Jedediah S. Smith was to western exploration what Benjamin Franklin and Thomas Edison were to the world of invention—a legendary figure kiting into the unknown, a lighter of the dark. No one did more to open the American West than this mountain man. His greatest exploring expedition came in 1826 when he looked to the Southwest for trapping grounds. Jedediah Smith's route ran, in modern terms, from Soda Springs in Idaho to the Great Salt Lake, southward across Utah, along the Colorado River to the Mojave Desert, and westward to California. When he reached the San Gabriel mission there, he could claim to be the first American to have gone overland through the Southwest. Then Smith marched northward through the San Joaquin Valley and, with two companions, embarked across the Great Basin. In traveling to the rendezvous of 1827 they became the first citizens of the United States ever to cross the Sierra eastbound and the Great Basin. That is the itinerary described in *The Southwest Expedition of Jedediah S. Smith*, which contains the mountain man's long-lost journals. After coming to light in 1967, they were edited by George R. Brooks and published in a limited edition a decade later. This Bison Book reprint brings a scarce historical record to a wider audience. Advertising brochure endorsed by Francis P. Harper. The diaries and personal accounts of William Clark, Meriwether Lewis, and other members of their expedition chronicle their epic journey across North America in search of a river passage to the Pacific Ocean and describe their encounters with the Native American peoples of the West, exotic flora and fauna, and amazing natural wonders. My new master is intense, intimidating, and wildly unpredictable. The only thing I can count on? That he makes me ache in ways I didn't know were possible before he caught me in his web. Sterling's secrets are of the dark and dangerous variety—there's no doubt in my mind about that now. But I still can't figure out what he truly wants from me. He says he'll take what I've promised when "the time is right." In the meantime, he seems determined to treat me like a naughty submissive, a princess, or...his lover. But I can't let myself be drawn in by his generous, wickedly sexy side. Serving Sterling is something I can survive. Falling for Sterling would destroy me—body, heart, and soul. Warning: Serving Sterling is the second installment in a three-book serial romance. It's a dark, dirty, boundary pushing romance that ends in a cliffhanger. dark romance, billionaire romance, kidnapping romance, virgin auction, romantic suspense, thriller, contemporary romance, new adult, serial romance, steamy romance, enemies to lovers. First Published in 2003. Routledge is an imprint of Taylor & Francis, an informa company. Naval adventure in the Far East during the 1840s This book is a highly regarded classic of naval history. Its author was the captain of the ship, HMS Dido, which is central to the events recounted within its pages. The subject matter of his tale of adventure could hardly be more romantic or evocative. This is an account of the Royal Navy on duty and in action in the early part of Queen Victoria's long reign, sailing the tropical waters of the furthest corner of her burgeoning empire. Here the reader will enter the nineteenth century world of the East Indies—a place of unpredictable exotic seas bordered by fetid, steaming jungles perilously populated by head-hunting Dyaks and mercileus Malay pirates who scoured the seaways only to disappear into hidden creeks to their defended stockades. Here the reader will be introduced to the legendary 'White Rajah' of Sarawak, James Brooke, who under the Union Flag all but forged a kingdom for himself in Borneo and who spread his influence over the entire region. All readers who are fascinated by the doings of the Royal Navy in the last days of sail, here on a mission to make the tropical seas safe for trade, will find much to satisfy them within the pages of Keppel's account. Available in softcover or hardcover with dust jacket for collectors. Excerpt from *First Across the Continent: The Story of the Exploring Expedition of Lewis and Clark in 1803-4-5* This edition was republished in London, Dublin, Ger many, Holland, New York, and Paris during years ensuing. Altogether, there have been about forty imprints of the story of the Lewis and Clark expedition. The two latest of these are those of Harper and Brothers, edited by Archibald Mackintosh, and published in 1847 and that edited by Dr. Elliott Goues, and published by Francis P. Harper, New York, 1893. Dr. Mackintosh's work is long since out of print. That of Dr. Coues, comprised in four volumes and limited to an edition of one thousand copies, can now be obtained with difficulty and at considerable expense. It is hoped that the present version of the story of the expedition, told as fully as possible in the language of the heroic men who modestly penned the record of their own doings and observations, will be acceptable to many readers, especially to young folks, who will here read for the first time a concise narrative of the first exploring expedition sent into a wilderness destined to become the seat of a mighty empire. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works. Book Excerpt: people claim to be descendants of those who once lived in the now deserted villages of that province. I had some knowledge of the ethnology of the Hopi, derived from several summers' field work among them, and I believed this information could be successfully utilized in an attempt to solve certain archeological questions which presented themselves.[2] I desired, among other things, to obtain new information on the former extension, in one direction, of the ancestral abodes of certain clans of the sedentary people of Tusayan which are now limited to six pueblos in the northeastern part of the territory. In carrying out this general plan I made an examination of cliff dwellings and other ruins in Verde valley, and undertook an exploration of two old pueblos near the Hopi villages. The reason which determined my choice of the former as a field for investigation was a wish to obtain archeological data bearing on certain Tusayan traditions. It is claimed by the traditionalists of Walpi, especially those of the Read More Excerpt from *The Cairo Expedition: Illinois First Response in the Late Civil War, the Expedition From Chicago* As the years go by, and one by one the actors in and spectators of the scenes of the war of the Rebellion pass away, it seems necessary and proper that all of us should make some record of what we saw or knew of the anxious and trying times in the spring of 1861. The general history of the war has been written by a number of able authors, I wish, only, to add what came within my own knowledge, as to the part taken by Chicago at the beginning of the war. From the time when the steamer Star of the West was fired upon, January 9, 1861, and driven to sea from the entrance to Charleston harbor, the people throughout the North were uneasy and excited, but no one could believe that a serious attempt would be made to disrupt the Union of the States or destroy a government that had existed for nearly a century, and which had been consecrated by the deeds and lives of so many noble men. April 12, 1861, when the citizens of Charleston, South Carolina, opened fire on Fort Sumter, and the gallant Maj. Robert Anderson, to save the lives of his soldiers, struck the Flag of our Country, the news went through the North like an electric shock; quickly recovering from the stunning blow, the people felt that war had actually come and though cheeks paled, lips were firmly set, and eyes flashed, showing the determination by all patriots to stand shoulder to shoulder and preserve the Union and the Government at any cost of life and treasure. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works. A Canyon Voyage: The Narrative Of The Second Powell Expedition Down The Green-Colorado River From Wyoming, And The Explorations On Land, In The Years 1871 And 1872 This book is a result of an effort made by us towards making a contribution to the preservation and repair of original classic literature. In an attempt to preserve, improve and recreate the original content, we have worked towards: 1. Type-setting & Reformatting: The complete work has been re-designed via professional layout, formatting and type-setting tools to re-create the same edition with rich typography, graphics, high quality images, and table elements, giving our readers the feel of holding a 'fresh and newly' reprinted and/or revised edition, as opposed to other scanned & printed (Optical Character Recognition - OCR) reproductions. 2. Correction of imperfections: As the work was re-created from the scratch, therefore, it was vetted to rectify certain conventional norms with regard to typographical mistakes, hyphenations, punctuations, blurred images, missing content/pages, and/or other related subject matters, upon our consideration. Every attempt was made to rectify the imperfections related to omitted constructs in the original edition via other references. However, a few of such imperfections which could not be rectified due to intentional/unintentional omission of content in the original edition, were inherited and preserved from the original work to maintain the authenticity and construct, relevant to the work. We believe that this work holds historical, cultural and/or intellectual importance in the literary works community, therefore despite the oddities, we accounted the work for print as a part of our continuing effort towards preservation of literary work and our contribution towards the development of the society as a whole, driven by our beliefs. We are grateful to our readers for putting their faith in us and accepting our imperfections with regard to preservation of the historical content. HAPPY READING! The contents of this volume constitute observations collected by the U.S. Naval Observatory. "The Florida Wildlife Corridor Expedition shows the world that beyond beaches and theme parks, the heart of Florida is still wild—and can still be saved. In 2012, four explorers enter the Everglades and, 100 days later, reach the Okefenokee Swamp in southern Georgia. They paddle, peddle and hike more than 1,000 miles up the spine of Florida to call attention to this remaining natural corridor so essential to the survival of wildlife and to the well-being of Florida's ever-growing population. Stunning photographs by Carlton Ward Jr and essays by fellow explorers bring the story to life in vivid detail. Travel with them to discover the rivers, swamps, prairies, springs and forests, along with private cattle ranches and timberlands, which unite to form the corridor. Learn about wide-ranging wildlife like the Florida black bear and Florida panther and meet the gladesmen, cowboys and other heroes who work to protect the corridor for us all. The Florida Wildlife Corridor project is a collaborative vision to connect remaining natural lands, waters, working farms and ranches from the Everglades to Georgia, protecting a functional ecological corridor for the health of people and wildlife. The Florida Wildlife Corridor Expedition, led by photographer Carlton Ward Jr, biologist Joe Guthrie, conservationist Mallory Lykes Dimmitt and filmmaker Elam Stoltzfus, was a 100 day, 1000 mile trek in early 2012 that explored the last remaining natural path through the length of the Florida peninsula. The journey will be featured in a film to debut nationally on Public Television in April, 2013" -- Amazon.com. "A treasure of a book."—David McCullough The harrowing story of a pathbreaking naval expedition that set out to map the entire Pacific Ocean, dwarfing Lewis and Clark with its discoveries, from the New York Times bestselling author of *Valiant Ambition* and *In the Hurricane's Eye*. A New York Times Notable Book America's first frontier was not the West; it was the sea, and no one writes more eloquently about that watery wilderness than Nathaniel Philbrick. In his bestselling *In the Heart of the Sea* Philbrick probed the nightmarish dangers of the vast Pacific. Now, in an epic sea adventure, he writes about one of the most ambitious voyages of discovery the Western world has ever seen—the U.S. Exploring Expedition of 1838–1842. On a scale that dwarfed the journey of Lewis and Clark, six magnificent sailing vessels and a crew of hundreds set out to map the entire Pacific Ocean and ended up naming the newly discovered continent of Antarctica, collecting what would become the basis of the Smithsonian Institution. Combining spellbinding human drama and meticulous research, Philbrick reconstructs the dark saga of the voyage to show why, instead of being celebrated and revered as that of Lewis and Clark, it has—until now—been relegated to a footnote in the national memory. Winner of the Theodore and Franklin D. Roosevelt Naval History Prize Imprint: London, M. Ward, 1878. Illustrated, including Frontispiece & Map. ARCHIVAL REPRINT Limited Edition. Privately printed; vellum acabado. Provides facts and information about the travels of Meriwether Lewis and William Clark and their Corps of Discovery and its importance in relation to Native Americans and the westward expansion in the United States. Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better. Although it's a piece of history learned by every British student, the Terra Nova Expedition of 1910-1913 remains an epic story unknown to many. In this ultimate showing of life and boundless bravery, Robert F. Scott and his five-man team battled the elements--traveling through subzero temperatures with motor sledges and ponies--in the hope of being the first to reach this uninhabited territory. Arriving at the South Pole on January 18, 1913, the adventurers were greeted by their worst nightmare: a Norwegian flag. Disheartened and badly frostbitten, they trudged back toward their boat, only to die just eleven miles from the next depot. This well-documented journey is starkly relived in this waterproof, over-sized edition featuring a historic collection of stunning black-and-white photography on waterproof paper, and excerpts from Scott's harrowing diary uniquely crafted in calligraphy. Limited edition of 150 numbered copies Lt. Abert of the United States Army Topographical Engineers set out from Bent's Fort to conduct a detailed reconnaissance of the Canadian River region of the southern plains. Possessing a great eye for detail, Lt. Abert provided clear, graphic descriptions of birds, plants, animals, and the countryside, as well as details about the Comanches and the Kiowa. Lt. Abert's journal is one of the concluding records of the Anglo-American exploration of the American West begun in 1804 by Lewis and Clark. 'Everest by fair means - that is the human dimension, and that is what interests me ... In reaching for the oxygen cylinder, a climber degrades Everest ... a climber who doesn't rely on his own strength and skills, but on apparatus and drugs, deceives himself. In May 1978 Reinhold Messner and Peter Habeler became the first climbers in history to reach the summit of Mount Everest without the use of supplementary oxygen - an event which made international headlines and permanently altered the future of mountaineering. Here Messner tells how the and Habeler accomplished the impossible - and how it felt. He describes the dangers of the Khumbu Icefield, the daunting Lhotse flank, two lonely storm-filled nights at 26,247 feet, and finally the last step to the summit. Everest: Expedition to the Ultimate is a riveting account of the exhaustion, the exhilaration and the despair of climbing into the death zone. The book also includes a history of the mountain, successful ascents and Messner's reflections on recent tragedies on Mount Everest. Reinhold Messner was the first to climb all fourteen peaks higher than 8,000 metres. The author of more than a dozen books on his adventures, he lives in a castle in

northern Italy. With an increase in visits to remote and dangerous locations around the world, the number of serious and fatal injuries and illnesses associated with these expeditions has markedly increased. Medical personnel working in or near such locations are not always explicitly trained in the management of unique environmental injuries, such as high-altitude sickness, the bends, lightning strikes, frostbite, acute dehydration, venomous stings and bites, and tropical diseases. Many health care professionals seek training in the specialty of wilderness medicine to cope with the health risks faced when far removed from professional care resources, and the American College of Emergency Medicine has recently mandated that a minimum level of proficiency needs to be exhibited by all ER physicians in this discipline. This book covers everything a prospective field physician or medical consultant needs to prepare for when beginning an expedition and explains how to treat a variety of conditions in a concise, clinically oriented format. Excerpt from Report of the Exploring Expedition to the Rocky Mountains in the Year 1842: And to Oregon and North California in the Years 1843-44 This plant is very odoriferous, and in Canada charms the traveller, especially when passing through woods in the evening. The French there eat the tender shoots in the spring, as we do asparagus. The natives make a sugar of the owers, gathering them in the morning when they are covered with dew, and collect the cotton from the pods to fill their beds. On account of the silki ness of this cotton, Parkinson calls the plant Virginian silk.-loudon's Encyclopedia of Plants. With the current explosion of interest in letterpress, many are looking to see how new work can be influenced by the past. Active since 1982, Bruce Licher's Independent Project Press is a contemporary studio that has bridged technological eras and produced an unparalleled body of work. It has culled from the past while simultaneously turning it on its head with a distinct visual vocabulary that continues to influence current aesthetics. This monograph features over 40 years of the work of Bruce Licher. The deluxe edition is the same book as the regular with the addition of: 12" gold vinyl record Tape Excavation of previously unreleased remastered demos spanning Bruce Licher's recording career. Special letterpress stamp sheet tipped into book. Perforated chipboard letterpress bookplate tipped in signed and numbered by Bruce Licher. Letterpress wrap sleeve to hold book and record together as a set. Excerpt from Washington's Expeditions (1753-1754) And Braddock's Expedition (1755): With History of Tom Fausett, the Slayer of General Edward Braddock More than a century had elapsed after the discovery of this continent by the Cabots before the first English settle ment was established in America, and one hundred and forty years more had rolled away before settlements were at tempted west of the Allegheny moun tains. Thus for two hundred and fifty years after having gained possession by discovery had England been content to colonize only the American seaboard. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works. Excerpt from Narrative of the United States' Expedition to the River Jordan and the Dead Sea IN the Preface to the large and illustrated edition of this work, it is stated that The object of the Expedition, the narrative of which is here presented, was unknown to the pub lic, until a very short time prior to its departure from the United \states, when the indications were such as to induce me to ap prehend that it was not appreciated. Nevertheless, I had an abiding faith in the ultimate issue, which cheered me on; for I felt that a liberal and enlightened community would not long condemn an attempt to explore a distant river, and its wondrous reservoir, - the first, teeming with sacred associations, and the last, enveloped in a mystery, which had defied all previous attempts to penetrate it. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works. In 1905, eight men from the California Academy of Sciences set sail from San Francisco for a scientific collection expedition in the Galapagos Islands, and by the time they were finished in 1906, they had completed one of the most important expeditions in the history of both evolutionary and conservation science. These scientists collected over 78,000 specimens during their time on the islands, validating the work of Charles Darwin and laying the groundwork for foundational evolution texts like Darwin's Finches. Despite its significance, almost nothing has been written on this voyage, lost amongst discussion of Darwin's trip on the Beagle, and the writing of David Lack. In Collecting Evolution, author Matthew James finally tells the story of the 1905 Galapagos expedition. James follows these eight young men aboard the Academy to the Galapagos and back, and reveals the reasons behind the groundbreaking success they had. A current Fellow of the California Academy of Sciences, James uses his access to unpublished writings and photographs to provide unprecedented insight into the expedition. We learn the voyagers' personal stories, and how, for all the scientific progress that was made, just as much intense personal drama unfolded on the trip. This book shares a watershed moment in scientific history, crossed with a maritime adventure. There are four tangential suicides and controversies over credit and fame. Collecting Evolution also explores the personal lives and scientific context that preceded this voyage, including what brought Darwin to the Galapagos on the Beagle voyage seventy years earlier. James discusses how these men thought of themselves as collectors before they thought of themselves as scientists, and the implications this had on their approach and their results. In the end, the voyage of the Academy proved to be crucial in the development of evolutionary science as we know it. It is the longest expedition in Galapagos history, and played a critical role in cementing Darwin's legacy. Collecting Evolution brings this extraordinary story of eight scientists and their journey to life.
