This study provides an overview of the numerous African

initiated churches that came into being during the 20th century in the various different parts of Sub-Saharan Africa. Written by an acknowledged expert on Christianity in Africa, it also examines the reasons for the emergence of these religious centres that have resulted from the interaction between Christianity and African pre-Christian religions. From Calvinist to Catholic, from Charismatic to AmaZioni, the Rainbow Nation has one of the most colourful, variegated, and bewildering array of Christian churches in the world. Where on earth did they all come from? How did they develop? What do they believe? How are they related to one another? In this clear and readable history of Christianity in South Africa, Kevin Roy answers these questions with comprehensive, succinct and rigorous historical analysis with sympathy and honesty. Dr Roy does not shy away from the failures and sins of the participants in this story that intertwines with the history of the peoples and tribes in South Africa. This book is a testimony of divine love and patience in the midst of human folly and frailty, of successes and faithful service to God.

Biography of the obscure yet legendary founder of the Zion Christian Church, Engenas Lekganyane (1885-1948) This series of publications aims to fill the gaps in our history, highlighting in particular the significant roles played by black leaders from all walks of life. This volume traces the theme of the loss of language and culture in numerous post-colonial contexts. It establishes that the aphasia imposed on the indigenous is but a visible symptom of a deeper malaise — the mismatch between the symbiotic relation nurtured by the indigenous with their environment and the idea of development put before them as their future. The essays here show how the cultures and the imaginative expressions of indigenous communities all over the world are undergoing a phase of rapid depletion. They unravel the indifference of market forces to diversity and that of the states, unwilling to protect and safeguard these marginalized communities. This book will be useful to scholars and researchers of cultural and literary studies,

linguistics, sociology and social anthropology, as well as tribal and indigenous studies. There are only two roads; one leads to heaven and one leads to hell. This is a spiritual fact, without change or compromise; there is no middle road and no chance to "sit on the fence". There are numerous false religions operating in the world today, falsely broadcasting themselves as truth or as God's truth for that matter. These religions may, on the contrary, be the foundation of lifelong poverty, family breakdown, mental derangement, physical illness or varying manifestations of bizarre behavior in the lives of people. These individuals have either turned their back on the true God completely or, by their actions, have allowed some of these pagan and false religious practises to creep into their every day lives. By clinging to these pagan traditions, we inadvertently give Satan a foothold in our lives. In these books these false religions have been measured up against the word, wisdom and knowledge of God. The word of God says that His word is like fire and is a hammer that breaks rocks into pieces. This book presents an African Christian movement full of vitality and creativity. The reader will meet believers who drink milk so that they may dream about angels, reports about funerals where the mourners dance with the coffin on their shoulders and church members who are ritually not allowed to fertilize their fields or wear neck ties. The author's unique insight into Malawi's Christian community addresses important issues in society. Why have 'Spirit Churches,' including Pentecostalism, been so successful in Malawi? Why do some religious groups still refuse medical help, up to the point that children die of cholera? How did the independent churches deal with the colonial trauma? In this masterful portrait, Strohbahn takes the reader from industrial mine compounds to rural colonies, where churches have set up their own spiritual and political rule. He carefully dissects the fine lines between traditional notions and Christianity's influence. We find a spiritual portrait of the Ngoni people, a fascinating cultural analysis of dancing and an

encounter with a unique style of preaching. This book critically interrogates emerging interconnections between religion and biomedicine in Africa in the era of antiretroviral treatment for AIDS. Highlighting the complex relationships between religious ideologies, practices and organizations on the one hand, and biomedical treatment programmes and the scientific languages and public health institutions that sustain them on the other, this anthology charts largely uncovered terrain in the social science study of the Aids epidemic. Spanning different regions of Africa, the authors offer unique access to issues at the interface of religion and medical humanitarianism and the manifold therapeutic traditions, religious practices and moralities as they co-evolve in situations of AIDS treatment. This book also sheds new light on how religious spaces are formed in response to the dilemmas people face with the introduction of life-prolonging treatment programmes. This volume exhibits the engaging and challenging work of public and ecumenical theologian Piet Naud.,. The collection of 26 essays, written over three decades, constitutes an important contribution to public theology by critically and creatively evaluating diverse pathways through the landscape of Ecumenical, African, and Reformed theologies. "If my life and experience is of some interest, it is chiefly so because I have lived through interesting times, in an interesting country, traveled to many interesting places, and been accompanied along the way by interesting folk." John de Gruchy is a renowned South African theologian and an inspiration to many. An expert on the work of the anti-Nazi theologian Dietrich Bonhoeffer, De Gruchy is also a local struggle icon in his own right. In this book, we trace his story from his Viking ancestry, via a seafaring grandfather and illegitimate grandmother, to where he became an ecumenical activist for the South African Council of Churches and up to the present. We journey through a South Africa in transition and a rapidly changing global society. Along the way we meet varied, often controversial people, like Albert Luthuli, Jaap Durand, P.W.

Botha and Constand Viljoen. With a foreword by his friend Desmond Tutu, this is the tale of an extraordinary life lived to the full. No branch of Christianity has grown more rapidly than Pentecostalism, especially in the southern hemisphere. There are over 100 million Pentecostals in Africa. In Latin America, Pentecostalism now vies with Catholicism for the soul of the continent, and some of the largest pentecostal congregations in the world are in South Korea. In *To the Ends of the Earth*, Allan Heaton Anderson explores the historical and theological factors behind the phenomenal growth of global Pentecostalism. Anderson argues that its spread is so dramatic because it is an "ends of the earth" movement--pentecostals believe that they are called to be witnesses for Jesus Christ to the furthest reaches of the globe. His wide-ranging account examines such topics as the Azusa Street revival in Los Angeles, the role of the first missionaries in China, India, and Africa, Pentecostalism's incredible diversity due to its deep local roots, and the central role of women in the movement. He describes more recent developments such as the creation of new independent churches, megachurches, and the "health and wealth" gospel, and he explores the increasing involvement of pentecostals in public and political affairs across the globe. Why is this movement so popular? Anderson points to such features as the emphasis on the Spirit, the "born-again" experience, incessant evangelism, healing and deliverance, cultural flexibility, a place-to-feel-at-home, religious continuity, an egalitarian community, and meeting material needs--all of which contribute to Pentecostalism's remarkable appeal. Exploring more than a century of history and ranging across most of the globe, Anderson illuminates the spectacular rise of global Pentecostalism and shows how it changed the face of Christianity worldwide. This book presents an African Christian movement full of vitality and creativity. The reader will meet believers who drink milk so that they may dream about angels, reports about funerals where the mourners dance

with the coffin on their shoulders and church members who are ritually not allowed to fertilize their fields or wear neck ties. The authors unique insight into Malawis Christian community addresses important issues in society. Why have Spirit Churches, including Pentecostalism, been so successful in Malawi? Why do some religious groups still refuse medical help, up to the point that children die of cholera? How did the independent churches deal with the colonial trauma? In this masterful portrait, Strohbahn takes the reader from industrial mine compounds to rural colonies, where churches have set up their own spiritual and political rule. He carefully dissects the fine lines between traditional notions and Christianitys influence. We find a spiritual portrait of the Ngoni people, a fascinating cultural analysis of dancing and an encounter with a unique style of preaching. Non-Africans have written much about Baba Rolihlahla Dalibhunga Nelson Mandela in Non-African languages. This book was first written in Zulu and then translated into four South African languages including English. Years after the end of Apartheid South Africa remains racially polarized and socially divided. In this context pilgrimage and travelling rituals serve to help those who often find themselves at the bottom end of the social ladder to make sense of their world. This book describes a South Africa that is made up of a number of different fragmented worlds. The focus is on the Zion Christian Church, one of the largest religious movements in southern Africa, and a good example of indigenized African Christianity. Pilgrimage plays an important role in reintegrating some of those fragmented worlds into something approaching wholeness. This book tells the story of how the enduring ritual of pilgrimage is transforming African religion, along with the lives of ordinary South Africans. This volume explores how religious and spiritual actors engage for environmental protection and fight against climate change. Climate change and sustainability are increasingly prominent topics among religious and spiritual groups. Different faith

traditions have developed "green" theologies, launched environmental protection projects and issued public statements on climate change. Against this background, academic scholarship has raised optimistic claims about the strong potentials of religions to address environmental challenges. Taking a critical stance with regard to these claims, the chapters in this volume show that religious environmentalism is an embattled terrain. Tensions are an inherent part of religious environmentalism. These do not necessarily manifest themselves in open clashes between different parties but in different actions, views, theologies, ambivalences, misunderstandings, and sometimes mistrust. Keeping below the surface, these tensions can create effective barriers for religious environmentalism. The chapters examine how tensions are manifested and dealt with through a range of empirical case studies in various world regions. Covering different religious and spiritual traditions, they reflect on intradenominational, interdenominational, interreligious, and religious-societal tensions. Thereby, this volume sheds new light on the problems that religions face when they seek to take an active role in today's societal challenges. This book provides an interdisciplinary exploration of the challenges faced by pastoral ministry in South African Pentecostalism as a result of the Covid-19 pandemic, as well as some interventions being made to manage these challenges. Contributors present descriptive approaches to churches' reactions to lockdown measures, and especially the adaptations generated within Pentecostalism in South Africa. Through a variety of approaches—including pastoral care, virtual ecclesiology, social media, and missiology—contributors offer intervention techniques which can help readers to understand the unique role of Christian ministry

during the pandemic, in South Africa and beyond. One of the most important developments of Christianity in the twentieth century was its transformation in South Africa, where it became a vibrant religion rooted in African idioms and cultures. The church also became engaged in the struggle against social and political injustice, and church leaders employed the vocabularies of faith to secure civil liberty. This hard-hitting book focuses on post-apartheid Christian character and establishes the theological and spiritual authority of African Christians, calling contemporary Christians to renew their faith and Christian identity. It shows, too, that one cannot seriously consider contemporary Christianity apart from the African experience. What is it like to be born dirt-poor in South Africa? Clinton Chauke knows, having been raised alongside his two sisters in a remote village bordering the Kruger National Park and a squatter camp outside Pretoria. Clinton is a young village boy when awareness dawns of how poor his family really is: there's no theft in the village because there's absolutely nothing to steal. But fire destroys the family hut, and they decide to move back to the city. There he is forced to confront the rough-and-tumble of urban life as a 'bumpkin'. He is Venda, whereas most of his classmates speak Zulu or Tswana and he has to face their ridicule while trying to pick up two or more languages as fast as possible. With great self-awareness, Clinton negotiates the pitfalls and lifelines of a young life: crime and drugs, football, religion, friendship, school, circumcision and, ultimately, becoming a man. Throughout it all, he displays determination as well as a self-deprecating humour that will keep you turning the pages till the end. Clinton's story is one that will give you hope that even in a sea of poverty there are those that refuse to give up and, ultimately, succeed. This book examines the ongoing resurgence of traditional power structures in South Africa. Oomen assesses the relation between the changing legal and socio-political position of traditional authority and customary law and what these changes can teach us about the interrelation

between law, politics, and culture in the post-modern world. In this new and substantially expanded Third Edition, Philip Jenkins continues to illuminate the remarkable expansion of Christianity in the global South--in Africa, Asia, and Latin America. Drawing upon the extensive new scholarship that has appeared on this topic in recent years, he asks how the new Christianity is likely to affect the poor, among whom it finds its most devoted adherents. How should we interpret the enormous success of prosperity churches across the Global South? Politically, what will be the impact of new Christian movements? Will Christianity contribute to liberating the poor, to give voices to the previously silent, or does it threaten only to bring new kinds of division and conflict? Does Christianity liberate women, or introduce new scriptural bases for subjection? Acclaim for previous editions of *The Next Christendom*: Named one of the Top Religion Books of 2002 by USA Today Named One of the Top Ten Religion Books of the Year by Booklist (2002) Winner of the Christianity Today Book Award in the category of "Christianity and Culture" (2002) "Jenkins is to be commended for reminding us, throughout the often gripping pages of this lively work...that the history of Christianity is the history of innovative--and unpredictable--adaptations." --The New York Times Book Review "This is a landmark book. Jenkin's thesis is comprehensively researched; his analysis is full of insight; and his projection of the future may indeed prove to be prophetic." --Baptist Times "A valuable and provocative look at the phenomenon widely ignored in the affluent North but likely to be of enormous importance in the century ahead.... *The Next Christendom* is chillingly realistic about the relationship between Christianity and Islam." --Russell Shaw, *Crisis* "If the times demand nothing less than a major rethinking of contemporary global history from a Christian perspective, *The Next Christendom* will be one of the significant landmarks pointing the way." --Mark Noll, *Books & Culture* *The Routledge Companion to Christianity in Africa* offers a multi-disciplinary analysis of the

Christian tradition across the African continent and throughout a long historical span. The volume offers historical and thematic essays tracing the introduction of Christianity in Africa, as well as its growth, developments, and effects, including the lived experience of African Christians. Individual chapters address the themes of Christianity and gender, the development of African-initiated churches, the growth of Pentecostalism, and the influence of Christianity on issues of sexuality, music, and public health. This comprehensive volume will serve as a valuable overview and reference work for students and researchers worldwide. Uniquely authoritative and wide-ranging in its scope, The Oxford Dictionary of the Christian Church is the indispensable reference work on all aspects of the Christian Church. It contains over 6,500 cross-referenced A-Z entries, and offers unrivalled coverage of all aspects of this vast and often complex subject, from theology; churches and denominations; patristic scholarship; and the bible; to the church calendar and its organization; popes; archbishops; other church leaders; saints; and mystics. In this new edition, great efforts have been made to increase and strengthen coverage of non-Anglican denominations (for example non-Western European Christianity), as well as broadening the focus on Christianity and the history of churches in areas beyond Western Europe. In particular, there have been extensive additions with regards to the Christian Church in Asia, Africa, Latin America, North America, and Australasia. Significant updates have also been included on topics such as liturgy, Canon Law, recent international developments, non-Anglican missionary activity, and the increasingly important area of moral and pastoral theology, among many others. Since its first appearance in 1957, the ODCC has established itself as an essential resource for ordinands, clergy, and members of religious orders, and an invaluable tool for academics, teachers, and students of church history and theology, as well as for the general reader. When American evangelicals flocked to Latin America, Africa, Asia, and

Eastern Europe in the late twentieth century to fulfill their Biblical mandate for global evangelism, their experiences abroad led them to engage more deeply in foreign policy activism at home. Lauren Frances Turek tracks these trends and illuminates the complex and significant ways in which religion shaped America's role in the late-Cold War world. In *To Bring the Good News to All Nations*, she examines the growth and influence of Christian foreign policy lobbying groups in the United States beginning in the 1970s, assesses the effectiveness of Christian efforts to attain foreign aid for favored regimes, and considers how those same groups promoted the imposition of economic and diplomatic sanctions on those nations that stifled evangelism. Using archival materials from both religious and government sources, *To Bring the Good News to All Nations* links the development of evangelical foreign policy lobbying to the overseas missionary agenda. Turek's case studies—Guatemala, South Africa, and the Soviet Union—reveal the extent of Christian influence on American foreign policy from the late 1970s through the 1990s. Evangelical policy work also reshaped the lives of Christians overseas and contributed to a reorientation of U.S. human rights policy. Efforts to promote global evangelism and support foreign brethren led activists to push Congress to grant aid to favored, yet repressive, regimes in countries such as Guatemala while imposing economic and diplomatic sanctions on nations that persecuted Christians, such as the Soviet Union. This advocacy shifted the definitions and priorities of U.S. human rights policies with lasting repercussions that can be traced into the twenty-first century. A cross-cultural encyclopedia of the most significant holy people in history, examining why people in a wide range of religious traditions throughout the world have been regarded as divinely inspired. The first reference on the subject to span all the world's major religions, *Holy People of the World: A Cross-Cultural Encyclopedia* examines the impact of individuals who, through personal charisma and inspirational deeds, served

both as glorious examples of human potential and as envoys for the divine. *Holy People of the World* contains nearly 1,100 biographical sketches of venerated men and women. Written by religious studies experts and historians, each article focuses on the basic question: How did this person come to be regarded as holy? In addition, the encyclopedia features 20 survey articles on views of holy people in the major religious traditions such as Islam, Buddhism, and African religions, as well as 64 comparative articles on aspects of holiness and veneration across cultures such as awakening and conversion experiences, heredity, gender, asceticism, and persecution. Whether exploring by religion, culture, or historic period, this extensively cross-referenced resource offers a wealth of insights into one of the most revealing—and least explored—common denominators of spiritual traditions. For two-and-a-half years South Africa's Truth and Reconciliation Commission was on everybody's lips. Newspapers and radio programs reported daily on the work of the Commission, and the faces of victims and offenders alike appeared on millions of television screens. In *Chronicle of the Truth Commission*, Pieter Meiring sheds light on the work of the Truth Commission: the stories and testimonies of victims, the applications for amnesty by offenders guilty of violating human rights, the necessary confrontations with the past, and the need for forgiveness and reconciliation. Meiring presents the course of the Truth Commission as a symbolic quest, an epic journey back into the past and onwards to the new future, a great trek that would leave not a single South African unaffected. From the Pharaohs to Fanon, *Dictionary of African Biography* provides a comprehensive overview of the lives of the men and women who shaped Africa's history. Unprecedented in scale, DAB covers the whole continent from Tunisia to South Africa, from Sierra Leone to Somalia. It also encompasses the full scope of history from Queen Hatsheput of Egypt (1490-1468 BC) and Hannibal, the military commander and strategist of Carthage (243-183 BC), to

Kwame Nkrumah of Ghana (1909-1972), Miriam Makeba and Nelson Mandela of South Africa (1918 -).
