EVM isn't hard to do. All it takes is practice. But getting the examples to practice on has been difficult. Until now! This book contains 50 examples for you to work through. It guides you on a journey from simple to very complex. And it tests your ability to manipulate Earned Value Management calculations in multiple ways. By the time you finish this book, you'll never worry about EVM again! This volume serves to expand theory-driven understandings of active sport tourism by showcasing five empirical studies examining a variety of active sport tourism contexts. These include table tennis at the World Veteran's Championships, ultramarathon, running/cycling/triathlon, skiing/snowboarding, and a range of issues such as active ageing and travel-related carbon footprints. The volume also seeks to explore possibilities for future directions in active sport tourism and act as a catalyst for ongoing scholarly inquiry. Travelling to take part in active sporting pursuits is growing in popularity around the world. Active sport tourism encompasses travel to participate in a myriad sports, as well as in competitive participatory sport events. Much of the recent growth in active sport tourism is associated with travel to compete in participatory sport events, notably the "big city" international marathon events; amateur running, triathlon, and cycling events; Masters Games; and team sport tournaments. While the broader sport tourism research literature has tended to focus on spectator-oriented sports events, particularly the mega events such as the Olympic Games, it is only recently that a concerted research agenda in active sport tourism has emerged, making this volume innovative and relevant. This book was originally published as a special issue of the Journal of Sport & Tourism. A brilliant transplant surgeon brings compassion and narrative drama to the fearful reality that every doctor must face: the inevitability of mortality. "Uncommonly moving ... A revealing and heartfelt book." —Atul Gawande, #1 New York bestselling author of Being Mortal When Pauline Chen began medical school, she dreamed of saving lives. What she could not predict was how much death would be a part of her work. Almost immediately, she found herself wrestling with medicine's most profound paradox—that a profession premised on caring for the ill also systematically depersonalizes dying. Final Exam follows Chen over the course of her education and practice as she struggles to reconcile the lessons of her training with her innate sense of empathy and humanity. A superb addition to the best medical literature of our time. The aim of the tests is to determine which banks are adequately capitalized under severe economic shocks and to order corrective measures for those that are vulnerable. In Banking's Final Exam, one of the world's leading experts on banking regulation concludes that the tests administered on both sides of the Atlantic suffer from fundamental weaknesses, leading to a false sense of reassurance about the safety and soundness of the banking system. Some weaknesses can be corrected within the existing bank-capital regime, but others will require bold reforms—including higher minimum capital requirements for the largest and most systemically-important banks. The banking industry is likely to resist these reforms, but this book explains why their objections do not hold water. In business, either you can manage risk, or risk will manage you.
