LAW ENFORCEMENT EXAM PREPARATION

This book is designed to best prepare each candidate with the ability to score the highest possible score they are capable of attaining. The Federal Bureau of Investigation's Uniform Crime Reports Section selected and analyzed 51 incidents of police officer killings in order to evaluate the psychology of the offender, the behavior of the police officer, and circumstances in which the police officer lost his or her life. The study was conducted over a 3-year period; the 51 incidents resulted in the death of 54 police officers and involved 50 offenders. Results demonstrated that, while no single offender profile could be established, most killers of police officers had been diagnosed as having some type of personality disorder. Behavioral descriptors of victims were frequently similar in that they were good-natured and more conservative than their fellow officers in the use of physical force. The incidents themselves revealed that killings were often facilitated by some type of procedural miscue (e.g., improper approach to a vehicle). Type of assignment, circumstances at the scene of an encounter, weapons involved, and the environment in which events occurred all played a role in the preponderance of police officer deaths in the South. The report presents extensive information on the victims, offenders, and incidents studied. It identifies personality types of offenders, provides guidance on how individuals of a given personality type interact with authority figures, and offers approaches to interrogation. The report also points out specific areas where law enforcement training and procedures may be improved. Appendixes contain the study

methodology and a description of personality types. This book updates prior research that utilized the perceptions of criminal investigators of the Immigration & Naturalization Service (INS), and compares these perceptions with immigration enforcement priorities that were implemented post 9/11, through the Obama Administration up to the Trump presidency. The legacy INS attempted to provide both a service and control function, which made it difficult for INS investigators to fulfill their mission of interior enforcement of the immigration laws. Other problems that surfaced included organizational relations, as well as notions about professionalism, which affected recruitment, retention, training, and worker expectations. The creation of the Department of Homeland Security (DHS) should have addressed these issues relating to immigration enforcement with the intent of solving some of the underlying problems. However, policies and ideological issues exacerbated efforts to enforce the immigration laws. The updated material in this third edition discusses how the interaction between an organization and the environment in which it operates, contributes to effectiveness with specific reference to the organization's stated mission. A review of immigration laws and agency policies, including executive orders, priorities, the impact of sanctuary cities, and consideration of the wider variables impacting illegal migration among other issues, were also analyzed. Police officers work in a world where there is constant struggle between good and evil. More than any other public service profession; those in the field of law enforcement are in a unique position to make a spiritual difference in the lives of both co-workers and citizens whom they encounter. However; without a firm spiritual foundation, the stress found in a law enforcement career can drag the officer down emotionally thus leading to stress in the family, divorce, addiction, and in extreme cases even suicide. The Peacekeepers Bible study is designed to be used by individual law enforcement officers and small groups. It is written by a Christian law enforcement veteran using real life situations that all officers can appreciate. By using biblical quotes and spiritual references, the Peacekeepers study helps you discover and understand God's purpose for your life and career. Chapter topics include issues

such as work stress, becoming spiritually connected, developing a stronger marriage and family, and being a sound witness for Christ. This is a must read book for anyone in the field of law enforcement who may be struggling with the question "How can I be both a cop and a Christian?" This study investigates issues relative to assessing and addressing risks to officer safety. The study was conducted over a 3-year period and addressed 40 distinct cases of serious assaults on law enforcement officers. The cases involved 52 victim officers and 42 offenders. Routine, repetitive tasks emerged as a continuing threat to officer safety. Traffic stops, searches, and use of handcuffs are examples of tasks that should be second nature to officers but presented problems to the victims in the cases studied. Officers cited

training as critical to the actions they took to protect themselves. Post-assault trauma and recovery proved to be areas that perhaps have not received appropriate attention from the law enforcement community. Many of the victim officers in the study displayed an uncommon "will to survive," an attitude many officers attributed to their survival training. This article reports extensive information on the victims, offenders, and incidents studied, and identifies specific areas where law enforcement training and procedures may be improved. Figures, tables, appendixes, references.

While the proximate cause of any accident is usually someone's immediate action— or omission (failure to act)—there is often a trail of underlying latent conditions that facilitated their error: the person has, in effect, been unwittingly “set up” for failure by the organization. This Brief explores an accident in policing, as a framework for

examining existing police practices. Learning from Error in Policing describes a case of wrongful arrest from the perspective of organizational accident theory, which suggests a single unsafe act—in this case a wrongful arrest—is facilitated by several underlying latent conditions that triggered the event and failed to stop the harm once in motion. The analysis demonstrates that the risk of errors committed by omission (failing to act) were significantly more likely to occur than errors committed by acts of commission. By examining this case, policy implications and directions for future research are discussed. The analysis of this case, and the underlying lessons learned from it will have important implications for researchers and practitioners in the policing field.
