"... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called "zones," with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD." --Publisher's website. Space coloring book for boys, girls, and kids who love outer space. Coloring is not only fun but also an important tool for a child's development. Therefore, if your child doesn't like to color, it is worth encouraging them to do so. Thanks to this coloring book, your child will learn: ? Preparation for writing - coloring develops fine motor skills. Thanks to coloring, the child learns to hold the crayon correctly and coordinate the hand's work. He practices not going beyond the line and precise movements. ? Concentration - while coloring, the child focuses on the picture and its activity, and precision requires concentration. This skill will be handy at school - all in the form of playing with the child. ? Developing creativity - coloring is not only about filling in ready-made pictures. Contrary to appearances, it is an excellent exercise for imagination and creativity. ? Learning colors - the child learns to distinguish between different colors, shapes, and proportions. After some time, it can extract more and more elements from an image and highlight them with color. ? Expressing emotions - each of us tries to express our feelings differently. Coloring can also fulfill this function. The choice of colors has a therapeutic value and allows you to express yourself creatively. Content information about this book: ? 50 pictures to color - your child will meet easter bunny, eggs, chicks, lambs, baskets, carrots ? Large and simple pictures - large simple pictures will make it easier for your child to color their favorite Easter pets. ?
