The proliferation of mobile media in recent years is an international phenomenon, with billions of devices sold annually. Mobile communications are now moving beyond individualized voice to mass media content--text, voice, sound, images, and even video. This will create new types of content that allow media companies and users to interact in new ways. There is a strong interest from the media and telecom industries in what manner of applications and content can be distributed in that fashion, and at what cost. To answer these questions, the book provides 18 chapters from internationally renowned authors. They identify likely types of content such as news, entertainment, peer-to-peer, and location-specific information; evaluate the economics, business models, and payment mechanisms necessary to support these media; and cover policy dimensions such as copyright, competitiveness, and access rights for content providers. This volume takes the reader through the various elements that need to be considered in the development of third generation (3G) content, and explains pitfalls and barriers. The result is a volume of interest to business professionals, academics, and policy makers. The book is international in focus and a glossary of terms is provided. There are few publications available which give an overview of this rapidly changing field. "This book introduces preschool and elementary teachers to a broad range of high-quality children's literature books and stories and provides them with background information so that they can use Jewish children's literature thoughtfully with their students"-- Sharing is caring! Originally published in 1996. During the author's decade of critical ethnography in Carpinteria, California, she has illuminated the intricate relationships between Latino families as together they build a sociopolitical community to bridge family and school alliances. How they extend their learning from the social networks to the family arena and to the personal, and in reverse, represents their protean responses to the diversity and adversity in their lives. This life-story captures the collective and individual texts of the Latino children, their parents and educators used to empower themselves to transform discontinuity in an age where continuity is increasingly foreign. Modern notions of empathy often celebrate its ability to bridge divides, to unite humankind. But how do we square this with the popular view that we can never truly comprehend the experience of being someone else? In this book, Samuel Fleischacker delves into the work of Adam Smith to draw out an understanding of empathy that respects both personal difference and shared humanity. After laying out a range of meanings for the concept of empathy, Fleischacker proposes that what Smith called “sympathy” is very much what we today consider empathy. Smith's version has remarkable value, as his empathy calls for entering into the perspective of another—a uniquely human feat that connects people while still allowing them to define their own distinctive standpoints. After discussing Smith's views in relation to more recent empirical and philosophical studies, Fleischacker shows how turning back to Smith promises to enrich, clarify, and advance our current debates about the meaning and uses of empathy.

L'home sharing è un'attività semplice e divertente, adatta a tutti che, se gestita bene dal punto di vista amministrativo e dell'offerta di ospitalità dei turisti, può creare un reddito aggiuntivo.
