The untold story of how the Dutch conquered the European book market and became the world's greatest bibliophiles--"an instant classic on Dutch book history" (BMGN - Low Countries Historical Review) "[An] excellent contribution to book history."--Robert Darnton, *New York Review of Books*

The Dutch Golden Age has long been seen as the age of Rembrandt and Vermeer, whose paintings captured the public imagination and came to represent the marvel that was the Dutch Republic. Yet there is another, largely overlooked marvel in the Dutch world of the seventeenth century: books. In this fascinating account, Andrew Pettegree and Arthur der Weduwen show how the Dutch produced many more books than pictures and bought and owned more books per capita than any other part of Europe. Key innovations in marketing, book auctions, and newspaper advertising brought

stability to a market where elsewhere publishers faced bankruptcy, and created a population uniquely well-informed and politically engaged. This book tells for the first time the remarkable story of the Dutch conquest of the European book world and shows the true extent to which these pious, prosperous, quarrelsome, and generous people were shaped by what they read. Internationale Organisationen (IO) wurden geschaffen, um globale öffentliche Güter bereitzustellen: darunter Sicherheit für alle, Handel für die Reichsten und Entwicklung für die Ärmsten. Ihre bloße Existenz ist heute ein Erfolgsversprechen für die kooperative Wende in den internationalen Beziehungen. Obwohl das IO-Netz einst von etablierten Mächten geschaffen wurde, können sich aufstrebende Staaten der massiven Produktion von Normen kaum entziehen. IO sind allgegenwärtig und üben großen Einfluss auf die Welt, wie wir sie kennen, aus. Allerdings sind sich Herrscher und Beherrschte dieser zwingenden und schneeballartigen Prozesse kaum bewusst. Yves Schemeil hat seine fundierten Kenntnisse über die IO genutzt, um ihre aktuellen Auswirkungen auf die internationalen Beziehungen und die Weltpolitik sowie ihr Potenzial zur Gestaltung der globalen Zukunft zu analysieren. The creator of one of the most innovative and best-selling video games of all time gives an unvarnished look into the process in this one-of-a-kind compilation. Before Prince of Persia was a best-selling video game franchise and a Disney movie, it was an Apple II computer game created and programmed by one person, Jordan Mechner. Mechner's candid and revealing journals from the time capture the journey from his parents' basement to the forefront of the fast-growing 1980s video game industry... and the creative, technical, and personal struggles that brought the prince into being and ultimately into the homes of millions of people worldwide. Now, on the 30th anniversary of Prince of Persia's release, Mechner looks back at the journals he kept from 1985 to 1993, offering new insights into the game that established him as a pioneer of cinematic storytelling in the industry. This beautifully illustrated and annotated collector's edition includes: 300 pages of Jordan's original journals, Present-day margin notations by Jordan adding explanation, context, and affectionate cartoons of real-life characters, Archival visuals illustrating the stages of the game's creation, Work-in-progress sketches, rotoscoped animation, screen shots, interface design, memos, and more, A full-color 32-page "Legacy" section in which Jordan and fans share Prince of Persia memories from the past 30 years, including the Ubisoft games and Disney movie. The Making of Prince of Persia is both a tribute to a

timeless classic, and an indelible look at the creative process that will resonate with retro-gaming fans, game developers, and writers, artists, and creators of all stripes. Startled by rapid social changes at the turn of the twentieth century, citizens of Atlanta wrestled with fears about the future of race relations, the shape of gender roles, the impact of social class, and the meaning of regional identity in a New South. Gavin James Campbell demonstrates how these anxieties were played out in Atlanta's popular musical entertainment. Examining the period from 1890 to 1925, Campbell focuses on three popular musical institutions: the New York Metropolitan Opera (which visited Atlanta each year), the Colored Music Festival, and the Georgia Old-Time Fiddlers' Convention. White and black audiences charged these events with deep significance, Campbell argues, turning an evening's entertainment into a struggle between rival claimants for the New South's soul. Opera, spirituals, and fiddling became popular not just because they were entertaining, but also because audiences found them flexible enough to accommodate a variety of competing responses to the challenges of making a New South. Campbell shows how attempts to inscribe music with a single, public, fixed meaning were connected to much larger struggles over the distribution of social, political, cultural, and economic power. Attitudes about

music extended beyond the concert hall to simultaneously enrich and impoverish both the region and the nation that these New Southerners struggled to create. The author of *The Footnote* reflects on scribes, scholars, and the work of publishing during the golden age of the book. From Francis Bacon to Barack Obama, thinkers and political leaders have denounced humanists as obsessively bookish and allergic to labor. In this celebration of bookmaking in all its messy and intricate detail, renowned historian Anthony Grafton invites us to see the scholars of early modern Europe as diligent workers. Meticulously illuminating the physical and mental labors that fostered the golden age of the book—the compiling of notebooks, copying and correction of texts and proofs, preparation of copy—he shows us how the exertions of scholars shaped influential books, treatises, and forgeries. *Inky Fingers* ranges widely, tracing the transformation of humanistic approaches to texts in the seventeenth and eighteenth centuries and examining the simultaneously sustaining and constraining effects of theological polemics on sixteenth-century scholars. Grafton draws new connections between humanistic traditions and intellectual innovations, textual learning and craft knowledge, manuscript and print. Above all, Grafton makes clear that the nitty-gritty of bookmaking has had a profound impact on the history of ideas—that the life of the mind depends on the work of the hands. From the critically acclaimed author of "The Rise and Fall of the British Empire" comes an unapologetic revisionist history of British rule in India. James recounts the twists and turns of imperialism and independence with a wealth of new material. 8-page photo insert. A Publishers Weekly Best Book of 2019

Why do we make things by hand? And why do we make them beautiful? Led by the question of why working with our hands remains vital and valuable in the modern world, author and maker Melanie Falick went on a transformative, inspiring journey. Traveling across continents, she met quilters and potters, weavers and painters, metalsmiths, printmakers, woodworkers, and more, and uncovered truths that have been speaking to us for millennia yet feel urgently relevant today: We make in order to slow down. To connect with others. To express ideas and emotions, feel competent, create something tangible and long-lasting. And to feed the soul. In revealing stories and gorgeous original photographs, *Making a Life* captures all the joy of making and the power it has to give our lives authenticity and meaning. It's said that decisions are made in the details. And yet, we make hundreds, even thousands of decisions daily. So how do Christians process all those details

and come up with answers that please God? In *Decision-Making by the Book*, author, lecturer, and radio personality, Haddon W. Robinson, takes his usual clear-eyed, not-a-word-wasted approach, to help you make decisions according to biblical principles—every time. Using beautiful full-color tutorials, Jenny Pfanenstiel teaches the basics of hat-making, from materials and fabric selection to stitching and finishing. All of the projects are scaled for difficulty so that readers can learn each of the highlighted skills while creating their own hats. Styles include cloche, fascinator, straw-brimmed, and other hats.

"*Making and Being* draws on the lived experience of Susan Jahoda and Caroline Woolard, visual arts educators who have developed a framework for teaching art with the collective BFAMFAPhD that emphasizes contemplation, collaboration, and political economy. The authors share ideas and pedagogical strategies that they have adapted to spaces of learning which range widely, from self-organized workshops for professional artists to Foundations BFA and MFA thesis classes. This hands-on guide includes activities, worksheets, and assignments and is a critical resource for artists and art educators today"--Page 4 of cover.

But, in meeting them, the city's diverse ethnic groups - French, Spanish, Anglo-America, and African-American - have created a place with a history and culture unlike any other in North America." The first book to address the significance of the materials and methods used to make contemporary artworks Today, artists are able to create using multiple methods of production—from painting to digital technologies to crowdsourcing—some of which would have been unheard of just a few decades ago. Yet, even as our means of making art become more extraordinary and diverse, they are almost never addressed in their specificity. While critics and viewers tend to focus on the finished products we see in museums and galleries, authors Glenn Adamson and Julia Bryan-Wilson argue that the materials and processes behind the scenes used to make artworks are also vital to current considerations of authorship and to understanding the economic and social contexts from which art emerges. This wide-ranging exploration of different methods and media in art since the 1950s includes nine chapters that focus on individual processes of making: Painting, Woodworking, Building, Performing, Tooling Up, Cashing In, Fabricating, Digitizing, and Crowdsourcing. Detailed examples are interwoven with the discussion, including visuals that reveal the intricacies of techniques and materials. Artists featured include Ai Weiwei, Alice Aycock, Isa Genzken, Los Carpinteros, Paul Pfeiffer, Doris Salcedo, Santiago Sierra, and Rachel

Whiteread. *Citizen Kane*, widely considered the greatest film ever made, continues to fascinate critics and historians as well as filmgoers. While credit for its genius has traditionally been attributed solely to its director, Orson Welles, Carringer's pioneering study documents the shared creative achievements of Welles and his principal collaborators. *The Making of Citizen Kane*, copiously illustrated with rare photographs and production documents, also provides an in-depth view of the operations of the Hollywood studio system. This new edition includes a revised preface and overview of criticism, an updated chronology of the film's reception history, a reconsideration of the locus of responsibility of Welles's ill-fated *The Magnificent Ambersons*, and new photographs. In *Democracy in the Making*, Kathleen M. Blee provides an in-depth look at modern grassroots activism, and reveals its simultaneous power and fragility. In the process, she examines the struggle between democratic vision and strategic reality that shapes each organization's trajectory and determines its ultimate success or failure. In *The West*, monastic ideals and scholastic pursuits are complementary; monks are popularly imagined copying classics, preserving learning through the Middle Ages, and establishing the first universities. But this dual identity is not without its contradictions. While monasticism emphasizes the virtues of poverty, chastity, and humility, the scholar, by contrast, requires expensive infrastructure—a library, a workplace, and the means of disseminating his work. In *The Monk and the Book*, Megan Hale Williams argues that Saint Jerome was the first to represent biblical study as a mode of asceticism appropriate for an inhabitant of a Christian monastery, thus pioneering the enduring linkage of monastic identities and institutions with scholarship. Revisiting Jerome with the analytical tools of recent cultural history—including the work of Bourdieu, Foucault, and Roger Chartier—Williams proposes new interpretations that remove obstacles to understanding the life and legacy of the saint. Examining issues such as the construction of Jerome's literary persona, the form and contents of his library, and the intellectual framework of his commentaries, Williams shows that Jerome's textual and exegetical work on the Hebrew scriptures helped to construct a new culture of learning. This fusion of the identities of scholar and monk, Williams shows, continues to reverberate in the culture of the modern university. "[Williams] has written a fascinating study, which provides a series of striking insights into the career of one of the most colorful and influential figures in Christian antiquity. Jerome's Latin Bible would become the foundational text for the intellectual

development of the West, providing words for the deepest aspirations and most intensely held convictions of an entire civilization. Williams's book does much to illumine the circumstances in which that fundamental text was produced, and reminds us that great ideas, like great people, have particular origins, and their own complex settings."—Eamon Duffy, *New York Review of Books*

Ingenuity in the Making explores the myriad ways in which ingenuity shaped the experience and conceptualization of materials and their manipulation in early modern Europe. Contributions range widely across the arts and sciences, examining objects and texts, professions and performances, concepts and practices. The book considers subjects such as spirited matter, the conceits of nature, and crafty devices, investigating the ways in which ingenuity acted in and upon the material world through skill and technique. Contributors ask how ingenuity informed the “maker’s knowledge” tradition, where the perilous borderline between the genius of invention and disingenuous fraud was drawn, charting the ambitions of material ingenuity in a rapidly globalizing world. This significant reassessment of Jacobean political culture reveals how colonizing America transformed English civility in early seventeenth-century England. This definitive political history from an ambassador of the Republic of Sudan unravels the background that led to the fracturing of a country. Author and ambassador Dr. Khidir Haroun Ahmed takes us on a journey as he traces the historical and internal/external factors that led to the division of Sudan and altered the political map of Africa. Spanning the nineteenth and twentieth centuries, *The Making and Breaking of the United Sudan* explores colonial rule, unstable national governments, and disruptive foreign intervention, which led to Sudan's civil war and changed the geography of Sudan. Ahmed's chronicle also focuses on understanding Sudan politics and explains the eventual establishment of two separate national governments in the region. This fascinating account of the formation and dissolution of a United Sudan offers an honest assessment of change and consequences. It provides a look at what worked and what failed and exposes the detrimental policies motivated by political agendas rather than the good of the people. Discusses how the movie "Star Wars" was made and how the special effects were created.

Why are human beings driven to make?

It's as if we collectively intuited, long before science gave us the language, that the universe bends toward entropy, and every act of creation on our part is an act of defiance in the face of that evolving disorder.

When we pick up a paintbrush, or compose elements through our camera viewfinders, or press fingers into wet clay to wrestle form from a shapeless lump, we are bending things back toward Order and wrestling them from Chaos.

But making things is often not enough.

We also want the things we make to be filled with meaning. We're each trying to describe what we know about life, to create a collective sense of "safety in numbers." When we reach the end of our traditional descriptive powers, it's time to weave collective meaning from poetry, painting, writing, dancing, photographing, filmmaking, storytelling, singing, animating, designing, performing, carving, sculpting, and a million other ways we daily create Order out of the Chaos and share it with each other for comfort.

On this journey we need a creative philosophy which will help us find our voice, discover our message, deal with the responses to our work, maintain inspiration, and stay mentally healthy and motivated creators as we strive to find "the meaning in the making."

A retelling of four Arthurian legends, "The Sword in the Stone," "Excalibur," "The Lady of the Lake," and "The Last Great Battle," which feature Merlin, King Arthur, and other familiar figures. The America that Alexander Hamilton knew was largely agricultural and built on slave labor. He envisioned something else: a multi-racial, urbanized, capitalistic America with a strong central government. He believed that such an America would be a land of opportunity for the poor and the newcomers. But Hamilton's vision put him at odds with his archrivals who envisioned a pastoral America of small towns, where governments were local, states would control their own destiny, and the federal government would remain small and weak. The disputes that arose during America's first decades continued through American history to our present day. Over time, because of the systems Hamilton set up and the ideas he left, his vision won out. Here is the story that epitomizes the American dream—a poor immigrant who made good in America. In the end, Hamilton rose from poverty through his intelligence and ability, and did more to shape our country than any of his contemporaries. The debates that raged when our nation was founded have been argued ever

since: How should the Constitution be interpreted? What is the meaning, and where are the limits of personal liberty? What is the proper role of the federal government? Who should be included in “we the people”? Each biography in the series tells the story of an American leader who helped shape the United States of today. A history of the common people and the Industrial Revolution: “A true masterpiece” and one of the Modern Library’s 100 Best Nonfiction Books of the twentieth century (Tribune). During the formative years of the Industrial Revolution, English workers and artisans claimed a place in society that would shape the following centuries. But the capitalist elite did not form the working class—the workers shaped their own creations, developing a shared identity in the process. Despite their lack of power and the indignity forced upon them by the upper classes, the working class emerged as England’s greatest cultural and political force. Crucial to contemporary trends in all aspects of society, at the turn of the nineteenth century, these workers united into the class that we recognize all across the Western world today. E. P. Thompson’s magnum opus, *The Making of the English Working Class* defined early twentieth-century English social and economic history, leading many to consider him Britain’s greatest postwar historian. Its publication in 1963 was highly controversial in academia, but the work has become a seminal text on the history of the working class. It remains incredibly relevant to the social and economic issues of current times, with the *Guardian* saying upon the book’s fiftieth anniversary that it “continues to delight and inspire new readers.” Slicing through blunt theories of supply and demand, Callon presents a rigorously researched but counterintuitive model of how everyday market activity gets produced. If you’re convinced you know what a market is, think again. In his long-awaited study, French sociologist and engineer Michel Callon takes us to the heart of markets, to the unsung processes that allow innovations to become robust products and services. *Markets in the Making* begins with the observation that stable commercial transactions are more enigmatic, more elusive, and more involved than previously described by economic theory. Slicing through blunt theories of supply and demand, Callon presents a rigorously researched but counterintuitive model of market activity that emphasizes what people designing products or launching startups soon discover—the inherent difficulties of connecting individuals to things. Callon’s model is founded upon the notion of “singularization,” the premise that goods and services must adapt and be adapted to the local milieu of every individual whose life they enter. Person by person, thing by thing, Callon demonstrates

that for ordinary economic transactions to emerge en masse, singular connections must be made. Pushing us to see markets as more than abstract interfaces where pools of anonymous buyers and sellers meet, Callon draws our attention to the exhaustively creative practices that market professionals continuously devise to entangle people and things. *Markets in the Making* exemplifies how prototypes, fragile curiosities that have only just been imagined, are gradually honed into predictable objects and practices. Once these are active enough to create a desired effect, yet passive enough to be transferred from one place to another without disruption, they will have successfully achieved the status of “goods” or “services.” The output of this more ample process of innovation, as redefined by Callon, is what we recognize as “the market”—commercial activity, at scale. The capstone of an influential research career at the forefront of science and technology studies, *Markets in the Making* coherently integrates the empirical perspective of product engineering with the values of the social sciences. After masterfully redescribing how markets are made, Callon culminates with a strong empirical argument for why markets can and should be harnessed to enact social change. His is a theory of markets that serves social critique.

From the New York Times bestselling author of *Then She Was Gone* comes a “compelling and heartbreaking” (Jojo Moyes) novel about three strangers who are brought together by the father they never knew. Lydia, Dean, and Robyn don’t know one another. Yet. Each is facing difficult challenges. Lydia is still wearing the scars from her traumatic childhood. Wealthy and successful, she leads a lonely and disjointed existence. Dean is a young, unemployed, single dad whose life is going nowhere. Robyn is eighteen. Gorgeous, popular, and intelligent, she entered her first year of college confident of her dream to become a pediatrician. Now she’s failing her classes. Now she’s falling in love for the first time. Lydia, Dean, and Robyn live very different lives, but each of them, independently, has always felt that something was missing. What they don’t know is that a letter is about to arrive that will turn their lives upside down. It is a letter containing a secret—one that will bind them together and show them what love and family and friendship really mean. “Filled with heart and humor” (Kirkus Reviews), *The Making of Us* is a literary gem that will remind readers of the miracles that happen when we bring life into the world and share our lives with those we love. Wealthy, powerful, and potentially dangerous, hedge-fund managers have emerged as the stars of twenty-first century capitalism. Based on unprecedented access

to the industry, *More Money Than God* provides the first authoritative history of hedge funds. This is the inside story of their origins in the 1960s and 1970s, their explosive battles with central banks in the 1980s and 1990s, and finally their role in the financial crisis of 2007-9. Hedge funds reward risk takers, so they tend to attract larger-than-life personalities. Jim Simons began life as a code-breaker and mathematician, co-authoring a paper on theoretical geometry that led to breakthroughs in string theory. Ken Griffin started out trading convertible bonds from his Harvard dorm room. Paul Tudor Jones happily declared that a 1929-style crash would be 'total rock-and-roll' for him. Michael Steinhardt was capable of reducing underlings to sobs. 'All I want to do is kill myself,' one said. 'Can I watch?' Steinhardt responded. A saga of riches and rich egos, this is also a history of discovery. Drawing on insights from mathematics, economics and psychology to crack the mysteries of the market, hedge funds have transformed the world, spawning new markets in exotic financial instruments and rewriting the rules of capitalism. And while major banks, brokers, home lenders, insurers and money market funds failed or were bailed out during the crisis of 2007-9, the hedge-fund industry survived the test, proving that money can be successfully managed without taxpayer safety nets. Anybody pondering fixes to the financial system could usefully start here: the future of finance lies in the history of hedge funds.

This classic account of artisan and working-class society in its formative years, 1780 to 1832, adds an important dimension to our understanding of the nineteenth century. E.P. Thompson shows how the working class took part in its own making and re-creates the whole life experience of people who suffered loss of status and freedom, who underwent degradation and who yet created a culture and political consciousness of great vitality. This speech was said to have been delivered by Willie Lynch on the bank of the James River in the colony of Virginia in 1712. Lynch was a British slave owner in the West Indies. He was invited to the colony of Virginia in 1712 to teach his methods to slave owners there. In this thought-provoking study (*Library Journal*), historian Kyle Ward—the widely acclaimed co-author of *History Lessons*—gives us another fascinating look at the biases inherent in the way we learn about our history. Juxtaposing passages from... At the center of this subtle ethnographic account of the Haya communities of Northwest Tanzania is the idea of a lived world as both the product and the producer of everyday practices. Drawing on his experience living with the Haya, Brad Weiss explores Haya ways of constructing and inhabiting their community, and

examines the forces that shape and transform these practices over time. In particular, he shows how the Haya, a group at the fringe of the global economy, have responded to the processes and material aspects of money, markets, and commodities as they make and remake their place in a changing world. Grounded in a richly detailed ethnography of Haya practice, Weiss's analysis considers the symbolic qualities and values embedded in goods and transactions across a wide range of cultural activity: agricultural practice and food preparation, the body's experience of epidemic disease from AIDS to the infant affliction of "plastic teeth," and long-standing forms of social movement and migration. Weiss emphasizes how Haya images of consumption describe the relationship between their local community and the global economy. Throughout, he demonstrates that particular commodities and more general market processes are always material and meaningful forces with the potential for creativity as well as disruption in Haya social life. By calling attention to the productive dimensions of this spatial and temporal world, his work highlights the importance of human agency in not only the Haya but any sociocultural order. Offering a significant contribution to the anthropological theories of practice, embodiment, and agency, and enriching our understanding of the lives of a rural African people, *The Making and Unmaking of the Haya Lived World* will interest historians, anthropologists, ethnographers, and scholars of cultural studies.
