Research Projects in Sociology Sep 21 2020 Sociology is the study of society. In order to understand society we must be able to see the world through the eyes of others. By using this social logical imagination you can understand the world around you. Sociology involves asking questions and solving problems. It focuses on looking at people and their ways of life as well as studying social trends, cultural changes, human development, social institutions, and collective behavior. Studying sociology also means looking at why things are where they are and at the relationships between humans and the world around them. The study of sociology helps us make connections between human behavior and society. - p. xxvi-xxvii.

Human Rights and Business Jul 20 2020 This book addresses the ever more urgent question as to whether individuals, indigenous peoples or other vulnerable groups should be entitled to remedies under international law for violations of their human rights by transnational corporations.

Research Methods in Africana Studies Nov 16 2022 Research Methods in Africana Studies, Revised Edition is a major contribution to the discipline of Africana studies and social science involving people of African descent in general.

Off the Books May 30 2021 In this revelatory book, Sudhir Venkatesh takes us into Maquis Park, a poor black neighborhood on Chicago's Southside, to explore the desperate and remarkable ways in which a community survives. The result is a dramatic narrative of individuals at work, and a rich portrait of a community. But while excavating the efforts of men and women to generate a basic livelihood for themselves and their families, Off the Books offers a devastating critique of the entrenched poverty that we so often ignore in America, and reveals how the underground economy is an inevitable response to the ghetto's appalling isolation from the rest of the country.

Introduction to Sociology 2e Apr 21 2023 Introduction to Sociology 2e adheres to the scope and sequence of a typical, one-semester introductory sociology course. It offers comprehensive coverage of core concepts, foundational scholars, and emerging theories, which are supported by a wealth of engaging learning materials. The textbook presents detailed section reviews with rich questions, discussions that help students apply their knowledge, and features that draw learners into the discipline in meaningful ways. The second edition retains the book's conceptual organization, aligning to most courses, and has been significantly updated to reflect the latest research and provide examples most relevant to today's students. In order to help instructors transition to the revised version, the 2e changes are described within the preface. The images in this textbook are grayscale. Authors include: Heather Griffiths, Nathan Keirns, Eric Strayer, Susan Cody-Rydzewski, Gail Scaramuzzo, Tommy Sadler, Sally Vyain, Jeff Bry, Faye Jones

Christian Politics in Oceania Jan 26 2021 The phrase “Christian politics” evokes two meanings: political relations between denominations in one direction, and the contributions of Christian churches to debates about the governing of society. The contributors to this volume address Christian politics in both senses and argue that Christianity is always and inevitably political in the Pacific Islands. Drawing on ethnographic and historical research in Papua New Guinea, Solomon Islands, Vanuatu, and Fiji, the authors argue that Christianity and politics have redefined each other in much of Oceania in ways that make the two categories inseparable at any level of analysis. The individual chapters vividly illuminate the ways in which Christian politics operate across a wide scale, from interpersonal relations to national and global interconnections.

An Introduction to Social Psychology May 10 2022 A pioneering work in psychology, this enormously influential book served as a catalyst in the study of the foundations of social behavior. Ironically, its approach marked such a dramatic departure from contemporary trends that it stimulated little follow-up research at the time of its 1908 publication. In recent years, however, the author's ideas have been resurrected in sociobiological reasoning, making the republication of this systematic treatise particularly timely. McDougall's work grounds social behavior in biology, focusing on the individual and attributing most social behavior to instinct. This reasoning makes his work one of the first in modern psychology to take human motivation as its central concern. As one of the initial texts of social psychology, it assisted in laying the foundations of a new discipline, separating the field from its forerunners, sociology and general psychology. McDougall's emphasis on the instinctive basis of social phenomena also helped promote the individualistic approach typical of modern social psychology. Popular, long-lived, and ever-relevant, this landmark work is guaranteed a wide audience among teachers and students of psychology.

Black Men's Studies Dec 05 2021 Black Men's Studies offers an approach to understanding the lives and the self determination of men of African descent in the U.S. context. It not only frames their experiences, it also explores the multidimensional approaches to advancing the lives of Black men. Particular attention is given to placing Black men in their own unique historical, cultural, and socio-political contexts.

Digital Media, Culture and Education Apr 28 2021 This book provides a critical commentary on key issues around learning in the digital age in both formal and informal educational settings. The book presents research and thinking about new dynamic literacies, porous expertise, digital making/coding/remixing, curation, storying in digital media, open learning, the networked educator and a number of related topics; it further addresses and develops the notion of a ‘third space literacies’ in contexts for learning. The book takes as its starting point the idea that an emphasis on technology and media, as part of material culture and lived experience, is much needed in the discussion of education, along with a criticality which is too often absent in the discourse around technology and learning. It constructs a narrative thread and a critical synthesis from a sociocultural account of the memes and stereotypical positions around learning, media and technology in the digital age, and will be of great interest to academics interested in the mechanics of learning and the effects of technology on the education experience. It closes with a conversation as a reflexive ‘afterword’ featuring discussion of the key issues with, amongst others, Neil Selwyn and Cathy Burnett.
