**Science Research Writing: For Native And Non-native Speakers Of English (Second Edition)**

Oct 02 2021 This book enables STEM researchers to write effective papers for publication as well as other research-related texts such as a doctoral thesis, technical report, or conference abstract. Science Research Writing uses a reverse-engineering approach to writing developed from extensive work with STEM researchers at Imperial College London. This approach unpacks current models of STEM research writing and helps writers to generate the writing tools needed to operate those models effectively in their own field. The reverse-engineering approach also ensures that writers develop future-proof strategies that will evolve alongside the coming changes in research communication platforms. The Second Edition has been extensively revised and updated to represent current practice and focuses on the writing needs of both early-stage doctoral STEM researchers and experienced professional researchers at the highest level, whether or not they are native speakers of English. The book retains the practical, user-friendly format of the First Edition, and now contains seven units that deal separately with the components of written STEM research communication: Introduction, Methods, Results, Discussion, Conclusion, Abstract and Title, as well as extensive FAQ responses and a new Checklist and Tips section. Each unit analyses extracts from recent published STEM journal papers to enable researchers to discover not

only what to write, but, crucially, how to write it. The global nature of science research requires fast, accurate communication of highly complex information that can be understood by all participants. Like the First Edition, the Second Edition is intended as a fast, do-it-yourself guide to make both the process and the product of STEM research writing more effective.

Colposcopy and Treatment of Cervical

Intraepithelial Neoplasia Nov 03 2021 For many women in developing countries, such as sub-Saharan Africa, south and south-east Asia, and central and south America, there is a high risk of cervical cancer, but a lack of effective programmes to detect and treat such a problem. This introductory manual is intended to simplify the learning of colposcopy (a diagnostic and evaluation method for cervical intraepithelial neoplasia, or cervical cancer).

**Masterpieces of Swiss Entrepreneurship**

Apr 15 2020 This open access book focuses on Switzerland-based medium-sized companies with a longstanding export tradition and a proven dominance in global niche markets. Based upon in-depth documentation and analysis of 36 Swiss companies over their entire history, an expert team of authors presents several parallels in the pathways and success factors which allowed these firms to become dominant and operate from a high-cost location such as Switzerland. The book enhances these insights by providing detailed company profiles documenting the company history,

development, and how their relevant global niche positions were reached. Readers will benefit from these profiles as they compile a diverse selection of industries, mainly active within the B2B sector, with mostly mature companies (60 years to older than 100 years since founding) and different types of ownership structures including family firms. 'Masterpieces of Swiss Entrepreneurship' brings unique learning opportunities to owners and leaders of SMEs in Switzerland and elsewhere. Findings are based on detailed bottom-up research of 36 companies -- without any preconceived notions. The book is both conceptual and practical. It fosters understanding for different choices in development pathways and management practices. Matti Alahuhta, Chairman DevCo Partners, ex-CEO Kone, Board member of several global listed companies, Helsinki, Finland Start-up entrepreneurs need proven models from industry which demonstrate the various paths to success. "Masterpieces of Swiss Entrepreneurship" provides deep insights highlighting these models and the important trade-offs entrepreneurial teams must consider when choosing the path of high growth or of maximum control, as they are often mutually exclusive. Gina Domanig, Managing Partner, Emerald Technology Ventures, Zurich *Labour and Delivery* Aug 20 2020 *Placenta Accreta Spectrum* May 29 2021 Placenta accreta spectrum (PAS), an obstetric emergency associated with significant maternal

morbidity and mortality, has increasingly become a global challenge with the rising trend of cesarean deliveries. This book provides a comprehensive review of basic science-related to PAS, discusses modern practice in diagnosis and classification of PAS disorders, and appraise current recommendations on PAS management in view of recent studies, guidelines, and expert opinions. In the last few years, there have been many new updates to practice guidelines including ACOG, RCOG, and FIGO guidelines in addition to several new studies, some of which were unusually multicenter and of large sample size, that are eligible to make major changes in our PAS practice. In addition, the book aims at providing more comprehensive review of all aspects related to PAS from experts, including topics that are deficient in similar books e.g., vascular anatomy, risk reduction, adjuvant treatments. The book provides a single source that provides academic knowledge for researchers and investigators, and clinical guidance to best practice and recent updates in management of women with PAS.

*Practical Manual of Obstetrics and Gynecology for Residents and Fellows* May 09 2022

Obstetrics and Gynecology is a subject that encompasses a wide spectrum of conditions including physiological as well as pathological phenomenon, medical disorders to surgical emergencies, life threatening emergencies that demand immediate actions to situations like a normal labor that requires ""masterly

inactivity"" for a considerable amount of time! The students, who are exposed afresh to this varying spectrum, are often left clueless how to tackle efficiently the demands of the situations. Having a pocket size book that would guide them through the nooks and corners of this puzzling yet in.

*Anthropologies of Global Maternal and Reproductive Health* Dec 24 2020 This open access edited book brings together new research on the mechanisms by which maternal and reproductive health policies are formed and implemented in diverse locales around the world, from global policy spaces to sites of practice. The authors - both internationally respected anthropologists and new voices - demonstrate the value of ethnography and the utility of reproduction as a lens through which to generate rich insights into professionals' and lay people's intimate encounters with policy. Authors look closely at core policy debates in the history of global maternal health across six different continents, including: Women's use of misoprostol for abortion in Burkina Faso The place of traditional birth attendants in global maternal health Donor-driven maternal health programs in Tanzania Efforts to integrate qualitative evidence in WHO maternal and child health policy-making *Anthropologies of Global Maternal and Reproductive Health* will engage readers interested in critical conversations about global health policy today. The broad range of foci makes it a valuable resource for teaching in medical anthropology, anthropology of reproduction, and interdisciplinary global health programs. The book will also find readership amongst critical public health scholars, health policy and systems researchers, and global public health

practitioners.

**Approach to Internal Medicine** May 17 2020

**A Multidisciplinary Approach to Obstetric Fistula in Africa** Mar 19 2023 This book applies a multi-disciplinary lens to examine obstetric fistula, a childbirth injury that results from prolonged, obstructed labor. While obstetric fistula can be prevented with emergency obstetric care, it continues to occur primarily in resource-limited settings. In this volume, specialists in the anthropological, psychological, public health, and biomedical disciplines, as well as health policy experts and representatives of governmental and non-governmental organizations discuss a scoping overview on obstetric fistula, including prevention, treatment, and reducing stigma for survivors. This comprehensive resource is useful in understanding the risk factors, epidemiology, and social, psychological, and medical effects of obstetric fistula. Topics explored include: A Human Rights Approach

Toward Eradicating Obstetric Fistula  
Obstetric Fistula: A Case of Miscommunication - Social Experiences of Women with Obstetric Fistula  
Classification of Female Genital Tract Fistulas  
Training and Capacity-Building in the Provision of Fistula Treatment Services  
Designing Preventive Strategies for Obstetric Fistula  
Sexual Function in Women with Obstetric Fistula  
Social and Reproductive Health of Women After Obstetric Fistula Repair  
Making the Case for Holistic Fistula Care  
Addressing Mental Health in Obstetric Fistula Patients  
Physical Therapy for Women with Obstetric Fistula  
A Multidisciplinary Approach to Obstetric Fistula in Africa is designed for professional use by NGOs, international aid organizations, governmental and multilateral agencies, healthcare providers, public health specialists, anthropologists, and others who aim to improve maternal health across the globe. Although the book's geographic focus is Africa, it may serve as a useful resource for individuals who aim to address obstetric fistula in other settings. The book may also be used as an educational tool in courses/programs that focus on Global Health, Maternal and Child Health, Epidemiology, Medical Anthropology, Gender/Women's Studies, Obstetrics, Global Medicine, Nursing, and Midwifery.

**Practical Obstetric Fistula Surgery** Mar 27 2021 There is now a worldwide awareness of the vast number of women with untreated childbirth injury in Africa and other poor countries. These shameful injuries are preventable but this will not occur until there is improved access to quality obstetric care. While improvements in these services are the top priority, there is a great need to train more surgeons, especially nationals, to have the skill and resources to help these long-suffering incontinent women.

**The State of the World's Children 2009** Feb 23 2021 Having a child remains one of the biggest health risks for women worldwide. Fifteen hundred women die every day while giving birth. That's a half a million mothers every year. UNICEF's flagship publication, *The State of the World's Children 2009*, addresses

maternal mortality, one of the most intractable problems for development work. The difference in pregnancy risk between women in developing countries and their peers in the industrialised world is often termed the greatest health divide in the world. A woman in Niger has a one in seven chance of dying during the course of her lifetime from complications during pregnancy or delivery. That's in stark contrast to the risk for mothers in America, where it's one in 4,800 or in Ireland, where it's just one in 48,000. Addressing that gap is a multidisciplinary challenge, requiring an emphasis on education, human resources, community involvement and social equality. At a minimum, women must be guaranteed antenatal care, skilled birth attendants and emergency obstetrics, and postpartum care. These essential interventions will only be guaranteed within the context of improved education and the abolition of discrimination.
