The Frontiers of Ancient Science May 15 2020 Our understanding of science, mathematics, and medicine today can be deeply enriched by studying the historical roots of these areas of inquiry in the ancient Near East and Mediterranean. The fields of ancient science and mathematics have in recent years witnessed remarkable growth. The present volume brings together contributions from more than thirty of the most important scholars working in these fields in the United States and Europe in honor of the eminent historian of ancient science and medicine Heinrich von Staden, Professor Emeritus of Classics and History of Science at the Institute of Advanced Study and William Lampson Professor Emeritus of Classics and Comparative Literature at Yale University. The papers range widely from Mesopotamia to Ancient Greece and Rome, from the first millennium B.C. to the early medieval period, and from mathematics to philosophy, mechanics to medicine, representing both a wide diversity of national traditions and the cutting edge of the international scholarly community.

La Papauté et les croisades / The Papacy and the Crusades May 27 2021 This volume brings together a selection of the papers on the theme of the Papacy and the Crusades, delivered at the 7th Congress of the Society for the Study of the Crusades and the Latin East. After the introduction by Michel Balard, the first papers examine aspects of crusader terminology. The next section deals with events and perceptions in the West, including papers on the crusades against the Albigensians and Frederick II, and on the situation in the Iberian peninsula. There follow studies on relations between crusaders and the local populations in the Byzantine world after 1204 and Frankish Greece, and in Cilician Armenia, while a final pair looks at papal interventions in Poland and Scandinavia.

The Jews in Genoa Feb 04 2022 These volumes of the "Documentary History of the Jews in Italy," illustrate the history of the Jews in Genoa and surroundings from Antiquity to the French Revolution. The earliest documentary evidence takes the form of letters from King Theodoric. For the Middle Ages the documentation is relatively fragmentary and sporadic. Later there is greater abundance of historical evidence, which portrays chiefly the destinies of the Jews in the Republic from the sixteenth century on, when the presence of the Jews became permanent and a regular community was established also in the capital. The historical records presented illustrate mainly the relationship between the government of the Genoese Republic and the Jews, the latter's economic activities and their communal and social life. Some of the detailed descriptions of the Jewish population in Genoa, their living conditions and occupations, allow for a close examination of the social conditions of this Northern Italian community. For a while Genoa became a haven of refuge for some of the exiles from Spain, including the historian Joseph Hacoen and members of the Abarbanel family. The volumes are provided with an extensive introduction, bibliography, glossary and indexes.

**Le ali degli angeli** Apr 06 2022 Il presente testo affronta il tema dell'Angelologia studiando la Cabalà, le lettere ebraiche che compongono il nome di ognuno dei 72 Angeli e proponendo una spiegazione del carattere, dei talenti e dei difetti appartenenti a tutte le persone nate sotto l'influenza di ogni Angelo specifico. Inoltre ci sono capitoli introduttivi e di spiegazione sui Fiori di Bach, Fiori Australiani, Pietre, Aromaterapia e colori in quanto rimedi consigliati per creare un collegamento diretto con la propria energia Angelica specifica. Questi rimedi hanno la capacità, se usati in sinergia tra loro e con l'intenzione profonda della persona, di eliminare tutte quelle ostruzioni energetiche, psicologiche ed emotive che impediscono di contattare il flusso di energia del proprio Angelo, precludendo così le possibilità di sviluppo più profonde della persona.
