In the spirit of Peter Jenkins' "Walk Across America," speaker and teacher Brad Zockoll gives an autobiographical account of his two years on the road riding in a sputtering Dodge Aspen as a self-supporting circuit-riding evangelist in the mid-1980s. The true-life adventures range from the hilarious to the awe-inspiring, and all stories give a bird's-eye view of seeing God work in miraculous ways as Brad traveled throughout grassroots America. Miracles and mishaps are all included, from bee swarms to police cruisers to storefront churches. "The Gas Tank Chronicles are a must-read for anyone who's yearning for the freshness of God's touch, anyone who needs to laugh, and anyone who wants to know that God is still moving, still loving, and still changing people's lives. Brad Zockoll paints true stories filled with depth and humor. Once you begin reading, you won't stop!" -Susie Shellenberger, Editor, SUSIE Magazine This book discusses the technical alternatives for cleanup of radioactive fluoride salts that were the fuel for the Molten Salt Reactor Experiment, a novel nuclear reactor design that was tested in the 1960s at the Oak Ridge National Laboratory in Tennessee. IS A NEW DARK AGE COMING? As a candidate, President Biden boldly promised that America “would transition away from the oil and gas industry,” replacing it with “renewable energy over time.” He further doubled down on that promise by issuing executive orders on his first day in office. But has anyone really asked the question, is that possible? Fossil fuels have lifted humanity from the depths of poverty, the drudgery of manual labor, the edge of starvation and being captive to the whims of nature. The President’s proposals put all of that progress at risk by the idea that renewables can replace fossil fuels and the thousands of products derived from them. Too much of the debate and discussion about energy is rampant with overly simplistic ideas and misinformation. Take a journey through history and discover how fossil fuels touch every aspect of life, making humanity wealthier, healthier, and safer. Will the proposed world of renewable energy be bright or will it usher in a coming dark age? News from the Unconscious Realm is an extensive collection of vivid news dispatches from the dream world. If the experiences we have in our sleep are just as valid as waking life, these reports are of vital interest. Far from being imaginary, the unconscious is full of ideas and actions, and it’s literally the source of our conscious world—the pool that material reality emerges from. The opposite of breaking news, these stories, presented in hard-nosed journalism format, have helped to bring our world into existence. 17 unforgettable road trips through Delaware, Maryland, and Virginia Want to hunt shipwrecks for treasure?
