Love Inspired Suspense brings you four new titles for one great price, available now! Enjoy these contemporary heart-pounding tales of suspense, romance, hope and faith. This Love Inspired Suspense bundle includes Safe by the Marshal's Side by Shirlee McCoy, Frame-Up by Jill Elizabeth Nelson, Race for the Gold by Dana Mentink and Crossfire by Jodie Bailey. Look for four new inspirational suspense stories every month from Love Inspired Suspense! Myriad works discuss forgiveness, but few address it in the prison context. For most people, prisoners exist "out of sight and out of mind." Their stories are often reduced to a few short lines in news articles at the time of arrest or conviction. But what happened before in the lives of the convicted? What has happened after? How have people in prison dealt with the harm they have caused and the harm they have suffered? What does forgiveness mean to

them? What can we outsiders learn about the nature of forgiveness and prison from individuals who have both dealt and endured some of life's most painful experiences? Expanding on his MPhil dissertation *Echoes from Exile* (with Distinction) from Trinity College Dublin, Michael McRay's important new book brings the perspectives and stories of fourteen Tennessee prisoners into public awareness. Weaving these narratives into a survey of forgiveness literature, McRay offers a map of the forgiveness topography. At once storytelling, academic, activism, and cartography, McRay's book is as necessary as it is accessible. There is a whole demographic we have essentially ignored when it comes to conversations on forgiveness. What would we learn if we listened? California zookeeper Theodora Bentley travels to Iceland to pick up an orphaned polar bear cub destined for the Gunn Zoo's newly installed Northern Climes exhibit. The trip is intended to be a combination of work and play. The victim is identified as American birdwatcher Simon Parr, winner of the largest Powerball payout in history. Is Teddy a witness—or a suspect? Others include not only Parr's wife, a famed suspense novelist, but fellow members of the birding club Parr had generously treated to their lavish Icelandic expedition. Hardly your average birders, several of them have had serious brushes with the law back in the States. Guessing that an American would best understand other Americans, police detective Thorvald Haraldsson grudgingly concedes her innocence and allows Teddy to tag along with the group to volcanoes, glaciers, and deep continental rifts in quest of rare bird species. But once another member of the club is murdered and a rockfall barely misses Teddy's head, Haraldsson forbids her to continue. She ignores him and, in a stunning, solitary face-off with the killer in Iceland's wild interior, concludes an investigation at once exotic, thrilling, and rich in animal lore. What others find in *CAST YOUR NETS* It is said that a good sermon is delivered with the Bible in one hand and the daily newspaper in the other. Mark Miller adds a fishing rod to the mix, salting his wise reflections on ministry, faith, and life with insights that can only come while patiently waiting for the elusive yet exciting tug of the Spirit or a sockeye. John Thomas, General Minister and President, United Church of Christ Mark Henry Miller notices little things that the rest of us often miss: the person in the corner who doesn't go along with what others see as a consensus, the surprising kind act by the contentious opponent, the fish swimming upstream. And he thinks about what he has noticed and shares what he has learned. He shows us how to reflect in the midst of practice, which is essential to effective ministry. William McKinney--President, Pacific School of Religion, Berkeley, CA Mark writes with wit, humor, and grace. His insights will stay with you long after the reading is done. --Jim Thayer, novelist and professor Short, pithy, inspirational stories for everyday ministry--a good source for daily devotional material, provocative meeting openers or sermon illustrations. Each epistle has an easily grasped point that touches a deep spiritual issue or practice of both ministry and everyday life lived with intentional faithfulness. Paul Forman, United Church of Christ Minister Mark Henry Miller's always insightful, sometimes whimsical pastoral epistles are a delight and a challenge to read - challenging our everyday way of seeing things and letting us glimpse a bit of what might be if we only have eyes to see and ears to hear and hearts to love. Joanne Carlson Brown, Methodist Minister Five average, middle-age friends take a girls-only weekend vacation together once a year. Leaving the traditional vacations behind for the first time, they decide to tackle camping and head for a beautiful park preserve in the Pennsylvania wilderness. On their first night, things take a turn for the worse when they encounter three mysterious mountain men who abduct them and bring them to their cabin with the intent to rape and torture them. Hell-bent on surviving and making it back to their loved ones, the women quickly cease to be victims and make unrelenting war on the men. Relying on instincts they never knew they possessed, the women resort to brutal and savage tactics, and soon turn the tide on their attackers. There are several reasons a person might need to hotwire a car; such as misplacing keys and not wanting to hire an expensive locksmith, or maybe the ignition switch has malfunctioned. Perhaps the person is running from a threat, and survival requires emergency measures, such as "borrowing" a vehicle long enough to reach safety. It's really none of my business why someone might be interested in hotwiring a vehicle; however, I can tell you how to do it the right way, should you ever find yourself in need. In this book, we take a look at the reasons a person might find it necessary to hotwire a vehicle. We also touch on the legal ramifications of taking such actions, especially with vehicles that you do not own personally. In almost all cases, once this journey has begun, the ignition switch and wiring will need to be replaced, and/or repaired. It is important to learn to do this the right way, if for no other reason than to prevent accidents and further damage from occurring during the process. If you work on a lot of vehicles, or if you often misplace vehicle keys, then this is the right guide for you. Make hotwiring a vehicle, quick, simple and easy with this instructive guide. Meet former Lincoln officer Ben Eastin, a man of the law with a strong sense of justice. When he is transferred from the Lincoln Police Station to that of the Marek City Police Department, the job every lawman wants to take, he expects to find everything he's ever wanted there. The last thing he expects to happen is the zombie apocalypse. Within a matter of hours of his arrival, a viral outbreak slowly spreads across Marek City and turns it in on itself. As Eastin fights for his very survival, he gradually finds several survivors and promises to help them escape, but as he does so, he finds the dark side of humanity everywhere he turns. Will he and the survivors of this apocalyptic nightmare survive this hellish nightmare, or will they be buried beneath the countless bodies of the living dead? The Cabal has secretly expanded its grip on world economies, governments, corporations, and other centers of influence for decades. Founded by a mysterious person known as the thin man, its goal is to create a new world order—an authoritarian and borderless world under one government. With its members in strategic positions within global technology and social media companies, senior government positions, and enormous investment funds, they've pushed its narrative to billions of users until their beliefs have become mainstream. Those within the Cabal don't want to change the world for altruistic or egalitarian reasons. Instead, they want to establish perpetual global monopolies that would ensure extreme generational wealth while advocating that centralized government control creates greater economic stability, ratchets down global tensions, and establishes a society of equals. Standing in the way of this seemingly unstoppable juggernaut is Nemesis, an ultra-secret off-the-books organization that doesn't follow a rulebook. In this latest Matt Moretti-Han Li thriller, when the Cabal discovers Nemesis is after them, it uses its considerable global influence and piles of cash to frame them as terrorists. Hunted by several governments, including their own, and

with time running out, they must stop the Cabal before it initiates a world-unifying event that will forge its global consolidation of power and create a new world order. This book looks at a family of views involving the pro-life view of abortion and Christianity. These issues are important because major religious branches (for example, Catholicism and some large branches of Evangelicalism) and leading politicians assert, or are committed to, the following: (a) it is permissible to prevent some people from going to hell, (b) abortion prevents some people from going to hell, and (c) abortion is wrong. They also assert, or are committed to, the following: (d) it is permissible to use defensive violence to prevent people from killing innocents, (e) doctors who perform abortions kill innocents, and (f) it is wrong to use defensive violence against doctors who perform abortions. Stephen Kershner argues that these and other principles are inconsistent. Along the way, he explores the ways in which theories of hell, right forfeiture, and good consequences relate to each other and the above inconsistencies.

Two advertising veterans explain the myths about branding—and how even the smallest businesses can benefit by defining themselves to their customers. Branding may be the single most misunderstood concept in marketing. It's not only for big businesses with big bucks. It's not about a logo, a color, a font, or a type of advertising. Branding is defining a company's image in such a way that the customer is left with a single feeling about that business and what they do. Branding is about finding a business's juicy center. Even small businesses on shoestring budgets and sole practitioners can learn the principles of good branding—an effort that encompasses not just messaging, but multiple day-to-day decisions that shape and build your customers' perceptions and emotions. With numerous real-life examples and the expertise that comes only from experience, this book guides you to a new way of thinking about your business, and the kind of wisdom that no amount of money can buy. Launching a daring attempt to reach the Galactic Fleet, she makes an unlikely ally in stranded professor, James Sinclair. But James is not all that he seems. James is not the man he once was. He has technological augments that give him extraordinary abilities. His augments protect Noa and himself, but he has no memory of how he came to have them. Worse, the changes may be more than physical. Noa's mission and the answer to James's mystery will put them at the center of a confrontation of galactic proportions. The Criminalization series arose from an interdisciplinary investigation into criminalization, focussing on the principles that might guide decisions about what kinds of conduct should be criminalized, and the forms that criminalization should take. Developing a normative theory of criminalization, the series tackles the key questions at the heart of the issue: what principles and goals should guide legislators in deciding what to criminalize? How should criminal wrongs be classified and differentiated? How should law enforcement officials apply the law's specifications of offences? The sixth volume in the series offers a philosophical investigation of the relationship between moral wrongdoing and criminalization. Considering the justification of punishment, the nature of harm, the importance of autonomy, inchoate wrongdoing, the role of consent, and the role of the state, the book provides an account of the nature of moral wrong doing, the sources of wrong doing, why wrong doing is the central target of the criminal law, and the ways in which criminalization of non-wrongful conduct might be permissible.
