The History of Norway Aug 16 2020

Went the Day Well? Apr 23 2021 In these pages, acclaimed historian David Crane gives us an astonishing, intimate snapshot of the people and places surrounding the battle that changed the course of world history. Switching perspectives between Britain and Belgium, prison and palace, poet and pauper, husband and wife, *Went the Day Well?* offers a highly original view of Waterloo, showing how the battle was not only a military landmark, but also a cultural watershed that drew the line between the rural, reactionary age of the past and the urban, innovative era to come. Lyrically rendered in Crane's signature prose style, this essential account freeze-frames the ordinary men and women of 1815 who went about their business, attended lectures, worked in fields and factories—all on the cusp of a new, unforeseeable age.

Electronic Circuits with MATLAB, PSpice, and Smith Chart
Jul 07 2022 Provides practical examples of circuit design and analysis using PSpice, MATLAB, and the Smith Chart This book presents the three technologies used to deal with electronic circuits: MATLAB, PSpice, and Smith chart. It gives students, researchers, and practicing engineers the necessary design and modelling tools for validating electronic design concepts involving bipolar junction transistors (BJTs), field-effect transistors (FET), OP Amp circuits, and analog filters. Electronic Circuits with MATLAB®, PSpice®, and Smith Chart presents analytical solutions with the results of MATLAB analysis and PSpice simulation. This gives the reader information about the state of the art and confidence in the legitimacy of the solution, as long as the solutions obtained by using the two software tools agree with each other. For representative examples of impedance matching

and filter design, the solution using MATLAB and Smith chart (Smith V4.1) are presented for comparison and crosscheck. This approach is expected to give the reader confidence in, and a deeper understanding of, the solution. In addition, this text: Increases the reader's understanding of the underlying processes and related equations for the design and analysis of circuits Provides a stepping stone to RF (radio frequency) circuit design by demonstrating how MATLAB can be used for the design and implementation of microstrip filters Features two chapters dedicated to the application of Smith charts and two-port network theory Electronic Circuits with MATLAB®, PSpice®, and Smith Chart will be of great benefit to practicing engineers and graduate students interested in circuit theory and RF circuits.

***Den falska bilden av Israel* Oct 10 2022 Den falska bilden av Israel dokumenterar vilka vanföreställningar om den judiska staten som är utbredda i Norge. Den ger svar på hur denna bild har skapats genom flera decennier med ensidig och felaktig information från norska medier och skolböcker. Det är särskilt det statliga tv-bolaget NRK och nyhetsbyrån NTB som får sin agenda avslöjad. "Boken Den falska bilden av Israel är som ett knytnävslag mot medievärldens självbild,**

utrikesbevakning och multikulturella nonchalans. Alla, som tar sig tid att läsa hela verket, kommer att bli skakade av felen, ensidigheterna och den direkt pro-arabiska propagandan. Inte slumpartade och urskuldande enstaka misstag gjorda under tidspress, utan systematisk desinformation och hets mot Israel i reportage efter reportage, år efter år. Kritiken är noggrant dokumenterad och fundamental och borde vara obligatorisk läsning vid alla fakultet och skolor som undervisar i journalistik och kommunikation." Alf R. Jacobsen, författare och journalist, i bokens förord. "I en tid präglad av diskussioner om fake news, alternativ media, mediakritik och där de traditionella nyhetsmedierna blir allt mer ifrågasatta ligger Conrad Myrlands skrift precis rätt i tiden. Israels öppenhet är ofta ett tveeggat svärd, då man utsätts för en medial bevakning som ofta kännetecknas av dubbla måttstockar. Myrlands bok är ett självklart bidrag till alla de som är intresserade av hur medier efterföljer sitt uppdrag i asymmetriska konfliktzoner." Martin Blecher, statsvetare

Bringing the People Back In Aug 28 2021 The formation of states in early modern Europe has long been an important topic for historical analysis. Traditionally, the political and military struggles of kings and rulers were the favoured object of study for academic historians. This book highlights new historical research from Europe's northern frontier, bringing 'the people' back into the discussion of state politics, presenting alternative views of political and social relations in the Nordic countries before industrialisation. The early modern period was a time that witnessed initiatives from people from many groups formally excluded from political influence, operating outside the structures of central government, and this book returns to the subject of contentious politics and state building from below.

Inventing Human Rights: A History May 25 2021 "A tour de force."—Gordon S. Wood, New York Times Book Review
How were human rights invented, and how does their tumultuous history influence their perception and our ability to protect them today? From Professor Lynn Hunt comes this

extraordinary cultural and intellectual history, which traces the roots of human rights to the rejection of torture as a means for finding the truth. She demonstrates how ideas of human relationships portrayed in novels and art helped spread these new ideals and how human rights continue to be contested today.

Greek Thought, Arabic Culture Nov 30 2021 From the middle of the eighth century to the tenth century, almost all non-literary and non-historical secular Greek books, including such diverse topics as astrology, alchemy, physics, botany and medicine, that were not available throughout the eastern Byzantine Empire and the Near East, were translated into Arabic. **Greek Thought, Arabic Culture** explores the major social, political and ideological factors that occasioned the unprecedented translation movement from Greek into Arabic in Baghdad, the newly founded capital of the Arab dynasty of the 'Abbasids', during the first two centuries of their rule. Dimitri Gutas draws upon the preceding historical and philological scholarship in Greco-Arabic studies and the study of medieval translations of secular Greek works into Arabic and analyses the social and historical reasons for this phenomenon. Dimitri Gutas provides a stimulating, erudite and well-documented survey of this key movement in the transmission of ancient Greek culture to the Middle Ages.

The MKB42, MP43, MP44 and the Sturmgewehr 44 Apr 11 2020 The Sturmgewehr is the mother of all assault rifles and a major step in the development of the modern firearm. It combined low production costs with special ammunition, resulting in a cheap but a very effective full-automatic rifle. Fortunately, development and adoption was delayed by Hitler's objections, thus limiting the amount of guns that actually reached the front.

**Norwegen Traumziel nicht nur für Kreuzfahrer Sep 09 2022
Ein Traumziel, ein Land, in das man eine Reise unternimmt, sollte man nicht nur besichtigen und vielleicht bestaunen, um danach mit vielen Fotos und Erinnerungen wieder ins Alltagsleben zurück zu kehren. Ich habe bei meinen Reisen die Erfahrung gemacht, dass die Erlebnisse und Begegnungen in der Fremde intensiver und lohnender wurden, wenn ich ein wenig über das Land wusste, über die Menschen, ihre Gewohnheiten und aktuellen Themen. Meine Freude darüber gilt vor allem meinem Traumziel Norwegen. Darum verstehe ich mich hier als Vermittlerin von Themen, die im Allgemeinen nicht so bekannt sind; als Erzählerin von Geschichten aus Vergangenheit und Gegenwart; als Berichterstatterin von Informationen, die den Blick auf Land und Leute schärfen.**
