Learn to Read Latin helps students acquire an ability to read and appreciate the great works of Latin literature as quickly as possible. It not only presents basic Latin morphology and syntax with clear explanations and examples but also offers direct access to unabridged passages drawn from a wide variety of Latin texts. As beginning students learn basic forms and grammar, they also gain familiarity with patterns of Latin word order and other features of style. Learn to Read Latin is designed to be comprehensive and requires no supplementary material explains English grammar points and provides drills especially for today's students offers sections on Latin metrics includes numerous unaltered examples of ancient Latin prose and poetry incorporates selections by authors such as Caesar, Cicero, Sallust, Catullus, Vergil, and Ovid, presented chronologically with introductions to each author and work offers a comprehensive workbook that provides drills and homework assignments. This enlarged second edition improves upon an already strong foundation by streamlining grammatical explanations, increasing the number of syntax and morphology drills, and offering additional short and longer readings in Latin prose and poetry. For Heinemann Mathematics P7, colour textbooks and workbooks are used by children to practise and record their understanding of concepts, skills and applications in number, measure, shape and handling data. They include a wide range of problem-solving and investigative work to develop children's ability to use and apply maths. The textbooks help promote children's recording skills using a variety of motivating contexts, and include activities to give further practice in applying maths. The format of the workbooks frees children to concentrate on the maths rather than on the presentation of their work, and each one contains a record-keeping grid to show work completed. Batty received most of his education from parochial schools. His first nine years were at Bethlehem Christian School in Kennewick, Washington, graduated from Concordia College-High School in Portland, Oregon in 1956. He received his A.A. degree from Columbia Basin College in Pasco, Washington in 1969, and B.A. degree in Education from Pacific Lutheran University in Tacoma, Washington in 1976. Otto majored in Social Studies with a strong emphasis in History. In 1961 while in Wyoming, Otto developed a great love for the Scripture. Over the years, he read 23 different translations and paraphrases of the Bible. He even read the Bible backwards from Revelation to Genesis. When asked why, he simply replied, "Just for fun." However, he wouldn't do it again or recommend it, saying "It was chronologically distracting." Otto has taught many Sunday School classes to both teenagers and adults. This work emerged out of those life experiences. The more Otto read the scripture the more he became excited about what he "discovered." It was quite a surprise to him to learn so many believers had never read the whole Bible through once. Filled with a hunger to encourage others to read and find the "gems" he found in the Scripture, in 1985 he wrote and taught this Bible Study with a twist. The emphasis is on "discovering the gems," not theology or doctrine. It is fast paced, fun, and simple. Its primary purpose; to encourage believers to apply Romans 10:17, "faith comes by hearing and hearing by the Word of God." A Perfect Workbook You'll Need to ACE the CLEP College Mathematics Test!
