Sports Law in China Nov 30 2020 Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of sports law in China deals with the regulation of sports activity by both public authorities and private sports organizations. The growing internationalization of sports inevitably increases the weight of global regulation, yet each country maintains its own distinct regime of sports law and its own national and local sports organizations. Sports law at a national or organizational level thus gains a growing relevance in comparative law. The book describes and discusses both state-created rules and autonomous self-regulation regarding the variety of economic, social, commercial, cultural, and political aspects of sports activities. Self-regulation manifests itself in the form of by-laws, and encompasses organizational provisions, disciplinary rules, and rules of play. However, the trend towards more professionalism in sports and the growing economic, social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities. This form of regulation appears in a variety of legal areas, including criminal law, labour law, commercial law, tax law, competition law, and tort law, and may vary following a particular type or sector of sport. It is in this dual and overlapping context that such much-publicized aspects as doping, sponsoring and

media, and responsibility for injuries are legally measured. This monograph fills a gap in the legal literature by giving academics, practitioners, sports organizations, and policy makers access to sports law at this specific level. Lawyers representing parties with interests in China will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative sports law.

Corpus Linguistics and the Analysis of Sociolinguistic Change Apr 15 2022 Corpus Linguistics and the Analysis of Sociolinguistic Change demonstrates how particular styles and varieties of language are chosen and represented in the media, to reveal changing language ideologies and sociolinguistic change. Drawing on a corpus of ads

broadcast on an Irish radio station between 1977 and 2017, this book shows how corpus linguistic tools can be creatively employed, in conjunction with frameworks and concepts such as audience and referee design and indexicality, and examines how accents and dialects (vernacular and prestige) are exploited in the ads across the decades. In addition, this book: illustrates the key principles of corpus design for sociolinguistics studies and offers a framework for future diachronic corpus studies of advertising on social media; provides a model for analysing corpus data at both inter-varietal and intra-varietal levels in terms of both accent and dialectal features and explores the efficacy of using particular corpus linguistic tools; identifies key factors which can be used by researchers as evidence for sociolinguistic change and links these factors to relevant theories and frameworks; demonstrates how corpus tools can be used to compare advertising discourse with naturally occurring discourse, with particular reference to markers of (pseudo) intimate discourse. Building on the growing body of research relating to variation and change in Irish English, this book is key reading for researchers and advanced students undertaking research within the areas of sociolinguistics and corpus linguistics.
