First published in 1961 under the German title *Sadako Will Leben* (meaning *Sadako Wants to Live*), this non-fiction book by renowned Austrian children's writer Karl Bruckner is considered his most famous work. Telling the vivid story about a Japanese girl named Sadako Sasaki, who lived in Hiroshima and died of illnesses

caused by radiation exposure following the horrific atomic bombing of the city in August 1945, the book has been translated into most major languages and has been used as material for peace education in schools around the world. When it comes to obesity, diabetes, heart disease, cancer, and depression, everything you believe is a lie. With research gleaned from the National Institutes of Health, T.S. Wiley and Bent Formby deliver staggering findings: Americans really are sick from being tired. Diabetes, heart disease, cancer, and depression are rising in our population. We're literally dying for a good night's sleep. Our lifestyle

wasn't always this way. It began with the invention of the lightbulb. When we don't get enough sleep in sync with seasonal light exposure, we fundamentally alter a balance of nature that has been programmed into our physiology since day one. This delicate biological rhythm rules the hormones and neurotransmitters that determine appetite, fertility, and mental and physical health. When we rely on artificial light to extend our day until 11 p.m., midnight, and beyond, we fool our bodies into living in a perpetual state of summer. Anticipating the scarce food supply and forced inactivity of winter, our bodies begin

storing fat and slowing metabolism to sustain us through the months of hibernation and hunger that never arrive. Our own survival instinct, honed over millennia, is now killing us. Wiley and Formby also reveal: -That studies from our own government research prove the role of sleeplessness in diabetes, heart disease, cancer, infertility, mental illness, and premature aging -Why the carbohydrate-rich diets recommended by many health professionals are not only ridiculously ineffective but deadly -Why the lifesaving information that can turn things around is one of the best-kept secrets of our day.

Lights Out is one wake-up call none of us can afford to miss. Award-winning author Stark presents an inter-generational adventure filled with warmth and humor. Grandpa hates being in hospital. He wants to return the island where he used to live, but they won't let him out of the hospital. So Gottfried Junior, his namesake, helps Grandpa make a plan to run away. Illustrations. In Felix Gilbert's skilled analysis, the figures of Niccolo Machiavelli, whose writing changed the way people think about politics, and Francesco Guicciardini, whose History of Italy is one of the first classics of modern historical writing, provide important clues to interpreting

the Renaissance.
