Are you from India and interested in studying abroad in

the US, Europe, Australia or Canada? Sick of seeing scholarships only for local residents. Studying in a foreign university in a developed country has long been seen as a gateway to a better standard of living. This is either through the increased knowledge obtained or through the increased job opportunities that result from the knowledge. Universities in Europe, US, Australia and Canada expose all their students to people from different corners of the globe. Students do learn to work with people from different cultural backgrounds as well as learn skills

that will make them more employable globally. Of course, it is important that they work hard once they get there and make the right decisions; but they definitely have the opportunity to a better life.

However, people from India looking to study abroad have several obstacles that they need to overcome. The biggest burden is the financial one. People from upper middle class and rich families can afford the fees needed for the high grade of education. However, everyone else must scramble. There is the opportunity for graduate research and graduate teaching assistanships. But those who are not

able to get these assistanships must rely on loans taken at very high interest rate in Indian banks. Given the cost of foreign education and salaries in India, it is almost impossible to pay off the loan with an Indian salary. So, there is huge pressure to get a job in the country of schooling. This can be difficult as most jobs cater towards those with local citizenship. From personal experiences with study abroad scholarships, I realize that most of the scholarships that are shown to students require citizenship or permanent residence of the local country. When I was at Georgia

Tech, there were plenty of scholarships available to local residents of Georgia, USA. Most of the local students could cover their entire tuition with the scholarships. The international students were left hanging. To address this issue, our team looked at several programs, both in India and the developed countries. There are scholarships in USA, Australia, USA and Europe that are specific to students from developing countries to help educate their workforce. There are also scholarships by private and public organizations in India that are for Indian citizens.

Ultimate Scholarship Book includes helpful indexes to pinpoint the best scholarships for you. In an era when black athletes are commonly compared to the African slaves, Dr. Pinckney attempts to draw a connection to William Rhoden's "Forty Million Dollar Slaves" and Harry Edward's earlier work about the black athletes' integration and segregation issues. Furthermore, this book is an attempt to chronicle the past and current history of blacks in sports. This book reads like a hybrid book—part history, part sociology, and part current issues. Dr. Pinckney captures the rise

and slow decline of segregation in college and professional athletics. Dr. Pinckney examines how social and political forces imposed policies of racism, and explains the social forces that eventually forced blacks and historical black colleges and universities to accept second class-segregated competition. By some accounts five hundred years ago, our African ancestors were running from the slave catcher and slave ships to avoid slavery; however, today the descendants of slaves are still running. In fact, they are running, jumping, shooting

baskets, and catching odd-shaped balls for their masters. Sporting events such as track and field, football, and basketball are mainly dominated by blacks. On any given Saturday afternoon at majority-white institutions, the black athlete can be found entertaining not only their immediate white master, but their white masters in terms of the disproportionate number of white fans, including faculty, staff, and college administrators. This in itself has predated far too many black athletes to slavery and the conditions of modern-day slavery at the hand of

athletics. Truly, sports in America today as we know it has psychologically damaged the black athlete. There is an enormous amount of financial aid money available in direct scholarships and grants to fund college study; the trick is to identify the sources of athletic awards and to find the right one for you. In *Free Money for Athletic Scholarships*, Laurie Blum shows the high school athlete where and how to apply for the millions of dollars available each year to help finance education costs. According to the most recent report done by The College Board Annual Survey of Colleges, the average rate of

tuition at four-year public universities is \$19,548, and even more shocking, the average four-year tuition rate for private colleges is \$43,921. Tuition costs, of course, are just the beginning. However, there is good news: There is more financial aid available than ever before, and despite all of these college cost increases, a college education remains an affordable choice for most families. Armed with the information detailed in this comprehensive and updated edition of *How to Go to College on a Shoe String*, you will be privy to the more than 2,200 programs that offer scholarships,

internships, or loans to more than 1.7 million students each year. In addition to scholarships and grants, you will learn hundreds of innovative ways to slash your college cost, such as calculating and reducing your college budget, buying your text books and supplies cheaply, earning college credit on an accelerated basis, combining higher education and course-related employment, performing national and community service, and making use of tuition prepayment plans, federal funds, state aid, and private sector aid. If you want to learn hundreds of innovative ways to

save thousands on your college costs, then this book is for you. In the next five years, sixteen million high school students will graduate, making up the largest group of high school graduates in this country's history. Those students who are fortunate enough to be on the honor roll or the star quarterback of the football team will have access to the best scholarships. But what will happen to the rest of them—those students who have the potential for a great college career, but not necessarily the financial backing to attend the school of their dreams? Author Kimberly Stezala

passionately believes that every student should have access to a quality education. Now, she shows parents and their kids how to approach the scholarship process like a pro. Filled with inspiring advice from successful students and scholarship providers, *Scholarships 101* shows aspiring college students how to: apply for those scholarships that are the best match for their profile and skills • create a scholarship application that will stand apart from the rest and impress the judges • find the buried treasure of scholarships that aren't necessarily available on common websites •

build a team of supporters in their scholarship quest. Straightforward and savvy, this book provides the extra boost many students need to plan for their futures and receive the education they deserve.
