Critical Care of Children with Heart Disease presents a thorough review of the practical concepts, available treatment techniques, and the challenges associated with managing these patients in the critical care unit. It represents a timely and

valuable textbook reference for students and practising healthcare professionals alike seeking to learn or further their understanding of the latest advances in this discipline. This clinical casebook is comprised of surgical cases involving the most important cardiovascular diseases in a concise, easy-to-read format (5x8 in trim size, like other titles in this burgeoning, informal product line in the Springer clinical medicine program). Each chapter is a case that opens with a unique clinical presentation, followed by a description of the diagnosis, assessment and management techniques used to treat it, as well as questions and answers (between 8 and 10) about relevant aspects related to the diagnosis and treatment of the addressed disease. The Q&A section will broaden discussion and increase the title's pedagogical value. The casebook features 40 surgical cases in the following thematic areas: Aortic Disease, Arrhythmias, Cardiac Tumors, Coronary Insufficiency, Congenital Heart Disease, Endovascular Therapies, Heart Failure, Heart Transplantation, Mechanical Circulatory Support, Pericardial Disease, Pulmonary Embolism and Valvular Heart Disease. This book will be prepared by the Brazilian Department for Academic Leagues of Cardiovascular Surgery, within the Brazilian Society of Cardiovascular Surgery (BSCVS). This department is the section within BSCVS that consists of the academic leagues of cardiovascular surgery from each university throughout the country. In Brazil, medical academic leagues are organizations that gathers students, interns and residents to discuss a certain topic and promote research and teaching-oriented extra-class activities, supervised by a group of professors. Thus trainees will have involvement in writing the chapters and the senior professor supervisors will edit and finalize the work. Basically, each chapter is written by an intern or resident and, ultimately, his/her supervisor. As the books volume editors, doctors Almeida and Jatene will have final responsibility for the cases and overall manuscript. This book highlights peer reviewed articles from the 1st International Conference on Renewable Energy and Energy Conversion, ICREEC 2019, held at Oran in Algeria. It presents recent advances, brings together researchers and professionals in the area and presents a

platform to exchange ideas and establish opportunities for a sustainable future. Topics covered in this proceedings, but not limited to, are photovoltaic systems, bioenergy, laser and plasma technology, fluid and flow for energy, software for energy and impact of energy on the environment.

Drawing from a rich corpus of art works, including sarcophagi, tomb paintings, and floor mosaics, Patrick R. Crowley investigates how something as insubstantial as a ghost could be made visible through the material grit of stone and paint. In this fresh and wide-ranging study, he uses the figure of the ghost to offer a new understanding of the status of the image in Roman art and visual culture. Tracing the shifting practices and debates in antiquity about the nature of vision and representation, Crowley shows how images of ghosts make visible structures of beholding and strategies of depiction. Yet the figure of the ghost simultaneously contributes to a broader conceptual history that accounts for how modalities of belief emerged and developed in antiquity. Neither illustrations of ancient beliefs in ghosts nor depictions of afterlife, these images show us something about the visual event of seeing itself. The Phantom Image offers essential insight into ancient art, visual culture, and the history of the image. As Gregor Samsa awoke one morning from uneasy dreams he found himself transformed in his bed into a gigantic insect. The *Metamorphosis* - the masterpiece of Franz Kafka - was first published in 1915 and is one of the seminal works of fiction of the twentieth century. The novel is cited as a key influence for many of today's leading authors; as Auden wrote: "Kafka is important to us because his predicament is the predicament of modern man".

Traveling salesman, Gregor Samsa, wakes to find himself transformed into a

large, monstrous insect-like creature. The cause of Gregor's transformation is never revealed, and as he attempts to adjust to his new condition he becomes a burden to his parents and sister, who are repelled by the horrible, verminous creature Gregor has become. A harrowing, yet strangely comic, meditation on human feelings of inadequacy, guilt, and isolation, *The Metamorphosis* has taken its place as one of the most widely read and influential works of twentieth-century fiction.

Are you tempted beyond your power to resist? There is no question that addictions soil our souls, eventually taking control of our lives. The energy and motivation needed to serve the cause of Christ gets badly short-changed. That's the bad news. Here's the good news. Biblical Christianity provides a way to rise up from this quicksand: Waiting! Learning to eagerly wait for the Lord's return is essential to overcoming the root demand beneath all addictions. But the choice to wait is easy to state but hard to make because arranging for a temporary and counterfeit experience quiets the demand of our tired and thirsty souls. While there is no path to walk that eliminates the struggle to resist temptation we can be moving into greater freedom from it every day. As we learn to wait eagerly for heaven when all our longings will be fully and forever satisfied, we will be inclined to live for one central reason: to make this life work as we want it to. Two things will then happen: One, we will find ourselves driven by self-centeredness, by an

addictive concern for our own felt well-being; Two, whatever either numbs our discontent with things as they are or provides a convincing sense of satisfaction for our deeply felt longings will lead us toward addictions of any available variety, all fueled by a core addiction to self. Waiting for heaven to provide everything our souls yearn for, demanding nothing now, frees us to love well now, to delight God and to be there for others, requiring nothing in return. The result? Joy! The satisfaction of living and loving like Jesus. George Orwell's famous satire of the Soviet Union, in which "all animals are equal but some animals are more equal than others." The Conquest of Happiness is Bertrand Russell's recipe for good living. First published in 1930, it pre-dates the current obsession with self-help by decades. Leading the reader step by step through the causes of unhappiness and the personal choices, compromises and sacrifices that (may) lead to the final, affirmative conclusion of The Happy Man New edition of the classic complete reference book for cardiologists and trainee cardiologists on the theory and practice of electrocardiography, one of the key modalities used for evaluating cardiology patients and deciding on appropriate management strategies. relevance to conference themes, relevance to audience, contribution to scholarship, standard of writing, originality and critical analysis. The aim of this volume is twofold.
