In the Shadow of Inheritance Sep 07 2021 A haunting dream. A sinister legend.
Mesmerizing love. The appearance of a mysterious and attractive stranger in the small
town of Adeli changes Tara's life forever. She's now the heiress to the Khanolkar
Rajwada in Mahabaleshwar. However, the palatial home that is her ancestral legacy is
also full of people with deep, dark secrets and one of them is her father's murderer. Evil
lurks in the shadows, as does love. But Tara can't rely on anyone as someone out there
is determined to prove the legend right and to finish the incomplete murderous task of
the past. Read on to find out what Tara's fate will be . . .

GRID AND CLUSTER COMPUTING Apr 26 2023 Grid Computing and Cluster
Computing are advanced topics and latest trends in computer science that find a place
in the computer science and information technology curricula of many engineering
institutes and universities today. Divided into two parts—Part I, Grid Computing and Part
II, Cluster Computing—, this compact and concise text strives to make the concepts of
grid computing and cluster computing comprehensible to the students through its fine

presentation and accessible style. Part I of the book enables the student not only to understand the concepts involved in grid computing but also to build their own grids for specific applications. Similarly, as today supercomputers are being built using cluster computing architectures, Part II provides an insight into the basic principles involved in cluster computing and equips the readers with the knowledge to build their own clusters in-house. Diagrams are used to illustrate the concepts discussed and to enable the reader to actually construct a grid or a cluster himself. The book is intended as a text for undergraduate and postgraduate students of computer science and engineering, information technology (B.Tech./M.Tech. Computer Science and Engineering/IT), and post-graduate students of computer science/information technology (M.Sc. Computer Science and M.Sc. IT). Besides, practising engineers and computer science professionals should find the text very useful.

E-Governance Jun 28 2023 In Indian context.

The Oxford Handbook of Innovation Management Apr 02 2021 While innovation is widely recognised as being critical to organisational success and the well-being of societies, it requires careful management to ensure that innovation processes have the best possible impact. This volume provides a wide range of perspectives on the nature of innovation management and its influences.

Mandated Corporate Social Responsibility Sep 27 2020 This book examines the Indian mandate for Corporate Social Responsibility (CSR) and its implementations in various individual organizations. Although the mandate is applicable only to certain large and stable companies, many believe that India is poised to become the birthplace of social, economic and environmental transformation, given the immense size of the Indian population and its challenging socio-economic index. The book explores the various facets of CSR investigation and places special emphasis on the Schedule VII of the Indian Companies Act of 2013, which defines specific areas of intervention for these companies. In addition, it provides a wealth of first-hand case studies that exemplify the ongoing developments and the fundamental challenges and opportunities of mandated CSR.

Yoga Jan 12 2022

Metaphilosophy of Creation May 16 2022 Some of puzzling Metaphilosophical

Questions on Creation: 1) Who was there before creation? 2) Is there a beginning and an end to this creation? 3) Do other universes exist, similar to the universe we live in? 4) What was the first principle or *tatwa* that put the creation process into action? 5) Is there any controlling force to rule the universe and to keep the universe harmonious? Some of the Cardinal cosmic laws are: "What is evolved is necessarily caused." -- Cardinal cosmic law - "Being originated it is destructible/changed." -- Cardinal cosmic law - "What is caused is limited." -- Cardinal cosmic law Evolution takes place every moment*. "A moment is that period of time unit by which an Anu (atom) in motion gives up its previous position and reaches the succeeding place." — Maharshi Vyasa. (3000BC) *A moment (Kshana) indicates the smallest unit of time. "Dharma is the form of Dharmi". "There is no Dharma without a Dharmi" "Dharma Parinama =Characteristic Manifestation is known as Creation" This subject of creation is generally considered obscure, abstract, secretive and unfathomable. But knowledge is self-luminating and the Veda is knowledge. The ancient wisdom of Bharathadesam is the source of illumination for the concepts of creation.

Cybernetics, Cognition and Machine Learning Applications Nov 29 2020 This book provides a collection of selected papers presented at the International Conference on Cybernetics, Cognition and Machine Learning Applications (ICCCMLA 2019), which was held in Goa, India, on 16–17 August 2019. It covers the latest research trends and advances in the areas of data science, artificial intelligence, neural networks, cognitive science and machine learning applications, cyber-physical systems, and cybernetics.

Building Executive Information Systems and Other Decision Support Applications Apr 14 2022 This new book combines research findings and the practical experiences of the authors to present a comprehensive look at Executive Information Systems (EIS) and other decision support applications! From how EIS differs from other applications to what the future holds, this indispensable text covers everything readers need to know to understand and develop executive information systems. Coverage also includes Decision Support Systems, Artificial Intelligence (such as Expert Systems) and Groupware (such as Group Support Systems and Lotus Notes) to give readers a wide array of tools to support executive decision making.

Object-oriented Database Systems Jun 24 2020 Object-Oriented Database Systems offers a clear introduction to the concepts and features of object-oriented database, illustrated with several examples of current commercial systems. Professional database designers and users who want a clear guide to the current state of the art will find this book a must.

Business for the Common Good Nov 21 2022 Is business just a way to make money? Or can the marketplace be a venue for service to others? Scott B. Rae and Kenman L. Wong seek to explore this and other critical business issues from a uniquely Christian perspective, offering up a vision for work and service that is theologically grounded and practically oriented.

The Business of Persuasion Sep 19 2022 “A wonderfully personal account of the thoughts behind a lifelong focus on the reputation of corporations around the world. Candid and straightforward.”—Huffington Post Harold Burson, described by PRWeek as “the [20th] century’s most influential PR figure,” is perhaps the most recognized name in the industry today. The founder of PR giant Burson-Marsteller had an incredible 70-year career, in which he built a global enterprise from a one-man consulting firm. In this illuminating and engaging business memoir, Burson traces his career from studying at Ole Miss to serving in World War II, reporting on the Nuremburg trials, and joining with Bill Marsteller. Together, he and Marsteller made history in a new venture that would grow to be one of the biggest public relations companies in the world, with over 60 offices on six continents. By way of personal and professional examples, Burson shows readers what public relations really entails—its challenges, methodologies, and impacts. His anecdotes on PR challenges like the “Tylenol crisis,” the removal of confederate flags from Ole Miss, and the introduction of “New Coke” illustrate Burson’s time-tested tenets of great PR and crisis management. He interweaves iconic moments from the history of public relations into his story, making this “a must-read for any PR professional” (Jack Welch, executive chairman, Jack Welch Management Institute). “Every detail of Harold’s professional life is brought alive through an interesting narrative of the highs and lows . . . There is loads of inspiration hidden in every page for everyone. Be it a reader with no interest in Public Relations or a veteran who wants to understand more about the profession.”—Reputation Today

Small Money Big Impact Aug 07 2021 Make your money make a difference—and enjoy attractive returns Small Money, Big Impact explores and explains the globally growing importance of impact investing. Today, the investor's perspective has become as important as the actual social impact. Based on their experience with over 25 million micro borrowers, the authors delve into the mechanics, considerations, data and strategies that make microloans and impact investing an attractive asset class. From the World Bank to the individual investor, impact investing is attracting more and more attention. Impact investing is a global megatrend and is reshaping the way people invest as pension funds, insurance companies, foundations, family offices and private investors jump on board. This book explains for the first time how it works, why it works and what you should know if you're ready to help change the world. Impact investing has proven over the last 20 years as the first-line offense against crushing poverty. Over two billion people still lack access to basic financial services, which are essential for improving their livelihood. Investors have experienced not only social and environmental impact, but have received attractive, stable and uncorrelated returns for over 15 years. This guide provides the latest insights and methodologies that help you reap the rewards of investing in humanity. Explore the global impact investing phenomenon Learn how microloans work, and how they make a difference Discover why investors are increasingly leaning into impact investing Consider the factors that inform impact investing decisions Part social movement and part financial strategy, impact investing offers the unique opportunity for investors to power tremendous change with a small amount of money— expanding their portfolios as they expand their own global impact. Microfinance allows investors at any level to step in where banks refuse to tread, offering opportunity to those who need it most. Small Money, Big Impact provides the expert guidance you need to optimize the impact on your portfolio and the world.

Creating Business Value and Competitive Advantage With Social Entrepreneurship Apr 22 2020 The field of social entrepreneurship is attracting attention from multiple industries. Social entrepreneurs are responsible for finding ways to creatively contribute to society by providing affordable products and services. *Creating Business Value and Competitive Advantage With Social Entrepreneurship* is a useful scholarly resource that examines the broad topic of social entrepreneurship by looking at relevant theoretical frameworks and fundamental terms. Focused on topics such as creating business value, promoting social entrepreneurship, and enacting programs of social change, this book provides the latest research and practical solutions concerning social entrepreneurship. The source proves valuable to academicians, researchers, entrepreneurship practitioners, and individuals interested in learning more about social entrepreneurship.

E-Government Development and Diffusion: Inhibitors and Facilitators of Digital Democracy May 04 2021 "This book provides a comprehensive, integrative, and global assessment of the e-government evolution in terms of real-life success and failure cases"--Provided by publisher.

Management Strategy for Information Technology (IT and Management Convergence) Jul 26 2020

Understanding Social Entrepreneurship May 23 2020 "This book seeks to provide graduate-level and upper-division or honors undergraduate students with a comprehensive understanding of the emerging and rapidly growing field of social

entrepreneurship. It is the most complete text on the subject available, exploring both the theory and practice of social entrepreneurship and blending these seamlessly through examples, case studies, the voices of practicing social entrepreneurs, and special features that put students in a position that requires creative thinking and strategic problem solving"--

CSR 2.0 Jul 18 2022 The book examines the evolution and current state of corporate social responsibility (CSR), using a five-stage maturity model: defensive, charitable, promotional, strategic and transformative CSR. The first four stages are dubbed CSR 1.0 and characterise most current CSR practice, while the fifth stage is named CSR 2.0 (also transformative or systemic CSR) and describes emergent and future CSR practices. Reasons are given why CSR 1.0 approaches have failed to have any significant impact on the most serious global social, environmental and ethical challenges. The emergent CSR 2.0 will then be explored in detail by elaborating on five principles underlying the new approach, including: creativity, scalability, responsiveness, glocality and circularity. A four-part DNA Model is also introduced, covering value creation, good governance, societal contribution and ecological integrity, which provides the basis for defining and measuring CSR 2.0. Finally, a 70-question CSR 2.0 self-assessment diagnostic tool developed by the author is presented, with sample data to show how the tool can be used for future research and practitioner application.

It Enabled Practices And Emerging Management Paradigms Jun 04 2021 Papers presented at the Third National IT Conference.

E-GOVERNANCE Aug 31 2023 This comprehensive text, now in its Second Edition, continues to provide the entire spectrum of e-governance—from definition of e-governance to its history, evaluation, e-governance models, infrastructure and manpower facilities, data warehousing possibilities in implementation of e-government projects, and strategies of success of such projects. The text covers 22 case studies—18 Indian case studies and four International case studies. The Indian case studies include Bhoomi, a project of Karnataka Government, CARD (Computer-aided Administration of Registration Department), Smart Nagarpalika (Computerization of Urban Local Bodies or Municipalities), IT in judiciary, Sachivalaya Vahini (e-governance at Secretariat), e-Khazana (Computerization of Treasury Department), and e-Panchayat (Electronic Knowledge-based Panchayat). The international case studies are culled from USA, China, Brazil and Sri Lanka. This book would be of great interest to students of computer science, IT courses, management and public administration. In addition, government departments—both at the centre and in various states—and administrators should find the book highly useful. **NEW TO THIS EDITION** : Provides two Appendices—one on Eucalyptus cloud to remotely provision e-governance application and another on Revisiting NeGP: eBharath 2020: the proposed future NeGP.

Advances in SloT (Social Internet of Things) Mar 02 2021 The Social Internet of Things (SloT) has become a hot topic in academic research. It employs the theory of social networks into the different levels of the Internet of Things (IoT) and has brought new possibilities for the development of IoTs. Essentially, the SloT is a subset of IoTs. It uses intelligent hardware and humans as the node, a social network as the organization type, the social relationship between things, things and humans, and between humans, formatting research methods and models with social network characteristics to realize the connection, service, and application of the IoTs. Moreover, SloT is a form of

realization of technology, architecture, and application of the IoTs using social network research methods. It further promotes the integration between real-world and virtual cyberspace, contributes the realization of the IoTs, expands the research scope of the social networking, and provides a new solution for the specific problems of the IoTs. Consequently, there is a tremendous need for researchers to have a comprehensive knowledge of the advances in SIoT. This special issue is soliciting scientific research papers that can present a snapshot of the latest research status of SIoT.

Knowledge Management And Information Technology Jul 30 2023 The Title 'Knowledge Management And Information Technology written by C. S. R. Prabhu' was published in the year 2014. The ISBN number 9788121212199 is assigned to the Hardcover version of this title. This book has total of pp. 191 (Pages). The publisher of this title is Gyan Publishing House. This Book is in English. The subject of this book is Management, About The Author: - C.S.R. Prabhu, Director General(Retd.) National, Informatics Centre (NIC), New Delhi (Ministry of, Communications and I

Fog Computing, Deep Learning and Big Data Analytic-Research Directions Oct 28 2020

Providing a comprehensive overview of fog computing technology, this book explores research issues involved in the application of traditional shallow machine learning and deep learning techniques to big data analytics. --

Object – Oriented Database Systems : Approaches and Architectures Mar 26 2023

Sustainability at Work Oct 09 2021 Sustainability at Work is a compelling guide for everyone who wants to have both a successful career and a career that makes a positive difference in society. Containing career advice of great value to students of sustainability, and explaining how they can apply their knowledge to their future careers, its appeal extends well beyond the classroom. Sustainability at Work includes an easy-to-follow framework that anyone wondering how they can make a sustainable difference in the workplace can apply. Professionals from a variety of backgrounds and territories explain how they brought a sustainability approach to various sectors: agriculture, health care, business, economics, and financial services, education and research, law and policy, science and technology, and entertainment and media. Through inspiring narratives and a structured framework, Sustainability at Work illustrates how sustainability can be incorporated into every imaginable career to impact the quadruple bottom line: environment, economy, society, and future generations.

Big Data Analytics: Systems, Algorithms, Applications Feb 22 2023 This book provides a comprehensive survey of techniques, technologies and applications of Big Data and its analysis. The Big Data phenomenon is increasingly impacting all sectors of business and industry, producing an emerging new information ecosystem. On the applications front, the book offers detailed descriptions of various application areas for Big Data Analytics in the important domains of Social Semantic Web Mining, Banking and Financial Services, Capital Markets, Insurance, Advertisement, Recommendation Systems, Bio-Informatics, the IoT and Fog Computing, before delving into issues of security and privacy. With regard to machine learning techniques, the book presents all the standard algorithms for learning – including supervised, semi-supervised and unsupervised techniques such as clustering and reinforcement learning techniques to perform collective Deep Learning. Multi-layered and nonlinear learning for Big Data are also covered. In turn, the book highlights real-life case studies on successful

implementations of Big Data Analytics at large IT companies such as Google, Facebook, LinkedIn and Microsoft. Multi-sectorial case studies on domain-based companies such as Deutsche Bank, the power provider Opower, Delta Airlines and a Chinese City Transportation application represent a valuable addition. Given its comprehensive coverage of Big Data Analytics, the book offers a unique resource for undergraduate and graduate students, researchers, educators and IT professionals alike.

Do Good Dec 11 2021 Increasingly today, in every age group, consumers are committing to brands that show good citizenship--from fair employment practices, to social responsibility, to charitable giving. In fact, support of these generous and socially aware companies is so high that it is safe to say that good works and charitable giving are no longer optional for the company that aspires for financial success--they are necessary! Do Good documents the sea of change that has impacted the twenty-first-century marketplace more than even the most optimistic of business forecasters. Toms grew into a \$600 million company by giving away 35 million pair of shoes. Patagonia's profits have climbed year after year even as it funnels heavy investments into sustainability. From CVS's destocking cigarettes to Chipotle's ethical sourcing, customers have shown with their wallets the types of businesses they will support and that they will quickly call out negligence. Buyers today demand more than half-hearted pledges from companies who are clearly just trying to show less profits and decrease their taxes. By implementing the five-step model for the new rules of business laid out in Do Good--Trust, Enrichment, Responsibility, Community, and Contribution--companies can take the necessary steps to embed social consciousness into their DNA, in turn capturing both markets and hearts.

Sustainability Challenges and Solutions at the Base of the Pyramid Jul 06 2021 Around the turn of the millennium it had become painfully evident that development aid, charity or "global business-as-usual" were not going to be the mechanisms to alleviate global poverty. Today, there is little dispute that poverty remains the most pressing global problem calling for innovative solutions. One recent strategy is the Base of the Pyramid (BoP) concept developed by Prahalad and Hart, which relies on entrepreneurial activity tapping into the previously ignored markets of the economically most disadvantaged. It is a process requiring innovations in several disciplines: technological, social and business. This book covers a number of areas. First, much of the current BoP discussion emphasises targeting products to the needs of the poor. But do we actually know what the real needs of the poor are? This book takes a bottom-up human-centred approach and examines examples that truly engage the poor in BoP product and service development. What types of needs assessment methodologies are indicated considering the cultural differences in BoP countries? Are the existing methodologies adequate? Do they need to be redefined and redeveloped? Second, the book considers how we can balance poverty alleviation and stimulate economic growth without stressing the ecosystem. Tragically, the poor are hardest hit by the adverse effects of environmental deterioration such as water shortages, climate change or the destruction of habitats. While the economic welfare of the poor is critical, the BoP approach must balance its inherent paradox of encouraging greater consumption while avoiding further pressures on environmental sustainability. The link between the BoP approach and sustainable development is a key feature of this book. Third, it looks at innovation and

asks what kinds of "bottom-up" innovation (open source, technological, social and business) support BoP initiatives (and sustainable development)? Fourth, the book deals with the relationship between development assistance and BoP. Is a BoP strategy the antithesis to development aid or can these two co-exist or even complement each other? Finally, the book raises questions about the relationship between corporate responsibility and BoP. Is BoP a new form of corporate neo-colonialism or a new form of corporate responsibility? Although the BoP concept has unleashed an extensive and generally enthusiastic response from academics, businesses, NGOs and governments, the knowledge domain around this concept is still in the early stages of development. This book addresses that need with a focus on the needs of the end-users – the poor – as a starting point for BoP products and innovations. With contributions from both supporters and critics, it provides a treasure trove of global knowledge on how the concept has developed, what its successes and failures have been and what promise it holds as a long-term strategy for alleviating poverty and tackling global sustainability.

Big Billion Startup: The Untold Flipkart Story Dec 31 2020 The definitive account of India's biggest startup that redefined e-commerce, entrepreneurship and the way we shop and live. IIT graduates Sachin Bansal and Binny Bansal founded out of a Bangalore apartment what would become India's biggest e-commerce startup. Established in October 2007, Flipkart began as an online bookstore and soon came to be known for its 'customer obsession'. As the startup's reputation grew, so did its value, with venture capitalists in India and abroad lining up to invest heavily in the company that stood for bold ambition, unabashed consumerism and the virtues of technology. Investigative journalist Mihir Dalal recounts the astounding story of how the Bansals built Flipkart into a multi-billion-dollar powerhouse in the span of a few years and made internet entrepreneurship a desirable occupation. But it is also a story of big money, power and hubris, as both business and interpersonal complexities weakened the founders' control over their creation and forced them to sell out to a retailer whose dominance they had once dreamt of emulating. Flipkart's auction involved some of the corporate world's biggest names, from Jeff Bezos, Satya Nadella, Sundar Pichai to Masayoshi Son and Doug McMillon, an ironic testimony to the strength of what the Bansals had forged. Based on extraordinary research, extensive interviews and deep access to key characters in the Flipkart story, Big Billion Startup is the riveting and revealing account of how Sachin and Binny Bansal built and sold India's largest internet company.

Fog Computing, Deep Learning and Big Data Analytics-Research Directions Dec 23 2022 This book provides a comprehensive picture of fog computing technology, including of fog architectures, latency aware application management issues with real time requirements, security and privacy issues and fog analytics, in wide ranging application scenarios such as M2M device communication, smart homes, smart vehicles, augmented reality and transportation management. This book explores the research issues involved in the application of traditional shallow machine learning and deep learning techniques to big data analytics. It surveys global research advances in extending the conventional unsupervised or clustering algorithms, extending supervised and semi-supervised algorithms and association rule mining algorithms to big data Scenarios. Further it discusses the deep learning applications of big data analytics to fields of computer vision and speech processing, and describes applications such as

semantic indexing and data tagging. Lastly it identifies 25 unsolved research problems and research directions in fog computing, as well as in the context of applying deep learning techniques to big data analytics, such as dimensionality reduction in high-dimensional data and improved formulation of data abstractions along with possible directions for their solutions.

A Hitchhiker's Guide To Armageddon Jun 16 2022 With wit and humor, popular Lost Cities author David Hatcher Childress takes us around the world and back in his trippy final book to the Lost Cities series. He's off on an adventure in search of the apocalypse and end times. Childress hits the road from the fortress of Megiddo, the legendary citadel in northern Israel where Armageddon is prophesied to start. Hitchhiking around the world, Childress takes us from one adventure to another, to ancient cities in the deserts and the legends of worlds before our own. Childress muses on the rise and fall of civilizations, and the forces that have shaped mankind over the millennia, including wars, invasions and cataclysms. He discusses the ancient Armageddons of the past, and chronicles recent Middle East developments and their ominous undertones. In the meantime, he becomes a cargo cult god on a remote island off New Guinea, gets dragged into the Kennedy Assassination by one of the "conspirators," investigates a strange power operating out of the Altai Mountains of Mongolia, and discovers how the Knights Templar and their off-shoots have driven the world toward an epic battle centered around Jerusalem and the Middle East.

Corporate Social Responsibility in China Jan 29 2021 Over the years, many corporations have been trying to determine what they can and should do to contribute to the sustainability of the economic, social and ecological environment within which they operate. Corporate social responsibility has become a key senior management issue worldwide and an increasingly debated topic in China. This book aims at helping companies operating in China to better assess and exercise their corporate social responsibility (CSR) in specific contexts. The purpose of this book is to show that CSR has a strong economic pay back in the long run, that it is a key success factor in nurturing corporate excellence, and that a sense of urgency and accrued inventiveness are required from companies operating in China. Cross-disciplinary in scope, the book aims at helping students and analysts in political science, governance, international relations and Chinese studies to understand and appreciate the unique role that firms play in shaping a new China. It focuses on the relationship between the state, civil society and corporations in the Chinese context. It researches the conditions under which this relationship might result in redefining China's developmental model. This practical, business-oriented book takes into account China's classical and contemporary thought on CSR. It is the result of a long research and collaborative process with several institutions and industry leaders .

Rural India Aug 26 2020 Papers presented at the Third International Conference on Rural India : achieving Millennium Development Goals and Grassroots Development, held at Hyderabad during 10-12 November 2005.

CSR for Purpose, Shared Value and Deep Transformation Aug 19 2022 CSR for Purpose, Shared Value and Deep Transformation focuses on a new type of CSR, which includes entrepreneurial innovation, sustainable goals and shared and integrated value in a systems-oriented approach for deep transformation. All topics are backed by case studies, academic literature and future research opportunities.

Mobile Computing Oct 21 2022 Papers presented at the National Conference on Mobile Computing, held at Hyderabad during 11-12 December 2001.

DATA WAREHOUSING May 28 2023 The Third Edition of this well-received text analyses the fundamental concepts of data warehousing, data marts, and OLAP. The author discusses, in an easy-to-understand language, important topics such as data mining, how to build a data warehouse, and potential applications of data warehousing technology in government. Besides, the text compares and contrasts the currently available software tools used to design and develop data warehouses. While retaining the six existing case studies, it gives four new case studies: ? HARBOR, A Highly Available Data Warehouse ? A Typical Business Data Warehouse for a Trading Company ? Customer Data Warehouse for the World's First and Largest Online Bank in the United Kingdom ? A German Supermarket EDEKA's Data Warehouse The book, which is a blend of principles and real-life case studies, is intended as a text for students of B.Tech/M.Tech (Computer Science and Engineering), B.Tech/M.Tech (Information Technology), MBA, M.Sc. (Computer Science), M.Sc. (Information Technology), and MCA. It should also be of considerable utility and worth to software professionals and database practitioners.

Corporate Social Responsibility in India Mar 14 2022 Corporate Social Responsibility in India is arguably the first comprehensive, well-researched book on the subject in the country. The author uses Indian examples, case studies and CSR role models from the Indian industry to explain the gap between Indian business needs and current practices. Practices and researches in economically developed countries have also been used extensively. As the Indian industry begins to enter international markets, it is going to be imperative to integrate CSR with business goals for long-term sustainability and healthy economic, social and environmental impact. The book helps in understanding the meaning of business beyond financial numbers and tries to explain how even CSR can be used as a marketing tool and for business benefits. It dwells comprehensively upon the concept of CSR, from its inception as philanthropy till its journey to a form where now it is mandatory to be sensitive about CSR in businesses.

BLUETOOTH TECHNOLOGY Jan 24 2023 Bluetooth is a short range wireless radio technology standard that packs the potential to meet the demands of the present and of the future. Bluetooth is the most secure among all wireless technologies. This up-to-date, well-organized book provides a comprehensive coverage of Bluetooth and shows how various Bluetooth-enabled applications can be developed in Java and J2ME. The text provides a detailed description and a skilful analysis of the techniques involved in developing Bluetooth-enabled applications with a host of illustrative codes. This book, which treats a topic of current interest, will be extremely useful to students of computer science as well as to professionals in the field.

Sustainability Challenges in Sub-Saharan Africa I Feb 10 2022 The aim of this 2-volume book is to highlight how Sustainability Science approaches can help solve some of the pervasive challenges that Africa faces. The volumes collect a number of local case studies throughout Africa that adopt transdisciplinary and problem-oriented research approaches using methodologies from the natural and the social sciences. These are put into perspective with chapters that introduce key sustainability challenges such using a regional focus. Through this multi-scale and inter/transdisciplinary approach the proposed volume will provide an authoritative source that will pack in a

single volume a large amount of information on how Sustainability Science approaches sustainability challenges in African contexts. While there have been general books about sustainability science, none has had a strong African focus. As a result the 2-volume set fills a major gap in the Sustainability Science scholarship. This volume sets the stage for the series. Part I introduces key sustainability challenges in Africa. Parts II?III highlights specific case studies related to these challenges from West and Central Africa.
