The second book in the series that began with the Newbery Medal-winning *Sarah, Plain and Tall* by Patricia MacLachlan. My mother, Sarah, doesn't love the prairie. She tries, but she can't help remembering what she knew first. Sarah came to the prairie from Maine to marry Papa. But that summer, a drought turned the land dry and brown. Fires swept across the fields and coyotes came to the well in search of water. So Sarah took Anna and Caleb back east,

where they would be safe. Papa stayed behind. He would not leave his land. Maine was beautiful, but Anna missed home, and Papa. And as the weeks went by, she began to wonder what would happen if the rains never came. Would she and Caleb and Sarah and Papa ever be a family again? A "brilliant, innovative, beautiful" (The Guardian) book from the acclaimed author of Chilean Poet "Dazzling . . . a work of parody, but also of poetry." —The New York Times Book Review NAMED ONE OF THE BEST BOOKS OF THE YEAR BY NPR, THE GUARDIAN, AND THE IRISH TIMES "Latin America's new literary star" (The New Yorker), Alejandro Zambra is celebrated around the world for his strikingly original, slyly funny, daringly unconventional fiction. Now, at the height of his powers, Zambra returns with his most audaciously brilliant book yet. Written in the form of a standardized test, Multiple Choice invites the reader to respond to virtuoso language exercises and short narrative

passages through multiple-choice questions that are thought-provoking, usually unanswerable, and often absurd. It offers a new kind of reading experience, one in which the reader participates directly in the creation of meaning, and the nature of storytelling itself is called into question. At once funny, poignant, and political, Multiple Choice is about love and family, authoritarianism and its legacies, and the conviction that, rather than learning to think for ourselves, we are trained to obey and repeat. Serious in its literary ambition and playful in its execution, it confirms Alejandro Zambra as one of the most important writers working in any language. Based on the analysis of a specially compiled corpus of internationally recognized English as a foreign language (EFL) reading tests at different levels of proficiency, this volume explores the relation between the complexity of written texts and the difficulty of reading comprehension tests. It brings together linguistic investigations into the text-inherent complexity of the tests and a study of the data derived from their administration to groups of Italian university students. The study of text complexity draws on corpus linguistics, text linguistics and systemic functional linguistics. Both quantitative and qualitative analyses are carried out on the language used in the reading texts and in the related tasks that make up the corpus of tests. The assessment of test difficulty, on the other hand, is

informed by research on language testing, and, in particular, by findings and methodologies of Classical Test Theory and Item Response Theory. Relevant aspects of these theories are used to analyze and interpret both the data obtained from the administration of the tests and the data collected by means of feedback questionnaires completed by test takers. The application of such diverse methodologies and the subsequent comparison of the results of the analyses has brought out interesting correlations between text-inherent complexity, perceived test difficulty and actual test difficulty. Develop Expert Reading Strategies, Prepare for Important Exams, Overcome Reading Anxiety, Learn the Joy of Reading for Pleasure, Gives full answer explanations for every question and Provides support for any reading comprehension test. Language in Social Life is a major series which highlights the importance of language to an understanding of issues of

social and professional concern. It will be of practical relevance to all those wanting to understand how the ways we communicate both influence and are influenced by the structures and forces of contemporary social institutions. In all modern societies individuals are subject to tests, whether to enter educational programs, to pass from one level to the next or to grant certificates to practice. Yet, tests are powerful tools which are often introduced in undemocratic and unethical ways as disciplinary tools for carrying out various policy agendas. Tests can be detrimental to people's lives as they are capable of affecting and defining the knowledge and behaviour of those who are being tested. The Power of Tests applies a critical perspective of language tests by examining their uses and consequences in education and society and by viewing tests not as isolated events but rather as embedded in social, educational and political

contexts. The book is divided into four parts: the first part establishes the power of tests through echoing the voices of test takers, describing the features of the power of tests, and the temptations that tests offer to bureaucrats who use them for power and control. The second part reports on studies that provide empirical evidence about intentions and effects of a number of large scale language tests. The third part interprets the results by examining their consequences on education and society, arriving at a model of tests' use. The final section of the book offers strategies for controlling and minimising the misuses of tests by introducing the notion of Critical Language Testing which calls for the examination of the consequences and misuses of tests, monitoring of power and pointing to their unethical uses. It also provides a comprehensive discussion of the responsibilities of language testers, including a new Code of Ethics, as well as strategies for guarding and protecting the

rights of test takers. This book explores the construct of reading comprehension by means of two main test methods. Research methods like the think aloud protocol and eye tracking are employed to tap into test-takers' cognitive processes while engaged in input text meaning building, and in test tasks. The book is the first systematic attempt to explore test-takers' cognitive processes through the control of test methods, and presents findings in visualized form including processing route maps and eye fixation heat maps. It offers readers essential support with "digging into" and analyzing data that has to date remained difficult to access. The present volume tells how to approach the most popular types of tests (essay, multiple choice, number series, verbal analogy, etc.) and explains in detail how to take tests measuring vocabulary ability, reading comprehension, and numerical problem solving ability. Specific challenges of oral and open-book tests are given fresh

analysis. - Back cover.
