HSC Advanced English is a practical work ebook designed to prepare students for HSC English Advanced Paper 2. Effective writing strategies for writing analytically about prescribed texts and related texts and modelled responses written to syllabus requirements are included to help students develop their understanding of and comprehensively write about each module in the NSW HSC Advanced English Examination, Paper 2. Students will also develop skills in responding to and composing texts in different ways. Conquer the syllabus with Excel-the comprehensive study guide! This guide has been written to focus only on the syllabus outcomes for each text in the HSC Advanced English course. So you can read an analysis of

each text that is completely syllabus focused. All fifty-two prescribed texts for the course have been summarised plus related texts have been covered. Every text has been analysed according to the syllabus outcomes specific to its Module or Area of Study. HSC Golden Guide to English (Advanced) is a textbook designed to teach students how to craft Band 6 level responses in English. The textbook is modelled on the highly successful educational method of example-based learning. Each piece of guidance provided in the textbook is supported by Band 6 examples using prescribed texts from the 2018 Year 12 Advanced English syllabus, so that students may see and learn for themselves how to improve their writing. The strategic philosophy of the textbook allows students to independently master HSC English without having to rely on tutoring or copious amounts of memorisation. The 250+ pages textbooks are divided into three sections: Practical Skills: including guides to essay preparation, essay writing, adapting to exam questions, writing in different formats such as speech, and supporting workbook exercises. Discovery: including syllabus deconstruction and clarification, creative writing, responding to short answer questions, 2018 Discovery texts, adapting to Discovery exam questions, and supporting workbook exercises. Modules A, B, C: including syllabus deconstruction and clarification, 2018 Modules texts, adapting to Modules

exam questions, and supporting workbook exercises. "This combined book is written for the new Year 12 Mathematics Advanced + Extension 1 courses, which are being introduced into the NSW syllabus in 2020. This book has been written with two main objectives: it can be used as a textbook for classroom use, as well as a step-by-step resource to be used independently by students for their own self-study purposes. This book provides sufficiently clear explanations about each topic in the syllabus, with worked out examples and alternative methods, where applicable. Questions are categorised by topic and graded from easy to hard, to help guide students in their learning. Each chapter also contains a set of review exercises and challenge problems, as well as fully worked solutions for each question. The review exercises will help consolidate students' skills and knowledge, while improving their competence and confidence. The book also features challenge problems. While they may extend beyond the syllabus, they are designed to provide extra stimulus for highly motivated students and increase confidence for the harder questions in the Higher School Certificate examination." -- Publisher's website. Dealing with current hot topics, this book aims to provide an update on advances in the treatment of endocrine disorders. The chapters cover innovative therapeutic approaches to type 1 diabetes, such as artificial pancreas and islet transplantation. Additionally, novel pharmacological interventions for patients with obesity and the metabolic syndrome, as well as with adrenal and gonadal disorders are provided. Furthermore, recent developments in growth-promoting therapies, such as the C-type natriuretic peptide analog to treat achondroplasia, as well as antioxidant and gene replacement therapies in patients with adrenoleukodystrophy, are described. Worldwide renowned experts share their

experience and cutting edge research in Advanced Therapies in Pediatric Endocrinology and Diabetology, which makes it a useful and interesting resource for every pediatric endocrinologist, not only those active in clinical research, but also those involved in the management of children with endocrine diseases in daily practice. Over the past ten years there has been a dramatic increase in new nursing roles and nurse-led clinics within oncology. This unique handbook is a comprehensive companion for nurses studying and practising at an advanced level in this emerging field. This text outlines and discusses roles, responsibilities and skills related to advanced practice in oncology nursing - including leadership, communication skills and prescribing - linking throughout to the implications for clinical practice. It then provides a step-by-step guide to setting up and developing nurse-led clinics, looking in more detail at clinics focusing on surgery, chemotherapy, radiotherapy, clinical trials and follow ups, and providing an in-depth case example of a clinic set up for adjuvant Herceptin use. Practical, relevant and underpinned by current legislation, Advanced Nursing Practice and Nurse-led Clinics in Oncology is an invaluable resource for oncology nurses.
