Climate and Energy Protection in the EU and China Jul 08 2022 This edited volume gives an insight into climate and energy protection in China and the European Union (EU). By taking a closer look at the EU and China separately, the book presents the current situation in terms of environmental policy and energy use/ consumption in EU as well as in China. The book broaches the collaboration of the EU and China regarding climate and energy protection. The target audience primarily comprises research experts in the field of climate research as well as public decision makers.

**Business, Environment, and Society** Apr 17 2023 This book blends theory and practice to support courses in corporate social responsibility (CSR), business and society, and environmental management and sustainability. Based on her extensive work with companies, the author offers engaging readings and teaching cases that address key challenges for business today - measurement, supply chain management, public policy, and stakeholder pressures. Part I focuses on the macro-level and provides an overview of concepts such as the green economy, eco-industrial parks, corporate social responsibility (corporate citizenship), nanotechnology, and sustainable consumption. Part II provides specific frameworks and tools for sustainability management and measurement at the company level. Part III includes detailed teaching

cases of several well-known firms. The main theme is that business is a key player in achieving a more sustainable development, yet its practices are often narrow in focus or shortsighted. The text provokes discussions around issues such as: Is business sustainability possible in a market economy focused on increasing consumption? Should a product or service be called "green" when it puts at risk the health and safety of workers? What can U.S. policymakers learn from their European counterparts when it comes to protecting human health and the environment? How can we ensure that the benefits of nanotechnology exceed its risks? How can sustainability indicators be used as a tool to advance sustainability by companies and policymakers? The book provides a flexible, up-to-date supplementary teaching tool for undergraduate and graduate students, executive education courses, and certificate programs. Intended Audience: Primarily undergraduate and graduate students taking courses in environmental management, corporate social responsibility (CSR), sustainability, or business and society; as a supplementary text in professional education and certificate programs in environmental management, corporate citizenship, sustainability, and CSR.

People and Products Dec 13 2022 By examining the interface between consumer behavior and new product development, *People and Products: Consumer Behavior and Product Design* demonstrates the ways in which consumers contribute to product design, enhance product utility, and determine brand identity. With increased connectedness and advances in technology, consumers and marketers are more closely connected than ever before. Yet consumer behavior texts often overlook the

application of the subject to product design, testing, and success. This is the first book to explore this interface in detail, exploring such issues as: the attributes and qualities that consumers demand from products and services, and social and cultural forces to be aware of; design and form and how they facilitate product usage; technological developments and the ways they have changed how consumers interact with products; product disposal and sustainability; emerging and future trends in consumer behavior and product development and design. This exciting volume is relevant to anyone interested in marketing, consumer behavior, product development, technology, engineering, design, and brand management.

**Social Epidemiology** Jan 02 2022 "Eleven fully updated chapters include entries on the links between health and discrimination, income inequality, social networks and emotion, while four all-new chapters examine the role of policies in shaping health, including how to translate evidence into action with multi-level interventions."

**OECD Economic Surveys: Israel 2016** Sep 29 2021  
This 2016 OECD Economic Survey of Israel examines  
recent economic developments, policies and prospects.  
The special chapters cover: Special Features: Boosting  
competition on Israeli markets and Improving the pension  
system.

**The Routledge Handbook of Poverty in the United  
States** Mar 04 2022 In the United States, the causes and  
even the meanings of poverty are disconnected from the  
causes and meanings of global poverty. The Routledge

Handbook of Poverty in the United States provides an authoritative overview of the relationship of poverty with the rise of neoliberal capitalism in the context of globalization. Reorienting its national economy towards a global logic, US domestic policies have promoted a market-based strategy of economic development and growth as the obvious solution to alleviating poverty, affecting approaches to the problem discursively, politically, economically, culturally and experientially. However, the handbook explores how rather than alleviating poverty, it has instead exacerbated poverty and pre-existing inequalities – privatizing the services of social welfare and educational institutions, transforming the state from a benevolent to a punitive state, and criminalizing poor women, racial and ethnic minorities, and immigrants. Key issues examined by the international selection of leading scholars in this volume include: income distribution, employment, health, hunger, housing and urbanization. With parts focusing on the lived experience of the poor, social justice and human rights frameworks – as opposed to welfare rights models – and the role of helping professions such as social work, health and education, this comprehensive handbook is a vital reference for anyone working with those in poverty, whether directly or at a macro level.

**International Organizations and the Implementation of the Responsibility to Protect** Jun 26 2021 This book seeks to understand the obligation of the international community to implement the principles of the Responsibility to Protect (R2P). With a focus on the humanitarian crisis in Syria, the volume examines what formal responsibility and actual capability international

institutions have to protect and prevent civilians from systematic mass atrocities and presents an analysis of several prominent international organizations (IOs). Each chapter focuses on a specific organization and explores their formal responsibilities and how these pertain to the obligations of the R2P. Existing capabilities and actual abilities to address the challenges of R2P are analysed by looking at these issues before, during, and after the occurrence of the humanitarian crisis in Syria. With the UN not fully engaged in the Syrian conflict, the systematic human rights abuses have engendered greater attention on other organizations. This volume argues that if the UN Security Council's inactions result in an abdication of responsibilities under the UN Charter, there should not only be a discussion of how the UN must alter its approach, but also an examination of whether there are alternative R2P paths for other MNOs to take in the name of international peace and human security. This book will be of much interest to students of R2P, humanitarian intervention, international organisations, Middle Eastern politics and security studies.

**Teaching and Learning at a Distance** Jul 16 2020  
Teaching and Learning at a Distance is written for introductory distance education courses for preservice or in-service teachers, and for training programs that discuss teaching distant learners or managing distance education systems. This text provides readers with the basic information needed to be knowledgeable distance educators and leaders of distance education programs. The teacher or trainer who uses this book will be able to distinguish between appropriate uses of distance education. In this text we take the following themes: The

first theme is the definition of distance education. Before we started writing the first edition of *Teaching and Learning at a Distance* we carefully reviewed the literature to determine the definition that would be at the foundation of our writing. This definition is based on the work of Desmond Keegan, but is unique to this book. This definition of distance education has been adopted by the Association for Educational Communications and Technology and by the *Encyclopedia Britannica*. The second theme of the book was the importance of research to the development of the contents of the book. The best practices presented in *Teaching and Learning at a Distance* are validated by scientific evidence. Certainly there are “rules of thumb”, but we have always attempted to only include recommendations that can be supported by research. The third theme of *Teaching and Learning at a distance* is derived from Richard Clark’s famous quote published in the *Review of Educational Research* that states that media are mere vehicles that do not directly influence achievement. Clark’s controversial work is discussed in the book, but is also fundamental to the book’s advocacy for distance education – in other words, we authors did not make the claim that education delivered at a distance was inherently better than other ways people learn. Distance delivered instruction is not a “magical” approach that makes learners achieve more. The fourth theme of the book is equivalency theory. Here we presented the concept that instruction should be provided to learners that is equivalent rather than identical to what might be delivered in a traditional environment. Equivalency theory helps the instructional designer approach the development of instruction for each

learner without attempting to duplicate what happens in a face to face classroom. The final theme for Teaching and Learning at a Distance is the idea that the book should be comprehensive – that it should cover as much of the various ways instruction is made available to distant learners as is possible. It should be a single source of information about the field.

**Water and Power** Dec 21 2020 This book brings together a talented international group of scholars, policy practitioners, and NGO professionals that explores a range of issues relating to environmental, developmental, and governing challenges on the Mekong, one of the world's greatest rivers and, alas, one of the most endangered. The book is divided into three sections devoted in turn to historical perspectives on the Lower Mekong Basin. Issues relate to livelihood strategies, environmental threats, and adaptation strategies; and various aspects of river governance, with individual authors treating questions of governance at different levels of refraction and in different registers. The result is a fresh and innovative collection of essays, which, taken together, provide much-needed new perspectives on some of the most important and seemingly intractable environmental and development issues in contemporary Asia.

References -- Glossary -- Index

**Academic Research Systems** Apr 24 2021 This book is a comprehensive examination system. However, for-profit college students should have approved writing and are habituated on training. It's been a proportion of the constitution that organized authored journals. Its

guidelines are the recovering of the microelectronic redundant vacating as an organization concerning reservation of the circumstantial as well as for-profit college journals and research documents. However, this is a new tactic. Many college students are not regular in study and use daily journal and researches. This book is systematically superfluous in State of Somalia College and in African colleges. There were no past studies in primary and high schools for journal and research. For-profit college journals, however, were present, as well as student-building professional academics. You must have those structures daily, if God wills you.

Covering American Politics in the 21st Century Dec 01 2021

*Beyond Energy* Apr 05 2022 Jacopo Maria Pepe examines the rapid development of non-energy transport infrastructure in the broader Eurasian space. By doing so, the author considers the ongoing structural transformation of the Eurasian continent against the backdrop of deepening commercial interconnectivity in Eurasia into broader areas of trade, supported by the rapid development of rail connectivity. He frames this process in a long-wave historical analysis and considers in detail the geopolitical, geo-economic, and theoretical implications of deepening physical connectivity for the relationships among China, Russia, Central Asia, and the European Union.

*Principles of Banking Regulation* Jan 22 2021 Analyses banking regulation and recent international developments, including Basel IV, bank resolution and Brexit, and their impact on bank governance.

**Aristotelian Character Education** Oct 19 2020 This

book provides a reconstruction of Aristotelian character education, shedding new light on what moral character really is, and how it can be highlighted, measured, nurtured and taught in current schooling. Arguing that many recent approaches to character education understand character in exclusively amoral, instrumentalist terms, Kristjánsson proposes a coherent, plausible and up-to-date concept, retaining the overall structure of Aristotelian character education. After discussing and debunking popular myths about Aristotelian character education, subsequent chapters focus on the practical ramifications and methodologies of character education. These include measuring virtue and morality, asking whether Aristotelian character education can salvage the effects of bad upbringing, and considering implications for teacher training and classroom practice. The book rejuvenates time-honoured principles of the development of virtues in young people, at a time when 'character' features prominently in educational agendas and parental concerns over school education systems. Offering an interdisciplinary perspective which draws from the disciplines of education, psychology, philosophy and sociology, this book will appeal to researchers, academics and students wanting a greater insight into character education.

*The Routledge Handbook of Urbanization and Global Environmental Change* Jan 14 2023 This volume provides a comprehensive overview of the interactions and feedbacks between urbanization and global environmental change. A key focus is the examination of how urbanization influences global environmental change, and how global environmental change in turn influences

urbanization processes. It has four thematic foci: Theme 1 addresses the pathways through which urbanization drives global environmental change. Theme 2 addresses the pathways through which global environmental change affects the urban system. Theme 3 addresses the interactions and responses within the urban system in response to global environmental change. Theme 4 centers on critical emerging research.

*China's Globalizing Internet* Jul 28 2021 This book considers the Chinese internet as an ensemble of ideas, ownership, policies, laws, and interests that intersect with pre-existing global elements and, increasingly, with deepening globalizing imperatives. It extends traditional inquiry about digital China and globalization and encourages closer attention to contestation, shifting international order, transformation of states, and new requirements of global digital capitalism. Across the three foci of history, power, and governance, this book considers the ways the Chinese internet is entangled with transnational capitals, ideas, and institutions, while at the same time manifests a strong globalizing drive. It begins with a historical political economy approach that emphasizes the dialectics between structural imperatives and historical contingency. As for governance, the Chinese state has set out to re-regulate the internet as the network becomes ubiquitous during the nation's web-oriented digital transformation. Such a state-centric governance model, however, is likely to affect China's global expansion, apart from the fact that the state is taking an active interest in global internet governance. This book will be of interest to researchers and advanced students of Communication Studies, Politics, Sociology, Economics,

Cultural Studies, and Science and Technology Studies. The chapters in this book were originally published as a special issue of the Chinese Journal of Communication.

**UGC NET JRF 1st Paper - Volume I** Sep 17 2020 This Volume consist 1st 4 Units 1. Teaching Aptitude 2.

Research Aptitude 3. Comprehension 4. Communication

**The Oxford Handbook of Ecumenical Studies** May 26 2021 This handbook is currently in development, with individual articles publishing online in advance of print publication. At this time, we cannot add information about unpublished articles in this handbook, however the table of contents will continue to grow as additional articles pass through the review process and are added to the site. Please note that the online publication date for this handbook is the date that the first article in the title was published online. For more information, please read the site FAQs.

Burma Mar 16 2023 This book is a practical and comprehensive guide to succeeding in business and investing in emerging Myanmar, formerly known as Burma. It covers the country's history, geography, demographics and market size, political environment, economic conditions and industries, and legal framework, cultural idiosyncrasies including religious issues. It also discusses language, beliefs and customs, business etiquette and attitudes, management and working styles, meetings and decision making, and negotiation strategies that work. The author identifies incentives offered with regard to tax relief and repatriation of profits, the various sectors that are opening up, and where opportunities for participation exist. He also highlights the risks inherent in entering an emerging and new market economy and

suggests ways of mitigating these risks. Strategies for success in an emerging Myanmar are propounded for both investors and businesses. This book allows for a deeper understanding of the business environment in Myanmar. You will be better able to evaluate the risk factors and options available and then make meaningful investment and business decisions.

Nov 12 2022

*Handbook of Regulatory Impact Assessment* Nov 19 2020

Regulatory impact assessment (RIA) is the main instrument used by governments and regulators to appraise the likely effects of their policy proposals. This pioneering Handbook provides a comparative and comprehensive account of this tool, situating it in the relevant theoretical traditions and scrutinizing its use across countries, policy sectors and policy instruments. Comprising six parts, university researchers, international consultants and practitioners working in international organizations examine regulatory impact assessment from many perspectives, which include: • research traditions in the social sciences • implementation, regulatory indicators and effects • tools and dimensions such as courts and gender • sectoral case studies including environment, enterprise and international development • international diffusion in the European Union (EU), Americas, Asia and developing countries • appraisal, training and education. With its wealth of detail and lessons to be learned, the Handbook of Regulatory Impact Assessment will undoubtedly be of great value to practitioners and scholars working in governance, political science and socio-

legal studies.

**UGC NET Paper 1 - 30 Solved Papers (2004 to 2018)**

Jun 14 2020 30 Solved Papers of UGC NET Paper 1 Exam (2004 - 2018) consists of past years (authentic) solved papers from 2018 Phase II to 2004 Phase II. The solutions have been prepared after a thorough research. The book contains 1700+ questions of 10 Units as prescribed in the UGC syllabus. The detailed solutions are provided immediately after each paper. The book is also useful for SET (JRF & Asst. Professor).

**Is the Planet Full?** Aug 09 2022 What are the impacts of population growth? Can our planet support the demands of the ten billion people anticipated to be the world's population by the middle of this century? While it is common to hear about the problems of overpopulation, might there be unexplored benefits of increasing numbers of people in the world? How can we both consider and harness the potential benefits brought by a healthier, wealthier and larger population? May more people mean more scientists to discover how our world works, more inventors and thinkers to help solve the world's problems, more skilled people to put these ideas into practice? In this book, leading academics with a wide range of expertise in demography, philosophy, biology, climate science, economics and environmental sustainability explore the contexts, costs and benefits of a burgeoning population on our economic, social and environmental systems.

*Drones and the Future of Air Warfare* May 06 2022 This book examines the evolution of airpower and specifically the growth and proliferation of Remotely Piloted Aircraft (RPAs). While most existing literature examines either the

law or ethics of RPAs, and some newer scholarship looks to the battlefield effectiveness (the gains from strikes versus the potential for 'blowback, etc.), this work investigates it from a broader military perspective. It examines the strategy for employment of RPAs across the spectrum of warfare, the potential deterrent value of RPAs in some circumstances, and the resulting ability of RPAs to fundamentally shift the character of when and how wars are fought. The central aim of this book is to evaluate the role of 'drones' in warfare to date, and make basic projections on how states will adopt RPAs and UCAVs in the future. At the core is the goal of answering a broad, underlying research question: How will the RPA innovation impact military strategy and international security? This book will be of much interest to students of airpower, drone warfare, military and strategic studies, security studies and IR.

### Coping with Crisis: Europe's Challenges and Strategies

Aug 29 2021 How has the economic and financial crisis that started in 2007 affected European integration?

Observers have been speculating about whether the crisis will ultimately lead to a strengthening or weakening of the European Union. This book studies the effects of the crisis on EU policy-making and institutional arrangements on one hand, and citizens' EU attitudes and political parties' electoral strategies on the other. It concludes that, at least in the short run, the crisis has overall created an opportunity for European integration rather than an obstacle. First, it has triggered events of proposed and actual far-reaching policy and institutional change. Second, negative effects on public opinion have not (yet) systematically translated into tendencies of stagnation or

disintegration. The book brings together established scholars of European integration whose diverse research expertise contributes to an improved theoretical and empirical understanding of how the economic and financial crisis has affected EU policies, institutions and citizens. This book was published as a special issue of the Journal of European Integration.

**Big Data Challenges** Oct 11 2022 This book brings together an impressive range of academic and intelligence professional perspectives to interrogate the social, ethical and security upheavals in a world increasingly driven by data. Written in a clear and accessible style, it offers fresh insights to the deep reaching implications of Big Data for communication, privacy and organisational decision-making. It seeks to demystify developments around Big Data before evaluating their current and likely future implications for areas as diverse as corporate innovation, law enforcement, data science, journalism, and food security. The contributors call for a rethinking of the legal, ethical and philosophical frameworks that inform the responsibilities and behaviours of state, corporate, institutional and individual actors in a more networked, data-centric society. In doing so, the book addresses the real world risks, opportunities and potentialities of Big Data.

**Too Little, Too Late** Sep 10 2022 The current approach to resolving sovereign debt crises does not work: sovereign debt restructurings come too late and address too little. Though unresolved debt crises impose enormous costs on societies, many recent restructurings have not been deep enough to provide the conditions for economic recovery (as illustrated by the Greek debt restructuring of

2012). And if the debtor decides not to accept the terms demanded by the creditors, finalizing a restructuring can be slowed by legal challenges (as illustrated by the recent case of Argentina, deemed as "the trial of the century"). A fresh start for distressed debtors is a basic principle of a well-functioning market economy, yet there is no international bankruptcy framework for sovereign debts. While this problem is not new, the United Nations and the global community are now willing to do something about it. Providing guidance for those who intend to take up reform, this book assesses the relative merits of various debt-restructuring proposals, especially in relation to the main deficiencies of the current nonsystem. With contributions by leading academics and practitioners, *Too Little, Too Late* reflects the overwhelming consensus among specialists on the need to find workable solutions.

UGC NET Paper 1 - 32 Solved Papers (2019 to 2004) 2nd Edition Apr 12 2020

*Impacts of the Knowledge Society on Economic and Social Growth in Africa* Feb 03 2022 In a world that is essentially digitizing, some have argued that the idea of the knowledge society holds the greatest promise for Africa's rapid socio-economic transformation. *Impacts of the Knowledge Society on Economic and Social Growth in Africa* aims to catalyze thinking and provide relevant information on the complex ways in which the information age is shaping Africa and the implications that this will have for the continent and the world. This premier reference volume will provide policy analysts, policymakers, academics, and researchers with fresh insights into the key empirical and theoretical matters framing Africa's ongoing digitization.

*World Literacy* Mar 24 2021 International literacy assessments have provided ample data for ranking nations, charting growth, and casting blame. Summarizing the findings of these assessments, which afford a useful vantage from which to view world literacy as it evolves, this book examines literate behavior worldwide, in terms of both the ability of populations from a wide variety of nations to read and the practice of literate behavior in those nations. Drawing on *The World's Most Literate Nations*, author Jack Miller's internationally released study, emerging trends in world literacy and their relationships to political, economic, and social factors are explored. Literacy, and in particular the practice of literate behaviors, is used as a lens through which to view countries' economic development, gender equality, resource utilization, and ethnic discrimination. Above all, this book is about trajectories. It begins with historical contexts, described in terms of support for literate cultures. Based on a variety of data sources, these trends are traced to the present and then projected ahead. The literate futures of nations are discussed and how these relate to their economic and sociocultural development. This book is unique in providing a broader perspective on an intractable problem, a vantage point that offers useful insights to inform policy, and in bringing together an array of relevant data sources not typically associated with literacy status.

*Business Information Systems Workshops* May 14 2020 This book constitutes the refereed proceedings of the four workshops that were organized in conjunction with the International Conference on Business Information Systems, BIS 2013, which took place in Poznań, Poland, in

June 2013. BIS workshops give researchers the opportunity to share their preliminary ideas and first experimental results and to discuss research hypotheses with a highly focused audience. The 25 papers in this volume were carefully reviewed and selected from 47 submissions and were revised and extended after the event. The workshop topics covered applications and economics of knowledge-based technologies (AKTB), business and IT alignment (BITA), enterprise systems for higher education (ESHE) and formal semantics for future enterprises (FSFE). In addition, two keynotes as well as ten papers presented at the PhD Symposium are also included in this volume.
