Diversity Across the Disciplines Dec 20 2022 Diversity research and scholarship has evolved over the past several decades and is now reaching a critical juncture. While the scholarship on diversity and inclusion has advanced within various disciplines and subdisciplines, there have been limited conversations and collaborations across distinct areas of research. Theories, paradigms, research models and methodologies have evolved but continue to remain locked within specific area, disciplines, or theoretical canons. This collaborative edited volume examines diversity across disciplines in higher education. Our book brings together contributions from the arts, sciences, and professional fields. In order to advance diversity and inclusion across campuses, multiple disciplinary perspectives need to be acknowledged and considered broadly. The current higher education climate necessitates multicultural and interdisciplinary collaboration. Global partnerships and technological advances require faculty, administrators, and graduate students to reach beyond their disciplinary focus to achieve successful programs and research projects. We need to become more familiar discussing diversity across disciplines. Our book investigates diversity across disciplines with attention to people, process, policies, and paradigms. The four thematic categories of people, process, policies, and paradigms describe the multidisciplinary nature of diversity and topics relevant to faculty, administrators, and students in higher education. The framework provides a structure to understand the ways in which people are impacted by diversity and the complicated process of engaging with diversity in a variety of contexts. Policies draw attention to the dynamic nature of diversity across disciplines and paradigms presents models of diversity in research and education.

Empowering Women May 01 2021 The expansion of married women's property rights was a main achievement of the first wave of feminism in Latin America. As Carmen Diana Deere and Magdalena Leon reveal, however, the disjuncture between rights and actual ownership remains vast. This is particularly true in rural areas, where the distribution of land between men and women is highly unequal. In their pioneering, twelve-country comparative study, the authors argue that property ownership is directly related to women's bargaining power within the household and community, point out changes resulting from recent gender-progressive legislation, and identify additional areas for future reform, including inheritance rights of wives.

Research Advances in Alcohol and Drug Problems Oct 26 2020 This is the tenth volume in the Research Advances series and the seventh published by Plenum Press. Volume 10 is another omnibus volume, providing specialized and advanced reviews in a number of areas related to the use of alcohol, illicit drugs, and tobacco. We include also a brief history of the Center for Alcohol Studies that gives Mark Keller's unique perspective on this noted institution. Two of the chapters are decidedly longer than the others-very long chapters have appeared occasionally in the past, and we think that it is one of the strengths of the series that we are able to accommodate such reviews. Again the editorial board has changed. After several years of service, Reginald G. Smart has stepped down. New to the board are Helen M. Annis, Michael S. Goodstadt, Lynn T. Kozlowski, and Evelyn R. Vingilis. This is likely to be the sole volume for which Goodstadt is on the board, since before completion of this volume he moved from the Addiction Research Foundation to the Center for Alcohol Studies, Rutgers University.

Routledge Handbook of the History of Global Economic Thought Jun 02 2021 The Routledge Handbook of the History of Global Economic Thought offers the first comprehensive overview of the long-run history of economic thought from a truly international perspective. Although globalization has facilitated the spread of ideas between nations, the history of economics has tended to be studied either thematically (by topic), in terms of different currents of thought, or individually (by economist). Work has been published in the past on the economic thought traditions of specific countries, but this pioneering volume is unique in offering a wide-ranging comparative account of the development of economic ideas and philosophies on the international stage. The volume brings together leading experts on the development of economic ideas from across the world in order to offer a truly

international comparison of the economics within nation-states. Each author presents a long-term perspective on economics in their region, allowing global patterns in the progress of economic ideas over time to be identified. The specially commissioned chapters cover the vast sweep of the history of economics across five world regions, including Europe (England, Scotland, Ireland, Italy Greece, Spain, Portugal, Germany, Sweden, Russia and the Ukraine), the Americas (the USA, Canada, Mexico and Central America, Spanish-Speaking South America, Brazil and the Caribbean), the Middle East (Turkey, Israel, Arab-Islamic Economics, Persia/Iran, North Africa), Africa (West Africa, Southern Africa, Mozambique and Angola), and the Asia-Pacific Region (Australia and New Zealand, China, Southeast Asia, the Asian Tigers, India.) This rigorous, ambitious and highly scholarly volume will be of key interest to students, academics, policy professionals and to interested general readers across the globe.
