What role does law play in post-communist societies? This book examines the law as a social institution in Eurasia, exploring how it is shaped in everyday interactions between state and society, organisations and individuals, and between law enforcement and other government entities. It bridges the gap between theoretically rich work on law-in-action and the empirical reality of Eurasia. The contributions in this volume include research on policing, the legal profession, public attitudes towards law, regime support and oppositional mobilisation, crime policy, and property rights, among others. The studies shift away from the common perception that, in Eurasia, the law exists only as a tool for the state to enforce order and suppress dissent. Instead, they show, through empirical analyses, that citizens evade, use, reinterpret and shape the law even in authoritarian contexts—sometimes containing state violence and challenging the regime, and other times reinforcing state capture from below. The

chapters in this book were originally published as a special issue of the journal Europe-Asia Studies. Inspired by the author's observations of the language curriculum as a practising teacher for the past 20 years, this book addresses how the high school Chinese language and literacy (Yuwen) curriculum in China was controlled and directed in the post-Mao era. Examining the social and political domination from 1980 to 2010, the book offers insights into how teachers and schools responded to the top-down curriculum change in their teaching practice. This book discusses some of the most important questions concerning China and its education system: What changes have occurred in the Chinese language and literacy curricula; how and why the changes have occurred; who has been in control of the process and outcome; and what impacts the curriculum changes may bring not only to China but to the international sectors that "export" education and degrees to China and Chinese students. The author provides answers to these questions crucial to both the contemporary Chinese society and the students who come out of that system. This critical inquiry of the Yuwen curriculum and its implementation provides a valuable and timely showcase for understanding the ideology of China's future generation and the social and political transformation in the past three decades. In addition to researchers, this book is expected to have impact on

policymakers in China and beyond, where Chinese migrants and international students constitute a substantial learning population.
