Regional Security in Southeast Asia Aug 26 2023 The book examines ASEAN's mechanisms in managing challenges and threats to regional security. Its extensive analyses of the ASEAN story of managing regional security cover the different phases of ASEAN's development as a regional organization and explore the perceptible changes that have occurred in regional mechanisms of conflict management. The book also examines the roles of relevant actors beyond the states of ASEAN and the key interactions that have evolved over time, which have been instrumental in moving regional mechanisms beyond the ASEAN way. The book argues that the ASEAN way has not been impervious to change. As the association finds

its way through periods of crises and continues to confront the many challenges ahead, ASEAN and its mechanisms are already being transformed beyond the narrow confines of the modalities associated with the ASEAN way. The changes in the political and security landscape of the region, as well as the democratic transitions taking place in some member states, have set the stage for a much more dynamic set of regional actors and processes that bring into question the kind of regionalism that is now taking place in the region. This book therefore attempts to capture these evolving dynamics and examines the way regionalism is changing in Southeast Asia.

The Asia-Pacific Security Lexicon Jun 19 2020
Identifies and defines the concepts and ideas central to security discourse in the Pacific region. This book looks at how concepts such as human security and non-traditional security have evolved and found adherents.

Human Security in Southeast Asia Jul 21 2020
There is a growing interest in human security in Southeast Asia. This book firstly explores

the theoretical and conceptual basis of human security, before focusing on the region itself. It shows how human security has been taken up as a central part of security policy in individual states in Southeast Asia, as well as in the regional security policy within the Association of Southeast Asian Nations (ASEAN). The book discusses domestic challenges for human security including the insurgencies in southern Thailand, the Philippines and Indonesia. Transnational security issues such as terrorism, drugs, human trafficking and the situation in Burma are explored by the author, and the 'ASEAN' way of contrasting the values and approaches of Southeast Asian countries with those in the West is assessed. By focusing on the ongoing changes and efforts to achieve human security in Southeast Asia, this book contributes to theoretical debates on human security as well as regional studies on Southeast Asia.

(Re)Negotiating East and Southeast Asia May 23 2023 This book seeks to explain two core paradoxes associated with the Association of Southeast Asian Nations (ASEAN): How have diverse states hung together and stabilized relations in the face of competing interests, divergent preferences, and arguably weak cooperation? How has a group of lesser, self-identified Southeast Asian powers gone beyond

its original regional purview to shape the form and content of Asian Pacific and East Asian regionalisms? According to Alice Ba, the answers lie in ASEAN's founding arguments: arguments that were premised on an assumed regional disunity. She demonstrates how these arguments draw critical causal connections that make Southeast Asian regionalism a necessary response to problems, give rise to its defining informality and consensus-seeking process, and also constrain ASEAN's regionalism. Tracing debates about ASEAN's intra- and extra-regional relations over four decades, she argues for a process-driven view of cooperation, sheds light on intervening processes of argument and debate, and highlights interacting material, ideational, and social forces in the construction of regions and regionalisms.

The "Free and Open Indo-Pacific" and Implications for ASEAN Aug 02 2021 In recent times, the United States, Japan and Australia have all promoted extremely similar visions of a Free and Open Indo-Pacific as the central organizing concept to guide their efforts in the region. The concept is essentially a reaffirmation of the security and economic rules-based order which was cobbled together after the Second World War – especially as it relates to freedom of the regional and global

commons such as sea, air and cyberspace, and the way nations conduct economic relations. Be that as it may, the Free and Open Indo-Pacific is an updated vision of collective action to defend, strengthen and advance that order. It signals a greater acceptance by the two regional allies of the U.S. of their security burden and takes into account the realities of China's rise and the relative decline in dominance of the U.S. There are a number of noteworthy "updates" which include: • A deliberate move from "Asia-Pacific" to "Indo-Pacific" as the primary geo-strategic and geo-economic area of interest and responsibility for the three countries; • An increased emphasis on creating and sustaining a "balance of power" in favour of the rules-based order; and • A greater emphasis on the liberal aspects of a preferred order including the importance of rule-of-law and limitations on how governments wield their power, and greater separation of political and strategic objectives on one hand with commercial activities on the other. While operationalization of the Free and Open Indo-Pacific concept is at an early stage, trilateral strategic cooperation between the U.S., Japan and Australia is significant and quickly deepening. On the other hand, and with respect to misalignment and inconsistency, the

economic policies of the Trump administration are causing considerable frustration. The three countries have also been strong supporters for the revival of the Quadrilateral grouping which also includes India. However, and notwithstanding some apprehension in Southeast Asia, about where the "Quad" is heading, the latter grouping is only still a fledgling one and its shape and development will depend on the extent to which the four countries become concerned about China's activities in both Oceans. Finally, the Association of Southeast Asian Nations (ASEAN) and its member states continue to delay any definitive response to the Free and Open Indo-Pacific concept. Although its principles are attractive to many ASEAN member states, long-held conceptions of ASEAN centrality and its meaning gives the organization apparent reason for hesitation. The reasons include fears of diminished centrality and relevance, and reluctance to endorse a more confrontational mindset being adopted by the U.S. and its allies – including the revival of the Quadrilateral grouping with India – with respect to China. The reality is that while ASEAN and major member states are focused primarily on the risks of action, there are considerable risks of inaction and hesitation. The current era will either

enhance or lessen the relevance of ASEAN in the eyes of these three countries in the years ahead depending on how the organisation and its key member states respond. Indeed, the paper argues that ASEAN is more likely to be left behind by strategic events and developments if it remains passive, and that the ball is in ASEAN's court in terms of the future of its regional "centrality".

Regional Cooperation in South Asia and Southeast Asia Apr 10 2022 Provides a comparative sketch of regional cooperation in South and Southeast Asia in the light of various political, economic and social developments in the two regions.

China, India, Japan and the Security of Southeast Asia Jan 19 2023 "This volume presents the findings of a research project organized by the Institute of Southeast Asian Studies in 1989 to look specifically into the impact of the end of the Cold War on regional security. It is one of the few attempts that have been made to understand the complex nature of relations between the major Asian powers and Southeast Asia in the context of their historical ambitions and current strategic imperatives. The eleven contributors are a unique combination of regional and international expertise in the field of strategic analysis representing all the major

interested parties in the wider Asia-Pacific environment. Their chapters deal not only with China, India, and Japan but also with the central role of ASEAN, particularly its largest member, Indonesia, and the rapidly changing profile of Vietnam."--BOOK

The United States and Southeast Asian Regionalism Oct 16 2022 The Nixon or Guam Doctrine of 1969 stressed the importance of progress towards regional cooperation and Asian collective security, indicating that Asian countries themselves should take the initiative in creating programs in which the United States could participate. This book analyses the development of United States regional cooperation policy on Southeast Asia and its importance to long-term planning for the region that had been the general aim of successive American post-war administrations. The author demonstrates the link between economic regional cooperation and collective security in Southeast Asia, placing regionalism in an international context by examining the influence United States policy and various important events had on the development of Southeast Asian regionalism. Through the analysis of primary material,

including previously classified material, in the United States, the United Kingdom, and Australia and engagement with historiography of war and peace in Southeast Asia, the book puts forward the argument that Southeast Asian regional cooperation was influenced by both American and Asian policy and its development reflected the economic and political transformation of the post-war Southeast Asian landscape. It also examines the developments in British and Australian policy and how developments in Southeast Asia influenced and, in turn, were affected by the policies of the Western powers. Adding to the current discourse concerning the origins of Southeast Asian regionalism, this book will be of interest to academics in the field of Southeast Asian studies, United States political history, international relations and regionalism.

International Relations in Southeast Asia Dec 18 2022 This fully revised and updated edition of Donald E. Weatherbee's widely praised text offers a clear and comprehensive introduction to international relations in contemporary Southeast Asia. An invaluable guide to the region, this lucid work will be an essential text for courses on Southeast Asia and on the international relations of the Asia-Pacific.

Understanding ASEAN's Role in Asia-Pacific

Order Apr 22 2023 This book assesses the important role of the Association of Southeast Asian Nations (ASEAN) in the management of regional political, security and economic relations. The author argues that ASEAN's prominent role in the region, spanning 50 years, is largely due to the acquiescence of the great powers who endorsed ASEAN, accepted its regional position and accorded the institution a legitimacy and durability that, otherwise, it would not have. This text offers a key intervention into the debate regarding ASEAN and regional order by showing how ASEAN's contribution to order management is part of a negotiated division of labour with the great powers. The author applies an innovative social roles analysis, which captures the dynamic interactions between ASEAN and the great powers from the Cold War to the present day.

China and Southeast Asia Jun 24 2023 The relations between ASEAN and China occupy a unique and important position in the foreign relations of the Asia-Pacific region. This volume investigates the impacts of global changes and regional challenges confronting the contemporary developments of China-ASEAN relations.

ASEAN and Regional Order Jul 01 2021 Founded in 1967, the Association of Southeast Asian

Nations (ASEAN) has emerged as one of the most successful regional organizations in the world. This book discusses the future of ASEAN against a backdrop of a growing US-China rivalry and the security implications of COVID-19. Chapters in this book move through a history of ASEAN and its multilateral institutions, including the ASEAN Regional Forum (ARF) and the East Asia Summit (EAS), featuring rare photographic material to contextualize both recent developments in regional security and projections for ASEAN's prospects. Key concepts and terms are unpacked throughout, with the chapters focusing on rapidly changing international and regional environments, economic insecurities such as trade conflicts, human rights, and ASEAN identity, and providing extensive analysis of the factors challenging the principle ASEAN Centrality and the Indo-Pacific security architecture. The concept of security community frames this book, despite being subject to change if intraregional discord and institutional stagnation take hold. As a discussion of the role and future of ASEAN in a pivotal period of world history, ASEAN and Regional Order will prove vital to both students and scholars of international relations, regional organizations, and Asian studies more broadly.

Bush and Asia Feb 25 2021 Bringing together a number of recognized international experts, this book considers the impact of changes in American foreign policy on the East Asian region, as well as the evolving nature of American policy itself. Specific case studies consider America's relations with the most important countries of the region, including China, a potential strategic rival, Japan, still the second largest economy in the world, and Indonesia, the world's largest Muslim country. These case studies and others are complemented with more theoretical and thematic considerations of the nature of American hegemony, its historical links to the region, security policy, economic ties, and American attitudes toward emerging East Asian regionalism. Bush and Asia provides a comprehensive introduction to, and analysis of, the Bush administration's relations with what will be the twenty-first century's most dynamic and strategically significant region.

(Re)Negotiating East and Southeast Asia Jan 07 2022 This book seeks to explain two core paradoxes associated with the Association of Southeast Asian Nations (ASEAN): How have diverse states hung together and stabilized relations in the face of competing interests, divergent preferences, and arguably weak cooperation? How has a group of lesser, self-

identified Southeast Asian powers gone beyond its original regional purview to shape the form and content of Asian Pacific and East Asian regionalisms? According to Alice Ba, the answers lie in ASEAN's founding arguments: arguments that were premised on an assumed regional disunity. She demonstrates how these arguments draw critical causal connections that make Southeast Asian regionalism a necessary response to problems, give rise to its defining informality and consensus-seeking process, and also constrain ASEAN's regionalism. Tracing debates about ASEAN's intra- and extra-regional relations over four decades, she argues for a process-driven view of cooperation, sheds light on intervening processes of argument and debate, and highlights interacting material, ideational, and social forces in the construction of regions and regionalisms.

Asia Eyes America Aug 22 2020 Contains a collection of papers produced by participants (U.S. and regional scholars and analysts) at a conference, "Asia Eyes America," held at the Naval War College in Newport, Rhode Island, in May 2006. What are the implications of Asia's longer-term transformation for U.S. interests? How might change reconfigure American security requirements in the next decade and beyond? On what basis does United States reaffirm yet

redefine its enduring commitment to regional order? This volume is a collaborative effort involving prominent specialists on both sides of the Pacific. The book focuses on underlying attitudes toward American power and policy, especially as viewed by strategic analysts within the region. Various contributors describe contradictory attitudes toward American power. Most states hope to deepen ties with the United States, while avoiding comprehensive envelopment in U.S. strategy. There is a tension between the preference for continued American regional involvement, while seeking to limit possibilities of highly intrusive U.S. policy interventions. Both considerations will continue to shape regional attitudes toward American power, especially U.S. military power--Publisher's description.

Cooperative Security in the Asia-Pacific May 19 2020 This book offers the most comprehensive analysis yet of the ASEAN Regional Forum (ARF), which remains the foremost dialogue forum for the promotion of cooperative security in the Asia-Pacific. Contributors focus on the perspectives and roles of the key players in the ARF - ASEAN, the United States, China, Japan, and Australia - and discuss to what extent these participants have shaped the Forum's institutional development and affected its

achievements and prospects against the backdrop of the evolving regional security architecture. They also examine in depth how participants have used the Forum to respond to a range of important transnational security issues and challenges, including terrorism and maritime security, as well as disaster relief. This work also explores how, despite the difficulties in reaching a new consensus regarding the collective pursuit of preventive diplomacy, some activist participants have succeeded in bringing about a notable, albeit incipient, 'practical turn' in the ARF's security cooperation. This book will appeal to students of South-East Asian Politics, Asian Security Studies and International Relations in general.

Political and Security Dynamics of South and Southeast Asia Dec 06 2021 Security and economic imperatives are increasingly intertwining the destinies of Southeast Asia and South Asia, making it necessary for scholars on both sides to deepen their understanding of each other's regions. This collection of papers, first presented at a Dialogue between the Institute of Southeast Asian Studies in Singapore and the Observer Research Foundation of India in March 2006, provides perspectives from India and Singapore on some of the major security and political

issues facing the two regions. The subjects covered include regional integration trends as symbolized by the first East Asian Summit, the roles of the major powers, maritime security and naval deployments in the Indian Ocean region, and political and security developments within Southeast Asia.

Reconfiguring East Asia Mar 29 2021 Focuses both on specific regional organizations like ASEAN, The Asian Development Bank and APEC, as well as on key institutions such as East Asian legal systems, the media, organized labour, Asian business systems, and the developmental state.

The New Regionalism in Asia and the Pacific Apr 29 2021

Making of Southeast Asia Nov 24 2020 Amitav Acharya has written a splendidly ambitious book. Travelling from the discipline of International Relations to the historiography of Southeast Asia and back again, it draws upon a range of methodologies to analyse the issue of identity in the configuration of Southeast Asia. But it provides more than an academic assessment. With this book, Acharya must be judged to have contributed not just to the study of Southeast Asian regionalism, but to the process itself. - Anthony Milner, Basham Professor of Asian History, Australian National University

Constructing a Security Community in Southeast Asia Mar 21 2023 First published in 2000. Routledge is an imprint of Taylor & Francis, an informa company.

Proceedings of the Third Southeast Asia Regional Conference of the Academy of International Business May 11 2022

Communities in Southeast Asia Feb 08 2022

China, the United States, and South-East Asia Dec 26 2020 China's emergence as a great power is a global concern that can potentially alter the structure of world politics. Its rise is multidimensional, affecting the political, security, and economic affairs of all states that comprise the world's fastest developing region of the Asia-Pacific. Most of the recently published studies on China's rise have focused on its relations with its immediate neighbours in Northeast Asia: Japan, the Koreas, Taiwan, and Russia. Less attention has been given to Southeast Asia's relations with China. To address these issues, this volume, with its wide range of perspectives, will make a valuable contribution to the ongoing policy and academic dialogue on a rising China. It examines a range of perspectives on the nature of China's rise and its implications for Southeast Asian states as well as US interests in the region. China, the United States and South-East Asia will be of

great interest to students of Chinese politics, South-East Asian politics, regional security and international relations in general.

Southeast Asia and Regional Peace Mar 09 2022
Southeast Asian Perspectives on Security Aug 14 2022 The conventional understanding of strategic issues in the modern world has been very much a Western-driven phenomenon. That is to say, Western strategists, thinkers and writers have tended to establish the principles of strategic concepts, and to develop theories around them. While there is utility in much Western strategic thought, it is also apt to note that some of it does not have full relevance or validity when applied to a regional setting that is far removed from the geographical boundaries of the Western world. In that connection, this volume is partly intended to serve as an antidote to much of the Western commentary on Asia-Pacific security issues by providing a range of perspectives on those issues from the Southeast Asian point of view. It offers a range of Southeast Asian perspectives on the multifaceted security issues that confront the Asia-Pacific region in the post-Cold War era. That there is no unitary perspective emanating from the region is symptomatic of the very fluid geopolitical situation that

characterizes Asia-Pacific security, and, of equal import, the different schools of thought that analysts in the region have chosen to subscribe to.

Towards a Resilient Regional Cyber Security
Jan 27 2021 The rapid growth of internet, digital, social media and mobile users in Southeast Asia has increased the possibility of cyber misuse. The digital domain connects over half of the region population, opening economic possibilities, but also increasing their vulnerability to crimes and security breaches done via the internet. Aside from the cyber security challenges faced by individuals and businesses, national governments that increasingly provide their services online, as well as manage physical infrastructures that are digitally connected, have become more fragile toward cyber espionages and attacks. Furthermore, not only governments are obliged to protect national cyber security and the welfare of the population, but they are also tasked to formulate regulations for private sectors operating in cyber realm. Understanding such complexities, leaders of ASEAN have agreed to work together on cyber cooperation across the various platforms of the three pillars of ASEAN. This publication is an effort to increase public awareness of cyber issues faced by the Southeast Asian

region, as well as to share experiences from ASEAN countries in dealing with the complexities of cyber development and management. Cyber domain carries a great potential for economic development and source of employment, but it is also a field of contestation for ideology spreading and power play. Notwithstanding the intricacies, cyber security is a cross-cutting issue that would benefit from the involvement of multiple stakeholders including governments, scholars and practitioners.

Urban Development In Southeast Asia May 31 2021

Explaining ASEAN Feb 20 2023 Is ASEAN the foundation of a strong regional community in Southeast Asia? Or is it no more than an instrument used by its members to advance their individual interests? Addressing these questions, Shaun Narine offers a comprehensive political analysis of ASEAN from its creation in 1967 through the events of 2001. Reflecting both the accomplishments and the limitations of the organization, Explaining ASEAN explores issues of regional security, economic stability - and the growing expectations of the international community. Narine's trenchant analysis makes it clear that, unless ASEAN can resolve the problems of inadequate resources and disagreements among the member

states, its future as an effective, active international regime is doubtful.

The United States and Asia Jun 12 2022 Now in a fully revised and updated edition, this cogent book provides an overview of the historical context and enduring patterns of U.S. relations with Asia. Noted scholar Robert G. Sutter offers a balanced analysis of post-Cold War dynamics in Asia, which involve interrelated questions of security, economics, national identity, and regional institution building. He demonstrates how these critical concerns manifest a complex mix of realist, liberal, and constructivist tendencies that define the regional order. He describes how the United States has responded to Asia's growing strength and importance while at the same time trying to maintain its leading position as an Asian power despite China's rising influence. Considering the most important transition in American policy toward Asia since the end of the Cold War, Sutter assesses the growing U.S.-China rivalry that now dominates both regional dynamics in the Asia-Pacific and U.S. policy in the region.

Asian Regional Governance Apr 17 2020
Jayasuriya looks at the changing global and domestic political economies shaping the new regionalism in Asia, and examines the relationship between regional domestic,

political and economic structures and forms of regional governance. Well-known contributors in the field focus on the impact of globalization on Asian regionalism, new security challenges, monetary cooperation, sovereignty, democratization, industry policy and China's engagement with southeast Asia. Providing a detailed overview of the conceptual foundations of regional governance, this text is an indispensable resource for all who want to understand the emerging dynamics of regionalism in the Asia Pacific.

Connecting South Asia and Southeast Asia Sep 15 2022 This report analyzes how closer regional connectivity and economic integration between South Asia and Southeast Asia can benefit both regions, with a focus on the role played by infrastructure and public policies in facilitating this process. It examines major developments in South Asian–Southeast Asian trade and investment, economic cooperation, the role of economic corridors, and regional cooperation initiatives. In particular, it identifies significant opportunities for strengthening these integration efforts as a result of the recent opening up of Myanmar in political, economic, and financial terms. This is particularly the case for land-based transportation—highways and railroads—and energy trading. The report's

focus is on connectivity in a broad sense, covering both hardware and software, including investment in infrastructure, energy trading, trade facilitation, investment financing, and support for national and regional policies.

Southeast Asian Regional Port Development Oct 04 2021 This book provides an understanding of the dynamic regional play in terms of port development in Southeast Asia in the medium term. It presents a computer-based comparative analysis of container flows and transshipment within this region. The study provides a well-considered statistical dissection of the key port players in this part of the world – an analysis of value to businessmen, policy-makers, and observers of Southeast Asian affairs.

Regionalism and Multilateralism Sep 22 2020 These essays, written between 1990 and 2000, cover the most significant phase of multilateral institution-building in the Asia Pacific region. They deal with: the emergence of regionalism in Southeast Asia; ASEAN's transition to the post-Cold War era; the role of the ASEAN Regional Forum; the engagement of China; the changing relationship between sovereignty and regionalism; and prospects for the regional institutions such as ASEAN, APEC and the ARF after the Asian economic crisis. The essays address the most challenging issues

of regional order and articulate an institutionalist understanding of international relations in the region. This updated second edition includes four new chapters and two revised chapters.

Meeting the China Challenge Oct 24 2020 In East Asia, the United States is often acknowledged as a key determinant of stability given its military presence and role as a security guarantor. In the post-Cold War period, regional uncertainties about the potential dangers attending a rising China have led some analysts to conclude that almost all Southeast Asian states now see the United States as the critical balancing force. In contrast, based on case studies of Thailand, Singapore, and Vietnam, this study argues that key states in the region do not perceive themselves as having the stark choices of either balancing against or bandwagoning with China. Instead, they pursue hedging strategies that comprise three elements: indirect balancing, which mainly involves persuading the United States to act as counterweight to Chinese regional influence; complex engagement of China at the political, economic, and strategic levels, with the hope that Chinese leaders may be socialized into conduct that abides by international norms; and a more general policy of enmeshing a number of

regional great powers in order to give them a stake in a stable regional order. The study also investigates each state's perceptions of the American role in regional security and discusses how they operationalize their hedging policies against a potential U.S. drawdown in the region, as well as the different degrees to which they use their relationships with the United States as a hedge against potential Chinese domination. Finally, it discusses these states' expectations of what the United States should do to help in their hedging strategies toward China, suggesting a range of policies that span the military as well as political, diplomatic, and economic realms. This is the sixteenth publication in Policy Studies, a peer-reviewed East-West Center Washington series that presents scholarly analysis of key contemporary domestic and international political, economic, and strategic issues affecting Asia in a policy relevant manner.

ASEAN and East Asian International Relations
Jul 25 2023 Academic and accepted orthodoxy maintains that Southeast Asia, and Asia generally, is evolving into a distinctive East Asian regional order. This book questions this claim and reveals instead uncertainty and incoherence at the heart of ASEAN, the region's foremost institution. The authors provide a

systematic critique of ASEAN's evolution and institutional development, as well as a unified understanding of the international relations and political economy of ASEAN and the Asia Pacific. It is the first study to provide a sceptical analysis of international relations orthodoxies regarding regionalization and institutionalism, and is based on wide-ranging and rigorous research. Students of international relations, the Asia Pacific, Southeast Asia, regional studies, international history and security and defence studies will find this book of great interest, as will scholars, policy makers and economic forecasters with an interest in long-term Asia Pacific trends.

System And Process In Southeast Asia Jul 13 2022 Southeast Asia, although not garnering the headlines of ten to twenty years ago, is important in global politics. Vietnam's domination of Indochina, for example, has polarized the region, given the Soviet Union new regional access, and magnified the military threat to Thailand. Insurgency movements supported by the radical Left or Right continue to plague governments. The Strait of Malacca, the major sea-lane through Southeast Asia, provides primary access for the U.S. Pacific fleet to the Indian Ocean and the Middle East and is Japan's oil lifeline.

U.S. commercial and military interests remain strong in the Philippines and are expanding in Indonesia, the world's fifth largest country (with a population approaching 170 million people), whereas Thailand, Malaysia, and Singapore are sources for investment, raw materials, and potential markets. Thailand, once closely allied with the United States, has again renewed those ties in the face of Vietnam's expansion. This comprehensive, up-to-date textbook analyzes Southeast Asia in the context of regional and global political systems, both traditional and contemporary. After looking at the traditional patterns of interstate relations in the region, Professor McCloud shows that Southeast Asia has been and continues to be dependent on the global system. However, he also identifies a "neotraditional current" in contemporary Southeast Asian politics, as elements of traditional beliefs and values reassert themselves in policy and practice, redefine the patterns of interstate behavior in the region, and set the limits to dependence on the global system. The book is intended as a primary text for courses on the history or politics of Asia or Southeast Asia, regional development and integration, and the role of Southeast Asia in world politics. It will also be useful in survey courses in Asian studies,

comparative politics, and Third World development.

Contemporary Southeast Asia Nov 17 2022 South East Asia is one of the world's most diverse and complex regions yet its historical development, political practices and social and economic structures also have significant common features. This major new text brings together specially-commissioned chapters by leading authorities, rigorously edited to ensure systematic coverage, to provide students with an accessible and up-to-date thematically-structured comparative introduction to South East Asia today.
