## **OCR Gateway GCSE 9-1 Physics Revision Guide: Ideal for Home Learning, 2022 and 2023 Exams (Collins GCSE Grade 9-1 Revision)**

Provides comprehensive study notes for the final year of A-level Physics, with several examples and practice questions. This title also matches the AS-level guide for A-level coverage. At the time of writing Tim Prichard has nearly 30 years' experience as a science teacher in several schools both in the UK and abroad, covering the entire age and ability range, including A level Physics and Chemistry. The author has found students revise and consolidate their knowledge best if they have access to a wide variety of worked examples to study from. Physics by Example is based upon this concept with each topic having a short introduction followed by around ten example questions. Each question has a full "e;step by step"e;, easy to follow solution, including hints and tips to help the student understand the methodology for each question. At the end of each section there is a self testing exercise with answers to help the students consolidate their knowledge. Prichard Guides work best if they are used in conjunction with the student's own notes to support their own learning. These guides provide a huge resource of model questions and answers which have been tried and tested in classrooms across the UK and abroad, as they have been the basis of the author's lessons for nearly three decades, have been very successful and are still being used in lessons today. Following the latest AQA GCSE Science specifications, this Revision Guide uses an accessible and concise approach to recap the essential knowledge students need to succeed. A checklist at the end of each unit clearly lists what students need to know and breaks revision down into manageable sections, while practice questions and study tips help prepare students for the exams. Mathematical skills that are needed for the exams are

highlighted and supported with short, visual explanations.
