Expeditionary Anthropology Jul 15 2020 The origins of anthropology lie in expeditionary journeys. But since the rise of immersive fieldwork, usually by a sole investigator, the older tradition of team-based social research has been largely eclipsed. Expeditionary Anthropology argues that expeditions have much to tell us about anthropologists and the people they studied. The book charts the diversity of anthropological expeditions and analyzes the often passionate arguments they provoked. Drawing on recent developments in gender studies, indigenous studies, and the history of science, the book argues that even today, the 'science of man' is deeply inscribed by its connections with expeditionary travel.

Portable Wire Antennas Apr 16 2023 This is not a book on antenna theory. It does provide clear easily understood explanations on the principles of antenna operation, transmission line considerations, impedance matching, baluns, tuners, and the pros and cons of different types and configurations of wire antennas. This book is written with the intention of enabling a new comer to amateur radio to understand the theory and practical considerations of this subject without getting lost in mathematics and complex theory. Portable, reliable HF communication is required for emergency management, expedition communications and recreational uses. This book is about selecting and constructing portable HF wire antennas that will provide maximum performance with low power, light weight and low bulk. All the information required to assemble antennas and antenna kits that can be deployed in multiple configurations is provided. Special attention is given to wire antennas deployed at low heights above ground, a situation confronted by operators on the move. Special attention is also given to NVIS (Near Vertical Incident Skywave) communications, which is also optimum with low antenna elevation. NVIS propagation enables communications in the 50-500 mile range regardless of terrain and independent of repeaters. With two or three low suspension points (8-20 ft.), one can deploy wire antennas

that cover the 160-30 meter bands (those capable of NVIS propagation) with performance optimized for NVIS communication. With a single high suspension point that can be improvised from one or two tall trees, buildings or cliff faces and one of the antenna launch systems described here, one can deploy multiple antenna options that can be configured from the modular antenna kit. These include inverted V resonant or random wire dipoles, long wire antennas, sloper dipoles and inverted L antennas for efficient all-band regional use. It also covers terminated V beam and inverted half rhombic beam antennas optimized for 20-10 meters while being broad band (no tuner required), low noise gain equal to or greater than a high dipole. With two medium to high suspension points (15-80 ft. depending on the band), one can install half square wire antennas that produce high gain low angle radiation that is optimum for DX operation. Dropping one of the wire curtains converts the same antenna into a general coverage multi-band inverted L. With the versatility of the modular antenna components described here, one can quickly assemble, deploy and disassemble and roll up high performance wire antennas that are adaptable to nearly any operating environment and communications objective.

The Secret of the Ninth Planet May 25 2021 While the circumnavigation of the solar system seems farfetched, it may not be once the problem of effective anti-gravitational control is solved. In this book I have assumed that the many researchers now actually at work on this problem will achieve such a result in the next decade. It is not at all impossible that they may—for we all know that the more minds that work at a problem, the sooner it will be solved. The discovery of a means of negating, reversing or otherwise utilizing the immense force of gravitation for space flight purposes is now thought to be within the bounds of probability. It should occur some time within the next hundred years, possibly in even the short period I assume here. Once solved, the severe handicaps imposed on space exploration by the weight and chemical limitations of rockets would no longer apply. The whole timetable of our conquest of the planets in our solar system would be tremendously speeded up, from hot Mercury all the way out to frigid Pluto. In describing the visits of the spaceship Magellan to the planets, I have endeavored to adhere to known facts and the more reasonable assumptions about each of these worlds. The planet Pluto, however, deserves further comment, occupying as it does both an important role in this adventure and a unique one in actual astronomical lore.

Under the Wire Apr 04 2022 The Bad Boys of the Alliance—a top-secret military security agency—are back for more in HelenKay Dimon’s sexy, action-packed series Only one thing could pull Reid Armstrong away from a vacation he’s earned with every muscle in his finely honed body—learning that his former fiancée has disappeared on a top-secret science expedition in the middle of nowhere. Second chances don’t come often in Reid’s business, and he needs to prove his worth to Cara Layne or die trying. Waking up to find her camp destroyed and her colleagues missing, Cara is a walking target. She can’t trust anyone, least of all Reid. Even if his skills get them out alive, he’s a heartache waiting to strike twice. Yet being in close proximity proves their connection burns hotter than ever. The body count is rising, the enemy is getting closer, and soon Reid will be right back in the position that cost him everything—forced to choose between the woman he loves, and the job that’s his only hope of saving them both . . .

Losing Apollo In Father's Space Jun 13 2020 They are the forever family, born with matching wire in blood, barbed DNA wire. An Australian rural family leaves their farm kingdom to locate a WW2 aircraft in the Riverland to tow back for spare parts. Departure date is Apollo 11; launch day 1969. The war-bird characterises their family relationship. Father is the unyielding supreme commander, an Odysseus, adversarial and warrior-like. This close quarter-quest corrodes family bonds through a stressful expedition involving hazardous river crosses, python wranglers and perilous weather. An aging war-bird with dubious mechanics is the spur to break rust from a toxic relationship. It is a race to help save Father and the Oxford, a race to return to witness the Apollo 11 moon landing. Two pursuits divided by space but united in time. Losing Apollo the - very last thought.

Expedition and Wilderness Medicine Aug 20 2023 With an increase in visits to remote and dangerous locations around the world, the number of serious and fatal injuries and illnesses associated with these expeditions has markedly increased. Medical personnel working in or near such locations are not always explicitly trained in the management of unique environmental injuries, such as high-altitude sickness, the bends, lightning strikes, frostbite, acute dehydration, venomous stings and bites, and tropical diseases. Many health care professionals seek training in the specialty of wilderness medicine to cope with the health risks faced when far removed from professional care resources, and the American College of Emergency Medicine has recently mandated that a minimum level of proficiency needs to be exhibited by all ER physicians in this discipline. This book covers everything a prospective field physician or medical consultant needs to prepare for when beginning an expedition and explains how to treat a variety of conditions in a concise, clinically oriented format.

Radio Journal Dec 20 2020

VOICE Jan 21 2021 Perspectives on the voice and technology, from discussions of voice mail and podcasts to reflections on dance and sound poetry. Voice has returned to both theoretical and artistic agendas. In the digital era, techniques and technologies of voice have provoked insistent questioning of the distinction between the human voice and the voice of the machine, between genuine and synthetic affect, between the uniqueness of an individual voice and the social and cultural forces that shape it. This volume offers interdisciplinary perspectives on these topics from history, philosophy, cultural theory, film, dance, poetry, media arts, and computer games. Many chapters demonstrate Lewis Mumford's idea of the "cultural preparation" that precedes technological innovation—that socially important new technologies are foreshadowed in philosophy, the arts, and everyday pastimes. Chapters cover such technologies as voice mail, podcasting, and digital approximations of the human voice. A number of authors explore the performance, performativity, and authenticity [(or 'authenticity effect') of voice in dance, poetry, film, and media arts]; while others examine more immaterial concerns—the voice's often-invoked magical powers, the ghostliness of disembodied voices, and posthuman vocalization. [The chapters evoke an often paradoxical reassertion of the human in the use of voice in mainstream media including recorded music, films, and computer games. Contributors Mark Amerika, Isabelle Arvers, Giselle Beiguelman, Philip Brophy, Ross Gibson, Brandon LaBelle, Thomas Levin, Helen Macallan, Virginia Madsen, Meredith Morse, Norie Neumark, Andrew Plain, John Potts, Theresa M. Senft, Nermin Saybasili, Amanda Stewart, Axel Stockburger, Michael Taussig,

Earth Sound Earth Signal Mar 23 2021 *Earth Sound Earth Signal* is a study of energies in aesthetics and the arts, from the birth of modern communications in the nineteenth century to the global transmissions of the present day. Grounded in the Aeolian sphere music that Henry David Thoreau heard blowing in telegraph lines and in the Aelectrosonic sounds of natural radio that Thomas Watson heard in telephone lines, the book moves through the histories of science, media, music, and the arts to the 1960s, when the composer Alvin Lucier worked with the "natural electromagnetic sounds" present from "brainwaves to outer.

Exploring the Legacy of the 1948 Arnhem Land Expedition May 17 2023 "In 1948 a collection of scientists, anthropologists and photographers journeyed to northern Australia for a seven-month tour of research and discovery - now regarded as 'the last of the big expeditions'. The American-Australian Scientific Expedition to Arnhem Land was front-page news at the time, but 60 years later it is virtually unknown. This lapse into obscurity was due partly to the fraught politics of Australian anthropology and animus towards its leader, the Adelaide-based writer-photographer Charles Mountford. Promoted as a 'friendly mission that would foster good relations between Australia and its most powerful wartime ally, the Expedition was sponsored by National Geographic, the Smithsonian Institution and the Australian Government. An unlikely cocktail of science, diplomacy and popular geography, the Arnhem Land Expedition put the Aboriginal cultures of the vast Arnhem Land reserve on an international stage." -- Publisher's website.

Expedition into Empire Feb 14 2023 Expeditionary journeys have shaped our world, but the expedition as a cultural form is rarely scrutinized. This book is the first major investigation of the conventions and social practices embedded in team-based exploration. In probing the politics of expedition making, this volume is itself a pioneering journey through the cultures of empire. With contributions from established and emerging scholars, *Expedition into Empire* plots the rise and transformation of expeditionary journeys from the eighteenth century until the present. Conceived as a series of spotlights on imperial travel and colonial expansion, it roves widely: from the metropolitan centers to the ends of the earth. This collection is both rigorous and accessible, containing lively case studies from writers long immersed in exploration, travel literature, and the dynamics of cross-cultural encounter.

Portable Wire Antennas Aug 28 2021 This book is written for the Radio Amateur reader, and, as such, it contains a large amount of practical Antenna design information for the "Ham" community. Portable, reliable HF communication is required for emergency management, expedition communications and recreational uses. This book is about selecting and constructing portable HF wire antennas that will provide maximum performance with low power, light weight and low bulk. All the information required to assemble antennas and antenna kits that can be deployed in multiple configurations is provided. It also covers long wire, two suspension point rhombics, terminated V beam and inverted half rhombic beam antennas optimized for 20-10 meters while being broad band

(no tuner required), low noise and gain equal to or greater than a high dipole.

Radio News Dec 12 2022 Some issues, 1943-July 1948, include separately paged and numbered section called Radio-electronic engineering edition (called Radionics edition in 1943).

Toscotti's War May 05 2022 The formal hostilities with the Deity commenced on Thursday, October 7, 1965 at 2:45 p.m. Central Standard Time. Such a date deserves proper historical notation. From the official transcript: Chesterfield, Randall William. The Fourth. Warrant Officer One, RA 36801629. DOB: March 19, 1946. Distinguishing characteristics? Just one. Feed me regularly, or I'll start to turn green. I need plenty of water, too. Light's necessary, but I'll get exceptionally horny if I'm left out in the sun too long... ..I know that you don't actually plan to let me go and to get all those charges dropped once you've finished questioning me. Let's see, that'd include illegal trespass, theft of government property, destruction of government property, assault—though, in all fairness, it was Tony, not me, that kicked the cop in the balls—resisting arrest, grand theft auto, interstate flight to avoid apprehension, possession of a forged passport, falsifying official documents, and smuggling an unauthorized, unidentified biological organism into the country. I'd have to plead not guilty to that last one. Tony had already shipped the samples to Carbondale before I flew down to Tierra del Fuego to pick him up. Well, maybe I'm wrong. Is it smuggling to sneak an American back into the United States? After all, he wasn't wanted then. In fact, he wasn't even legally alive. All the same, I swear I had no idea at the time that he was carrying the virus in his bloodstream.

The World of Ham Radio, 1901–1950 Jan 01 2022 During the first fifty years of the twentieth century, ham radio went from being an experiment to virtually an art form. Because of the few government restrictions and the low monetary investment required, the concept of ham radio appealed to various people. More than just a simple hobby, however, ham radio required its operators to understand radio theory, be able to trace a schematic and know how to build a transmitter and receiver with whatever material they might have available. With the advent of World War II and the increased need for cutting-edge communications, the United States government drew upon the knowledge and skill of these amateur ham radio operators. This book explores the history of ham radio operators, emphasizing their social history and their many contributions to the technological development of worldwide communications. It traces the concept of relays, including the American Radio Relay League, from contacts as close as 25 miles apart to operators anywhere in the world. The book highlights the part played by ham radio in many of the headline events of the half century, especially exploration and aviation “firsts”. The ways in which these primarily amateur operators assisted in times of disaster including such events as the sinking of the Titanic and the 1937 Ohio River flood, are also examined.

Dangerous Crossings Mar 03 2022 Provides significant insight into the character and early career of one of the most famous and controversial polar explorers -- Richard Byrd. Polar specialists and historians alike will welcome the wealth of new material presented here. Adventure-story fans will thrill to the dangers of the historic mission. Book jacket.

Orange Coast Magazine Oct 18 2020 Orange Coast Magazine is the oldest continuously published lifestyle magazine in the region, bringing together Orange County's most affluent coastal communities through smart, fun, and timely editorial content, as well as compelling photographs and design. Each issue features an award-winning blend of celebrity and newsmaker profiles, service journalism, and authoritative articles on dining, fashion, home design, and travel. As Orange County's only paid subscription lifestyle magazine with circulation figures guaranteed by the Audit Bureau of Circulation, Orange Coast is the definitive guidebook into the county's luxe lifestyle.

Circulating Cultures Jul 19 2023 Circulating Cultures is an edited book about the transformation of cultural materials through the Australian landscape. The book explores cultural circulation, exchange and transit, through events such as the geographical movement of song series across the Kimberley and Arnhem Land; the transformation of Australian Aboriginal dance in the hands of an American choreographer; and the indigenisation of symbolic meanings in heavy metal music. Circulating Cultures crosses disciplinary boundaries, with contributions from historians, musicologists, linguists and dance historians, to depict shifts of cultural materials through time, place and interventions from people. It looks at the way Indigenous and non-Indigenous performing arts have changed through intercultural influence and collaboration.

Wollheim. And don't forget to search this ebook store for more entries in the Megapack series, covering science fiction, fantasy, mystery, adventure, ghost stories, and much, much more!

The River of Doubt Sep 16 2020 NATIONAL BESTSELLER • At once an incredible adventure narrative and a penetrating biographical portrait—the bestselling author of *River of the Gods* brings us the true story of Theodore Roosevelt's harrowing exploration of one of the most dangerous rivers on earth. The River of Doubt—it is a black, uncharted tributary of the Amazon that snakes through one of the most treacherous jungles in the world. Indians armed with poison-tipped arrows haunt its shadows; piranhas glide through its waters; boulder-strewn rapids turn the river into a roiling cauldron. After his humiliating election defeat in 1912, Roosevelt set his sights on the most punishing physical challenge he could find, the first descent of an unmapped, rapids-choked tributary of the Amazon. Together with his son Kermit and Brazil's most famous explorer, Cândido Mariano da Silva Rondon, Roosevelt accomplished a feat so great that many at the time refused to believe it. In the process, he changed the map of the western hemisphere forever. Along the way, Roosevelt and his men faced an unbelievable series of hardships, losing their canoes and supplies to punishing whitewater rapids, and enduring starvation, Indian attack, disease, drowning, and a murder within their own ranks. Three men died, and Roosevelt was brought to the brink of suicide. *The River of Doubt* brings alive these extraordinary events in a powerful nonfiction narrative thriller that happens to feature one of the most famous Americans who ever lived. From the soaring beauty of the Amazon rain forest to the darkest night of Theodore

Roosevelt's life, here is Candice Millard's dazzling debut. Look for Candice Millard's latest book, *River of the Gods*.

The History of the International Polar Years (IPYs) Mar 15 2023 Although international scientific cooperation - particularly in meteorology - was established previous to the first International Polar Year, the IPY-1 (1882-83) is considered to be the first revolutionary step towards an extensive international cooperation in the polar areas for the benefit of science rather than national prestige and territorial gain. This was followed by IPY-2 (1932-33) and IPY-3 - actually the International Geophysical Year (1957-58) - before the crowning effort of IPY-4 (2007-08). The history of these years is recounted here and explains the political, economic, technical and scientific conditions and expectations that laid the basis for each IPY and which gradually expanded both the scope and extent of our understanding of the complexities in polar regions
