Aeronautical engineer, rocket scientist, missile man, visionary, teacher and the most inspiring head of state in living memory - Avul Pakir Jainulabdeen Abdul Kalam was all these and more. Unquestionably the most revered Indian leader since Mahatma Gandhi A.P.J. Abdul Kalam became President of India in July 2002. He was a surprise choice. A scientist and not a politician, with an unusual hairstyle and an unassuming way of doing things, and no other agenda except that of seeing India become a developed and strong nation. How would such a man fit into the regal splendour of Rashtrapati Bhavan, and all the pomp and ceremony of a head of state? What followed, however, as P.M. Nair shows in *The Kalam Effect*, was a remarkable presidency that in the next five years transformed the way people looked at this office, and made Kalam popular in a way few politicians have been. Rashtrapati Bhavan became a much more accessible place, and his 'at homes' drew guests in the thousands. Not only that, the website he set up became a huge draw, and people wrote to him on e-mail or otherwise from across the country. His positive attitude infected all those who came in touch with him. While the reasons for his popularity will be analysed for a long time, Nair, who was his Secretary, suggests in this affectionate yet factual account some of the probable causes. One of these being that Kalam is just a very special human being. Dr. Kalam is rare legendary personality. On the whole it is very difficult to describe his greatness in words. The manifold aspects of a scientist, philosopher, great human being and a President are embodied in one person which is a source of inspiration for us. This book nicely narrates about his childhood days, life as a scientist and 'Missile Man', contributions towards our country, speeches, quotes. Readers are going to know a lot about Dr. A.P.J. Abdul Kalam through this book. Like as- how he made India a self-dependent country in atomic power, how he maintained the dignity of his position by living with simplicity, how he become the president of India despite not having any political background. This book narrates his vision of India by 2020 as a highly developed nation of the world. The language is simple and easy to understand. A must read book for everyone. India's most popular president was also an extremely disciplined man. Whether it was maintaining his social engagements or dealing with professional shortcomings, Kalam tackled it all with aplomb and dignity. And when it comes to learning important life lessons, who could be a better teacher than Kalam himself? 'Some Life Lessons', a collection of his thoughts articulated at different moments of his life, and largely focused on the youth, will motivate and energize the youth to become future nation builders. Read on. Pramukh Swamiji, one of the most inspiring spiritual leaders of modern times and the fifth spiritual successor of Bhagwan Swaminarayan, is the inheritor of a legacy of enlightened gurus that goes back to the early nineteenth century. Pramukh Swamiji became, through a chance meeting, friend to one of India's most eminent citizens, the eleventh president of India, Dr A.P.J. Abdul Kalam, and together they created an unparalleled fellowship of science and spirituality. In *Transcendence*, Dr Kalam, with his co-author and pupil Arun Tiwari, maps a journey of self-realization reflected in the compassionate eyes of Pramukh Swamiji, painting a delightfully open-hearted portrait of the

fusion of spirituality, science and leadership. His candid vignettes from life on the centre stage of Indian technology and societal missions, Indian politics and world affairs are interwoven with revelations of a profound connection with Swamiji. He describes how his path has been illuminated by Swamiji's words and his inspirational, loving presence. Through the life of Pramukh Swamiji and the transnational work of the BAPS Swaminarayan Sanstha, Dr Kalam traces the contemporary concerns of the Indian diaspora across the world and the emerging Indian identity of a capable, right-thinking and hardworking people. Drawing from the lives of great scientists and creative leaders, *Transcendence* captures the essence of all religions and is as much a fountain of inspiration and a treasury of wisdom as it is a tribute to the multi-faith, pluralistic Indian society. Book jacket. It was like any other day on the Anna University campus in Chennai. As I was returning to my room in the evening, the vice-chancellor, Prof. A. Kalanidhi, fell in step with me. Someone had been frantically trying to get in touch with me through the day, he said. Indeed, the phone was ringing when I entered the room. When I answered, a voice at the other end said, 'The prime minister wants to talk with you.' Some months earlier, I had left my post as Principal Scientific Adviser to the Government of India to return to teaching. Now, as I spoke to the PM, Atal Bihari Vajpayee, my life was set for an unexpected change. Turning Points takes up the incredible Kalam story from where Wings of Fire left off. It brings together details from his career and presidency that are not generally known as he speaks out for the first time on certain points of controversy. It is a continuing saga, above all, of a journey - individual and collective - that will take India to 2020 and beyond as a developed nation. In the tiny pilgrim town of Rameswaram in Tamil Nadu, the son of a boatman had the courage to dream. One day his brilliance, perseverance and hard work would take Bharat Ratna A.P.J. Abdul Kalam to Rashtrapati Bhawan as the eleventh President of India. Nuclear capability; self-sufficiency in food production; an array of indigenous satellites and missiles; an unmanned Moon mission—India's achievements in the

scientific domain in recent years have been spectacular. But; according to the country's best-known scientist A.P.J. Abdul Kalam and his close associate Y.S. Rajan; we've only just begun. In a century that many experts predict may belong to India; the realization of the vision of a better future for everyone will require a keen understanding of our needs and this can only be achieved by tailoring our research and innovations to the goal of national development. India to the forefront of the world in the decades to come. The Scientific Indian will speak to every curious and adventurous mind; and especially to tomorrow's scientists and technologists; encouraging us to dream big; and urging us to work hard to make our dreams come true. In *The Scientific Indian*; the authors of the path-breaking *India 2020: A Vision for the New Millennium* return after ten years to the core areas of scientific advancement that are crucial today: space exploration; satellite technology; missile development; earth and ocean resources; the biosphere; food production; energy and water harvesting; health care and communications; to name a few. For each aspect; the authors provide the context of recent progress on the global platform as well as Indian breakthroughs; before outlining a pragmatic vision of technological development that will propel APJ Abdul Kalam, a man who reached unimaginable heights but never forgot his roots. A man who brought his own brand of excellence and humility to everything he touched. A teacher, a writer, a poet, a visionary, a world-renowned scientist and the 11th President of India. Read about his life in *Amar Chitra Katha's APJ Abdul Kalam - When Dreams Take Flight* What is it that we as a nation are missing? Why, given all our skills, resources and talents, do we settle so often for the ordinary instead of striving to be the best? At the heart of *Ignited Minds* is an irresistible premise: that people do have the power, through hard work, to realize their dream of a truly good life. Kalam's vision document of aspiration and hope motivates us to unleash the dormant energy within India and guide the country to greatness. As we aspire for rising economic prosperity and a strong and confident India, this book forcefully reminds us of the values that make for a truly sustainable society, at the heart of which is the family. For it is not economic growth or military strength alone that will make India strong. Sustainable success comes from values, and these can sustain a society and a nation even in times of hardship. The book expresses an ideal by which Indian society may prosper and speaks of how spirituality can help create a noble nation and a better world. It provides a valuable counterpoint to the modern-day emphasis on consumerism and the philosophy of more is better, highlighting the sanctity of the natural world and its great power to evoke human creativity and love. Writing on this crucial subject are two iconic Indians. Together, Acharya Mahapragya and A.P.J. Abdul Kalam-- one a Jain muni revered as a saint, the other a visionary, a distinguished scientist and a former President of India-- bring their vast experience to bear on this important subject. As the authors put it, it's only a united and happy family that will lead to a strong nation, one that can be a true fulfilment of 5,000 years of India's civilization. The book takes up the difficult and pressing task of setting a new agenda in a time of radical social change. It shows us the path we need to follow to take India to its rightful place as a great nation.
