Trapped by the evil Edrick in a locked room, Yaleen is cold-bloodedly murdered. But it is not the end of Yaleen's story, for she is given a second life - a reincarnation on Earth as a 'cherub'. Soon she encounters Godmind, the megalomaniac artificial deity which controls life on Earth - and maintains a brutal labour colony on the Moon for any who dare to rebel. Bit by bit, Yaleen comes to understand the horrifying project of the Godmind... A Flash of Green tells the gripping story of small-town corruption and two people brave enough to fight back, featuring many of the themes John D. MacDonald explored better than anyone in his legendary career as a leading crime novelist. Introduction by Dean Koontz

The opportunists have taken over Palm City. Silent and deadly, like the snakes that infest the nearby swamps, they lay hidden from view, waiting for the right moment to strike. Political subterfuge has already eased the residents toward selling out. All that's left now is to silence a few stubborn holdouts. James Wing is only trying to help a friend's widow. At least that's what he tells himself after warning Kat Hubble that the beautiful bay she and her neighbors have struggled to save is going to be sold to developers. He knows that he shouldn't have told her anything. He's a reporter, trained to reveal nothing. But he's falling in love with her. Now cutthroats have set their sights on Kat—and they'll do anything, use anyone, to stop her from interfering in their plans. Praise for John D. MacDonald “John D. MacDonald was the great entertainer of our age, and a mesmerizing storyteller.”—Stephen King “The first modern writer to nail Florida dead-center, to capture all its languid sleaze, racy sense of promise, and breath-grabbing beauty.”—Carl Hiaasen “To diggers a thousand years from now, the works of John D. MacDonald would be a treasure on the order of the tomb of Tutankhamen.”—Kurt

The young wizard Jinx concludes his suspenseful and dryly humorous adventures in the magical forest of the Urwald with this third installment in the series that ALA Booklist says “deserves a permanent place in the children’s fantasy pantheon, with Narnia and Earthsea” (Jinx's Magic, starred review). This action-packed conclusion is perfect for readers of fantasy adventure series such as Septimus Heap, the Sisters Grimm, and Fablehaven. The forest is under attack and its magic is fading. Can Jinx summon enough of his magic—the bright fire within him—to rescue Simon, defeat the Bonemaster, unite the Urwald, and fight off the invaders? He is the Urwald's only hope. . . . A human lie detector sets off in search of a revolution There are 1,500 hand grenades in Alabama’s Styx River, and none of them work. Rebels are attacking UN peacekeeping forces in Burma and Honduras, but just when the battle gets started, they find their guns don’t fire. Someone is selling defective weaponry to violent men around the globe, and the United Nations needs to find him. In a world where even the good men are liars, it will take Shelby Kent to see the truth. Shelby is the world’s only human lie detector, a psychic who sees a buzzing red aura around anyone—including her

Shelby is happy to use her unique powers for the sake of world peace, but she'll find that unthinkable evil lies behind this strange scheme, and clairvoyance is no protection against a madman with a gun. The year is 3020 and the human race has colonized most of the solar system with a series of colonies and stations. But under the facade of peace, a secret war is brewing between man and machine. Enter Catherine, a innocent school girl who was drawn into the war when her home on the Virgo Star Colony was attacked and raided for its human populace. Founded in 1943, Negro Digest (later "Black World") was the publication that launched Johnson Publishing. During the most turbulent years of the civil rights movement, Negro Digest/Black World served as a critical vehicle for political thought for supporters of the movement. Is the Internet the key to a reinvigorated public life? Or will it fragment society by enabling citizens to associate only with like-minded others? Online community has provided social researchers with insights into our evolving social life. As suburbanization and the breakdown of the extended family and neighborhood isolate individuals more and more, the Internet appears as a possible source for reconnection. Are virtual communities 'real' enough to support the kind of personal commitment and growth we associate with community life, or are they fragile and ultimately unsatisfying substitutes for human interaction? Community in the Digital Age features the latest, most challenging work in an important and fast-changing field, providing a forum for some of the leading North American social scientists and philosophers concerned with the social and political implications of

this new technology. Their provocative arguments touch on all sides of the debate surrounding the Internet, community, and democracy. Globalization is often described as the spread of western culture to other parts of the world. How accurate is the depiction of 'cultural flow'? In Counterworks, ten anthropologists examine the ways in which global processes have affected particular localities where they have carried out research. They challenge the validity of anthropological concepts of culture in the light of the pervasive connections which exist between local and global factors everywhere. Rather than assuming that the world is culturally diverse, this book proposes that culture is itself a representation of the similarities and difference recognized between forms of social life. The authors address issues of globalization in terms of diverse histories and traditions of knowledge, which may include the construction of difference as cultural. In its attention to specific local situations, such as Bali, Cuba, Bolivia, Greece, Kenya, and the Maoris in New Zealand, Counterworks argues that the apparent oppositoin between strong westernizing, global forces and weak concept of culture, which supposes cultures to be integrated and possessed of essential properties, needs rethinking in a contemporary world where a marked sense of culture has become a wide-spread property of people's social knowledge. The book will have wide appeal to anthropologists, to students of comparative studies in history, religion and language, and to anyone interested in the phenomenon of postmodernism. In the early morning hours of December 31, 2010, Dr. Cornelius H. Evans and his wife received a terrible phone call: their son, Bryant, had been shot and killed. The agonizing days that followed brought Evans face-to-face with the realization that evil had touched his family's life, sending him on a quest to try to understand the role evil plays in our world. Deeply emotional and heartfelt, *Surviving Evil in a Depraved Society* offers insight into how Evans dealt with the loss of his son by analyzing the root of violence in America—evil. He examines various theories on evil and its origin, its effects on mankind, and how, according to the Christian belief, evil will remain a part of our society until Christ returns. Evans also challenges ideologies, philosophical beliefs, and theologies on whether one can avoid evil elements. He demonstrates that we can be on our guard against inviting evil into our lives by spiritually guarding ourselves and raising our children with a strong moral foundation. An eye-opening look at the face of evil, *Surviving Evil in a Depraved Society* offers hope for living in today's world. We don't just lead others, we lead ourselves. Increasingly, having a philosophy in a sense of knowing your strengths and understanding your life is a project is regarded as a major plus point by organizations, employers and team managers. our day-to-day references, our self-awareness, and how we compute aptitudes and weaknesses in ourselves and others. Based on fieldwork and comparative historical analysis of Rwanda, this book questions the conventional wisdom that education builds peace. Integrating significant advances in motivation science that have occurred over the last two decades, this volume thoroughly examines the ways in which motivation interacts with social, developmental, and emotional processes, as well as personality more generally. The Handbook comprises 39 clearly written chapters from leaders in the field. Cutting-edge theory and research is presented on core psychological motives, such as the need for esteem, security, consistency, and achievement; motivational systems that arise to address these fundamental needs; the process and consequences of goal pursuit, including the role of individual differences and contextual moderators; and implications for personal well-being and interpersonal and intergroup relations. The Unfinished Revolution is the definitive story of New Labour from its genesis to its election defeat 2010 - covering over 25 years and six general elections of strategy, rebuilding and reinvention. In this extraordinary book, Philip Gould, one of the world's leading political strategists and a key adviser to Tony Blair during the period, brilliantly describes how New Labour came to dominate, falter and fall, assessing how successful it was in government, and where it should go from here.

Drawing on his years of experience at the heart of New Labour he gives us his unique perspective on how best to understand the electorate, how to communicate policy and how to adapt in a rapidly changing world. Cities affect every person's life, yet across the traditional divides of class, age, gender and political affiliation, armies of people are united in their dislike of the transformations that cities have undergone in recent times. The physical form of the urban environment is not a designer add-on to 'real' social issues; it is a central aspect of the social world. Yet in many people's experience, the cumulative impacts of recent urban development have created widely un-loved urban places. To work towards better-loved urban environments, we need to understand how current problems have arisen and identify practical action to address them. Urban Transformations examines the crucial issues relating to how cities are formed, how people use these urban environments and how cities can be transformed into better places. Exploring the links between the concrete physicality of the built environment and the complex social, economic, political and cultural processes through which the physical urban form is produced and consumed, Ian Bentley proposes a framework of ideas to provoke and develop current debate and new forms of practice. This study frames the social dynamics of Latin America in terms of two types of cultural momentum: foundational momentum and the momentum of global order in contemporary Latin America. We don't just lead others, we lead ourselves. Presupposing no familiarity with either U.S. or German criminal law, the book will provide criminal law scholars and students with a rich comparative understanding of criminal law's foundations and central doctrines. All foreign-language sources have been translated into English; cases and materials are accompanied by heavily cross-referenced introductions and notes that place them within the framework of each country's criminal law system and highlight issues ripe for comparative analysis. Divided into three parts, the book covers foundational issues - such as constitutional limits on the criminal law - before tackling the major features of the general part of the criminal law and a selection of offences in the special part. Throughout, readers are exposed to alternative approaches to familiar problems in criminal law, and as a result will have a chance to see a given country's criminal law doctrine, on specific issues and in general, from the critical distance of comparative analysis.
