***The White House Physician* Sep 14 2022** When President George Washington fell ill six short weeks after his inauguration, he summoned Samuel Bard, one of the most prominent physicians of the day. Thereafter, when residing at his presidential home in Manhattan, Washington consistently relied on Bard for medical care. Thus Bard became the first in a line of presidential physicians, the providers of medical care for America's chief executive. From George Washington to George W. Bush, this volume examines 217 years of health care in the White House and the men and women who ministered to these presidential patients. Beginning with that first presidential physician's visit on June 13, 1789, it analyzes the relationships--sometimes fruitful and sometimes disastrous--of the presidents with their physicians. While biographical sketches detailing the background of each physician are included, the main focus of the work is the especially complex physician-patient relationship and the ways in which it has changed over time. The evolution of the presidential physician's responsibilities is also discussed, as are developments in American medicine during presidential terms.

Gunn's Household Physician, Or Home Book of Health Mar 28 2021 Excerpt from Gunn's Household Physician, or Home Book of Health: Forming a Complete Household Guide Virtue; it has a salutary Operation on our moral

constitution, and prepares us for the rewards of obedience. Death is a departure from the present scene; and we have good reason to conclude that with respect to those who have acted virtuously here, it is a transition to a more exalted state of being. No virtuous person, then, has reason to complain; the vicious ought to direct their murmurs and complaints not against the Author of their existence and their enjoyments, but against their own follies and perversity, in often disobeying the dictates of reason and conscience, and so forfeiting that happiness and health which the bountiful Creator has placed within their reach.
