Included are many of the ancient literary sources that refer to dentistry - or the lack thereof - in Greece and Rome, as well as the archaeological evidence of ancient dental health. Starting with this question, this book explores how, at the turn of the twentieth century, rural Europeans developed distinctive circuits of transatlantic labor migration linked to diverse immigrant communities in the Americas. It looks at transoceanic moves in the larger context of migration systems, examining their connections and the crucial role of social networks in migrants geographic mobility and adaptation. Combining regional and local perspectives on both sides of the Atlantic, Chains of Gold provides a vivid account of the trajectories of migrant men and women as they moved from rural Portugal to contrasting places of settlement in the Argentine pampas and Patagonia. Despite the wealth of research produced on gender, social class, race, and national identity few studies have focused on how these categories interacted, frequently operating simultaneously to reveal contexts in which dominated groups were dominating and vice versa. Such revelations call into question metanarratives about the exploitation of one group by another and bring to light interlocking systems of identity formation, and consequently oppression, that are difficult to disentangle. The authors included here study this dynamic in a variety of genres and venues, namely the essay, the novel, the short story, theater, and zarzuelas. These essays cover canonical authors such as Benito Pérez Galdós and Emilia Pardo Bazán, and understudied female authors such as Rosario de Acuña and Belén Sárraga. The authors included here study this dynamic in a variety of genres and venues, namely the essay, the novel, the short story, theater, and zarzuelas. The volume builds on recent scholarship on race, class, gender, and nation by focusing specifically on the intersections of these categories, and by studying this dynamic in popular culture, visual culture, and in the works of both canonical and lesser-known authors. A catalogue of one of the finest collections of Etruscan artifacts outside of Italy, that of Wold Museum, Liverpool. This publication is highly illustrated with over 100 plates in full colour. Boxing is one of the oldest and most exciting of sports: its bruising and bloody confrontations have permeated Western culture since 3000 BC. During that period, there has hardly been a time in which young men, and sometimes women, did not raise their gloved or naked fists to one other. Throughout this history, potters, sculptors, painters, poets, novelists, cartoonists, song-writers, photographers and film-makers have been there to record and make sense of it all. In her encyclopaedic investigation, Kasia Boddy sheds new light on an elemental sports and struggle for dominance whose weapons are nothing more than fists. Boddy examines the shifting social, political and cultural resonances of this most visceral of sports, and shows how from Daniel Mendoza to Mike Tyson, boxers have embodied and enacted our anxieties about race, ethnicity, gender and sexuality. Looking afresh at everything from neoclassical sculpture to hip-hop lyrics, Boxing explores the way in which the history of boxing has intersected with the history of mass media, from cinema to radio to pay-per-view. The book also offers an intriguing new perspective on the work of such diverse figures as Henry Fielding, Spike Lee, Charlie Chaplin, Philip Roth, James Joyce, Mae West, Bertolt Brecht, and Charles Dickens. An all-encompassing study, Boxing ultimately reveals to us just how and why boxing has mattered so much to so many. Shadows of Love By: James Atchison This eloquent collection of poetry is written in "old-style free verse." It follows love's life path, from dreaming to the end of love aftermath. Atchison believes it will resonate with a lot of readers and invoke memories. #1 NATIONAL BESTSELLER • Saving the world is a test no school of magic can prepare you for in the triumphant conclusion to the New York Times bestselling trilogy that began with A Deadly Education and The Last Graduate. The one thing you never talk about while you're in the Scholomance is what you'll do when you get out. Not even the richest enclaver would tempt fate that way. But it's all we dream about: the hideously slim chance we'll survive to make it out the gates and improbably find ourselves with a life ahead of us, a life outside the Scholomance halls. And now the impossible dream has come true. I'm out, we're all out—and I didn't even have to turn into a monstrous dark witch to make it happen. So much for my great-grandmother's prophecy of doom and destruction. I didn't kill enclavers, I saved them. Me and Orion and our allies. Our graduation plan worked to perfection: We saved everyone and made the world safe for all wizards and brought peace and harmony to all the enclaves everywhere. Ha, only joking! Actually, it's gone all wrong. Someone else has picked up the project of destroying enclaves in my stead, and probably everyone we saved is about to get killed in the brewing enclave war. And the first thing I've got to do now, having miraculously gotten out of the Scholomance, is turn straight around and find a way back in. Leaving home. Taking only what could be carried. Not knowing when we would return, if ever. It was the choice made by millions, a choice imposed by war. The alternative was death. Or worse. The unknown was better. So begins this story of survival at impossible odds. Part history and part memoir, this book takes us into the surreal world of war as seen through a child's eyes, but reflected in adulthood in the very different light of retrospect many years later. It is the story of perseverance, in the face of overwhelming peril, that will touch the reader with its sincerity, poignancy, and warmth. Numerous books about the civilian World War Two experience deal with the Holocaust and Nazi crimes against humanity. Very few address the horrors implemented by Soviet Russia and the plight of thousands-hundreds of thousands-who fled to escape them. This book is one of those few. Al Karasa lived through the horrors of World War Two in Europe as a child and witnessed, first hand, man's inhumanity to man on a cataclysmic scale. It is stuff of which nightmares are made. The author learned, used and forgot the rudiments of more languages by age seventeen than most of us engage in a lifetime. Changing countries more often than the stages of the moon became the norm during his family's escape westward. This is the story of that escape. For more about the author and his work, visit [www.alsbooks.com](http://www.alsbooks.com). Kindness is Golden is the debut book in The Golden Stories: An Inclusive Children's Book Series. So—what are the first steps you can make today toward a golden retirement? In Your Retirement Smile: The Treatment Plan for Pay-Cut Prevention in Your Golden Years, Dr. Mart G. The move to Iowa was not an easy decision for the focused teenager. For many months, she suffered serious bouts of homesickness. Still, the girl with the golden smile believed her sacrifice would someday lead her to Olympic gold. This book focuses on recent advances in dental gold alloys and gold nanoparticles (GNPs) for biomedical applications. Dental gold alloys combine several highly desirable mechanical properties, such as high strength, ductility, and elasticity, with an extremely robust chemical stability in the mouth. Moreover, astonishing progress has been made in the use of GNPs as novel gold biomaterials that provide a multifunctional platform for cellular imaging, biosensing, and targeted drug delivery in tumour immunotherapy and photothermal therapy. Beginning with a comprehensive overview of the development and use of dental gold alloys, the book addresses the materials properties that are crucial for dental applications, focusing on aspects such as microstructure, chemical and mechanical stability, ageing, biocompatibility, and colour retention. The book then shifts focus to the use of GNPs in dental applications, delving into different techniques of GNP synthesis for specifically tailoring the size, shape, and stability of GNPs in biological media. In addition to these factors, it addresses how their exposure route, surface chemistry, as well as how the steric effects of their coating impact biodistribution and determine the level of GNP toxicity in the human body. Featuring topical literature reviews alongside up-to-date published experimental results, this book offers an attractive resource for practicing scientists and engineers working in the field of gold-based biomaterials.
