Supreme Court Appellate Division- First Department Jan 29 2021

Sociology in America Jul 18 2022 Though the word "sociology" was coined in Europe, the field of sociology grew most dramatically in America. Despite that disproportionate influence, American sociology has never been the subject of an extended historical examination. To remedy that situation—and to celebrate the centennial of the American Sociological Association—Craig Calhoun assembled a team of leading sociologists to produce *Sociology in America*. Rather than a story of great sociologists or departments, *Sociology in America* is a true history of an often disparate field—and a deeply considered look at the ways sociology developed intellectually and institutionally. It explores the growth of American sociology as it addressed changes and challenges throughout the twentieth century, covering topics ranging from the discipline's intellectual roots to understandings (and misunderstandings) of race and gender to the impact of the Depression and the 1960s. Sociology in America will stand as the definitive treatment of the contribution of twentieth-century American sociology and will be required reading for all sociologists. Contributors: Andrew Abbott, Daniel Breslau, Craig Calhoun, Charles Camic, Miguel A. Centeno, Patricia Hill Collins, Marjorie L. DeVault, Myra Marx Ferree, Neil Gross, Lorine A. Hughes, Michael D. Kennedy, Shamus Khan, Barbara Laslett, Patricia Lengeremann, Doug McAdam, Shauna A. Morimoto, Aldon Morris, Gillian Niebrugge, Alton Phillips, James F. Short Jr., Alan Sica, James T. Sparrow, George Steinmetz, Stephen Turner, Jonathan VanAntwerpen, Immanuel Wallerstein, Pamela Barnhouse Walters, Howard Winant

Classical Sociological Theory Feb 10 2022 A world-class introduction to the historical and continuing impact of classical theory on sociological debate The latest edition of *Classical Sociological Theory* offers students a definitive guide to the theoretical foundations of sociology and the continuing impact of the ideas explored by early theorists, including Marx, Durkheim, Weber, Mead, Simmel, Freud, Du Bois, Adorno, Marcuse, Parsons, and Merton. The prestigious editors have integrated several readings on the most influential theories arising out of the Enlightenment era and the work of de Tocqueville. Readers are introduced to seminal works in classical sociological theory by way of editorial introductions that lend historical and intellectual perspective to the included readings. The readings themselves have been selected based on their combinations of theoretical sophistication and accessibility. From analyses of self and society to examinations of critical theory and structural-functional analysis, *Classical Sociological Theory* remains the gold standard in classical theory readers. The Fourth Edition of this widely taught book includes: Selections that trace the history of classical sociological theory, from its undisciplined roots to its modern influence on contemporary sociological debate Readings describing the "pre-history" of sociology, including ideas from the Enlightenment and de Tocqueville Editorial introductions that place selected works firmly in their intellectual, philosophical, and historical contexts for the benefit of the student A distinguished and scholarly team of editors with a wide and deep range of expertise Perfect for undergraduate and graduate students of social and sociological theory, *Classical Sociological Theory* is also a thought-provoking resource ideal for use in courses taught in human geography, anthropology, criminology, and urban studies programs.

Genomes and What to Make of Them Oct 21 2022 The announcement in 2003 that the Human Genome Project had completed its map of the entire human genome was heralded as a stunning scientific breakthrough: our first full picture of the basic building blocks of human life. Since then, boasts about the benefits—and warnings of the dangers—of genomics have remained front-page news, with everyone agreeing that genomics has the potential to radically alter life as we know it. For the nonscientist, the claims and counterclaims are dizzying—what does it really mean to understand the genome? Barry Barnes and John Dupré offer an answer to that question and much more in *Genomes and What to Make of Them*, a clear and lively account of the genomic revolution and its promise. The book opens with a brief history of the science of genetics and genomics, from Mendel to Watson and Crick and all the way up to Craig Venter; from there the authors delve into the use of genomics in determining evolutionary paths—and what it can tell us, for example, about how far we really have come from our ape ancestors. Barnes and Dupré then consider both the power and risks of genetics, from the economic potential of plant genomes to overblown claims that certain human genes can be directly tied to such traits as intelligence or homosexuality. Ultimately, the authors argue, we are now living with a new knowledge as powerful in its way as nuclear physics, and the stark choices that face us—between biological warfare and gene therapy, a new eugenics or a new agricultural revolution—will demand the full engagement of both scientists and citizens. Written in straightforward language but without denying the complexity of the issues, *Genomes and What to Make of Them* is both an up-to-date primer and a blueprint for the future.

The Therapist's Notebook for Integrating Spirituality in Counseling I Oct 09 2021 Learn to initiate the integration of your clients' spirituality as an effective practical intervention. A client's spiritual and religious beliefs can be an effective springboard for productive therapy. How can a therapist sensitively prepare for the task? *The Therapist's Notebook for Integrating Spirituality in Counseling I* is the first volume of a comprehensive two-volume resource that provides practical interventions from a wide range of backgrounds and theoretical perspectives. This volume helps prepare clinicians to undertake and initiate the integration of spirituality in therapy with clients and provides easy-to-follow examples. The book provides a helpful starting point to address a broad range of topics and problems. The chapters of *The Therapist's Notebook for Integrating Spirituality in Counseling I* are grouped into five sections: Therapist Preparation and Professional Development; Assessment of Spirituality; Integrating Spirituality in Couples Therapy; Specific Techniques and/or Topics Used in Integrating Spirituality; and Use of Scripture, Prayer, and Other Spiritual Practices. Designed to be clinician-friendly, each chapter also includes sections on resources where counselors can learn more about the topic or technique used in the chapter—as well as suggested books, articles, chapters, videos, and Web sites to recommend to clients. Each chapter utilizes similar formatting to remain clear and easy-to-follow that includes objectives, rationale for use, instructions, brief vignette, suggestions for follow-up, contraindications, references, professional readings and resources, and bibliotherapy sources for the client. The first volume of *The Therapist's Notebook for Integrating Spirituality in Counseling I* helps set a solid foundation and provides comprehensive instruction on: ethically incorporating spirituality into the therapeutic setting professional disclosure building a spiritual referral source through local clergy assessment of spirituality the spirituality-focused genogram using spirituality in couples therapy helping couples face career transitions dealing with shame addiction recovery the use of scripture and prayer overcoming trauma in Christian clients and much more! *The Therapist's Notebook for Integrating Spirituality in Counseling I* is a stimulating, creative resource appropriate for any clinician or counselor, from novices to experienced mental health professionals. This first volume is perfect for pastoral counselors, clergy, social workers, marriage and family therapists, counselors, psychologists, Christian counselors, educators who teach professional issues, ethics, counseling, and multicultural issues, and students.

Australian Financial Accounting Dec 23 2022 Australia's market-leading financial accounting text provides students with a detailed grasp of reporting requirements in an accessible and engaging manner. Fully updated throughout, AUSTRALIAN FINANCIAL ACCOUNTING further develops and extends its coverage of consolidations and encompasses topical issues such as social and environmental accounting. Renowned for his clear writing style, Craig Deegan successfully communicates the detail necessary to understand, challenge and critically evaluate financial reporting. Complete in theoretical and practical coverage, this text gives students a strong foundation for current study and their future professional lives.

Reports of Cases Decided in the Court of Appeals of the State of New York Aug 19 2022

Environmental Management Accounting — Purpose and Progress Sep 27 2020 This is the second book of selected papers on environmental management accounting (EMA) which has been developed for Kluwer by the Environmental Management Accounting Network - Europe (EMAN-Eu), drawn primarily from papers presented at EMAN-Eu, to bring together several examples of leading thinking and practice internationally in this rapidly developing area. The authors include academics, practitioners from industry, and government policy-makers, and the subjects covered range from individual company experiences to the role of government in promoting EMA in industry. The papers included in the book provide several examples of how EMA can be applied in practice both in large corporations and in small and medium-sized enterprises, and of reports on the extent of the implementation of EMA and the conditions which encourage this. The book is intended for all those interested in EMA as either researchers or practitioners. It will also be of interest both to those interested in how well-established management accounting methods can be adapted and extended in order to meet new demands on companies, and also to environmental managers interested in learning how accounting techniques can be of value in achieving environmental management objectives.

Preventing Mental Ill-Health Dec 31 2020 Is there any evidence that we can reduce the incidence of mental ill health? Is it possible to prevent recurrence of mental ill health? Aspirations to achieve both these goals have featured in mental health policy and practice for over 100 years. This comprehensive and accessible book draws on research on the development and persistence of behavioural problems in childhood, adult depression and schizophrenia. The association between social disadvantage and mental ill health, as well as the need for preventive care to start from conception and the crucial importance of maternal mental health, are discussed. A variety of prominent programmes which have good evidence of efficacy are described. These include: Targeted approaches with individuals and families Macro policies affecting housing and employment Lifestyle contributions such as diet and exercise However, some attempts to achieve preventive benefits have not succeeded, and reflecting on these problems is an important feature of this review. Jennifer Newton has written extensively on these issues for over twenty years, and her careful examination of the research literature provides a succinct overview of the state of current knowledge which will benefit mental health professionals, and students of health psychology and public health. It also takes a life course perspective, and considers how, when and why vulnerability persists through childhood into adult life, so will interest those whose work focuses on child well-being.

3rd Generation Biofuels Apr 14 2022 *3rd Generation Biofuels: Disruptive Technologies to Enable Commercial Production* is a comprehensive volume on all aspects of algal biofuels, offering the latest advances on commercial implementation. In addition to the fundamentals, the book discusses all applied aspects of 3rd generation biofuels production, including design approaches, unit operations of the upstream and downstream biomass processing, and every potential microalgae-based energy product, including microbial fuel cells. Policy, economic, environmental, and regulatory issues are addressed in a dedicated section. Finally, the book presents pilot and demonstration-scale projects for 3rd generation biofuels production in the format of a white paper. Each chapter reviews the state of the art, discusses the disruptive technological approaches that will potentially enable large-scale production, and concludes with specific recommendations on how to achieve commercial competitiveness. The book provides readers with an invaluable reference for researchers, graduates, and practitioners working in the areas of renewable energy, bioenergy and alternative fuels, and biotechnology. Offers a sequential framework for the design of process plants using 3rd generation feedstock Presents dedicated sections on case studies at pilot and demonstration scales as well as on policy, economic, and environmental issues Provides a global perspective on biofuels production, with more than 40 contributions from world-renowned experts

Financial Accounting Theory Jan 24 2023 The much anticipated fourth edition of Craig Deegan's Financial Accounting Theory delivers authoritative and completely up to date material with the discussion of both existing theories and newer theories that have surfaced as financial reporting has become more international. This edition includes a new selection of modern 'Accounting Headlines' which provide current examples of organisations and individuals putting accounting theory into practice in both local and global settings. Financial Accounting Theory covers additional topics such as critical perspectives, public sector accounting and fair value. Workflows and processes are presented using enhanced visual charts to help demonstrate how accounting works in practice. Deegan presents the concepts in a clear and straightforward style, while challenging students to think critically about the range of accounting theories. Financial Accounting Theory provides a sound basis for readers contemplating further research and develops habits of analytical reasoning and critical thinking.

Human Trafficking Around the World Apr 02 2021 An examination of human trafficking around the world including the following countries: United States, Japan, United Arab Emirates, Thailand, Israel and the Occupied Palestinian Territories, Colombia, Iraq, Syria, Canada, Italy, France, Iran, India, Niger, China, South Africa, Australia, United Kingdom, Chile, Germany, Poland, Mexico, Russia, and Brazil.

Reader's Guide to the History of Science Jul 06 2021 The Reader's Guide to the History of Science looks at the literature of science in some 550 entries on individuals (Einstein), institutions and disciplines (Mathematics), general themes (Romantic Science) and central concepts (Paradigm and Fact). The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn.

EBOOK: Financial Accounting Theory: European Edition Jun 28 2023 The second edition of Craig Deegan and Jeffrey Unerman's market leading text presents the various theories of financial accounting through a balanced and dynamic approach. Students are given all the tools to engage with these theories and are encouraged to critically evaluate and challenge them. Clearly written and user friendly, this new edition provides comprehensive coverage of internationally developed accounting theories from a European perspective.

Supreme Court Appellate Division May 16 2022

The New York Times Index Jul 30 2023

A Life Decoded Jun 16 2022 The triumphant memoir of the man behind one of the greatest feats in scientific history Of all the scientific achievements of the past century, perhaps none can match the deciphering of the human genetic code, both for its technical brilliance and for its implications for our future. In *A Life Decoded*, J. Craig Venter traces his rise from an uninspired student to one of the most fascinating and controversial figures in science today. Here, Venter relates the unparalleled drama of the quest to decode the human genome—a goal he predicted he could achieve years earlier and more cheaply than the government-sponsored Human Genome Project, and one that he fulfilled in 2001. A thrilling story of detection, *A Life Decoded* is also a revealing, and often troubling, look at how science is practiced today.

United States Reports May 28 2023

An Introduction to Accounting: Accountability in Organisations and Society Mar 26 2023 Written by one of ANZ's premier sustainability and social accounting academics, *An Introduction to Accounting: Accountability in Organisations and Society* brings today's accounting hot topics of corporate accountability, sustainability and social responsibility to life with the only complete textbook created from the ground up for these modern accounting teaching and learning concepts. *An Introduction to Accounting: Accountability in Organisations and Society* takes a unique approach in embracing from the start the notion of accountability for the environment and sustainability in accounting; the structure, content and learning activities provide students with an understanding of accounting's pervasive and transformative role as a social practice and organisational driver. It shows that environments, ideas and values change; the interconnectivity of society; that the planet must be respected as a resource; and that people are affected/influenced by the information they receive and the way it is presented. It is emphasised that accounting and accountability are key aspects of every person's life and that the practice of accounting, while often being seen as very technical in nature, has many social implications. Learning accounting through the lens of sustainability and the environment embeds this perspective in students' minds so that in their careers they will actively seek and use accounting information to make decisions that take into consideration accountability for the environment. The City Record Nov 09 2021

Governing Knowledge Commons Mar 14 2022 "Governing Knowledge Commons argues that innovation policymaking should be based on a deeper understanding of what makes commons institutions work. It borrows from and builds on Elinor Ostrom's Nobel Prize-winning research on natural resource commons to propose a case study framework adapted to the unique attributes of knowledge and information. Eleven contributed case studies and two theoretical responses explore knowledge commons across a wide variety of scientific and cultural domains"—Unedited summary from book cover.

Racial Theories in Social Science Aug 07 2021 *Racial Theories in Social Science: A Systemic Racism Critique* provides a critique of the white racial framing and lack of systemic-racism analysis prevalent in past and present mainstream race theory. As this book demonstrates, mainstream racial analysis, and social analysis more generally, remain stunted and uncritical because of this unhealthy white framing of knowledge and evasion or downplaying of institutional, structural, and systemic racism. In response to ineffective social science analyses of racial matters, this book presents a counter-approach—systemic racism theory. The foundation of this theoretical perspective lies in the critical insights and perspectives of African Americans and other people of color who have long challenged biased white-framed perspectives and practices and the racially oppressive and exclusionary institutions and social systems created by whites over several centuries.

Social Division May 23 2020 Social divisions are systematic social inequalities which are frequently regarded as unjust, and are fateful in the lives of individuals.

Financial Accounting, 8th Edition Feb 22 2023

The American Psychiatric Association Practice Guidelines for the Psychiatric Evaluation of Adults, Third Edition Nov 21 2022 Since the publication of the Institute of Medicine (IOM) report *Clinical Practice Guidelines We Can Trust* in 2011, there has been an increasing emphasis on assuring that clinical practice guidelines are trustworthy, developed in a transparent fashion, and based on a systematic review of the available research evidence. To align with the IOM recommendations and to meet the new requirements for inclusion of a guideline in the National Guidelines Clearinghouse of the Agency for Healthcare Research and Quality (AHRQ), American Psychiatric Association (APA) has adopted a new process for practice guideline development. Under this new process APA's practice guidelines also seek to provide better clinical utility and usability. Rather than a broad overview of treatment for a disorder, new practice guidelines focus on a set of discrete clinical questions of relevance to an overarching subject area. A systematic review of evidence is conducted to address these clinical questions and involves a detailed assessment of individual studies. The quality of the overall body of evidence is also rated and is summarized in the practice guideline. With the new process, recommendations are determined by weighing potential benefits and harms of an intervention in a specific clinical context. Clear, concise, and actionable recommendation statements help clinicians to incorporate recommendations into

clinical practice, with the goal of improving quality of care. The new practice guideline format is also designed to be more user friendly by dividing information into modules on specific clinical questions. Each module has a consistent organization, which will assist users in finding clinically useful and relevant information quickly and easily. This new edition of the practice guidelines on psychiatric evaluation for adults is the first set of the APA's guidelines developed under the new guideline development process. These guidelines address the following nine topics, in the context of an initial psychiatric evaluation: review of psychiatric symptoms, trauma history, and treatment history; substance use assessment; assessment of suicide risk; assessment for risk of aggressive behaviors; assessment of cultural factors; assessment of medical health; quantitative assessment; involvement of the patient in treatment decision making; and documentation of the psychiatric evaluation. Each guideline recommends or suggests topics to include during an initial psychiatric evaluation. Findings from an expert opinion survey have also been taken into consideration in making recommendations or suggestions. In addition to reviewing the available evidence on psychiatry evaluation, each guideline also provides guidance to clinicians on implementing these recommendations to enhance patient care.

Genocide, War Crimes and the West Nov 29 2020 Genocide and war crimes are increasingly the focus of scholarly and activist attention. Much controversy exists over how, precisely, these grim phenomena should be defined and conceptualized. Genocide, War Crimes & the West tackles this controversy, and clarifies our understanding of an important but under-researched dimension: the involvement of the US and other liberal democracies in actions that are conventionally depicted as the exclusive province of totalitarian and authoritarian regimes. Many of the authors are eminent scholars and/or renowned activists; in most cases, their contributions are specifically written for this volume. In the opening and closing sections of the book, analytical issues are considered, including questions of responsibility for genocide and war crimes, and institutional responses at both the domestic and international levels. The central section is devoted to an unprecedentedly broad range of original case studies of western involvement, or alleged involvement, in war crimes and genocide. At a moment in history when terrorism has become a near universal focus of public attention, this volume makes clear why the West, as a result of both its historical legacy and contemporary actions, so often excites widespread resentment and opposition throughout the rest of the world.

EBOOK: Financial Accounting and Reporting: An International Approach Aug 31 2023 Financial Accounting and Reporting: An International Approach is an adaptation of McGraw-Hill Australia's bestselling financial accounting text Australian Financial Accounting by Craig Deegan, authored by Anne Marie Ward of Ulster University. Set within an international context, with a solid grounding in IAS/ IFRS, the book provides students with a detailed grasp of reporting requirements in an accessible and engaging manner. Up to date throughout and complete in theoretical and practical coverage, the book successfully communicates the detail necessary to understand, challenge and critically evaluate financial reporting. The result gives students a strong foundation for current study and their future professional lives.

Men in reserve May 04 2021 Men in reserve focuses on working class civilian men who, as a result of working in reserved occupations, were exempt from enlistment in the armed forces. It uses fifty six newly conducted oral history interviews as well as autobiographies, visual sources and existing archived interviews to explore how this group articulated their wartime experiences and how they positioned themselves in relation to the hegemonic discourse of military masculinity. It considers the range of masculine identities circulating amongst civilian male workers during the war and investigates the extent to which reserved workers draw upon these identities when recalling their wartime selves. It argues that the Second World War was capable of challenging civilian masculinities, positioning the civilian man below that of the 'soldier hero' while, simultaneously, reinforcing them by bolstering the capacity to provide and to earn high wages, frequently in risky and dangerous work, all which were key markers of masculinity.

Corporate Governance and Accountability Jun 04 2021 Corporate Governance and Accountability presents students with a complete and current survey of the latest developments involving how a company is directed and controlled. Providing a broad research-based perspective, this comprehensive textbook examines global corporate governance systems, the role and responsibilities of the directorate, and the frameworks designed to ensure effective corporate accountability for stakeholders. A holistic approach to the subject enables students to develop a well-rounded knowledge of corporate governance theory and practice, policy documents, academic research, and current debates, issues, and trends. Now in its fifth edition, this comprehensive view of the corporate governance agenda features fully revised content that reflects new research and global developments in codes of practice and governance and accountability mechanisms. In-depth chapters contain numerous real-world case studies and compelling debate and discussion topics, exploring corporate transparency, social responsibility, boardroom diversity, shareholder activism, and many other timely issues.

Encyclopedia of Television Pilots Oct 28 2020 On November 27, 1937, NBC presented TV's first pilot film, Sherlock Holmes (then called an "experiment"). Thousands of pilot films (both unaired and televised) have been produced since. This updated and restyled book contains 2,470 alphabetically arranged pilot films broadcast from 1937 to 2019. Entries contain the concept, cast and character information, credits (producer, writer, director), dates, genre and network or cable affiliation. In addition to a complete performer's index, two appendices have been included: one detailing the pilot films that led to a series and a second that lists the programs that were spun off from one series into another. Never telecast pilot films can be found in the companion volume, The Encyclopedia of Unaired Television Pilots, 1945-2018. Both volumes are the most complete and detailed sources for such information, a great deal of which is based on viewing the actual programs.
