'Arabiyyat al-Naas (Part One) offers a groundbreaking introduction to Arabic as it is written and spoken by native speakers. It combines a progressive and rigorous grounding in Modern Standard Arabic (MSA) – the form employed for reading, writing and formal speaking – with an innovative integration of the spoken Levantine variety used in everyday situations in Syria, Lebanon, Jordan and Palestine. Introducing the two simultaneously 'Arabiyyat al Naas (Part One) uses each in its proper context: Levantine for conversations and MSA for reading and writing activities. In this way, the course efficiently prepares students for the practical realities of learning and "living" Arabic today. Features include: 21 theme-based units covering all the core topics expected in a first-year Arabic course, such as countries, clothes, colors, family and professions a broad range of stimulating activities and exercises fostering active engagement with the course and the development of comprehension and communication skills comprehensively covers the 5 Cs: communication, culture, connections, comparisons and communities a free DVD filmed on location in Jordan, presenting over 40 videos and incorporating a wide variety of entertaining and realistic scenarios a free companion website ([www.routledge.com/cw/younes](http://www.routledge.com/cw/younes)) offering a wealth of additional instructor and student resources, including a teacher's guide, an introduction to the letters and sounds of Arabic (with audiovisual aid and writing demonstrations), audio recordings of songs and listening passages, video clips, sample tests, an answer key and language games clear explanations of grammatical structures and concepts as they occur in the reading and listening materials to encourage progressive learning and active interaction with the text a user-friendly and vibrant full colour text design, richly illustrated throughout with over 200 illustrations and photographs songs with simple lyrics tied to the themes of the course to help advance vocabulary acquisition and understanding of basic grammatical structures. Written by a dynamic author team and tested over a number of years at Cornell University, 'Arabiyyat al-Naas (Part One) will be an essential resource for students beginning to learn Arabic. While primarily designed for classroom use, the accessibility of the course and website also renders it highly suitable for independent study. This volume is the first in an exciting three-part series of Arabic textbooks which together provide a complete three-year undergraduate language program. Django for APIs is a project-based guide to building modern web APIs with Django & Django REST Framework. It is suitable for beginners who have never built an API before as well as professional programmers looking for a fast-paced introduction to Django fundamentals and best practices. Over the course of 200+ pages you'll learn how to set up a new project properly, how web APIs work under the hood, and advanced testing and deployment techniques. Three separate projects are built from scratch with progressively more advanced features including a Library API, Todo API, and Blog API. User authentication, permissions, documentation, viewsets, and routers are all covered thoroughly. Django for APIs is a best-practices guide to building powerful Python-based web APIs with a minimal amount of code. From the foreword: "One of the High Line's powers is its ability to evoke time, to remind us of the changes we've experienced during our own lives, to bring forth echoes of the past, and to make us guess what life might be like years from now. I love the photos on these pages, because they have that power, too." --Joshua David, Co-Founder of the Friends of the High Line. Ten Avenues Press, in association with

Friends of the High Line, announce the publication of High Line Nudes. In 2006, photographer Kevin McDermott took three of his friends up on the abandoned railroad tracks that would become New York City's High Line park to shoot a series of nudes. As McDermott states in his introduction, "at the time I took these photos, what I sought from its beauty was its sense of isolation, being alone, surrounded by nature in the middle of this metropolis." A decade later, this location is now one of the most visited tourist destinations in NYC and one of the largest real estate developments in the world. High Line Nudes captures a seemingly impossible, but beautiful moment in the history of the West Side Rail Yards, Chelsea and an ever changing New York City. The cloth hardcover book is beautifully printed in color and rich black and white duotone images. In October 1939, Albert Einstein warns President Franklin D. Roosevelt that Nazi Germany is actively pursuing an atomic bomb and urges him to make sure that the United States develops the bomb first. Roosevelt heeds the warning and launches the "Manhattan Project" in June 1942. *Randiana, or Excitable Tales* is an anonymously written erotic novel originally published by William Lazenby in 1884. This complete (and completely gross) guide to the human body is the hilarious debut nonfiction children's book from world-wide multi-million bestselling author and former doctor Adam Kay! Do you ever think about your body and how it works? Like really, really think about it? The human body is extraordinary and fascinating and, well...pretty weird. Yours is weird, mine is weird, your math teacher's is even weirder. This book is going to tell you what's actually going on in there, and answer the really important questions, like: Are boogers safe to eat? Look, if your nose is going to all that effort of creating a snack, the least we can do is check out its nutritional value. (Yes, they're safe. Chew away!) And how much of your life will you spend on the toilet? About a year—so bring a good book. (I recommend this one.) Sit back, relax, put on some rubber gloves, and let a doctor take you on (slightly repulsive) tour of your insides. Welcome to *Kay's Anatomy\**. \*A fancy word for your body. See, you're learning already. Based on *The Railway Series* by the REV. W. AWDRY *A is for All Aboard!* Filled with fun photographs from the popular TV show, *Shining Time Station*, *Thomas's ABC Book* will delight children while teaching them the alphabet along the way. An expert communicator, Jack McAfghan writes the memoirs of his four-legged life as a mixed-breed Afghan Hound. From obedience and agility training to hospice work, Jack and his master learn their lessons side by side, inevitably applying what they have learned as their own lives unfold. It is a love story that can be used as an informal study guide for those who are in the process of training a dog, learning to love, or grieving over the loss of a friend. Jack presents with a wise, open and informed mind. He speaks firsthand about the psychological aspects of canine behavior as he opens the reader's mind to the possibilities that exist in life and after death. He reminds us that the way we think can change the course of our lives. This story will touch everyone who has ever loved. It matters not if they have four legs or two. Jack leads us to a higher love as he expands our tolerance and compassion for all of humanity. He extends himself to every creature of the earth, every human on the planet, every spirit in the universe and most of all, to the bona fide Master over all. The reimagined story of Anarcha, an enslaved Black woman, subjected to medical experiments by Dr. Marion Sims. Selected by Tyehimba Jess as a National Poetry Series winner. In this provocative collection by award-winning poet and artist Dominique Christina, the historical life of Anarcha is personally reenvisioned. Anarcha was an enslaved Black woman who endured experimentation and torture at the hands of Dr. Marion Sims, more commonly known as the father of modern gynecology. Christina enables Anarcha to tell her story without being relegated to the margins of history, as a footnote to Dr. Sims's life. These poems are a reckoning, a resurrection, and a proper way to remember Anarcha . . . and grieve her. Pick a Weekend, Pick a City, and Go! A freak storm has spawned three tornadoes that are bearing down on the town of Summerville. Yet under the cover of the storm looms a much more ominous threat: A vindictive killer known as Red who's left a string of victims in his wake and is now bent on exacting his final revenge on the unsuspecting town. But there is an enigma surrounding Red that the FBI is unwilling to admit-closely guarded secrets of something gone terribly wrong beneath the skin of Summerville. Secrets that will destroy far more than one small town. Wendy Davidson is caught in the middle. She's a recovering cult survivor who takes refuge in Summerville on her way to visit her estranged mother. And with her, four strangers, any of whom could be the next victim . . . or the killer. McKinley/O'Loughlin/Bidle: Anatomy & Physiology: An Integrative Approach, 3e brings multiple elements of the study of A&P together in ways that maximize understanding. Text discussions provide structural details in the context of their functional significance to integrate coverage of anatomy and physiology in each chapter. Chapters emphasize the interdependence of body systems by weaving prior coverage of one system into textual explanations of how other systems work. These system relationships are also covered in "Integrate: Concept Connection" boxes. All figures are carefully designed to support the text narrative, and carry brief textual explanations to make figures self-contained study tools. Special "Concept Overview" figures in each chapter tie together multi-faceted concepts in 1- or 2-page visual summaries. Applications are presented in "Integrate: Clinical View" boxes to apply chapter content using clinical examples that show students what can go wrong in the body, to help crystallize understanding of the "norm." Critical Thinking questions in "What Do You Think?" engage students in application or analysis to encourage students to think more globally about the content; 'What Did You Learn' are mini self-tests at the end of each section that assess whether students have a sufficient grasp of the content before moving on. End-of-chapter "Challenge Yourself" assessments include 'Do You Know the Basics', "Can You Apply What You've Learned?", and "Can You Synthesize What You've Learned?" question sets. Career opportunities pursued by students studying A&P are highlighted at the beginning of each chapter. Everyday analogies and practical advice for remembering material are presented in "Integrate: Learning Strategy" boxes. Chapters end with a summary of media tools available to help learn each chapter's content. Global Weirdness summarizes everything we know about the science of climate change, explains what is likely to happen to the climate in the future, and lays out, in practical terms, what we can do to avoid further shifts. In sixty easy-to-read entries, Climate Central tackles basic questions such as: -Is climate ever "normal"? -Why and how do fossil-fuel burning and other human practices produce greenhouse gases? -What natural forces have caused climate change in the past? -What risks does climate change pose for human health? -What accounts for the diminishment of mountain glaciers and small ice caps around the world since 1850? -What are the economic costs and benefits of reducing carbon emissions? Illustrated throughout with clarifying graphics, Global Weirdness enlarges our understanding of how climate change affects our daily lives, and arms us with the incontrovertible facts we need to make informed decisions about the future of the planet, and of humankind. My Gaza offers a startling perspective on contemporary Gaza. Photographer Jehad al-Saftawi documents his life there up until his escape, in 2016. His eye is drawn to moments of humanity and tenderness that redefine this place beyond propaganda, beyond prevailing narratives. Through vivid images and captions--a gun to the head, an interrogation, a family in strife--al-Saftawi exposes a situation that cannot withstand further escalation. Urgent and resolute, My Gaza is the first book of its kind, presenting photos of present-day Gaza by a Gazan journalist. This completely revised and rewritten second edition begins by examining the fundamentals of system forensics, such as what forensics is, the role of computer forensics specialists, computer forensic evidence, and application of forensic analysis skills. It also gives an overview of computer crimes, forensic methods, and laboratories. It then addresses the tools, techniques, and methods used to perform computer forensics and investigation. Finally, it explores emerging technologies as well as future directions of this interesting and cutting-edge field. New and key features include: examination of the fundamentals of system forensics; discussion of computer crimes and forensic methods; incorporation of real-world examples and engaging cases. -- In this enhanced digital edition of The MELT Method, Sue Hitzmann shows you how to live without pain, illustrating her MELT techniques with 20 instructional videos plus 10 audio clips, so you can listen hands-free while you start your journey toward a pain-free body. techniques that can be done in your own home. A nationally known manual therapist and educator, Hitzmann helps her clients find relief from pain and suffering by taking advantage of the body's natural restorative properties. The MELT Method shows you how to eliminate pain, no matter what the cause, and embrace a happier, healthier lifestyle. The Simulation Hypothesis, by best-selling author, renowned MIT computer scientist and Silicon Valley video game designer Rizwan Virk, is the first serious book to explain one of the most daring and consequential theories of our time. Riz is the Executive Director of Play Labs @ MIT, a video game startup incubator at the MIT Game Lab. Drawing from research and concepts from computer science, artificial intelligence, video games, quantum physics, and referencing both speculative fiction and ancient eastern spiritual texts, Virk shows how all of these traditions come together to point to the idea that we may be inside a simulated reality like the Matrix. The Simulation Hypothesis is the idea that our physical reality, far from being a solid physical universe, is part of an increasingly sophisticated video game-like simulation, where we all have multiple lives, consisting of pixels with its own internal clock run by some giant Artificial Intelligence. Simulation theory explains some of the biggest mysteries of quantum and relativistic physics, such as quantum indeterminacy, parallel universes, and the integral nature of the speed of light. Recently, the idea that we may be living in a giant video game has received a lot of attention: “There’s a one in a billion chance we are not living in a simulation” -Elon Musk “I find it hard to argue we are not in a simulation.” -Neil deGrasse Tyson “We are living in computer generated reality.” -Philip K. Dick Video game technology has developed from basic arcade and text adventures to MMORPGs. Video game designer Riz Virk shows how these games may continue to evolve in the future, including virtual reality, augmented reality, Artificial Intelligence, and quantum computing. This book shows how this evolution could lead us to the point of being able to develop all encompassing virtual worlds like the Oasis in Ready Player One, or the simulated reality in the Matrix. While the idea sounds like science fiction, many scientists, engineers, and professors have given the Simulation Hypothesis serious consideration. Futurist Ray Kurzweil has popularized the idea of downloading our consciousness into a silicon based device, which would mean we are just digital information after all. Some, like Oxford lecturer Nick Bostrom, goes further and thinks we may in fact be artificially intelligent consciousness inside such a simulation already! But the Simulation Hypothesis is not just a modern idea. Philosophers like Plato have been telling us that we live in a “cave” and can only see shadows of the real world. Mystics of all traditions have long contended that we are living in some kind of “illusion” and that there are other realities which we can access with our minds. While even Judeo-Christian traditions have this idea, Eastern traditions like Buddhism and Hinduism make this idea part of their core tradition — that we are inside a dream world (“Maya” or illusion, or Vishnu’s Dream), and we have “multiple lives” playing different characters when one dies, continuing to gain experience and “level up” after completing certain challenges. Sounds a lot like a video game! Whether you are a computer scientist, a fan of science fiction like the Matrix movies, a video game enthusiast, or a spiritual seeker, The Simulation Hypothesis touches on all these areas, and you will never look at the world the same way again! Admitting you're a bell-end is the first step to salvation... KSI is one of the biggest and baddest YouTube stars on the planet. With over a billion views and millions of subscribers to his name, he is the undisputed king of social media. But despite this success he is a self-confessed bell-end.
