Being Modern in China Oct 12 2021 This book analyses modernity and tradition in China today and how they combine in striking ways in the Chinese school. Paul Willis - the leading ethnographer and author of *Learning to Labour* - shows how China has undergone an internal migration not only of masses of workers but also of a mental and ideological kind to new cultural landscapes of meaning, which include worship of the glorified city, devotion to consumerism, and fixation upon the smartphone and the internet. Massive educational expansion has been a precondition for explosive economic growth and technical development, but at the same time the school provides a cultural stage for personal and collective experience. In its closed walls and the inescapability of its 'scores', an astonishing drama plays out between the new and the old, with a tapestry of intricate human meanings woven of small tragedies and triumphs, secret promises and felt betrayals, helping to produce not only exam results but cultural orientations and occupational destinies. By exploring the cultural dimension of everyday experience as it is lived out in the school, this book sheds new light on the enormous transformations that have swept through China and created the kind of society that it is today: a society that is obsessed with the future and at the same time structured by and in continuous dialogue with its past.

Population in China Jul 29 2020 China is home to a fifth of the world's inhabitants. For the last several decades, this huge population has been in flux: fertility has fallen sharply, mortality has declined, and massive rural-to-urban migration is taking place. The state has played a direct role in these changes, seeing population control as an important part of its intention to modernize the country. In this insightful new work, Nancy E. Riley argues that China's population policies and outcomes are not simply imposed by the state onto an unresponsive citizenry, but have arisen from the social organization of China over the past sixty years. Riley demonstrates how China's population and population policy are intertwined and interact with other social and economic features. Riley also examines the unintended consequences of state directives, including the extraordinary number of missing girls, the rapid aging of the population, and an increase in inequality, particularly between rural and urban residents. Ultimately, China's demographic story has to be understood as a complex, multi-pieced phenomenon. This book will be essential reading for researchers and students of China and social demography, as well as non-specialists interested in the changing nature of China's population.

Taiwan and China Oct 24 2022 At publication date, a free ebook version of this title will be available through Luminos, University of California Press's Open Access publishing program. Visit www.luminosoa.org to learn more. China's relation to Taiwan has been in constant contention since the founding of the People's Republic of China in October 1949 and the creation of the defeated Kuomintang (KMT) exile regime on the island two months later. The island's autonomous sovereignty has continually been challenged, initially because of the KMT's insistence that it continue to represent not just Taiwan but all of China—and later because Taiwan refused to cede sovereignty to the then-dominant power that had

arisen on the other side of the Taiwan Strait. One thing that makes Taiwan so politically difficult and yet so intellectually fascinating is that it is not merely a security problem, but a ganglion of interrelated puzzles. The optimistic hope of the Ma Ying-jeou administration for a new era of peace and cooperation foundered on a landslide victory by the Democratic Progressive Party, which has made clear its intent to distance Taiwan from China's political embrace. The Taiwanese are now waiting with bated breath as the relationship tautens. Why did détente fail, and what chance does Taiwan have without it? Contributors to this volume focus on three aspects of the evolving quandary: nationalistic identity, social economy, and political strategy.

[Evolutionary Economic Geography in China](#) Feb 01 2021 The book provides the first detailed account of the complex geographical dynamics restructuring China's manufacturing industries from the evolutionary economic geography perspective. These geographical and industrial shifts have enormous implications in and beyond China for what is possible in the post-crisis global economy. The book demonstrates that the interface between evolutionary economic geography approaches and other approaches (e.g. global value chain, global production network, institutional economic geography) could be a fertile area for further consideration. The two main audiences that this book appeals to are economic geography and regional science. The topics covered in the book are also relevant to development studies, economics, economic sociology and international studies, offering academics, international researchers, post-graduate and advanced undergraduate students in these fields an accessible, grounded, yet theoretically sophisticated account of the evolutionary economic geography in China and its interaction with firm performance and regional economic development. The book is also attractive to national policy makers, since it engages directly with economic and industrial policy issues, such as industrial competitiveness, regional and national development, industrial and employment restructuring, and trade regulation.

Legal Orientalism Mar 05 2021 After the Cold War, how did China become a global symbol of disregard for human rights, while the U.S positioned itself as the chief exporter of the rule of law? Teemu Ruskola investigates globally circulating narratives about what law is and who has it, and shows how "legal Orientalism" developed into a distinctly American ideology of empire.

Aging in Asia Jan 03 2021 The population of Asia is growing both larger and older. Demographically the most important continent on the world, Asia's population, currently estimated to be 4.2 billion, is expected to increase to about 5.9 billion by 2050. Rapid declines in fertility, together with rising life expectancy, are altering the age structure of the population so that in 2050, for the first time in history, there will be roughly as many people in Asia over the age of 65 as under the age of 15. It is against this backdrop that the Division of Behavioral and Social Research at the U.S. National Institute on Aging (NIA) asked the National Research Council (NRC), through the Committee on Population, to undertake a project on advancing behavioral and social research on aging in Asia. *Aging in Asia: Findings from New and Emerging Data Initiatives* is a peer-reviewed collection of papers from China, India, Indonesia, Japan, and Thailand that were presented at two conferences organized in conjunction with the Chinese Academy of Sciences, Indian National Science Academy, Indonesian Academy of Sciences, and Science Council of Japan; the first conference was hosted by the Chinese Academy of Social Sciences in Beijing, and the second conference was hosted by the Indian National Science Academy in New Delhi. The papers in the volume highlight the contributions from new and emerging data initiatives in the region and cover subject areas such as economic growth, labor markets, and consumption; family roles and responsibilities; and labor markets and consumption.

[Mandarin Chinese](#) Jul 21 2022 A Mandarin phrasebook designed for the traveller. It provides guidance on Mandarin pronunciation and tones, dos and don'ts, cultural know-how and other matters where language is important like making a phone call.

China Under Mao Aug 29 2020 China's Communist Party seized power in 1949 after a long guerrilla

insurgency followed by full-scale war, but the revolution was just beginning. Andrew Walder narrates the rise and fall of the Maoist state from 1949 to 1976—an epoch of startling accomplishments and disastrous failures, steered by many forces but dominated above all by Mao Zedong.

[China](#) Feb 25 2023 China: Adapting the Past, Confronting the Future combines original essays by leading experts with excerpts from primary sources, the latest scholarship, Chinese literature, and Western media reports to provide a comprehensive textbook on contemporary China. Completely updated, China: Adapting the Past, Confronting the Future is the latest in a series of classroom units on China from the Center of Chinese Studies at The University of Michigan. It is not only ideal for courses on contemporary China but also an excellent supplement for courses in area studies, international affairs and economics, and women's studies. Each section, in addition to essay and excerpts, also includes a bibliography of additional topical works as well as suggestions for complementary video and internet teaching resources.

Doing Business in China for Dummies Apr 29 2023

Find out how Chinese Character Writing For Dummies can help you today!

China's Foreign Policy Mar 17 2022 China's inexorable rise as a major world power is one of the defining features of the contemporary political landscape. But should we heed the warnings of a so-called 'China threat'? Is China set to become the next superpower? Or will its ambitions be tempered by economic and political realities both at home and abroad? In this insightful and balanced analysis, noted China expert Stuart Harris explores China's present foreign policy and its motivations, focusing in particular on the extent to which China will co-operate with the West in years to come. He considers what factors, international or domestic, will influence the foreign policies being shaped in Beijing, including how far the Chinese regime will adhere to existing global norms and the evolving international system. In contemplating this uncertain future, Harris assesses the considerable challenges and vulnerabilities likely to impact on Chinese foreign policy, leading it to be cautious and hesitant or assertive and aggressive on the international stage. Concise and authoritative, this book will be essential reading for anyone seeking a clearer understanding of the international relations of one of the world's most important powers.

The Coming Collapse of China May 19 2022 China is hot. The world sees a glorious future for this sleeping giant, three times larger than the United States, predicting it will blossom into the world's biggest economy by 2010. According to Chang, however, a Chinese-American lawyer and China specialist, the People's Republic is a paper dragon. Peer beneath the veneer of modernization since Mao's death, and the symptoms of decay are everywhere: Deflation grips the economy, state-owned enterprises are failing, banks are hopelessly insolvent, foreign investment continues to decline, and Communist party corruption eats away at the fabric of society. Beijing's cautious reforms have left the country stuck midway between communism and capitalism, Chang writes. With its impending World Trade Organization membership, for the first time China will be forced to open itself to foreign competition, which will shake the country to its foundations. Economic failure will be followed by government collapse. Covering subjects from party politics to the Falun Gong to the government's insupportable position on Taiwan, Chang presents a thorough and very chilling overview of China's present and not-so-distant future.

[Chinese Phrases For Dummies](#) May 31 2023 Hundreds of useful phrases at your fingertips Speak Chinese - instantly! Traveling to China but don't know Chinese? Taking Chinese at school but need to kick up your

conversation skills? Don't worry! This handy little phrasebook will have you speaking Chinese in no time. Discover how to Get directions, shop, and eat out Talk numbers, dates, time, and money Chat about family and work Discuss sports and the weather Deal with problems and emergencies *Geopolitics for Dummies* Dec 14 2021 We are at a turning point in history when the US won't be the superpower anymore. A multi-polar and a multilateral world is emerging -- China is poised to become an economic superpower, and the center of global power will shift to Asia in the coming years. Russia will be stronger than the USSR ever was. And everyone, especially Americans, need to understand how to face this New World Order 2.0. Geopolitics is more fascinating than any novel or a movie, but unfortunately a vast majority of people stay away from it and the mainstream media reduces it to a Disney version of good versus bad. Geopolitics is a mix of foreign policy, history, geography, culture, economics, wars and more. It involves Machiavellian power struggle as well as cooperative, win-win alliances among nations. Given the importance of geopolitics, one would assume that in a country like America - a superpower with 800 military bases in 144 countries - people will be extremely interested in the subject. We also spend trillions of dollars on perpetual wars and annual military budgets. However, Americans are awfully apathetic and ignorant about geopolitics. This book is aimed at revealing the truths about geopolitics, with special emphasis on US foreign policies, in an easy to understand manner. It will introduce the readers to a new paradigm and will help them understand the world events through a lens that's very different from the mainstream narrative.

[China's Military Transformation](#) Jun 27 2020 China's military transformation is one of the major geo-strategic developments of the 21st Century. Billions of dollars are being spent modernizing The People's Liberation Army (PLA) as China seeks to upgrade and expand its military capabilities to rival the US. In this cutting-edge analysis, You Ji, a leading expert on China's military affairs, explores the changes taking place within the PLA today, covering its ground, aerospace and maritime forces, its ability to meet asymmetric threats, and the growing role played by the People's Armed Police in quelling dissent in China. He shows how these transformations in personnel, technology and strategic goals are slowly driving a wedge between China's two most powerful institutions. Until recently, relations between the CCP and PLA were harmonious, but as the PLA becomes increasingly professionalized and autonomous so its unconditional loyalty to the ruling Party may weaken. The changing relationship between the CCP and PLA, he argues, is likely to have profound implications for China's own political development and the balance of power in the Asia-Pacific region. Comprehensive and incisive, this timely book is a valuable resource for anyone interested in the nature and consequences of China's military rise.

Mandarin Chinese for Beginners Aug 22 2022 This user-friendly guide to the basics helps you learn how to speak Chinese quickly and easily by drawing parallels with something you already know--English. Chinese is a fascinating language that can seem impossibly difficult to learn at first, but is relatively easy if you focus on the spoken aspect. This revised edition contains new dialogues, cultural notes, IT and social media vocabulary, and new manga illustrations. This book is designed for everyone who wants to learn to speak and understand colloquial Chinese--whether it is for business, pleasure, or travel to China. A lighthearted guide that brings Chinese to life in a down-to-earth fashion, Mandarin Chinese for Beginners makes language learning fun. Real-life dialogues and situations help you to converse with confidence Sentence pattern exercises and drills help to reinforce what you are learning Native-speaker audio recordings enable you to pronounce Chinese vocabulary accurately Interesting notes, idioms, sayings and poems introduce you to Chinese culture Mandarin Chinese for Beginners contains lots of extra hints and tips drawn from the authors' many years of experience in teaching the language to foreigners. Answer keys for the exercises are provided, and an "Extend Your Vocabulary" section in each chapter helps you to remember and understand more words that you'd think possible.

Mastering the Art of Chinese Cooking Dec 02 2020 This new masterwork of Chinese cuisine showcases acclaimed chef Eileen Yin-Fei Lo's decades of culinary virtuosity. A series of lessons build skill, knowledge, and confidence as Lo guides the home cook step by step through the techniques, ingredients, and equipment that define Chinese cuisine. With more than 100 classic recipes and technique illustrations throughout, Mastering the Art of Chinese Cooking makes the glories of this ancient cuisine utterly accessible. Stunning color photography reveals the treasures of old and new China, from the zigzagging

alleys of historical Guangzhou to the bustle of city centers and faraway Chinatowns, as well as wonderful ingredients and gorgeous finished dishes. Step-by-step brush drawings illustrate Chinese cooking techniques. This lavish volume takes its place as the Chinese cookbook of choice in the cook's library.

[Socialism with Chinese Characteristics](#) Sep 30 2020 This book covers the whole system of Socialism with Chinese Characteristics, dealing with Deng Xiaoping's theory, the socialist market economy, a moderately well-off (Xiaokang) society, China's practice and theory of socialist democracy, human rights, and Xi Jinping's Marxism. In short, the resolute focus is the Reform and Opening-Up. Socialism with Chinese Characteristics is one of the most important global realities today. However, the concept and its practice remain largely misunderstood outside China. This book sets to redress such a lack of knowledge, by making available to non-Chinese speakers the sophisticated debates and conclusions in China concerning socialism with Chinese Characteristics. It presents this material in a way that is both accessible and thorough.

[Taoism For Dummies](#) Sep 22 2022 The definitive guide to understanding Taoism—no matter your background or faith Lao Tzu's Tao Te Ching is the second most translated book in the world, and the practice of religious Taoism is on the rise in China, where adherents currently number in the hundreds of millions. Yet there remains a remarkable lack of reliable information about Taoism for curious westerners. Taoism For Dummies provides comprehensive coverage of Taoism's origins in China's Chou Dynasty, its underlying quietist principles, its emergence as a major religion, various interpretation of its core texts, including both Eastern and Western interpretations, key Taoist concepts, and much more. It also provides a fascinating glimpse of Taoism in contemporary China. The ideal guide for readers interested in this influential religion, as well as those taking an introductory course on Taoism or Chinese Religion A valuable source of insight for those with an interest in modern Chinese culture and beliefs

[Public Memory in Early China](#) Sep 10 2021 In early imperial China, the dead were remembered by stereotyping them, by relating them to the existing public memory and not by vaunting what made each person individually distinct and extraordinary in his or her lifetime. Their posthumous names were chosen from a limited predetermined pool; their descriptors were derived from set phrases in the classical tradition; and their identities were explicitly categorized as being like this cultural hero or that sage official in antiquity. In other words, postmortem remembrance was a process of pouring new ancestors into prefabricated molds or stamping them with rigid cookie cutters. Public Memory in Early China is an examination of this pouring and stamping process. After surveying ways in which learning in the early imperial period relied upon memorization and recitation, K. E. Brashier treats three definitive parameters of identity—name, age, and kinship—as ways of negotiating a person's relative position within the collective consciousness. He then examines both the tangible and intangible media responsible for keeping that defined identity welded into the infrastructure of Han public memory.

[Chinese Cooking For Dummies](#) Jul 01 2023 Have you ever had a craving for fried dumplings or hot and sour soup at midnight? Ever wonder how your local Chinese takeout makes their food taste so good—and look so easy to make? Still don't know the difference between Sichuan, Cantonese, and Mandarin cooking? Discovering how to cook the Chinese way will leave you steaming, stir-frying, and food-styling like crazy! The indescribably delicious cuisine of a fascinating country can finally be yours. dishes—including Moo Goo Gai Pan, Kung Pao Chicken, and Honey Garlic Chicken Pork, beef, and lamb dishes—including Sichuan Spareribs, Tangerine Beef, and Mongolian Lamb Chinese Cooking For Dummies gives you all of the basics you'll need, letting you experience the rich culinary landscape of China, one delicious dish at a time—and all, without leaving a tip!

[Poorly Made in China](#) Feb 13 2022 An insider reveals what can—and does—go wrong when companies shift production to China In this entertaining behind-the-scenes account, Paul Midler tells us all that is wrong with our effort to shift manufacturing to China. Now updated and expanded, Poorly Made in China reveals industry secrets, including the dangerous practice of quality fade—the deliberate and secret habit of Chinese manufacturers to widen profit margins through the reduction of quality inputs. U.S. importers don't stand a chance, Midler explains, against savvy Chinese suppliers who feel they have little to lose by placing consumer safety at risk for the sake of greater profit. This is a lively and impassioned personal account, a collection of true stories, told by an American who has worked in the country for close to two decades. Poorly Made in China touches on a number of issues that affect us all.

China's Mobile Economy Apr 05 2021 Explore the world-changing digital transformation in China China's Mobile Economy: Opportunities in the Largest and Fastest Information Consumption Boom is a cutting-edge text that spotlights the digital transformation in China. Organised into three major areas of the digital economy within China, this ground-breaking book explores the surge in e-commerce of consumer goods, the way in which multi-screen and mobile Internet use has increased in popularity, and the cultural emphasis on the mobile Internet as a source of lifestyle- and entertainment-based content. Targeted at the global business community, this lucid and engaging text guides business leaders, investors, investment banking professionals, corporate advisors, and consultants in grasping the challenges and opportunities created by China's emerging mobile economy, and its debut onto the global stage. Year 2014-15 marks the most important inflection point in the history of the internet in China. Almost overnight, the world's largest digitally-connected middle class went both mobile and multi-screen (smart phone, tablets, laptops and

more), with huge implications for how consumers behave and what companies need to do to successfully compete. As next-generation mobile devices and services take off, China's strength in this arena will transform it from a global "trend follower" to a "trend setter." Understand what the digital transformation in China is, and impact on global capital markets, foreign investors, consumer companies, and the global economy as a whole Explore the e-commerce consumption boom in the context of the Chinese market Understand the implications of the multi-screen age and mobile Internet for China's consumers See how mobile Internet use, its focus on lifestyle and entertainment is aligned with today's Chinese culture Learn about the mobile entertainment habits of China's millennial generation and the corresponding new advertisement approaches The development of China's mobile economy is one of the most important trends that will reshape the future of business, technology and society both in China and the world. China's Mobile Economy: Opportunities in the Largest and Fastest Information Consumption Boom introduces you to the digital transformation in China, and explains how this transformation has the potential to transform both China and the global consumer landscape.

China's Economy Oct 31 2020 In the 1980s China was an impoverished backwater, struggling to escape the political turmoil and economic mismanagement of the Mao era. Today it is the world's second biggest economy, the largest manufacturing and trading nation, the consumer of half the world's steel and coal, the biggest source of international tourists, and one of the most influential investors in developing countries from southeast Asia to Africa to Latin America. Kroeber helps you navigate the complexities of a capitalist economy governed by an authoritarian Communist Party that shows no sign of loosening its grip.

Will China Save the Planet? Jan 15 2022 Now that Trump has turned the United States into a global climate outcast, will China take the lead in saving our planet from environmental catastrophe? Many signs point to yes. China, the world's largest carbon emitter, is leading a global clean energy revolution, phasing out coal consumption and leading the development of a global system of green finance. But as leading China environmental expert Barbara Finamore explains, it is anything but easy. The fundamental economic and political challenges that China faces in addressing its domestic environmental crisis threaten to derail its low-carbon energy transition. Yet there is reason for hope. China's leaders understand that transforming the world's second largest economy from one dependent on highly polluting heavy industry to one focused on clean energy, services and innovation is essential, not only to the future of the planet, but to China's own prosperity.

The Chinese Corporate Savings Puzzle May 26 2020 China's high corporate savings rate is commonly claimed to be a key driver for the country's large current account surplus. The mainstream explanation for high corporate savings is a combination of windfall profits in state-owned firms, especially in resource sectors, and mis-governance of state-owned firms represented by their low dividend payout. The paper casts doubt on these views by comparing the savings of 1557 Chinese listed firms with those of 29330 listed firms from 51 other countries over 2002-07. First, Chinese firms do not have a significantly higher savings rate (as a share of total assets) than the global average because corporations in most countries have a high savings rate. The rising corporate savings rate is also consistent with a global trend. Second, there is no significant difference in the savings behavior and dividend patterns between Chinese majority state-owned and private listed firms, contrary to the received wisdom.

Capitalizing China Apr 25 2020 La 4e de couverture indique : "Despite a vast accumulation of private capital, China is not embracing capitalism. Deceptively familiar capitalist features disguise the profoundly unfamiliar foundations of "market socialism with Chinese characteristics." The Chinese Communist Party (CCP), by controlling the career advancement of all senior personnel in all regulatory agencies, all state-owned enterprises (SOEs), and virtually all major financial institutions state-owned enterprises (SOEs), and senior Party positions in all but the smallest non-SOE enterprises, retains sole possession of Lenin's Commanding Heights. The chapters in this volume examine China's high savings rate, banking system, financial markets, financial regulations, corporate governance, and public finances; and consider policy alternatives the CCP might consider if its goal is China's elevation into the ranks of high income countries."

Last Boat Out of Shanghai Jul 09 2021 The dramatic real life stories of four young people caught up in the mass exodus of Shanghai in the wake of China's 1949 Communist revolution—a heartrending precursor to the struggles faced by emigrants today. "A true page-turner . . . [Helen] Zia has proven once again that

history is something that happens to real people."—New York Times bestselling author Lisa See NAMED ONE OF THE BEST BOOKS OF THE YEAR BY NPR AND THE CHRISTIAN SCIENCE MONITOR • FINALIST FOR THE PEN/JACQUELINE BOGRAD WELD AWARD FOR BIOGRAPHY Shanghai has historically been China's jewel, its richest, most modern and westernized city. The bustling metropolis was home to sophisticated intellectuals, entrepreneurs, and a thriving middle class when Mao's proletarian revolution emerged victorious from the long civil war. Terrified of the horrors the Communists would wreak upon their lives, citizens of Shanghai who could afford to fled in every direction. Seventy years later, members of the last generation to fully recall this massive exodus have revealed their stories to Chinese American journalist Helen Zia, who interviewed hundreds of exiles about their journey through one of the most tumultuous events of the twentieth century. From these moving accounts, Zia weaves together the stories of four young Shanghai residents who wrestled with the decision to abandon everything for an uncertain life as refugees in Hong Kong, Taiwan, and the United States. Benny, who as a teenager became the unwilling heir to his father's dark wartime legacy, must decide either to escape to Hong Kong or navigate the intricacies of a newly Communist China. The resolute Annuo, forced to flee her home with her father, a defeated Nationalist official, becomes an unwelcome exile in Taiwan. The financially strapped Ho fights deportation from the U.S. in order to continue his studies while his family struggles at home. And Bing, given away by her poor parents, faces the prospect of a new life among strangers in America. The lives of these men and women are marvelously portrayed, revealing the dignity and triumph of personal survival. Herself the daughter of immigrants from China, Zia is uniquely equipped to explain how crises like the Shanghai transition affect children and their families, students and their futures, and, ultimately, the way we see ourselves and those around us. Last Boat Out of Shanghai brings a poignant personal angle to the experiences of refugees then and, by extension, today. "Zia's portraits are compassionate and heartbreaking, and they are, ultimately, the universal story of many families who leave their homeland as refugees and find less-than-welcoming circumstances on the other side."—Amy Tan, author of The Joy Luck Club

The Complete Idiot's Guide to Modern China Nov 24 2022 This work provides an informative guide to the roots of modern China. It also looks at the key challenges and opportunities that face China in the 21st century.

China's Economy Nov 12 2021 China's economic growth has been revolutionary, and is the foundation of its increasingly prominent role in world affairs. It is the world's second biggest economy, the largest manufacturing and trading nation, the consumer of half the world's steel and coal, the biggest source of international tourists, and one of the most influential investors in developing countries from southeast Asia to Africa to Latin America. Multinational companies make billions of dollars in profits in China each year, while traders around the world shudder at every gyrations of the country's unruly stock markets. Perhaps paradoxically, its capitalist economy is governed by an authoritarian Communist Party that shows no sign of loosening its grip. China is frequently in the news, whether because of trade disputes, the challenges of its Belt and Road initiative for global infrastructure, or its increasing military strength. China's political and technological challenges, created by a country whose political system and values differ dramatically from most of the other major world economies, creates uncertainty and even fear. China's Economy: What Everyone Needs to Know® is a concise introduction to the most astonishing economic and political story of the last three decades. Arthur Kroeber enhances our understanding of China's changes and their implications. Among the essential questions he answers are: How did China grow so fast for so long? Can it keep growing and still solve its problems of environmental damage, fast-rising debt and rampant corruption? How long can its vibrant economy co-exist with the repressive one-party state? How do China's changes affect the rest of the world? This thoroughly revised and updated second edition includes a comprehensive discussion of the origins and development of the US-China strategic rivalry, including Trump's trade war and the race for technological supremacy. It also explores the recent changes in China's political system, reflecting Xi Jinping's emergence as the most powerful leader since Mao Zedong. It includes insights on changes in China's financial sector, covering the rise and fall of the shadow banking sector, and China's increasing integration with global financial markets. And it covers China's rapid technological development and the rise of its global Internet champions such as Alibaba and Tencent.

Written by a leading Chinese language teacher in the United States, Chinese for Dummies will introduce an often daunting language to you in a fun-and-easy For Dummies manner.

China's Healthcare System and Reform May 07 2021 This volume provides a comprehensive review of China's healthcare system and policy reforms in the context of the global economy. Following a value-chain framework, the 16 chapters cover the payers, the providers, and the producers (manufacturers) in China's system. It also provides a detailed analysis of the historical development of China's healthcare system, the current state of its broad reforms, and the uneasy balance between China's market-driven approach and governmental regulation. Most importantly, it devotes considerable attention to the major problems confronting China, including chronic illness, public health, and long-term care and economic security for the elderly. Burns and Liu have assembled the latest research from leading health economists and political scientists, as well as senior public health officials and corporate executives, making this book an essential read for industry professionals, policymakers, researchers, and students studying comparative health systems across the world.

Taoism For Dummies Jun 19 2022 The definitive guide to understanding Taoism—no matter your background or faith Lao Tzu's Tao Te Ching is the second most translated book in the world, and the practice of religious Taoism is on the rise in China, where adherents currently number in the hundreds of millions. Yet there remains a remarkable lack of reliable information about Taoism for curious westerners. Taoism For Dummies provides comprehensive coverage of Taoism's origins in China's Chou Dynasty, its underlying quietist principles, its emergence as a major religion, various interpretations of its core texts, including both Eastern and Western interpretations, key Taoist concepts, and much more. It also provides a fascinating glimpse of Taoism in contemporary China. The ideal guide for readers interested in this influential religion, as well as those taking an introductory course on Taoism or Chinese Religion A valuable source of insight for those with an interest in modern Chinese culture and beliefs

The Chinese Tao of Business Jun 07 2021 How can managers discover, develop and implement successful business strategies for China and our global economy? Drawing on in-depth research with top executives of successful Chinese and Western companies, this book provides a road map for profitable business strategies in our interconnected economy. In the process, the authors describe and examine both Chinese and Western strategic management, their weaknesses and strengths. Starting with an analysis of the historical, cultural and legal antecedents of Chinese strategy, the authors identify potential for synergy

and dominance between companies from Western, industrialized economies and Chinese companies. The book closes with recommendations on how the managements of non-Chinese companies, now pouring into China, can most effectively compete and interact with Chinese businesspersons and governments. The Chinese Tao of Business offers guidance to compete successfully against local companies and in foreign markets through: Unique insights into Chinese business strategy, including its origins and influencing factors; Insightful perspectives on the evolution of China's market and business environments; Incisive analysis of Eastern and Western strategic decision-making styles and how they differ; Cogent identification of hidden and overt threats, pitfalls and opportunities that Western companies face in China and how to plan for them; Effective direction through an Adaptive-Action Road Map (ARM) for successful business strategies in China and the global economy.

Dealing with China Aug 10 2021 NEW YORK TIMES BESTSELLER DEALING WITH CHINA takes the reader behind closed doors to witness the creation and evolution and future of China's state-controlled capitalism. Hank Paulson has dealt with China unlike any other foreigner. As head of Goldman Sachs, Paulson had a pivotal role in opening up China to private enterprise. Then, as Treasury secretary, he created the Strategic Economic Dialogue with what is now the world's second-largest economy. He negotiated with China on needed economic reforms, while safeguarding the teetering U.S. financial system. Over his career, Paulson has worked with scores of top Chinese leaders, including Xi Jinping, China's most powerful man in decades. In DEALING WITH CHINA, Paulson draws on his unprecedented access to modern China's political and business elite, including its three most recent heads of state, to answer several key questions: How did China become an economic superpower so quickly? How does business really get done there? What are the best ways for Western business and political leaders to work with, compete with, and benefit from China? How can the U.S. negotiate with and influence China given its authoritarian rule, its massive environmental concerns, and its huge population's unrelenting demands for economic growth and security? Written in the same anecdote-rich, page-turning style as Paulson's bestselling memoir, On the Brink, DEALING WITH CHINA is certain to become the classic and definitive examination of how to engage China's leaders as they build their economic superpower.
