***Street and other developments. Efforts to secure the American city have life-or-death implications, yet demands for heightened surveillance and security throw into sharp relief timeless questions about the nature of public space, how it is to be used, and under what conditions. Blending historical and geographical analysis, this book examines the vital relationship between struggles over public space and movements for social justice in the United States. Don Mitchell explores how political dissent gains meaning and momentum--and is regulated and policed--in the real, physical spaces of the city. A series of linked cases provides in-depth analyses of early twentieth-century labor demonstrations, the Free Speech Movement and the history of People's Park in Berkeley, contemporary anti-abortion protests, and efforts to remove homeless people from urban streets. A reconstruction of the major Abstract Expressionist's life includes coverage of her debutante years in the Midwest, her marriage to Barney Rosset, Jr. and her pioneering achievements as a woman in male-dominated artistic circles. By the author of Shadows, Fire, Snow. Fifteen minutes before five o'clock on Good Friday, 1998, Senator George Mitchell was informed that his long and difficult quest for an Irish peace accord had succeeded--the Protestants and Catholics of Northern Ireland, and the governments of the Republic of Ireland and the United Kingdom, would sign the agreement. Now Mitchell, who served as independent chairman of the peace talks for***

***the length of the process, tells us the inside story of the grueling road to this momentous accord. For more than two years, Mitchell, who was Senate majority leader under Presidents Bush and Clinton, labored to bring together parties whose mutual hostility--after decades of violence and mistrust--seemed insurmountable: Sinn Fein, represented by Gerry Adams; the Catholic moderates, led by John Hume; the majority Protestant party, headed by David Trimble; Ian Paisley's hard-line unionists; and, not least, the governments of the Republic of Ireland and the United Kingdom, headed by Bertie Ahern and Tony Blair. The world watched as the tense and dramatic process unfolded, sometimes teetering on the brink of failure. Here, for the first time, we are given a behind-the-scenes view of the principal players--the personalities who shaped the process--and of the contentious, at times vitriolic, proceedings. We learn how, as the deadline approached, extremist violence and factional intransigence almost drove the talks to collapse. And we witness the intensity of the final negotiating session, the interventions of Ahern and Blair, the late-night phone calls from President Clinton, a last-ditch attempt at disruption by Paisley, and ultimately an agreement that, despite subsequent inflammatory acts aimed at destroying it, has set Northern Ireland's future on track toward a more lasting peace. Upon George Mitchell's death in 2013, The Economist proclaimed, "Few businesspeople have done as much to change***

***the world as George Mitchell," a billionaire Texas oilman who defied the stereotypical swagger so identified with that industry. In *George P. Mitchell: Fracking, Sustainability, and an Unorthodox Quest to Save the Planet*, award-winning author Loren C. Steffy offers the first definitive biography of Mitchell, placing his life and legacy in a global context, from the significance of his discoveries to the lingering controversies they inspired. Mitchell will forever be known as "the father of fracking," but he didn't invent the drilling process; he perfected it and made it profitable, one of many varied ventures he pursued for years. Long before his company ever fracked a well, he pioneered sustainable development by creating The Woodlands, near Houston, one of the first and most successful master-planned communities. Its focus on environmental protection and livability redefined the American suburb. This apparent contradiction between his energy interests and environmental pursuits, which his son Todd dubbed "the Mitchell Paradox," was just one of many that defined Mitchell's life. Anyone who puts fuel in a tank or turns on a light switch has benefited from Mitchell's efforts. This compelling biography reveals Mitchell as a modern renaissance man who sought to make the world a better, more livable place, a man whose unbounded intellectual curiosity led him to support a wide range of interests in business, science, and philanthropy. Originally published in 1969, this monograph has become known***

***as a standard source for the history of the revivalist Egyptian movement, the Muslim Brethren, up to the time of Nasser. The work has been reissued for those scholars and students interested in the Muslim revival. By the New York Times bestselling author of The Bone Clocks | Shortlisted for the Man Booker Prize A postmodern visionary and one of the leading voices in twenty-first-century fiction, David Mitchell combines flat-out adventure, a Nabokovian love of puzzles, a keen eye for character, and a taste for mind-bending, philosophical and scientific speculation in the tradition of Umberto Eco, Haruki Murakami, and Philip K. Dick. The result is brilliantly original fiction as profound as it is playful. In this groundbreaking novel, an influential favorite among a new generation of writers, Mitchell explores with daring artistry fundamental questions of reality and identity. Cloud Atlas begins in 1850 with Adam Ewing, an American notary voyaging from the Chatham Isles to his home in California. Along the way, Ewing is befriended by a physician, Dr. Goose, who begins to treat him for a rare species of brain parasite. . . . Abruptly, the action jumps to Belgium in 1931, where Robert Frobisher, a disinherited bisexual composer, contrives his way into the household of an infirm maestro who has a beguiling wife and a nubile daughter. . . . From there we jump to the West Coast in the 1970s and a troubled reporter named Luisa Rey, who stumbles upon a web of corporate greed and murder that threatens to claim her life. . . . And onward,***

***with dazzling virtuosity, to an inglorious present-day England; to a Korean superstate of the near future where neocapitalism has run amok; and, finally, to a postapocalyptic Iron Age Hawaii in the last days of history. But the story doesn't end even there. The narrative then boomerangs back through centuries and space, returning by the same route, in reverse, to its starting point. Along the way, Mitchell reveals how his disparate characters connect, how their fates intertwine, and how their souls drift across time like clouds across the sky. As wild as a videogame, as mysterious as a Zen koan, Cloud Atlas is an unforgettable tour de force that, like its incomparable author, has transcended its cult classic status to become a worldwide phenomenon. *masterpieces of Western literature. Journal of an Expedition into the Interior of Tropical Australia By Thomas Mitchell* In 1837, Mitchell sought 18 months leave from his position and in May he left Sydney for London. During his leave, he published an account of his explorations called *Three Expeditions Into the Interior of Eastern Australia: with descriptions of the recently explored region of Australia Felix, and of the present colony of New South Wales*. Mitchell sought additional periods of leave and finally arrived back in Australia in 1841. Mitchell left Sydney again in March 1847 on another period of leave. By the time he arrived back in mid-1848, he had published his *Journal of an Expedition into the Interior of Tropical Australia*, in search of a route from Sydney to the Gulf of Carpentaria. We are delighted to publish this classic book as part of our extensive Classic Library collection. Many of the books in our collection have been out of print for decades, and therefore have not been accessible to the general public. Thomas Mitchell, Thomas Mitchell books, Thomas Mitchell pdf Gone With the Wind, a 1936 novel by Margaret Mitchell—winner of the Pulitzer Prize and one of the bestselling novels of all time—has been heralded by readers everywhere as The Great American Novel. Gone with the Wind is often placed in the literary subgenre of the historical romance novel. The epic romance tale set in and around Atlanta, Georgia during the American Civil War has remained a bestseller, even before the equally popular film starring Clark Gable and Vivian Leigh was made in 1939. The novel has also been described as an early classic of the erotic historical genre, because it is thought to contain some degree of pornography. The novel tells of archetypal Southern belle Scarlett O'Hara as she grows from a young woman into maturity against the backdrop of the American Civil War. Like many of the early 20th century Southern writers, Mitchell portrays an idyllic image of the antebellum South. While it can be legitimately criticized for its insensitivity to the treatment of African Americans who were enslaved, Mitchell's novel demonstrates how the South was decimated by the Civil War and continued to suffer under the Northern-sanctioned Restoration. An English-language rendering of the world's oldest epic seeks to convey the work's literary richness and follows the journey of conquest*

***and self-discovery by the heroic king of Uruk, in an edition complemented by an introduction that places the story in its historical, spiritual, and cultural context. By the author and translator of The Book of Job and Tao Te Ching. 50,000 first printing. 'Of ways you may speak, but not the Perennial Way; By names you may name, but not the Perennial Name.' The best-loved of all the classical books of China and the most universally popular, the Daodejing or Classic of the Way and Life-Force is a work that defies definition. It encapsulates the main tenets of Daoism, and upholds a way of being as well as a philosophy and a religion. The dominant image is of the Way, the mysterious path through the whole cosmos modelled on the great Silver River or Milky Way that traverses the heavens. A life-giving stream, the Way gives rise to all things and holds them in her motherly embrace. It enables the individual, and society as a whole, to harmonize the disparate demands of daily life and achieve a more profound level of understanding. This new translation draws on the latest archaeological finds and brings out the word play and poetry of the original. Simple commentary accompanies the text, and the introduction provides further historical and interpretative context. ***in its fourth edition, Family Matters offers an enriched discussion on a variety of substantive issues experienced by diverse Canadian families across the life course. Adopting a feminist sociological approach throughout, this popular textbook explores family dynamics through a critical life course theoretical lens. This over-arching perspective is used to examine how social, economic, and historical processes related to gender roles, age and generational location, ethnicity and race, geographical location, and social change shape contemporary family life. As a leading name in sociology, Barbara Mitchell has thoroughly updated the previous edition to reflect timely current events, recent census data, and cutting-edge research. Providing more detailed and nuanced discussions of many areas including life course and other styles of critical theorizing on families, this new edition examines the history of slavery and Black family life in Canada, Indigenous families, foreign/temporary workers, intersectional and racialized processes influencing families, youth activism, transgender children, technology and social media, and the impact of the COVID-19 pandemic on aging families. Approachable, concise, and filled with discussion questions, activities, and resources for further reading, Family Matters is the perfect resource for students enrolled in introductory or advanced level courses in family sociology and gender studies. Sociologist Duneier, author of Slim's Table, offers an accessible and compelling group portrait of several poor black men who make their livelihoods on the sidewalks of Greenwich Village selling secondhand goods, panhandling, and scavenging books and magazines. Duneier spent five years with these individuals, and in Sidewalk he argues that, contrary to the opinion of various city officials, they actually contribute significantly to the order and well-being of the Village. An important study of the heart and mind of the street, Sidewalk also features an insightful afterword by longtime book vendor Hakim Hasan. This fascinating study reveals today's urban life in all its complexity: its vitality, its conflicts about class and race, and its surprising opportunities for empathy among strangers. CULTURAL ANTHROPOLOGY: Sidewalk engages the rich terrain of recent developments regarding representation, writing, and authority; in the tradition of Elliot Liebow and Ulf Hannerz, it deals with age old problems of the social and cultural experience of inequality; this is a telling study of culture on the margins of American society. CULTURAL STUDIES: Breaking down disciplinary boundaries, Sidewalk shows how books and magazines are received and interpreted in discussions among working-class people on the sidewalk; it shows how cultural knowledge is deployed by vendors and scavengers to generate subsistence in public space. Residential colleges are the foundation on which US higher education is based. These institutions possess storied traditions fondly cherished by students, alumni, and faculty. There is no denying, however, that all colleges today struggle with changing consumer preferences, high sticker prices, and aging infrastructure. Technological and pedagogical alternatives—not to mention growing political pressure—present complex challenges. What can colleges and smaller universities do to stay relevant in today’s educational and economic climate? In their concise guide, How to Run a College, Brian C. Mitchell and W. Joseph King analyze how colleges operate. Widely experienced as trustees, administrators, and faculty, they understand that colleges must update their practices, monetize their assets, and focus on core educational strategies in order to build strong institutions. Mitchell and King offer a frank yet optimistic vision for how colleges can change without losing their fundamental strengths. To survive and become sustainable, they must be centers of dynamic learning, as well as economic engines able to power regional, state, and national economies.
