The book that inspired the major new motion picture Mandela: Long Walk to Freedom. Nelson Mandela is one of the great moral and political leaders of our time: an international hero whose lifelong dedication to the fight against racial oppression in South Africa won him the

Nobel Peace Prize and the presidency of his country. Since his triumphant release in 1990 from more than a quarter-century of imprisonment, Mandela has been at the center of the most compelling and inspiring political drama in the world. As president of the African National Congress and head of South Africa's antiapartheid movement, he was instrumental in moving the nation toward multiracial government and majority rule. He is revered everywhere as a vital force in the fight for human rights and racial equality. LONG WALK TO FREEDOM is his moving and exhilarating autobiography, destined to take its place among the finest memoirs of history's greatest figures. Here for the first time, Nelson Rolihlahla Mandela tells the extraordinary story of his life--an epic of struggle, setback, renewed hope, and ultimate triumph. The must-have guide to honestly and sensitively answering your clients' questions Written to help therapists view their clients' questions as collaborative elements of clinical work, What Do I Say? explores the questions—some direct, others unspoken—that all therapists, at one time or another, will encounter from clients. Authors and practicing therapists Linda Edelstein and Charles Waehler take a thought-provoking look at how answers to clients' questions shape a therapeutic climate of expression that encourages personal discovery and growth. Strategically arranged in a question-and-answer format for ease of use,

this hands-on guide is conversational in tone and filled with personal examples from experienced therapists on twenty-three hot-button topics, including religion, sex, money, and boundaries. What Do I Say? tackles actual client questions, such as: Can you help me? (Chapter 1, The Early Sessions) Sorry I am late. Can we have extra time? (Chapter 9, Boundaries) I don't believe in all this therapy crap. What do you think about that? (Chapter 3, Therapeutic Process) Why is change so hard? (Chapter 4, Expectations About Change) Will you attend my graduation/wedding/musical performance/speech/business grand opening? (Chapter 20, Out of the Office) Where are you going on vacation? (Chapter 10, Personal Questions) I gave your name to a friend . . . Will you see her? (Chapter 9, Boundaries) Should I pray about my problems? (Chapter 12, Religion and Spirituality) Are you like all those other liberals who believe gay people have equal rights? (Chapter 13, Prejudice) The power of therapy lies in the freedom it offers clients to discuss anything and everything. It's not surprising then, that clients will surprise therapists with their experiences and sometimes with the questions they ask. What Do I Say? reveals how these questions—no matter how difficult or uncomfortable—can be used to support the therapeutic process rather than derail the therapist-client relationship. The design and functioning of an information system improve to the extent that the system can handle the questions people ask. Surprisingly, however, researchers in the cognitive, computer, and information sciences have not thoroughly examined the multitude of relationships between information systems and questions -- both question asking and answering. The purpose of this book is to

explicitly examine these relationships. Chapter contributors believe that questions play a central role in the analysis, design, and use of different kinds of natural or artificial information systems such as human cognition, social interaction, communication networks, and intelligent tutoring systems. Their efforts show that data structures and representations need to be organized around the questioning mechanisms in order to achieve a quick retrieval of relevant useful information.
