The French empire between the wars is the first study of the French colonial empire at its height in the twenty years following the First World War. Based on extensive archival research, it addresses current debates about French methods of rule and their impact on colonial peoples, the origins of decolonisation, and the role of popular imperialism in French society and culture. By considering the distinctiveness of the inter-war years as a discrete period of colonial change, this book addresses several larger issues, such as tracing the origins of decolonisation in the rise of colonial nationalism, and a re-assessment of the impact of inter-war colonial rebellions in Africa, Syria and Indochina. The book also connects French theories of colonial governance to the lived experience of colonial rule in a period scarred by war and economic dislocation. The author analyses colonial decision-making in Paris and the renewed threat of global war, as well as colonial economic conditions and forms of discrimination in the empire to illustrate the process of French imperial decline. Between World War I and World War II, Britain endured sweeping social, political, religious, and economic changes. Includes the pivotal year of 1936 and the failed peace negotiations with Hitler. This study examines the feminist, African-American and populist avant-garde that flourished in the era of American modernism. This text is a comprehensive study of the United States from 1919 to 1941. It is based around the authors' narrative which is

combined with source material which seeks to give students a deep insight into the boom years of the 1920s and the harsh Depression of the 1930s. Full syllabus coverage is provided and also included are the real history classroom strategies that the Schools History Project have pioneered. It is based around the authors' narrative which is combined with source material which seeks to give students a deep insight into the boom years of the 1920s and the harsh Depression of the 1930s. Popular in Australia, it is supported by a comprehensive Teacher Resource Book. In this innovative theoretical book, Elizabeth Kier uses a cultural approach to take issue with the conventional wisdom that military organizations inherently prefer offensive doctrines. Kier argues instead that a military's culture affects its choices between offensive and defensive military doctrines. Drawing on organizational theory, she demonstrates that military organizations differ in their worldview and the proper conduct of their mission. It is this organizational culture that shapes how the military responds to constraints, such as terms of conscription set by civilian policymakers. In richly detailed case studies, Kier examines doctrinal developments in France and Great Britain during the interwar period. She tests her cultural argument against the two most powerful alternative explanations and illustrates that neither the functional needs of military organizations nor the structural demands of the international system can explain doctrinal choice. She also reveals

as a myth the argument that the lessons of World War I explain the defensive doctrines in World War II. Imagining War addresses two important debates. It tackles a central debate in security studies: the origins of military doctrine. And by showing the power of a cultural approach, it offers an alternative to the prevailing rationalist explanations of international politics. Originally published in 1997. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905. Considers major developments in the US affecting children and traces the social construction of childhood during the years between WWI and WWII. Contains chapters on expansion of education, the US Children's Bureau, the rise of child-rearing experts, social agencies and their impact on children and families, and the importance of the Great Depression and the New Deal for young people and youth culture. Includes b & w photos. c. Book News Inc. The European Economy between the Wars, (OUP, 1997) has become the definitive economic history of Europe in the inter-war period. Placing the Great Depression

of 1929-33 and the associated financial crisis at the center of the narrative, the authors comprehensively examined the lead-up to and consequences of the depression and recovery. The authors now expand their scope to include the entire world economy, and have created a new edition: The World Economy between the Wars. New material focuses on the structure of the world economy in the 1920s, including a special focus on the United States, Japan, and Latin America. World War I created a set of forces that affected the political arrangements and economies of all the countries involved. This period in global economic history between World War I and II offers rich material for studying international monetary and sovereign debt policies. Debt and Entanglements between the Wars focuses on the experiences of the United States, United Kingdom, four countries in the British Commonwealth (Australia, New Zealand, Canada, Newfoundland), France, Italy, Germany, and Japan, offering unique insights into how political and economic interests influenced alliances, defaults, and the unwinding of debts. The narratives presented show how the absence of effective international collaboration and resolution mechanisms inflicted damage on the global economy, with disastrous consequences. Martin Kitchen's compelling account of Europe between the wars sets the twenty-year crisis within the context of the profound sense of cultural malaise shared by many philosophers and artists, the economic crises that plagued a Europe ruined by war

and the social upheavals caused by widespread unemployment and grinding poverty amid a noticeable improvement of living standards. This thoroughly revised edition, with completely new sections on intellectual, cultural and social history is richly illustrated with contemporary photographs. It is an up-to-date and lively account of a critical period of European history when the old world collapsed, the dictators offered seemingly exciting alternatives, and democracies were put to the supreme test. Written for undergraduate students studying 20th century European history, this new edition of a classic will challenge and provoke a deeper understanding of the interwar years. Mary S. Barton explores the global war on terror that Great Britain, the United States, and France waged during the interwar years between World War I and World War II. This book begins by considering responses by French artists to the First World War, showing how Purism, Dada, and early Surrealism are related to the ethos of post-war reconstruction. The authors then discuss the language of construction in places as dissimilar as France, Germany, and the Soviet Union; the contrasting demands of the utility and decoration of objects and paintings; and the relationship of surrealism to questions of sexuality and gender and to Freudian theory. The book concludes by addressing the widespread debate over realism in art: whether it represents an alternative to the elitism of the avant-garde or whether avant-garde art should play a role in

the development of a modern realism. A U.S. Military Academy historian analyzes America's exit strategies in conflicts ranging from the American Revolution to the Gulf War, providing fifteen essays by leading authorities to offer insight into each war's goals, campaigns, and legacies. "Brilliant... highly original in its approach and meticulously cautious, concise and convincing in its judgments." --Sidney B. Fay, The Yale Review "Diplomacy Between the Wars" is a detailed inside story of diplomacy seen through the careers of five remarkable career diplomatists. Here is a unique and authentic picture of practical diplomacy and its effect during periods of international crisis which shaped the twentieth century. These were not the statesmen and politicians who dominated the international stage but practical diplomats with long experience, linguistic competence, deep knowledge of the local conditions, history, culture and of the people of the countries where they served. George Liebmann also brings acute political awareness to the subject. The achievements of these diplomats - often unsung during their careers and gleaned largely from history books - were considerable and a monument to practical, professional diplomacy. Lewis Einstein was influential in demonstrating the central role - and its control - of finance and credit in modern wars and urging massive US economic assistance to Europe and after World War II providing the intellectual underpinnings of the Marshall Plan; Sir Horace Rumbold's work was vital in avoiding war between

Great Britain and Turkey and in warnings of the dangers of Hitler; Johann von Bernstorff opposed Germany's 'naval militarism', supported a negotiated end to the First World War and peaceful revision of the Treaty of Versailles; Count Carlo Sforza urged restraint on Italy's territorial ambitions and tolerance for former Fascists and Communists; and Ismet Inonu kept Turkey out of war, preserved her national interest at the Treaty of Lausanne and maintained friendship with the great powers. He worked for religious toleration and the limitation of dictatorship in Ataturk's secular Turkish Republic. This series offers a complete, up-to-date survey of the phenomena of the 1900s and the first years of the new millennium through an original, transversal and interdisciplinary analysis of artistic culture in the twentieth century. The second volume analyses and presents the hugely diverse world of artistic production between the two world wars, taking into consideration not only the environment that took shape in the immediate wake of the First World War, from the so-called "return to order" to the re-emergence of a figurative approach (The New Objectivity, Novecento Italiano, Magic Realism) that was profoundly anti-avant-garde yet imbued with strong plastic and semantic values, but also the evolution of an avant-garde that was now historicised, with its second-generation artists (Aerial Painting, the second generation of Futurism). Also considered are the codification of certain phenomena, such as

Surrealism, changes in taste (from Art Deco to Novecentismo), as well as art as the expression of the totalitarian regimes, and the outbreak of the Second World War, with the embracing of environments outside Europe, particularly the USA. The chronological boundaries are marked by the birth of the Dadaist experience in Germany and the establishment of Metaphysics in Italy (1917- 1920) on one side and by the birth of the great season of U.S. Abstract Expressionism (1943-1945) on the other. A critical analysis the decade leading up to September 11 details America's role as a superpower in the wake of the collapse of the Berlin Wall; the events, politics, debates, and decisions that shaped the world of today; the impact of the terrorist attacks; and important lessons for the future. Updated with a new afterword. Reprint. This volume's central assertion is that the 'forgetting' of European women's contributions during the period between the two world wars was not accidental but was ideologically motivated. Key concerns are canon formation. genre, literature and journalism, women's political activism, antifascism, the avant-garde, professional life, and women's involvement in voluntary associations. Bringing together scholars with diverse expertise, the collection invites connections and comparisons across the whole spectrum of women's political, social, and cultural activities. The main theme of the book is that the new types of sanctions constitute a challenge to the international system. First, there are more of the

targeted sanctions, including financial, travel, aviation, special commodity and arms sanctions. Furthermore, there are considerable but varied practices in implementation. Also there are now sanctions by new actors (regional bodies, international organizations). These all put new strains on international bodies in carrying out sanctions or getting member states to work together in these efforts. These challenges are analyzed in this volume, with some examples, but mostly from a generalist perspective. A completely novel aspect is that this volume also includes studies of the difficulties that are met by targeting actors, their way of managing the situations, and most interesting, the human rights of such actors. The region between the Baltic and the Black Sea was marked by a set of crises and conflicts in the 1920s and 1930s, demonstrating the diplomatic, military, economic or cultural engagement of France, Germany, Russia, Britain, Italy and Japan in this highly volatile region, and critically damaging the fragile post-Versailles political arrangement. The editors, in naming this region as "Middle Europe" seek to revive the symbolic geography of the time and accentuate its position, situated between Big Powers and two World Wars. The ten case studies in this book combine traditional diplomatic history with a broader emphasis on the geopolitical aspects of Big-Power rivalry to understand the interwar period. The essays claim that the European Big Powers played a key role in regional affairs by keeping the local conflicts and national

movements under control and by exploiting the region's natural resources and military dependencies, while at the same time strengthening their prestige through cultural penetration and the cultivation of client networks. The authors, however, want to avoid the simplistic view that the Big Powers fully dominated the lesser players on the European stage. The relationship was indeed hierarchical, but the essays also reveal how the "small states" manipulated Big-Power disagreements, highlighting the limits of the latter's leverage throughout the 1920s and the 1930s. In the two decades between the First and the Second World wars, Toronto was finding its place in the swiftly changing world of the twentieth century. In the 1920s the city was expanding, the automobile replaced the horse, and radio, movies and mass advertising began to have a huge impact on everyday life. Then the Depression hit in 1929, and ordinary people struggled to keep a roof over their heads and food on the table. As the thirties progressed, the threat of another devastating war in Europe grew stronger. Toronto Between the Wars offers a tantalizing view into life in the city during those two decades: women working in the accounting department at Loblaws; a crowd cheering at Woodbine Race Track; swimmers at the new Sunnyside pool; Lady Eaton opening the new College Street Eaton's store; banners welcoming the King and Queen in 1939; and the unemployed sleeping in a bandshell at Queen's Park. Book jacket. Here, Patrick Crowhurst

identifies the crucial political problem that faced Czechoslovakia between 1918 and 1939 - the rift between the Czechs and the Sudeten Germans that would open the way for the rise of Konrad Henlein's right-wing 'Sudeten Deutsch' party, and which was exploited ruthlessly by Hitler during Nazi Germany's 1938 annexation of Czechoslovakia. A History of Czechoslovakia Between the Wars deepens our understanding of a fragile Europe before World War II, and is essential for students and scholars of 20th century history. America in the 1920s and '30s saw the emergence of some of the best known writers of the modern generation: John Steinbeck, Ernest Hemingway, and William Faulkner. Focusing on Berlin's heyday as a hotbed of both artistic excellence and moral decadence, this survey also assesses the political and historical factors that encouraged - or failed to prevent - the rise of Nazism. Britain is celebrated for having avoided the extremism, political violence and instability that blighted many European countries between the two world wars. But her success was a closer thing than has been realized. Disillusionment with parliamentary democracy, outbreaks of fascist violence and fears of communist subversion in industry and the Empire ran through the entire period. Fascist organizations may have failed to attract the support they achieved elsewhere but fascist ideas were adopted from top to bottom of society and by men and women in all parts of the country. This book will demonstrate for the first time

the true spread and depth of fascist beliefs - and the extent to which they were distinctly British. Rich in anecdotes and extraordinary characters, Hurrah for the Blackshirts! shows us an inter-war Britain on the high-road to fascism but never quite arriving at its destination. The must-read summary of Chollet and Goldgeier's book: "America Between the Wars : From 11/9 to 9/11: The Misunderstood Years Between the Fall of the Berlin Wall and the Start of the War on Terror". This complete summary of "America Between the Wars" by Derek Chollet, former Assistant Secretary of Defense, and James Goldgeier, a renowned political professor, presents their examination of how the decisions made in the 12 years between the fall of the Berlin Wall and the beginning of the war on terror following 9/11 have shaped the world today. It attempts to outline how - and why - America failed to recognise that when they became the sole superpower with responsibility for the world's oversight, they overlooked how the new world actually worked. Added-value of this summary:

- Save time • Gain deeper understanding of the war on terror and foreign policy • Expand your knowledge of American and global politics***

To learn more, read "America Between the Wars" and discover how the decisions made in America in the 12 years between wars have shaped the world today. This study examines the position of women from all classes who worked in industries and services during World War 1 and were then told to go "back to the home" or to

domestic service when the war finished. Franklin D. Roosevelt once described the South as "the nation's number one economic problem." These twelve original, interdisciplinary essays on southern indigence between the World Wars share a conviction that poverty is not just a dilemma of the marketplace but also a cultural and political construction. Although previous studies have examined the web of coercive social relations in which sharecroppers, wage laborers, and other poor southerners were held in place, this volume opens up a new perspective. These essays show that professed forces of change and modernization in the South--writers, photographers, activists, social scientists, and policymakers--often subtly upheld the structures by which southern labor was being exploited. Planters, politicians, and others who enforced the southern economic and social status quo not only relied on bigotry but also manipulated deeply held American beliefs about sturdy yeoman nobility and the sanctity of farm and family. Conversely, any threats to the system were tarred with the imagery of big cities, northerners, and organized labor. The essays expose vestiges of these beliefs in sources as varied as photographs from the Farm Security Administration, statistics for incarceration and child labor, and the writings of Grace Lumpkin, Ellen Glasgow, and Erskine Caldwell. This volume shows that those who work to eradicate poverty--and even victims of poverty themselves--can hesitate to cross the line of race, gender, memory, or

tradition in pursuit of their goal. The central aim of this interdisciplinary book is to make visible the intentionality behind the 'forgetting' of European women's contributions during the period between the two world wars in the context of politics, culture and society. It also seeks to record and analyse women's agency in the construction and reconstruction of Europe and its nation states after the First World War, and thus to articulate ways in which the writing of women's history necessarily entails the rewriting of everyone's history. The years between World War I and World War II were years of change and reform. This enlightening title discusses some of the most prominent events during this time, including the Harlem Renaissance, a rise in new literature and entertainment, suffrage, the stock market crash on "Black Tuesday," and the Great Depression. The authentic images, colorful scrapbook layout, and easy to read text work in conjunction with an accessible glossary, index, and engaging sidebars to intrigue readers as they move through the pages of this book. This collection situates over seventy essential primary documents in their historical context to illustrate the American experience during the interwar era (1919-1941). Introduces a broad range of cultural and historical topics, from race and the role of women to trends in literature and the Great Depression Includes a range of photographs and illustrations End-of-chapter questions encourage critical thinking and analysis, while a bibliography prepares students for

further research Distinguished historian Martin Pugh offers a colourful and controversial revisionist history of Britain in the 1920s-30s. Papers from a conference analyze Poland's historiography, the dispute with Germany over Upper Silesia, national identity and ethnic minorities, the 1920 victory over the Red Army at Warsaw, the role of the press, and defense preparations before World War I. Sian Reynolds challenges the prevailing assumption that women had little influence or power in France during the interwar period. She combines extensive empirical research with revealing insights into France's political history and women's history. Cosmopolitan atmosphere attracted a large artistic and intellectual circle from every corner of France and the Western world. In this book the art life of the era is comprehensively documented and placed in its original context, showing the extent to which the extreme, often baffling, antics of the avant-garde affected quotidian existence. Captured in image and text alike are gatherings of artists and intellectuals in cafes, studios, new boutiques, innovative examples of. A study of the rise of Hitler and the Nazis, based on a narrative, pictures, source extracts, questions, and assignments. Emphasis is on key ideas, concepts and use of evidence and is designed to be especially suited to Standard Grade, as well as GCSE. At the end of 1918 one prescient American historian began to write a history of the Great War. "What will you call it?" he was asked. "The First World War" was his bleak

response. In Between the Wars Philip Ziegler examines the major international turning points - cultural and social as well as political and military - that led the world from one war to another. His perspective is panoramic, touching on all parts of the world where history was being made, giving equal weight to Gandhi's March to the Sea and the Japanese invasion of China as to Hitler's rise to power. It is the tragic story of a world determined that the horrors of the First World War would never be repeated yet committed to a path which in hindsight was inevitably destined to end in a second, even more devastating conflict. Organised into sections on society, culture, politics and the economy, and embracing subjects as diverse as women novelists and village crafts, this book argues that almost everywhere we look in the countryside between the wars there were signs of new growth and dynamic development.
