NEW YORK TIMES BESTSELLER • A Times (UK) Best Book of the Year • From the author of the million-copy-selling *Essentialism* comes an empowering guide to achieving your goals. It all starts with a simple principle: Not everything has to be so hard. “In a world beset by burnout, Greg McKeown’s work is essential.”—Daniel H. Pink, author of *When, Drive, and To Sell Is Human* “At a time when fear, uncertainty, and our ever-growing list of responsibilities have come to feel like much too much to handle, *Effortless* couldn’t be timelier, or more necessary.”—Eve Rodsky, author of *Fair Play* Do you ever feel like: • You’re teetering right on the edge of burnout? • You want to make a higher contribution, but lack the energy? • You’re running faster but not moving closer to your goals? • Everything is so much harder than it used to be? As high achievers, we’ve been conditioned to believe that the path to success is paved with relentless work. That if we want to overachieve, we have to overexert, overthink, and overdo. That if we aren’t perpetually exhausted, we’re not doing enough. But lately, working hard is more exhausting than ever. And the more depleted we get, the more effort it takes to make progress. Stuck in an endless loop of “Zoom, eat, sleep, repeat,” we’re often working twice as hard to achieve half as much. Getting ahead doesn’t have to be as hard as we make it. No matter what challenges or obstacles we face, there is a better way: instead of pushing ourselves harder, we can find an easier path. *Effortless* offers actionable advice for making the most essential activities the easiest ones, so you can achieve the results you want, without burning out. *Effortless* teaches you how to: • Turn tedious tasks into enjoyable rituals • Prevent frustration by solving problems before they arise • Set a sustainable pace instead of powering through • Make one-time choices that eliminate many future decisions • Simplify your processes by removing unnecessary steps • Make relationships easier to maintain and manage • And much more The *effortless* way isn't the lazy way. It's the smart way. It may even be the only way. Not every hard thing in life can be made easy. But we can make it easier to do more of what matters most. The proceedings of the Second International Conference on [title] held in Cambridge, Massachusetts, April 1991, comprise 55 papers on topics including the logical specifications of reasoning behaviors and representation formalisms, comparative analysis of competing algorithms and formalisms, and ana Thinking strategically is what separates managers and leaders. Learn the fundamentals about how to create winning strategy and lead your team to deliver it. From understanding what strategy can do for you, through to creating a strategy and engaging others with strategy, this book offers practical guidance and expert tips. It is peppered with punchy, memorable examples from real leaders winning (and losing) with real world strategies. It can be read as a whole or you can dip into the easy-to-read, bite-size sections as and when you need to deal with a particular issue. The structure has been specially designed to make sections quick and easy to use – you’ll find yourself referring back to them again and again. This ground-breaking textbook gathers contributions from service users, expert practitioners and leading academics to help students develop the core knowledge and skills they need to qualify as mental health nurses. Focusing in particular on helping students apply person-centred, compassionate and recovery-focused care, service-user voices and practical case studies are integrated throughout the book. Students are also given a rounded understanding of the key debates they will face in practice through the exploration of both bio-medical and psycho-social approaches. Key features include: Voices and case studies from real practising nurses and students help students apply knowledge to practice. Critical thinking activities, debates, and ‘What’s the Evidence’ summaries help students develop higher level critical thinking and evidence based practice skills. Further reading and free SAGE journal articles facilitate independent learning. Online Multiple-Choice Quizzes and Flashcards make revision simple and fun. The free interactive ebook gives students the freedom to learn anywhere! Online resources: free quizzes, case studies, SAGE journal articles and more, which can be used for flipped classroom activities to make teaching more interactive. Sandra Carberry addresses the problem of creating computational strategies that can improve user-computer communication by assimilating ongoing dialogue and reasoning on the acquired knowledge. In most current natural language systems each query is treated as an isolated request for information regardless of its context in dialogue. Sandra Carberry addresses the problem of creating computational strategies that can improve user-computer communication by assimilating ongoing dialogue and reasoning on the acquired knowledge. *Plan Recognition in Natural Language Dialogue* critically examines plan recognition - the inference of an agent's goals and how he or she intends to achieve them. It describes significant models of plan inference and presents in detail the author's own model, which infers new goals from user utterances and integrates them into the system's model of the user's plan, incrementally expanding and adding detail to its beliefs about what the information seeker wants to do. Carberry then outlines computational strategies for interpreting two kinds of problematic utterances: utterances that violate the pragmatic rules of the system's world model and intersentential elliptical fragments. She also suggests directions for future research. *Plan Recognition in Natural Language Dialogue* is included in the ACL-MIT Press Series in Natural Language Processing edited by Aravind Joshi. "Essential elements of superior war fighting include tactical planning and battle command. This report reviews research on the human dimension of tactical planning. By aggregating what is known about human styles and capabilities, the Army will be better able to enhance battle command performance. Available research is reviewed and organized into 10 categories. Individual difference research is reviewed that addresses level of expertise, rank, military student populations, and cognitive ability. Findings on the estimate procedures include failure to follow procedures, imprecise procedures, inflexibility of procedures, and excessive time demands. Management of the process covers lack of involvement of staff and commander and poor process management. Information exchange discusses problems in information use, presenting plans to the commander, and communicating interpretations. Battle success relates procedural performance to outcome measures. The other categories address the functions performed in the command and control C2 cycle. " -- Abstract. Many Canadians will remember Reg Sherren as host of the popular CBC TV program *Country Canada*, when he criss-crossed the nation sniffing out amazing but little-known stories of life in small towns and rural areas. Others will recall his many years as feature reporter for CBC’s flagship news program, *The National*, collecting stories like that of Montreal inventor Catalin Alexandru Duru magically soaring above the earth on his home-made hoverboard to set a new Guinness World Record. In the course of his eventful career, Sherren did everything from guest hosting network radio shows like *Cross Country Checkup* to reporting from war zones, and his experiences make for a book bristling with memorable characters, unbelievable events and provocative reflection. Breaking news, politics, crime, economics—Sherren covered it all, and always with what Peter Mansbridge called “his unique ability to weave fascinating detail into the fabric of the people and places that make our nation so diverse and so interesting.” In this memoir, Sherren shares behind-the-scenes stories of his career in television journalism and the many Canadians he met along the way, from the time he rode on the back of a humpback whale to a journey down the world’s longest ice road in a solar-powered car. Sherren also provides insight into the changing business of broadcasting, having witnessed up-close how the industry has evolved, and why it is more important now than ever. *That Wasn’t the Plan* will appeal to industry insiders, CBC fans, history buffs and anyone who simply enjoys a good rollicking read. ntil now there has been no state-of-the-art collection of themost important writings in automatic text summarization. This bookpresents the key developments in the field in an integrated frameworkand suggests future research areas. With the rapid growth of the World Wide Web and electronic information services, information is becoming available on-line at an incredible rate. One result is the oft-decried information overload. No one has time to read everything, yet we often have to make critical decisions based on what we are able to assimilate. The technology of automatic text summarization is becoming indispensable for dealing with this problem. Text summarization is the process of distilling the most important information from a source to produce an abridged version for a particular user or task. Until now there has been no state-of-the-art collection of the most important writings in automatic text summarization. This book presents the key developments in the field in an integrated framework and suggests future research areas. The book is organized into six sections: Classical Approaches, Corpus-Based Approaches, Exploiting Discourse Structure, Knowledge-Rich Approaches, Evaluation Methods, and New Summarization Problem Areas. Contributors D. A. Adams, C. Aone, R. Barzilay, E. Bloedorn, B. Boguraev, R. Brandow, C. Buckley, F. Chen, M. J. Chrzanowski, H. P. Edmundson, M. Elhadad, T. Firmin, R. P. Futrelle, J. Gorfinsky, U. Hahn, E. Hovy, D. Jang, K. Sparck Jones, G. M. Kasper, C. Kennedy, K. Kukich, J. Kupiec, B. Larsen, W. G. Lehnert, C. Lin, H. P. Luhn, I. Mani, D. Marcu, M. Maybury, K. McKeown, A. Merlino, M. Mitra, K. Mitze, M. Moens, A. H. Morris, S. H. Myaeng, M. E. Okurowski, J. Pedersen, J. J. Pollock, D. R. Radev, G. J. Rath, L. F. Rau, U. Reimer, A. Resnick, J. Robin, G. Salton, T. R. Savage, A. Singhal, G. Stein, T. Strzalkowski, S. Teufel, J. Wang, B. Wise, A. Zamora This book provides a new process to greatly improve the performance of organizations. It is purposely designed to enhance the strategic planning processes of large organizations and may replace the process entirely for smaller organizations. Finally, a book that makes sense and can be put to use immediately. NEW YORK TIMES BESTSELLER • More than one million copies sold! *Essentialism* isn’t about getting more done in less time. It’s about getting only the right things done. Featuring the new *Essentialism 21-Day Challenge* • “A timely, essential read for anyone who feels overcommitted, overloaded, or overworked.”—Adam Grant Have you ever: • found yourself stretched too thin? • simultaneously felt overworked and underutilized? • felt busy but not productive? • felt like your time is constantly being hijacked by other people’s agendas? If you answered yes to any of these, the way out is the Way of the Essentialist. *Essentialism* is more than a time-management strategy or a productivity technique. It is a systematic discipline for discerning what is absolutely essential, then eliminating everything that is not, so we can make the highest possible contribution toward the things that really matter. By forcing us to apply more selective criteria for what is Essential, the disciplined pursuit of less empowers us to reclaim control of our own choices about where to spend our precious time and energy—instead of giving others the implicit permission to choose for us. *Essentialism* is not one more thing—it’s a whole new

way of doing everything. It's about doing less, but better, in every area of our lives. Essentialism is a movement whose time has come. This Handbook is the first to explore the emergent field of 'placemaking' in terms of the recent research, teaching and learning, and practice agenda for the next few years. Offering valuable theoretical and practical insights from the leading scholars and practitioners in the field, it provides cutting-edge interdisciplinary research on the placemaking sector. Placemaking has seen a paradigmatic shift in urban design, planning, and policy to engage the community voice. This Handbook examines the development of placemaking, its emerging theories, and its future directions. The book is structured in seven distinct sections curated by experts in the areas concerned. Section One provides a glimpse at the history and key theories of placemaking and its interpretations by different community sectors. Section Two studies the transformative potential of placemaking practice through case studies on different places, methodologies, and theoretical frameworks. It also reveals placemaking's potential to nurture a holistic community engagement, social justice, and human-centric urban environments. Section Three looks at the politics of placemaking to consider who is included and who is excluded from its practice and if the concept of placemaking needs to be reconstructed. Section Four deals with the scales and scopes of art-based placemaking, moving from the city to the neighborhood and further to the individual practice. It juxtaposes the voice of the practitioner and professional alongside that of the researcher and academic. Section Five tackles the socio-economic and environmental placemaking issues deemed pertinent to emerge more sustainable placemaking practices. Section Six emphasizes placemaking's intersection with urban design and planning sectors and includes case studies of generative planning practice. The final seventh section draws on the expertise of placemakers, researchers, and evaluators to present the key questions today, new methods and approaches to evaluation of placemaking in related fields, and notions for the future of evaluation practices. Each section opens with an introduction to help the reader navigate the text. This organization of the book considers the sectors that operate alongside the core placemaking practice. This seminal Handbook offers a timely contribution and international perspectives for the growing field of placemaking. It will be of interest to academics and students of placemaking, urban design, urban planning and policy, architecture, geography, cultural studies, and the arts. Offering all the essentials of financial planning, Financial Planning Essentials delivers concise, relatable, relevant and curriculum-aligned content carefully tailored to first-year undergraduate students. Students will be inspired, rather than saturated, by information on how to advise their future clientele about investment decisions throughout their lifetime, and how this advice fits into the broader multi-disciplinary context (tax, psychology, law, accounting, etc.). Financial Planning Essentials will walk students through the fundamental conceptual and technical information required of financial planners, so that they feel both prepared and enthusiastic about their future careers. This edition also features Wiley's Future Skills Guide, a unique tool which provides expert and practical advice on career preparedness making for more future-ready graduates. More than 82 per cent of companies believe creativity directly impacts results, yet few of us understand how it comes about or how to put it into practice. Some people say that creativity is about thinking outside the box, while others believe it is about being creative inside the box; but what if there is no box? The Creative Thinking Handbook argues that we need to identify and remove the 'box' around our thinking, so we can unlock unlimited streams of creativity for professional and business success. This book offers an integrated system of personalized insights, along with clear, practical tools and strategies - including the tried-and-trusted Solution Finder model. The authors show you how to develop your creative problem-solving skills to make better decisions with an individualized step-by-step strategy. Based on long-term research and testing of the creative thinking process, The Creative Thinking Handbook helps you generate more ideas and find brilliant solutions for any professional challenge. Perspectives -- Introduction -- Affirmations -- Conclusion -- Index This planner is designed to make planning easy for realtors in the St. Mary Parish area. Within this planner, you will find calendars and forms that allow a realtor to plan their day-to-day activities. As a bonus, you will find a brief history of the major cities and historical sites within each city. Recognizing that the generation of natural language is a goal-driven process, where many of the goals are pragmatic (i.e., interpersonal and situational) in nature, this book provides an overview of the role of pragmatics in language generation. Each chapter states a problem that arises in generation, develops a pragmatics-based solution, and then describes how the solution is implemented in PAULINE, a language generator that can produce numerous versions of a single underlying message, depending on its setting. Textbook constituting a guide to the use of management planning principles - presents definitions and a model pertaining to strategic and operational management processes, and discusses establishment of objectives and goals, time factors, commitment and involvement, etc. Diagrams, graphs and photographs. "Planners on Planning" offers pragmatic information on the realities of day-to-day practice from some of the most innovative, respected, and visionary leaders in the planning profession today. The editors have gathered straightforward lessons from today's most effective planners on the core values, skills, and techniques needed for success. Through real-life examples from the trenches, the experts explain in their own words what works, what doesn't, and why. The interactions between climate change, agriculture, and technology are of increasing concern to academicians, educators, and planners. After the publication of the first report of the Intergovernmental Panel on Climate Change (IPCC), studies of the impact of climate change on productive systems such as agriculture have multiplied. The best solution can be found in new technologies and tools. Intelligent Solutions for Optimizing Agriculture and Tackling Climate Change: Current and Future Dimensions explores the importance of artificial intelligence and its effects on the future of agriculture. It further highlights the opportunities and challenges of artificial intelligence in the agricultural field. Covering topics such as agroforestry, farming productivity, and population projections, this premier reference source is an indispensable resource for climate scientists, agricultural scientists, policymakers, computer scientists, engineers, students and educators of higher education, libraries, researchers, and academicians. Quick, practical management advice from Harvard Business Review to help you do your job better. Drawing from HBR's popular Management Tip of the Day newsletter, these concise, handy guides are packed with easy-to-read tips on a broad range of topics. Each book puts the best management practices and insights, from top thinkers in the field, right at your fingertips.
