All that's required is a curiosity about all things religious, a quick mind, and a sense of humor. In this provocative set of essays, John Bookman delves beneath the transitory issues of the day to identify and respond to the fundamental, perennial questions of American politics. The questions concern the myths that shape the thinking of so many Americans about politics. These myths are the popular narratives that impart meaning to the American experience and define for many what it is to be an American. For the first time, readers have under one cover a sober, informed examination of these myths. Among the myths subjected to critical examination are the following:

1. The Framers of the Constitution were fundamentalist Christians. Americans at the time of the founding constituted a Christian nation.
2. The Framers were disinterested demigods who wrote a constitution for the ages.
3. James Madison intended separation of powers and checks and balances to protect the general citizenry against government.
4. Constitutional constraints on democratic majorities are necessary to prevent tyranny of the majority.
5. The United States is exceptional. It is more populist, egalitarian, religious, patriotic, and prosperous than other nations.
6. Americans are a chosen people marked out by God or history to carry out a world-historical mission.
7. The unfettered market uses resources more efficiently, better promotes growth, and confers more freedom than other ways of organizing the production and distribution of goods and services.

In his examination of these myths, Bookman does not slight argument in favor of description and explanation. He does not neglect description and

explanation, but he enlists them in the service of arguments, and those arguments reach conclusions sure to be controversial. "Hailed by many as the most accessible of all epic narratives recounting a classic Pueblo Indian story of creation, migration, and ultimate residence, this version of the Acoma Pueblo creation myth offers a unique window into Pueblo Indian cosmology and its dramatic, ancient history. It reveals how one premodern society answered key existential questions and formed its guiding social, religious, and economic customs. In 1928 it was narrated by Edward Proctor Hunt, a Pueblo Indian man from the mesa-top village of Acoma, New Mexico, to Smithsonian Institution scholars. In this new edition, Peter Nabokov renders this important document into clear sequence, adds excerpted material from the original storytelling sessions, and explains the creation and roles of such central myths in American Indian cultures." -- Back of cover. Murad Ali Baig questions, not the importance of faith, but the capturing of all religions by the vested interests of professional priests claiming to be God's sole selling agents leading to distortions, superstitions and religiosity that the founding sages would have abhorred. He analyzes the patrons of religion – the founding prophets, apostles, priests, rulers and the rich – and the common people whose offerings make the places of worship so rich. Murad provides interesting insights into how people the world over, especially in India, have been influenced by geography, sources of food, technological change, trade and by political and religious forces. He presents provocative questions and answers allowing readers to draw their own conclusions. Writing on religion can be volatile but fortunately he cannot be accused of prejudice when his answers equally impact Hindus, Muslims, Christians, Buddhists, Sikhs and others. In spite of the growing amount of important new work being carried out on uses of myth in particular ancient contexts, their appeal and reception beyond the framework of one culture have rarely been the primary object of enquiry in contemporary debate. Highlighting the fact that ancient societies were linked by their shared use of mythological narratives, Wandering Myths aims to advance our understanding of the mechanisms by which such tales were disseminated cross-culturally and to investigate how they gained local resonances. In order to assess both wider geographic circulations and to explore specific local features and interpretations, a regional approach is adopted, with a particular focus on Anatolia, the Near East and Italy. Contributions are drawn from a range of disciplines, and cross a wide chronological span, but all are interlinked by their engagement with questions focusing on the factors that guided the processes of reception and steered the facets of local interpretation. The Preface and Epilogue evaluate the material in a synoptic way and frame the challenging questions and views expressed in the Introduction.
