The Missing Entrepreneurs 2017 Aug 28 2023 The Missing Entrepreneurs 2017 is the fourth edition in a series of publications that examine how public policies at national, regional and local levels can support job creation, economic growth and social inclusion by overcoming obstacles to business start-ups and self-employment by people from disadvantaged or under-represented groups in entrepreneurship. It shows that there is substantial potential to combat unemployment and increase labour market participation by facilitating business creation in populations such as women, youth, the unemployed, and migrants. However, the specific problems they face need to be recognised and addressed with effective and efficient policy measures. This edition contains in-depth policy discussion chapters on the quality of self-employment, including new forms of self-employment such as dependent and false self-employment, and the potential of self-employment as an adjustment mechanism in major firm restructuring and job shedding. Each thematic chapter discusses current policy issues and challenges, and makes recommendations for policy makers. A data section provides a range of information on self-employment and business creation rates, barriers and key characteristics of businesses operated by social group. Finally, country profiles highlight recent trends in inclusive entrepreneurship, key policy challenges and recent policy actions in each of the 28 EU Member States.

OECD Studies on SMEs and Entrepreneurship Strengthening SMEs and Entrepreneurship for Productivity and Inclusive Growth OECD 2018 Ministerial Conference on SMEs Aug 24 2020 SMEs that grow have a considerable positive impact on employment creation, innovation, productivity growth and competitiveness. Digital technologies and global value chains offer new opportunities for SMEs to participate in the global economy, innovate and strengthen productivity. Yet SMEs are lagging behind in the digital transition and are disproportionately affected by market failures, trade barriers, policy inefficiencies and the quality of institutions. A cross-cutting approach to SME policy can enhance SME innovation and scale-up, as well as their contributions to inclusive growth. This includes a business environment conducive to risk-taking and experimentation

by entrepreneurs, as well as access to entrepreneurship competencies, management and workforce skills, technology, innovation, and networks.

China's Rebalancing and Gender Inequality Jun 21 2020 This paper examines gender inequality in the context of structural transformation and rebalancing in China. We document declining women's relative wages and labor force participation in China during the last two decades, despite rapid growth and expansion of the service sector. Using household data, we provide evidence consistent with a U-shaped relationship between economic development and women's labor market outcomes. Using a model of structural transformation, we show that labor market barriers for women have increased over time. Model counterfactuals suggest that removing these barriers and increasing service sector productivity can boost both gender equality and economic growth in China.

Denying to the Grave May 01 2021 "This chapter addresses the complicated topic of conspiracy theories. This topic is complicated because a conspiracy theory is not prima facie wrong. Yet one of the hallmarks of false scientific beliefs is the claim by their adherents that they are the victims of profiteering, deceit, and cover-ups by conglomerates variously composed of large corporations, government regulatory agencies, the media, and professional medical societies. The trick is to figure out if the false ones can be readily separated from those in which there may be some truth. Only by carefully analyzing a number of such conspiracy theories and their adherents does it become possible to offer some guidelines as to which are most obviously incorrect. The chapter then studies the psychology of conspiracy theory adherence. It argues that belittling people who come to believe in false conspiracy theories as ignorant or mean-spirited is perhaps the surest route to reinforcing an anti-science position"--

Caste Dec 28 2020 #1 NEW YORK TIMES BESTSELLER • OPRAH'S BOOK CLUB PICK • "An instant American classic and almost certainly the keynote nonfiction book of the American century thus far."—Dwight Garner, *The New York Times* The Pulitzer Prize–winning, bestselling author of *The Warmth of Other Suns* examines the unspoken caste system that has shaped America and shows how our lives today are still defined by a hierarchy of human divisions. #1 NONFICTION BOOK OF THE YEAR: *Time* ONE OF THE BEST BOOKS OF THE YEAR: *The Washington Post*, *The New York Times*, *Los Angeles Times*, *The Boston Globe*, *O: The Oprah Magazine*, *NPR*, *Bloomberg*, *The Christian Science Monitor*, *New York Post*, *The New York Public Library*, *Fortune*, *Smithsonian Magazine*, *Marie Claire*, *Slate*, *Library Journal*, *Kirkus Reviews* Winner of the Carl Sandberg Literary Award • Winner of the Los Angeles Times Book Prize • National Book Award Longlist • National Book Critics Circle Award Finalist • Dayton Literary Peace Prize Finalist • PEN/John Kenneth Galbraith Award for Nonfiction Finalist • PEN/Jean Stein Book Award Longlist • Kirkus Prize Finalist "As we go about our daily lives, caste is the wordless usher in a darkened theater, flashlight cast down in the aisles, guiding us to our assigned seats for a performance. The hierarchy of caste is not about feelings or morality. It is about power—which groups have it and which do not." In this brilliant book, Isabel Wilkerson gives us a masterful portrait of an unseen phenomenon in America as she explores, through an immersive, deeply researched, and beautifully written narrative and stories about real people, how America today and throughout its history has been shaped by a hidden caste system, a rigid hierarchy of human rankings. Beyond race, class, or other factors, there is a powerful caste system that influences people's lives and behavior and the nation's fate. Linking the caste systems of America, India, and Nazi Germany, Wilkerson explores eight pillars that underlie caste systems across civilizations, including divine will, bloodlines, stigma, and more. Using riveting stories about people—including Martin Luther King, Jr., baseball's Satchel Paige, a single father and his toddler son, Wilkerson herself, and many others—she shows the ways that the insidious undertow of caste is experienced every day. She documents how the Nazis studied the racial systems in America to plan their outcasting of the Jews; she discusses why the cruel logic of caste requires that there be a bottom rung for those in the middle

to measure themselves against; she writes about the surprising health costs of caste, in depression and life expectancy, and the effects of this hierarchy on our culture and politics. Finally, she points forward to ways America can move beyond the artificial and destructive separations of human divisions, toward hope in our common humanity. Original and revealing, *Caste: The Origins of Our Discontents* is an eye-opening story of people and history, and a reexamination of what lies under the surface of ordinary lives and of American life today.

SME and Entrepreneurship Policy in Canada Sep 17 2022 SMEs and entrepreneurs make an important contribution to the Canadian economy. SMEs account for 60% of total employment, and Canada performs very well across many measures of small business generation, growth and innovation. However, further increases in productivity in medium-sized firms, an increase in SME exports, a greater business start-up rate and an increased number of high-growth firms could bring substantial benefits for the national economy. This report identifies several areas where new policy approaches could help achieve these objectives. Framework conditions for small business could be improved in business taxation, public procurement, access to financing and the commercialisation of research. New and extended programmes could be

introduced in domains including entrepreneurship education, management advice and consultancy, and workforce skills development. A major effort is recommended to prioritise women's entrepreneurship, including by supporting social enterprises, and federal support could be offered to support the exchange of information on best practice SME regulations and programmes among provinces and territories. All this could be brought together and co-ordinated through the umbrella of a national strategy and a lead agency for SME and entrepreneurship policy.

How Do You Live? Sep 05 2021 The first English translation of the classic Japanese novel that has sold over 2 million copies—a childhood favorite of anime master Hayao Miyazaki (*Spirited Away*, *My Neighbor Totoro*, *Howl's Moving Castle*), with an introduction by Neil Gaiman. First published in 1937, Genzaburō Yoshino's *How Do You Live?* has long been acknowledged in Japan as a crossover classic for young readers. Academy Award-winning animator Hayao Miyazaki has called it his favorite childhood book and announced plans to emerge from retirement to make it the basis of his final film. *How Do You Live?* is narrated in two voices. The first belongs to Copper, fifteen, who after the death of his father must confront inevitable and enormous change, including his own betrayal of his best friend. In between episodes of Copper's emerging story, his uncle writes to him in a journal, sharing knowledge and offering advice on life's big questions as Copper begins to encounter them. Over the course of the

story, Copper, like his namesake Copernicus, looks to the stars, and uses his discoveries about the heavens, earth, and human nature to answer the question of how he will live. This first-ever English-language translation of a Japanese classic about finding one's place in a world both infinitely large and unimaginably small is perfect for readers of philosophical fiction like *The Alchemist* and *The Little Prince*, as well as Miyazaki fans eager to understand one of his most important influences.

The Metamorphosis Nov 26 2020 New translation of *The Metamorphosis* by Franz Kafka. Poor Gregor Samsa! This guy wakes up one morning to discover that he's become a "monstrous vermin". The first pages of *The Metamorphosis* where Gregor tries to communicate through the bedroom door with his family, who think he's merely being lazy, is vintage screwball comedy. Indeed, scholars and readers alike have delighted in Kafka's gallows humor and matter-of-fact handling of the absurd and the terrifying. But it is one of the most enigmatic stories of all time, with an opening sentence that's unparalleled in all of literature.

THERE IS A BETTER WAY. Make no mistake: Congressmen Eric Cantor, Paul Ryan, and Kevin McCarthy are proud Republicans. But they believe the party had lost sight of the ideals it believes in, like economic freedom, limited government, the sanctity of life, and putting families first. This isn't your grandfather's Republican party. These Young Guns of the House GOP—Cantor (the leader), Ryan (the thinker), and McCarthy (the strategist)—are ready to take their belief in the principles that have made America great and translate it into solutions that

will make the future even better, solutions that will create private sector jobs, maximize individual freedom, and establish a better world for our children. This groundbreaking book is a call to action that sets forth a plan for growth, opportunity, and commitment that will propel this country to prosperity once again. Standards for Internal Control in the Federal Government Nov 07 2021 Policymakers and program managers are continually seeking ways to improve accountability in achieving an entity's mission. A key factor in improving accountability in achieving an entity's mission is to implement an effective internal control system. An effective internal control system helps an entity adapt to shifting environments, evolving demands, changing risks, and new priorities. As programs change and entities strive to improve operational processes and implement new technology, management continually evaluates its internal control system so that it is effective and updated when necessary. Section 3512 (c) and (d) of Title 31 of the United States Code (commonly known as the Federal Managers' Financial Integrity Act (FMFIA)) requires the Comptroller General to issue standards for internal control in the federal government.

OECD Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations 2022 Dec 08 2021 In a global economy where multinational enterprises (MNEs) play a prominent role, governments need to ensure that the taxable profits of MNEs are not artificially shifted out of their jurisdiction and that the tax base reported by MNEs in their country reflects the economic activity undertaken therein. For taxpayers, it is essential to limit the risks of economic double taxation.

Financing SMEs and Entrepreneurs 2017 Jun 14 2022 Financing SMEs and Entrepreneurs 2017 provides information on debt, equity, asset-based finance, and framework conditions for SME and entrepreneurship finance, complemented with an overview of recent policy measures to support access to finance in 39 countries. Almost a decade after the financial crisis, the financing situation of SMEs and entrepreneurs has generally improved in 2015 and the first half of 2016 in most participating countries, and indicates a more favourable business environment. While alternative sources of financing are gaining some traction, SMEs nevertheless remain very reliant on bank lending, making them vulnerable to credit market conditions and the economic climate.

The Next Production Revolution Feb 10 2022 This publication examines the opportunities and challenges, for business and government, associated with technologies bringing about the "next production revolution". These include a variety of digital technologies (e.g. the Internet of Things and advanced robotics), industrial biotechnology, 3D printing, new materials and nanotechnology. Some of these technologies are already used in production, while others will be available in the near future. All are developing rapidly. As these technologies transform the production and the distribution of goods and services, they will have far-reaching consequences for productivity, skills, income distribution, well-being and the environment. The more that governments and firms understand how production could develop in the near future, the better placed they will be to address the risks and reap the benefits.
