distinguish the difficulty level of a question and aids in scoring the student's proficiency rating.

Each question will have four answer choices from which to choose. You should be aware of the amount of time you have to complete each section of the test, so that you do not waste too much time working on difficult questions, while neglecting to answer easy questions. Speed is very important. Using the practice tests will help you prepare for this. Taking as many of the practice tests as possible, and making sure to time yourself, will help you become accustomed to the time constraints. Repeating this process will help you develop speed in answering the questions because you will become more familiar with the

format. First, make sure you know how much time you have to complete each section. Second, read the directions to each section so that you understand it completely. Third, you should become familiar with the three parts of the ELPT. These sections are: "PART A: Listening Comprehension - Rejoinders" In this section, which makes up 17 percent of the test, your ability to respond to and understand spoken English will be tested. A tape recording of conversations will be played for you. You will then have seven seconds to choose the answer that would best continue the conversation. The questions, the conversations, and the

answer choices will not appear in your test booklet. When you take the sample tests, take Part A for Tests 1-4 by using the provided tapes. Students will be given 10 minutes to complete the 14 questions in Part A. To study for this section, turn to the Listening Comprehension Review - Rejoinders. "PART B: Reading Comprehension - Realia" This section, which makes up 50 percent of the test, will test your ability to understand written English through published material such as signs, advertisements, directions, menus, labels, tickets, and street signs. The items in this section will include a piece of "realia" and

test the students' ability to understand its content. Students will be given 30 minutes to complete the 42 questions in Part B. To study for this section, turn to the Reading Comprehension Review - Realia. "PART C: Listening Comprehension - Narratives and Dialogues" This part, which makes up 33 percent of the test, will have several spoken announcements or conversations which the students listen to and then answer questions about the content or main points of what was said on the tape. The students will be given 12 seconds to complete each question. Part C has 28 questions that must be

completed in 20 minutes. To study for this section, turn to the Listening Comprehension Review - Narratives and Dialogues. ABOUT THE REVIEW SECTIONS Our reviews are written to help you understand the concepts behind the questions which will be asked in the ELPT. They will help you to prepare for the actual test. They contain study tips on how to choose the best answer quickly and accurately. Also, there will be many drills which will help you in studying for the ELPT. You should use the reviews in conjunction with the diagnostic test and its cross-referencing table, which can show you what areas you need to study the most. The

three review sections in this book correspond to the test sections of the official ELPT. Listening Comprehension Reviews Both Listening Comprehension parts of the ELPT (Rejoinders and Narratives and Dialogues) will be discussed in great detail in this review. It will illustrate for you the different forms of questions that may appear in those parts of the ELPT. Through using this review, you will learn how to listen for key words and phrases. A number of study tips have been included to help you concentrate more effectively and choose the correct answer quickly. Reading Comprehension Review This

review will describe for you the "realia" that will be presented in Part B of the ELPT. The review will help you learn how to understand the content of various signs, menus, directions, etc. STUDYING FOR THE ELPT At first glance, the ELPT may appear to be primarily a test of written English. However, the ELPT not only tests your written English ability, but it also tests your ability to understand spoken English. By using the tests contained in this book, you will be able to develop your abilities in both of these areas. It is important for you to discover the time and place that works best for you. Some students may set aside a

certain number of hours every morning to study, while others may choose to study at night before going to sleep. Other students may study during the day, while waiting on line, or they may even listen to English tapes while doing chores. Only you can determine when and where your study time will be most effective. The most important factor to keep in mind is consistency. Work out a study routine and stick to it! You may want to follow a schedule similar to the one presented at the beginning of this book. Depending on how long before the exam you begin to study, you may want to add to this schedule or condense it. Be sure to take the first

practice test before you begin studying the reviews in this book. By taking the practice test before studying you will determine your strengths and weaknesses, enabling your studying to be more concise and effective. When you take the practice tests, you should sit down at a quiet table and time yourself. Try to make the conditions as much like a test center as possible by removing all distractions. Afterwards, you should check each answer and thoroughly review the reasoning behind each question that you missed. You should not review too much at one time. Concentrate on each of your problem areas individually, until you feel comfortable with

your ability in each of those areas. Write in the margins and spaces of this book when practicing, and write in the test booklet when taking the test. You should use this space to make notes to yourself, especially notes to go back to a certain question. You should also cross out answers that you know are incorrect. Although you can write in your test booklet, make sure you do not write anything on your answer sheet, except to mark the answer you chose. Keep track of your scores! You will be able to gauge your progress and discover general weaknesses in particular sections. You may find it very helpful to work with someone else. If possible, you

should find a friend or classmate who is also taking the test. You may even find it convenient to ask a native speaker of English to help you practice. ELPT TEST-TAKING TIPS You may be unfamiliar with standardized tests such as the ELPT. There are many ways to acquaint yourself with this type of examination. Listed below are points to help you become familiar with the ELPT, some of which may be applied to other standardized tests. How to Beat the Clock Become comfortable with the format of the exam. When you are practicing to take the ELPT, pretend that you are under the same time constraints as you would during the test. Stay

calm, pace yourself, and pay attention to the clock. Practice these techniques thoroughly. After simulating the test only a few times, you will be better able to sit down for the actual ELPT much more confidently and boost your chances of doing well. Become familiar with the directions. Make sure you understand them before you take the exam, so that you do not waste valuable time on the exam. Know the format for each section before you actually take the test. This will not only save you valuable time, but also ensure that you are familiar enough with the exam to avoid nervousness (and the mistakes that come from being nervous). Work on

the easier questions first. Mark the very difficult questions (in the test booklet, not on the answer sheet) and continue. Remember, only correct answers will be counted in your score. You will not be penalized for guessing, so when you have either answered or marked all of the questions, go back and answer any of the difficult questions that you may have skipped. If you find yourself working too long on one question, mark it and go on. Be sure that you are marking your answer in the space that corresponds to the number of the question in the test booklet. Know how much time is allowed for each section. Remember that you are racing

against the clock. This is why you should not spend too much time on a single question. Budget your time. Every question has the same value, whether it is difficult or easy, so it is important to move on if a question becomes too time consuming. Pace yourself and make sure to check your time periodically to make sure that you are moving at a good rate. Should I Guess? If you don't know the answer to a question, guess! Cross out and eliminate answers (in the test booklet) that you know are wrong, and then pick the best answer from the ones that are left. Even if you can't eliminate any answers, guess anyway! Remember that there is no

penalty for guessing, and only correct answers are counted. If you guess, you may increase your number of correct answers. The Day of the Test On the day of the test, you should wake up early (hopefully after a decent night's rest) and have a good breakfast. Make sure you dress comfortably, so that you are not distracted by being too hot or too cold while taking the exam. You should plan to arrive at the test site early. By being early, you will spare yourself the anxiety of being late for the test. It will also allow you to collect your thoughts and to relax before taking the exam. Before you leave your home, make sure you have all the necessary

information to be admitted into the test site. You should consult your ELPT handbook for exact requirements. Make sure you bring at least two sharpened #2 (or HB) pencils, with erasers, to the exam. The pencils should be medium-soft with black lead. You may want to wear a watch to the test site; however, only ordinary watches will be permitted. Watches with alarms, calculator functions, flashing lights, beeping sounds, etc., will not be allowed in the test site. No food will be allowed into the examination room. During the Test When you arrive at the test center, you will be assigned a seat in the examination room by a member of the test site staff.

You will not receive a break during the examination. If you need to use the rest room, or if you become ill, you may leave the examination room, but you must first give the test supervisor your identification documents before you leave the room. If you do leave the room, you will not be allowed to make up any lost time. Once you enter the test site, follow all the instructions given by the test supervisor. If you do not, you risk being dismissed from the examination or having your ELPT scores voided (they will not be scored). Your answer sheet will not be scored and your test payment will not be refunded if you try to remove a test booklet, an answer sheet,

or any tape from the test center. All the test materials are the property of Educational Testing Service and legal action may be taken against you if you try to take home test materials or copy them in any way. There are also regulations that, if not followed, will void your answer sheet and then your test payment will not be refunded for any reason. Check your ELPT handbook for a list of these regulations. When all of the test materials have been passed out, the test instructor will give you directions for filling out one side of your answer sheet. You must fill out this sheet carefully since this information will be printed on your score report. Fill out your

name exactly as it appears on your identification documents, unless otherwise instructed. Remember to write in the margins and spaces of your test booklet, leaving notes for yourself to return to a question, or just to cross out incorrect answers. Make sure you do not write on your answer sheet, except to fill in the oval corresponding to the answer you chose. You will be marking your answers on the side two of your answer sheet. Each numbered row will contain four

ovals corresponding to each answer choice for that question. Fill in the oval which corresponds to your answer darkly, completely, and in a neat manner. You can change your answer, but remember to completely erase your old answer. Only one answer should be marked. This is very important, as your answer sheet will be scored by machine and stray lines or unnecessary marks may cause the machine to score your answers incorrectly. Only work

on the section of the test which the test instructor has instructed you to work on. You should begin only when instructed to do so, and stop, immediately, when instructed to end. Do not turn to the next section of the test until you are told to do so. When all of the sections have been completed, you should remain seated until all of the test materials have been collected. You will have to wait for your test results to arrive in the mail, which usually takes about one month.
