Upton Sinclair Jan 13 2023
Upton Sinclair (1878-1968) was the most prolific novelist of social criticism in the USA of the 20th century. The essays of this volume (all of them papers submitted to an Upton Sinclair World Conference in Bremen, FRG, July 1988) deal with the historical backgrounds and the social reform movements which influenced (and were influenced by) Sinclair. Special emphasis is put on the dialectic of the interaction between literary techniques and the strategies of social reform.

John Thelwall Jan 21 2021
Excerpt from John Thelwall: A Pioneer of Democracy and Social Reform in England During the French Revolution Within the period extending from the American War to the present day, great changes have taken place in English political theory and practice. For a statesman of 1775, were he even a Whig, the notion of government was inseparable from oligarchic rule, was limited to matters strictly political, and dominated by considerations of expediency. A statesman of 1905, even if he is a Tory, accepts, or at any rate recognises, government by the people, and asserts the need not only of political but of economic and moral melioration; if he is a Liberal, along with the traditional empiricism of England, he sets down a rational ideal as a potent factor in the work of civilisation. Democracy, social reform, political idealism - such are the chief features which distinguish the politics of our time from those of the end of the eighteenth century. [The Foundations of Political Economy and Social Reform](#)
Jun 06 2022 This book brings together leading contributors to explore the development of political economy in eighteenth century France from an interdisciplinary perspective, in particular the ideas for social reform proposed before the Revolution. Political economy in the Eighteenth century encompassed not only what we traditionally regard as economics but also moral philosophy, natural jurisprudence and political theory. This volume explores the different arguments that were made for reforming the economic organisation of the Ancien Régime before the French Revolution. In doing so, the contributors show that political economy in France laid the foundation for social reform ideas throughout the whole of the eighteenth century.

Social Reform and the Church

(Classic Reprint) Aug 28 2021
Excerpt from Social Reform and the Church It gives me much pleasure to welcome this work and to commend it. Opinions may differ in regard to the views presented in this work, as well as in Professor Commons's Distribution of Wealth; but there can be no doubt that they both afford an excellent stimulus to popular thought, and that they are calculated to awaken men to the true importance of popular questions of the day, and to help get us out of the ruts into which we are so likely to fall. It is a time when we need vigorous thinking, clear thinking, and a right spirit; and all these are found in the works of Professor Commons. Social Reform Or Revolution
Jan 01 2022 At first view the title of this work may be found surprising. Can the Social-Democracy be against reforms?

Can we contra pose the social revolution, the transformation of the existing order, our final goal, to social reforms? Certainly not. The daily struggle for reforms, for the amelioration of the condition of the workers within the framework of the existing social order, and for democratic institutions, offers to the Social-Democracy an indissoluble tie. The struggle for reforms is its means; the social revolution, its aim. It is in Eduard Bernstein's theory, presented in his articles on Problems of Socialism, *Neue Zeit* of 1897-98, and in his book *Die Voraussetzungen des Sozialismus und die Aufgaben der Sozialdemokratie*[1] that we find, for the first time, the opposition of the two factors of the labour movement. His theory tends to counsel us to renounce the social transformation, the final goal of Social-Democracy and, inversely, to make of social reforms, the means of the class struggle, its aim. Bernstein himself has very clearly and characteristically formulated this viewpoint when he wrote: "The Final goal, no matter what it is, is nothing; the movement is everything."

Dilemmas of Social Reform Aug 08 2022
Young Subjects Jul 07 2022 Across the metropole, the

colonies, and the wider eighteenth-century world, French children and youth participated in a diverse set of state-building initiatives, social reform programs, and imperial expansion efforts. *Young Subjects* explores the lives and experiences of these youth, revealing their role as active and vital agents in the shaping of early modern France. Through a set of regional case studies, Julia Gossard demonstrates how thousands of children and youth were engaged in the service of the state. In Lyon, charity schools cultivated children as agents of moral and social reform who carried their lessons home to their families. In Paris, orphaned and imprisoned youth trained in skilled trades or prepared for military service, while others were sent to the French colonies in North America as *filles du roi* and sturdy labourers. Young people from merchant families were recruited to serve as cultural brokers and translators on behalf of French commercial interests in the Ottoman Empire and Siam. In each case, Gossard considers how these youth played, negotiated, and sometimes resisted their roles, and what expressions of individual identity and agency were available to subjects under the legal control of others. As sources of labour, future taxpayers, colonial subjects, cultural mediators, and potential criminals, children and youth were objects of intense interest for civic authorities. *Young Subjects* refocuses our attention on these often

overlooked historical subjects who helped to build France.

The American Peace

Reform, 1889-1918 Feb 14

The history of the peace

movement in the United States

was one of dramatic change:

in the mid-1800s it consisted of a

few provincial societies; by

1912 it had become eminently

respectable and listed among

its members an impressive

number of the nation's leaders;

by 1918 it was once again weak

and remote from those who

formulated national policy.

Along with these fluctuations

went equally substantial

changes of leadership and

purpose that, as C. Roland

Marchand emphasizes,

reflected the motives of the

various reform groups that

successively joined and

dominated the movement. Most

of those who joined were not

devoted solely to the cause of

world peace, but saw in the

programs of the movement a

chance for the fulfillment of

their own more immediately

relevant goals. Consequently

the story of the peace

movement reflects the

concerns of such groups as the

international lawyers who

wanted a world court of

arbitration as an alternative to

war, the business leaders who

believed that international

economic stability would be

endangered by war, and the

labor unions who felt that the

working class suffered most in

war. Originally published in

Social Reform, Sexuality and

A

substantial contribution to the

debate on the role of gender

studies in the context of the

development of Indian society

is offered in this volume. The

contributors highlight the

problematic nature of the dual

role the state is expected to

play: on one hand it is vested

with the responsibility for

social reform; on the other it is

seen as representing and

furthering the interests of

social groups based on race,

class, caste or sex. This duality

of the state is particularly

evident in questions relating to

gender, and male and female

sexuality.

Women and Social Reform in Modern India Aug 20 2023

Social reforms aimed at changing the social, political, or economic status of women in India were important both to British colonial rule and to nascent nationalist movements. Debates over practices such as widow immolation, widow remarriage, and child governing marriage and property within different religious communities, continued to exert profound influence on Indian society and politics throughout the 20th century. In this collection, eminent historians Sumit Sarkar and Tanika Sarkar bring together some of the most important scholarly articles and primary source documents from the 19th and early 20th centuries.

Practicable Socialism Oct 18 2020 Excerpt from *Practicable Socialism: Essays on Social Reform* The following Essays have been written at different intervals during our fifteen years' residence in East

London. They were written out of the fulness of the moment with a view of giving a voice to some need of which we had become conscious. They do not, therefore, pretend to set forth any system for dealing with the social problem; they are simply the voice of the dumb poor, of whose mind it has been our privilege to get some understanding. They are published now in response to the requests of many to whom they have been some guide in the ways of service, and in the hope that the experience they offer may bring rich and poor together. It will be noticed that two or three great principles underlie all the reforms for which we ask. The equal capacity of all to enjoy the best, the superiority of quiet ways over those of striving and crying, character as the one thing needful, are the truths with which we have become familiar, and on these truths we take our stand. Although the Essays do not pretend to form a connected whole, it will be seen that their arrangement is subject to some order. Those placed first set forth the poverty of the poor.
