Observing Agriculture in Early Twentieth-Century Italy  
20 2023 Agricultural Economists in Early Twentieth-Century Italy describes how Italian agricultural economists collected information about the economy of Italy, between the Giolittian and the Fascist era. The book carefully describes three main forms of economic observation: enquiries, statistics, and farm surveys. For each of these forms of observation, the main participants to the investigation are discussed with their respective agendas, alongside the purposes of the investigation, and its practical constraints. This work introduces the concept of "stakeholder statistics", and stresses the two-way relation between the observer and the observed in the co-production of observational knowledge. Practices of observation developed together with agricultural economics as a discipline and a profession. The study of forms of investigation therefore shed light on the constitution of a coherent and self-conscious group of agricultural economists in Italy, and the scientific and methodological alliances they forged with agricultural economists elsewhere in Europe. Thanks to ambitious research projects, Ghino Valenti in the Giolittian period, and Arrigo Serpieri, after the First World War, led the transformation of Italian agricultural economists from agents of estate owners, to social and economic experts in the service of the Italian state. The group of agricultural economists who gathered around Serpieri played an important role in supplying the ideology of the agricultural elites with economic content, especially after the First World War, along lines that resemble the development of agrarian ideologies in other countries of Central Europe. This work discusses how observation entered the political debate on agricultural policies of the Fascist regime, namely the so-called Ruralismo.

Law and Agroecology Oct 15 2022 This book represents a first attempt to investigate the relations between Law and Agroecology. There is a need to adopt a transdisciplinary approach to multifunctional agriculture in order to integrate the agroecological paradigm in legal regulation. This does not require a super-law that hierarchically purports to incorporate and supplant the existing legal fields; rather, it calls for the creation of a trans-law that progressively works to coordinate interlegalities between different legal fields, respecting their autonomy but emphasizing their common historical roots in *rus* in the process. *Rus*, the rural phenomenon as a whole, reflects the plurality and interdependence of different complex systems based jointly on the land as a central point of reference. "Rural" is more than "agricultural": if agriculture is understood traditionally as an activity aimed at exploiting the land for the production of material goods for use, consumption and private exchange, rurality marks the reintegration of agriculture into a broader sphere, one that is not only economic, but also social and cultural; not only material, but also ideal, relational, historical, and symbolic; and not only private, but also public. In approaching *rus*, the natural and social sciences first became specialized, multiplied, and compartmentalized in a plurality of first-order disciplines; later, they began a process of integration into Agroecology as a second-order, multi-perspective and shared research platform. Today, Agroecology is a transdiscipline that integrates other fields of knowledge into the concept of agroecosystems viewed as socio-ecological systems. However, the law seems to still be stuck in the first stage. Following a reductionist approach, law has deconstructed and shattered the universe of *rus* into countless, disjointed legal elementary particles, multiplying the planes of analysis and, in particular, keeping Agricultural Law and Environmental Law two separate fields.

Cantine di Alba. Winemakers of Alba Nov 16 2022 La prima guida della cantine di Alba. La pubblicazione della guida dei produttori della città di Alba è un momento da celebrare. Si tratta infatti di uno dei primi tentativi di unire sotto un'unica bandiera i moltissimi produttori della capitale delle Langhe, creando una sinergia e un'unione che, speriamo, sia solo il primo passo di una promozione a lungo termine. L'idea che sta infatti alla base della pubblicazione è che questa funga da motore di valorizzazione, una sorta di innesco a partire dal quale i produttori albesi potranno proporsi ad eventi nazionali e internazionali con forze e contenuti che solo un solido gruppo possono garantire. La guida va dunque sfogliata "in divenire", augurandosi cioè che fondi le basi di un'associazione che continuerà a portare il nome vitivinicolo di Alba nel mondo. Ma la guida dell'Associazione Cantine di Alba va anche consultata per il suo lato pragmatico... The first guide to the wineries of Alba The publication of the guide to the wineries of the city of Alba is something to celebrate. In fact it is one of the first attempts to unite the plethora of producers in the capital of the Langhe in a common cause, creating a synergy and togetherness that we are certain is just the first step toward long-term promotion. In fact, the idea behind the publication was that it would act as a booster – a springboard for the producers of Alba to propose their participation in national and international events with the forces and the content that only a solid group can guarantee. One must therefore flip through the guide aware that it is in evolution, hoping that it will lay the

foundations for an association that will continue to carry the flag of Alba's winemaking out in the world.

New trends for innovation in the Mediterranean animal production Feb 19 2023 The Mediterranean area shows a great diversity of livestock systems, depending on local resources and traditions, but also on the networking space where informational resources are available for producers. During the last decades, a lot of innovations have been conceived or introduced in the Mediterranean area, allowing livestock systems to remain competitive. The book looks at two main issues: firstly, it gives an updated review on the main innovations that significantly changed the activities of livestock production in the Mediterranean area in the recent past. Secondly, the focus lies on the extent to which these innovations improve the efficiency, ensure the socio-cultural basis or reduce the environmental impact of livestock systems. One major finding is a new vision of innovating systems based on the distinction between regulated innovation (when aims are fixed) and innovative design (when aims are questioned). Innovations reported in the book are dealing with a set of concerns. They concern the production techniques, the work organization, the equipment and infrastructures, the collective features for selection, reproduction, feeding or sanitary devices. They also concern the local organization such as product labelling, new dynamics around local breeds, collective rules for supply basin or approaches of new products for new markets. More recently, some innovations focus on environmental impacts of livestock production, due to an increasing consciousness of those kinds of problems. In the final part of the book, a round table copes with a crucial

question: are traditions in Mediterranean livestock activities to be considered an obstacle or a source of innovation? This book provides a set of updated information and knowledge useful for researchers, students, extension services and policy-makers in the field of animal science.

Labor, Markets, And Agricultural Production Jun 23 2023

Focusing on the complex and often contradictory relationships between agricultural production and markets, Labor, Markets, and Agricultural Production examines the micro-macro linkages between farm production, farm labor issues, and the degree of autonomy or dependency vis-à-vis markets. By comparing the case of farmers in Peru, generally regarded as peripheral agricultural producers, with that of European farmers able to easily access the centralized markets of the EEC, Dr. van der Ploeg is able to draw general conclusions about the ongoing process of commoditization of agriculture and the roles farmers play in agrarian development.

Accounting and Business Economics Apr 21 2023 The recent financial crisis has sparked debates surrounding the nature and role of accounting in informing capital markets and regulatory bodies about the financial performance and position of a firm. These debates have drawn attention to the broader implications of accounting for the economy and society. Accounting and Business Economics brings together leading international scholars to examine the current state of accounting theory and its fundamental connection with the economics and finance of firms, viewing the business entity

from not only accounting, but also national, economic, social, political, juridical, anthropological, and moral points of view.

The Agricultural Cooperative in the Framework of the European Cooperative Society Jul 24 2023 This book assesses the Statute for a European Cooperative Society (SCE) regarding agricultural activities by comparing how specific questions arising in this context must be dealt with under the Italian and Austrian legal systems. In this regard, Council Regulation (EC) No. 1435/2003, of 22 July 2003, on the Statute for a European Cooperative Society (SCE), is used as a tool for the structured analysis of various aspects of agricultural cooperatives. However, a comparison is only meaningful if the results are made comparable on the basis of a previously defined standard. Accordingly, the study uses, on one hand, a cooperative model developed by European legal scholars that defines general guidelines on how cooperatives should function (PECOL). On the other, the results are presented in connection with economic considerations to discuss how efficient rules can be developed.

La circolazione mortis causa dell'azienda Apr 16 2020 I volume mira ad una trattazione esaustiva ed analitica delle tematiche relative alle vicende dell'azienda dopo la morte dell'imprenditore individuale. Esamina in prospettiva

unitaria le opinioni dottrinali e gli orientamenti giurisprudenziali sulle questioni di maggiore interesse, tenendo conto anche dei problemi relativi agli incapaci di agire e alle connesse implicazioni di volontaria giurisdizione. La parte introduttiva è dedicata allo sviluppo storico della disciplina, a partire dai casi affrontati e dalle soluzioni fornite dai giuristi romani fino ad arrivare all'età delle codificazioni europee e, infine, alla normativa del codice civile del 1942, ricostruendo in via interpretativa la disciplina applicabile alle vicende successorie a titolo universale e particolare. L'illustrazione non ha mancato di tener conto delle problematiche che sono insorte o potrebbero insorgere nella prassi notarile, oltre che degli orientamenti espressi dagli organismi istituzionali del notariato sulle varie questioni. Per quanto il lavoro sia ispirato ad un'impostazione teorica, si è cercato di indirizzarne le conclusioni ad un ragionato esame delle varie difficoltà che insorgono nella realtà quotidiana e che esigono dall'interprete una soluzione adeguata dei problemi concreti.
