came from the U.S. or Canada. There were four plenary addresses; they were delivered by Hans Freudenthal on major problems of mathematics education, Hermina Sinclair on the relationship between the learning of language and of mathematics, Seymour Papert on the computer as carrier of mathematical culture, and Hua Loo-Keng on popularising and applying mathematical methods. George Polya was the honorary president of the Congress; illness prevented his planned attendance but he sent a brief presentation entitled, "Mathematics Improves the Mind". There was a full program of speakers, panelists, debates, miniconferences, and meetings of working and study groups. In addition, 18 major projects from around the world were invited to make presentations, and various groups representing special areas of concern had the opportunity to meet and to plan their future activities.

Design for Learning Jan 16 2023 This important book is the result of a study of school curriculum undertaken by a joint committee of the University of Toronto and the Board of Education for the City of Toronto. Three sub-committees, dealing with English, Social Science, and Physical Science, here present preliminary reports which indicate the need for perpetual study if the school curriculum is to be kept abreast of modern developments in each discipline. Committee members responsible for the reports are themselves elementary, secondary or university teachers of experience. Their recommendations, embracing all grades up to and including Thirteen, are specific, stimulating and controversial. They are unanimous only in their concern that necessary changes be made and that study of the curriculum be continuous and objective. The reports are prefaced by a discerning essay written by Northrop Frye, Principal Frye points out that "the real barriers to break down were those between the three major divisions of education, the primary, secondary and university levels, each of which tends to become a self-enclosed system, congratulating itself on its virtues and blaming whatever deficiencies the educational process as a whole may have on the other systems." This book will be of interest to teachers at all levels, to officials, responsible for policy in our public education, to trustees, to parents, and to the increasing number of general public who care about education. The Chairmen of the three committees were: English, Mary Campbell (Parkdale Collegiate Institute); Social Science, C.B. Macpherson (Department of Political Economy, University of Toronto); Physical Science, Charlotte M. Sullivan (Department of Zoology, University of Toronto). The Editor, Northrop Frye, is Principal of Victoria College, University of Toronto.

University English for Academic Purposes in China May 08 2022

This book uses an in-depth, phenomenological interview approach to explain the generational characteristics of today's Chinese university youths and the critical dispositions they believe indispensable in acquiring English as an academic language in and outside school settings. By presenting the authentic voices of the recruited participants, the book clarifies how English for academic purposes (EAP), as an emerging global phenomenon and a research-informed practice, enables and empowers them for conscious self-transformation and critical awareness development through language study. The book also explores issues arising in the fields of general English language teaching as well as traditional and critical EAP, and discusses university English language learners' learning needs and rights. The book further promotes a dynamic and transformative University EAP pedagogy of particularity, practicality, and possibility moving from the oppression of language education to its liberation, and the increasing critical consciousness among the present and future university youths in a time of great social changes.
