Supported by extensive research and fuelled by a true passion and respect for the profound vision of America's Founding Fathers, Michael Warren proves how they have guided us in our journey to become the greatest and most free nation in the world. He exposes how our knowledge of our principles and history has eroded to the point of near non-existence-and that this is a threat to our survival much more serious than what may come to us from outside our borders. Warren proposes thoughtful and needed reforms to enable America to rise above

Sandstorm Blizzard This book is a must-have in your disaster survival kit, because the information will save your life Get it now. The world-famous adventurer reveals a lifetime of wisdom and lessons learned from the planet's wildest places Life in the outdoors teaches us invaluable lessons. Encountering the wild forces us to plan and execute goals, face danger, push our "limits," and sharpen our instincts. But our most important adventures don't always happen in nature's extremes. Living a purpose-driven, meaningful life can often be an even greater challenge. . . . In *A Survival Guide for Life*, Bear Grylls, globally renowned adventurer and television host, shares the hard-earned wisdom he's gained in the harshest environments on earth, from the summit of Mt. Everest to the boot camps of the British Special Forces. Filled with exclusive, never-before-told tales from Bear's globe-trekking expeditions, *A Survival Guide for Life* teaches every reader—no matter your age or experience—that we're all capable of

living life more boldly, of achieving our most daring dreams, and of having more fun along the way. *Survival Guide: The Book All Survivalist and Preppers Need (3 in 1)* From the acclaimed author of *Black Hole Blues and Other Songs from Outer Space*—an authoritative and accessible guide to the most alluring and challenging phenomena of contemporary science. "[Levin will] take you on a safe black hole trip, an exciting travel story enjoyed from your chair's event horizon." —*Boston Globe* Through her writing, astrophysicist Janna Levin has focused on making the science she studies not just comprehensible but also, and perhaps more important, intriguing to the nonscientist. In this book, she helps us to understand and find delight in the black hole—perhaps the most opaque theoretical construct ever imagined by physicists—illustrated with original artwork by American painter and photographer Lia Halloran. Levin takes us on an evocative exploration of black holes, provoking us to

imagine the visceral experience of a black hole encounter. She reveals the influence of black holes as they populate the universe, sculpt galaxies, and even infuse the whole expanse of reality that we inhabit. Lively, engaging, and utterly unique, *Black Hole Survival Guide* is not just informative—it is, as well, a wonderful read from first to last. Full of data, charts, nutritional breakdowns, and a poisonous look-alike section, this guide discusses how to identify, gather, prepare, store, and enjoy an endlessly nutritious and renewable resource of wild, edible plants.

"The focus of this book is to define who and what a prepper is and to provide an understanding of the element "fire" as modeled and required by the Survival Triangle."--back cover. "Absolutely splendid . . . essential for understanding why there is so much bad thinking in political life right now." —David Brooks, *New York Times*

How to Think is a contrarian treatise on why we're not as good at thinking as we assume—but how recovering this lost art can rescue our inner

lives from the chaos of modern life. As a celebrated cultural critic and a writer for national publications like *The Atlantic* and *Harper's*, Alan Jacobs has spent his adult life belonging to communities that often clash in America's culture wars. And in his years of confronting the big issues that divide us—political, social, religious—Jacobs has learned that many of our fiercest disputes occur not because we're doomed to be divided, but because the people involved simply aren't thinking. Most of us don't want to think. Thinking is trouble. Thinking can force us out of familiar, comforting habits, and it can complicate our relationships with like-minded friends. Finally, thinking is slow, and that's a problem when our habits of consuming information (mostly online) leave us lost in the spin cycle of social media, partisan bickering, and confirmation bias. In this smart, endlessly entertaining book, Jacobs diagnoses the many forces that act on us to prevent thinking—forces

that have only worsened in the age of Twitter, “alternative facts,” and information overload—and he also dispels the many myths we hold about what it means to think well. (For example: It’s impossible to “think for yourself.”) Drawing on sources as far-flung as novelist Marilynne Robinson, basketball legend Wilt Chamberlain, British philosopher John Stuart Mill, and Christian theologian C.S. Lewis, Jacobs digs into the nuts and bolts of the cognitive process, offering hope that each of us can reclaim our mental lives from the impediments that plague us all. Because if we can learn to think together, maybe we can learn to live together, too. Where there is stress, humor is not far behind," holds Close to Home creator John McPherson. And thanks to his stressed-out cast of characters, readers everywhere find something laughable, hilarious, and oftentimes downright knee-slapping in McPherson's single-panel snapshots of a loony world. Take the soberness of a former circus performer's funeral,

lotus.calit2.uci.edu

the idea that a health club would have an Offensive Odor Alarm, or absurd hospital insurance policies. McPherson has the eye-and-the-twisted-mind-to capture such scenes in ways that both shock and amuse his readers. McPherson does it with The Close to Home Survival Guide, an aggregation of his lumpy figures, with their long faces, protruding noses, and bulging eyeballs, parading down that fine line between grotesque and certifiably goofy. Everything from family life and dating to car repair and medical emergencies provide fodder for the wackiness in this essential collection and guide. Bear Grylls has always sought the ultimate in adventure. Growing up on a remote island off of Britain's windswept coast, he was taught by his father to sail and climb at an early age. Inevitably, it wasn't long before the young explorer was sneaking out to lead all-night climbing expeditions. As a teenager at Eton College, Bear found his identity and purpose through both mountaineering and martial arts. These passions led him into the foothills of the mighty Himalayas and to a karate grandmaster's remote training camp in Japan, an experience that soon helped him earn a second-degree black belt. Returning home, he embarked upon the notoriously grueling selection course for the British Special Forces to join the elite Special Air Service unit 21 SAS—a journey that would push him to the very limits of physical and mental endurance. Then, disaster. Bear broke his back in three places in a horrific free-fall parachuting accident in Africa. It was touch and go whether he would walk again, according to

doctors. However, only eighteen months later, a twenty-three-year-old Bear became one of the youngest climbers to scale Mount Everest, the world's highest summit. But this was just the beginning of his many extraordinary adventures. . . . Known and admired by millions as the star of *Man vs. Wild*, Bear Grylls has survived where few would dare to go.
