civilization ... at the secondary level"--P.1. WINNER OF: Frantz Fanon Outstanding Book from the Caribbean Philosophical Association Canadian Political Science Association's C.B. MacPherson Prize Studies in Political Economy Book Prize Over the past forty years, recognition has become the dominant mode of negotiation and decolonization between the nation-state and Indigenous nations in North America. The term "recognition" shapes debates over Indigenous cultural distinctiveness, Indigenous rights to land and self-government, and Indigenous peoples' right to benefit from the development of their lands and resources. In a work of critically engaged political theory, Glen Sean Coulthard challenges recognition as a method of organizing difference and identity in liberal politics, questioning the assumption that contemporary difference and past histories of destructive colonialism between the state and Indigenous peoples can be reconciled through a process of acknowledgment. Beyond this, Coulthard examines an alternative politics—one that seeks to revalue, reconstruct, and redeploy Indigenous cultural practices based on self-recognition rather than on seeking appreciation from the very agents of colonialism. Coulthard demonstrates how a "place-based" modification of Karl Marx's theory of "primitive accumulation" throws light on Indigenous-state relations in settler-colonial contexts and how Frantz Fanon's critique of colonial recognition shows that this relationship reproduces itself over time. This framework strengthens his exploration of the ways that the politics of recognition has come to serve the interests of settler-colonial power. In addressing the core tenets of Indigenous resistance movements, like Red Power and Idle No More, Coulthard offers fresh insights into the politics of active decolonization. • New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world "At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope." —Per Espen Stoknes, Author, What We Think About When We Try Not To Think About Global Warming "There's been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction

solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” —David Roberts, Vox “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth’s warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

Project Success. Everyone Wants It. Not Everyone Gets It. Ever wonder why some project managers are consistently more successful than others? The best trained managers are not always the most effective--and this book explains why. It shows you in step-by-step detail how the integration of people skills with technical skills is crucial, and how the lack of a people-oriented approach is frequently the cause of project failure. Based on the authors' 40 years of successful project management experience, this practical guidebook clearly shows how productive communication, motivation and leadership skills, and self-management techniques can make a dramatic difference in meeting project goals. Then, using real-life project examples and enjoyable "hands-on" exercises, the book shows you how to build on these basic principles to:

- * develop practical communication techniques (see page 22)
- * deliver memorable presentations (see page 37)
- * negotiate effectively on projects (see page 89)
- * understand customer needs (see page 210)
- * set personal goals for improved self-management (see page 112)
- * run productive meetings and training exercises (see pages 147 and 297)
- * establish clear project objectives (see page 167)
- * motivate and lead people (see page 71)
- * effectively monitor project progress (see page 185)
- * and much more! The

book concludes by linking all the people-centered skills and techniques covered into the Total Quality Management (TQM) concept, a system used with great success in the manufacturing sector. The book shows you how to apply TQM to service organization projects. Consistent project success comes when project managers focus their energy on people--the ones on their project team, others in their organization, and their clients. In Sweden there is a kind of decluttering called *döstädning*, *dö* meaning "death" and *städning* meaning "cleaning." This surprising and invigorating process of clearing out unnecessary belongings can be undertaken at any age or life stage but should be done sooner than later, before others have to do it for you. In *The Gentle Art of Swedish Death Cleaning*, artist Margareta Magnusson, with Scandinavian humor and wisdom, instructs readers to embrace minimalism. Her radical and joyous method for putting things in order helps families broach sensitive conversations,

and makes the process uplifting rather than overwhelming. Margareta suggests which possessions you can easily get rid of (unworn clothes, unwanted presents, more plates than you'd ever use) and which you might want to keep (photographs, love letters, a few of your children's art projects). Digging into her late husband's tool shed, and her own secret drawer of vices, Margareta introduces an element of fun to a potentially daunting task. Along the way readers get a glimpse into her life in Sweden, and also become more comfortable with the idea of letting go. Abandoned lots and litter-strewn pathways, or rows of green beans and pockets of wildflowers? Graffiti-marked walls and desolate bus stops, or shady refuges and comfortable seating? What transforms a dingy, inhospitable area into a dynamic gathering place? How do individuals take back their neighborhood? Neighborhoods decline when the people who live there lose their connection and no longer feel part of their community. Recapturing that sense of belonging and pride of place can be as simple as planting a civic garden or placing some benches in a park. The Great Neighborhood Book explains how most struggling communities can be revived, not by vast infusions of cash, not by government, but by the people who live there. The author addresses such challenges as traffic control, crime, comfort and safety, and developing economic vitality. Using a technique called "placemaking"-- the process of transforming public space -- this exciting guide offers inspiring real-life examples that show the magic that happens when individuals take small steps, and motivate others to make change. This book will motivate not only neighborhood activists and concerned citizens but also urban planners, developers and policy-makers.

Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game. One hundred years after the founding of the École Coloniale Supérieure in Antwerp, the adjacent Middelheim Museum invites Sandrine Colard, researcher and curator, to conceive an exhibition that probes silenced histories of colonialism in a site-specific way. For Colard, the term Congoville encompasses the tangible and intangible urban traces of the colony, not on the African continent but in 21st-century Belgium: a school building, a park, imperial myths, and citizens of African descent. In the exhibition and this adjoining publication, the concept Congoville is the starting point for 15 contemporary artists to address colonial history and ponder its aftereffects as black flâneurs walking through a postcolonial city. Due to the multitude of perspectives and voices, this book is both a catalogue and a reference work comprised of artistic and academic contributions. Together, the participating artists and invited authors unfold the blueprint of Congoville, an imaginary city that still subconsciously affects us, but also encourages us to envision a decolonial utopia. Een eeuw na de oprichting van de École Coloniale Supérieure in Antwerpen nodigt het naburige Middelheimmuseum onderzoeker en curator Sandrine Colard uit om een tentoonstelling te creëren die sitespecifiek peilt naar de stille

geschiedenissen van het kolonialisme. Congoville duidt op de zichtbare en onzichtbare stedelijke sporen van de kolonie, niet op het Afrikaanse continent, maar pal in het België van vandaag: een schoolgebouw, een park, imperialistische mythes en burgers van Afrikaanse origine. Doorheen de tentoonstelling en deze bijhorende publicatie is Congoville de context waarbinnen 15 hedendaagse kunstenaars, als zwarte flâneurs op pad in een postkoloniale stad, het koloniale verleden en de impact ervan adresseren. Door de veelheid aan perspectieven en stemmen is dit boek tegelijk een catalogus en een naslagwerk met zowel academische als artistieke bijdragen. Samen ontvouwen de betrokken kunstenaars en auteurs de blauwdruk van Congoville, een imaginaire stad die ons nog steeds onbewust in haar greep houdt, maar ons ook aanspoort om na te denken over een de-koloniaal utopia.
