This book presents a market-consistent valuation framework for implicit embedded options in life insurance contracts. This framework is used to perform an empirical analysis based on more than 110,000 actual and in-force life insurance policies and with a focus on the modeling of interest rates. Its results are the answer to the central question posed in the objectives: What value do the embedded options and guarantees considered have? This question is answered both absolutely and relative to the current policy reserves, from the perspective of the insurer, the policyholder and the shareholder respectively Actuarial Aspects of Individual Life Insurance and Annuity Contracts provides a comprehensive overview of the features and financial aspects of traditional, indexed, and variable products and their related rider benefits. Product development, pricing, financial reporting methods, and regulatory requirements are addressed for all products, including those with derivative-based guarantees. This provides an introduction to actuarial techniques and the relationships among various financial values for the student and provides a comprehensive summary of current practices on more recent products for the experienced actuary. Spreadsheets are available on the ACTEX website to demonstrate profit testing alternatives. Good Faith and Insurance Contracts sets out an exhaustive analysis of the law concerning the duty of utmost good faith, as applied to insurance contracts. Now in its fourth edition, it has been updated to address the arrival of the Insurance Act 2015, as well as any references to new case law. In addition, it synthesises all known judicial decisions by the English Courts concerning good faith in this area. This book is still the only text devoted to a discussion of the duty of utmost good faith applicable to insurance contracts. As good faith is an issue which arises in respect of all insurance contracts, it is a book which will be extremely useful to lawyers involved in insurance as well as insurance practitioners. Unlike most other books in the field, which slant toward either policyholder or insurer counsel, Stempel and Knutsen on Insurance Coverage takes an even-handed nonexcess and umbrella aking it useful to attorneys from all sides. Moreover, it's designed for practitioners from all professional backgrounds and insurance experience. Written in clear, jargon-free language, it covers everything from the basic insurance concepts, principles, and structure of insurance policies to today's most complex issues and disputes. The authors, Jeffrey W. Stempel and Erik S. Knutsen, are well-known authorities on the law of insurance coverage, and this new Fourth Edition of Stempel and Knutsen on Insurance Coverage is completely up-to-date on every aspect of its subject. This one-stop resource provides both a sound historical, theoretical and doctrinal grounding in insurance, as well being practice-oriented and packed with practical guidance. After providing information about insurance policies and issues in general, it focuses on specific types of policies and coverage such as property coverage, liability coverage, automobile coverage, excess and umbrella coverage, and reinsurance, plus such vital areas as employment, defective construction, and terrorism claims...Dandamp;O liability...ERISA...bad faith litigation...and much more. Plus, you'll find extensive examination of the commercial general liability (CGL) policy, the type of insurance involved in most major coverage cases. Among the most important CGL issues covered in Stempel and Knutsen on Insurance Coverage are: Pollution-related coverage Trigger of coverage Apportionment of insurer and policyholder responsibility Business risk exclusions Coverage under the andquot;personal injuryandquot; section of the CGL Coverage under andquot;advertising injuryandquot; Nowhere else will you find so much valuable current information, in-depth analysis, sharp insight, authoritative commentary, significant case law, and practical guidance on this critically important area. With its clear explanations and thorough, even-handed coverage, Stempel and Knutsen on Insurance Coverage is unlike any other resource in its field. In this volume, the Project Group "Restatement of European Insurance Contract Law" presents its Principles of European Insurance Contract Law (PEICL). These principles were submitted to the European Commission as a Draft Common Frame of Reference of European Insurance Contract Law (DCFR Insurance). The volume comprises the PEICL/DCFR Insurance, as well as translations into Czech, Dutch, French, German, Greek, Hungarian, Italian, Polish, Portuguese, and Spanish. It sets out the approach used by the Project Group, how the PEICL/DCFR Insurance relates to the overall DCFR, the participation of the Project Group in the CoPECL (Common Principles of European Contract Law) Network, as well as the general structure and characteristics of the PEICL/DCFR Insurance. The Project Group has also drafted the PEICL/DCFR Insurance as a model for an Optional Instrument of European Insurance Contract Law. Chinese Insurance Contracts: Law and Practice is the first systematic text written in English on the law of insurance in China. This book offers a critical analysis of the major principles, doctrines and concepts of insurance contract law in China. At every point the analysis discusses the principles of the Insurance Law in detail, referring where appropriate to decided cases and also drawing attention to external influences. Readers are guided through the complexities of Chinese law in a clear and comprehensive fashion, and – significantly – in a manner that is accessible and meaningful for those used to a common law system. This book presents a comprehensive picture of Chinese insurance contract law, to facilitate a wider understanding of the relevant rules of law. Elements of insurance contract law are critically examined. In addition, this book presents rules of law on some special types of insurance contract, such as life insurance, property insurance, liability insurance, motor vehicle insurance, reinsurance, and marine insurance. The deficiencies and shortcomings of the law and practice will be identified and analysed; suggestions and recommendations on how to reform the law will be presented. Chinese Insurance Contracts also offers legal and practical advice to insurance professionals on how to draft clauses to avoid contractual pitfalls. It also uses cases to illustrate the difficulties which can arise in applying the principles in practice. This book will be essential reading for insurance companies and legal practitioners looking to do business in China, as well as reference for Chinese lawyers practising insurance law. It will also be a useful resource for students and academics studying Chinese law. Bachelor Thesis from the year 2008 in the subject Economics - Finance, grade: A, Addis Ababa University (Addis Ababa University School of Commerce), language: English, abstract: Insurance business was introduced into Ethiopia based on mutual assistances and its modern form traces back to 1905, when bank of Abyssinia began to underwrite fire and marine insurance

policy, as an agent to foreign insurance company. The general objective of the study was to analysis the insurance services in the Nile Insurance Company by giving special attention focusing on life insurance. Primary data were collected using a structured questionnaire. In addition, secondary data were extracted from relevant sources to supplement the data obtained from the survey. The result of this study reveals that gross written premium and net written premium showed on increasing trend. But there is an ups and down of the percentage change because of unhealthy completion between non private and other private insurance companies. Secondly even if there are new classes of life insurance that was sold in Nile Insurance Company, the structure of life insurance in terms of diversification of the source of revenues is limited to small classes of the business. The amount of the premium collected and claims paid in these classes of the insurance is not proportionally distributed. The end result of the data also shows that there is a direct correlation between premium collections and the claim payments i.e. the classes of life insurance which contributes the large amount of also incur higher claims (cost). Using 40 years of historical rainfall data, this paper estimates a distribution for payouts on rainfall insurance policies offered to farmers in the State of Andhra Pradesh, India, in 2006. The authors find that the contracts primarily protect households against extreme tail events; half the expected value of indemnities paid by the insurance are generated by only 2 percent of rainfall realizations. Contract payouts are significantly correlated cross-sectionally, and also inversely associated with real GDP growth. The paper discusses the implications of these findings for the potential benefits of insurance to households, the risks facing a financial institution underwriting rainfall insurance contracts, and pricing. Insurance -- Insurable interest -- Indemnity principle -- Insurance contract -- Third party insurance -- South Africa -- Great Britain -- Australia. This volume focuses on transparency as the guiding principle for insurance regulation and supervisory law. All chapters were written by experts in their respective fields, who address transparency in a wide range of European and non-European jurisdictions. Each chapter reviews the transparency principles applicable in the jurisdiction discussed. While the European jurisdictions reflect different facets of the principle as emerging from EU law on insurance, the principle has developed quite differently in other jurisdictions. This detailed analysis of fire insurance law provides a comprehensive overview of the standard fire insurance policy and the legal issues surrounding it. The author, a prominent legal expert in the field, also explains the standard forms and clauses used in insurance contracts. A valuable resource for insurance professionals and anyone interested in this area of law. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the "public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant. Using 40 years of historical rainfall data, this paper estimates a distribution for payouts on rainfall insurance policies offered to farmers in the State of Andhra Pradesh, India, in 2006. The authors find that the contracts primarily protect households against extreme tail events; half the expected value of indemnities paid by the insurance are generated by only 2 percent of rainfall realizations. Contract payouts are significantly correlated cross-sectionally, and also inversely associated with real GDP growth. The paper discusses the implications of these findings for the potential benefits of insurance to households, the risks facing a financial institution underwriting rainfall insurance contracts, and pricing. Many Americans believe that people who lack health insurance somehow get the care they really need. Care Without Coverage examines the real consequences for adults who lack health insurance. The study presents findings in the areas of prevention and screening, cancer, chronic illness, hospital-based care, and general health status. The committee looked at the consequences of being uninsured for people suffering from cancer, diabetes, HIV infection and AIDS, heart and kidney disease, mental illness, traumatic injuries, and heart attacks. It focused on the roughly 30 million-one in seven-working-age Americans without health insurance. This group does not include the population over 65 that is covered by Medicare or the nearly 10 million children who are uninsured in this country. The main findings of the report are that working-age Americans without health insurance are more likely to receive too little medical care and receive it too late; be sicker and die sooner; and receive poorer care when they are in the hospital, even for acute situations like a motor vehicle crash. It is widely acknowledged that insurance has a major impact on the operation of tort and contract law regimes in practice, yet there is little sustained analysis of their interaction. The majority of academic private lawyers have little knowledge of insurance law in its own right, and the amount of discussion directed to insurance in private law theory is disproportionately small in relation to its practical importance. Filling this substantial gap in the literature, this book explores the multiple influences of insurance in the law of obligations, and the nature and impact of insurance law as an inherent and significant aspect of private law. It combines conceptual and doctrinal analysis, informing the theoretical discussion of the nature of private law, including the role of judicial and public purpose, and the place of formalism and of contextualism in normative theories of private law. Arguing for the wider recognition of the multiple impacts of insurance, the book claims that recognition of the presence of insurance necessarily marks a departure from the two-party framework sometimes described as definitive of private law. The structured exploration and interpretation of the contemporary role of insurance in the law of obligations, and of its implications, illuminates this under-explored area of private law, and equips the reader for further enquiry and debate.
