Music Theory Through Improvisation Feb 24 2021 Designed for Music Theory courses, *Music Theory Through Improvisation* presents a unique approach to basic theory and musicianship training that examines the study of traditional theory through the art of improvisation. The book follows the same general progression of diatonic to non-diatonic harmony in conventional approaches, but integrates improvisation, composition, keyboard harmony, analysis, and rhythm. Conventional approaches to basic musicianship have largely been oriented toward study of common practice harmony from the Euroclassical tradition, with a heavy emphasis in four-part chorale writing. The author's entirely new pathway places the study of harmony within improvisation and composition in stylistically diverse format, with jazz and popular music serving as important stylistic sources. Supplemental materials include a play-along audio in the downloadable resources for improvisation and a companion website with resources for students and instructors.

French Music and Jazz in Conversation Nov 04 2021 French concert music and jazz often enjoyed a special creative exchange across the period 1900-65. French modernist composers were particularly receptive to early African-American jazz during the interwar years, and American jazz musicians, especially those concerned with modal jazz in the 1950s and early 1960s, exhibited a distinct affinity with French musical impressionism. However, despite a general, if contested, interest in the cultural interplay of classical music and jazz, few writers have probed the specific French music-jazz relationship in depth. In this book, Deborah Mawer sets such musical interplay within its historical-

cultural and critical-analytical contexts, offering a detailed yet accessible account of both French and American perspectives. Blending intertextuality with more precise borrowing techniques, Mawer presents case studies on the musical interactions of a wide range of composers and performers, including Debussy, Satie, Milhaud, Ravel, Jack Hylton, George Russell, Bill Evans and Dave Brubeck.

Music Theory for Computer Musicians Dec 05 2021 Many DJs, gigging musicians, and electronic music producers understand how to play their instruments or make music on the computer, but they lack the basic knowledge of music theory needed to take their music-making to the next level and compose truly professional tracks. Beneath all the enormously different styles of modern electronic music lie certain fundamentals of the musical language that are exactly the same no matter what kind of music you write. It is very important to acquire an understanding of these fundamentals if you are to develop as a musician and music producer. Put simply, you need to know what you are doing with regard to the music that you are writing. Music Theory for Computer Musicians explains these music theory fundamentals in the most simple and accessible way possible. Concepts are taught using the MIDI keyboard environment and today's computer composing and recording software. By reading this book and following the exercises contained within it, you, the aspiring music producer/computer musician, will find yourself making great progress toward understanding

and using these fundamentals of the music language. The result will be a great improvement in your ability to write and produce your own original music!

Playing the Changes on the Jazz Metaphor Feb 07 2022 *Playing the Changes on the Jazz Metaphor* proposes an expanded view of the jazz metaphor in a broadened perspective that embraces a wide range of possibilities in organizational, management, and marketing-related themes. This monograph presents a new Typology of Jazz Musicians based on different kinds of artistic offerings. This typology will combine three key distinctions or dimensions to construct a twelve-fold classification that - when extended to the sphere of organizational behavior and business strategy as a Typology of Management and Marketing Styles - will shed light on different ways in which the jazz metaphor relates to organizational design, business practice, management skills, and marketing opportunities. In order to describe these typologies, the author examines important aspects of a first-level jazz metaphor as it relates to organizational issues involved in shaping the jazz improvisation into a form of collective collaboration. This is followed by attention to a second-level linguistic metaphor based on viewing jazz as a kind of language at the foundation for a collaborative conversation.

Alex North's A Streetcar Named Desire Aug 21 2020 This film score handbook provides a detailed analysis of Alex North's astounding score for Elia Kazan's 1951 adaptation of *A Streetcar Named Desire*. Beginning with a review of North's musical training and film scoring techniques, the book then uses approaches from both musicology and film studies to present a comprehensive exploration of the film's (self-)censorship and its impact on North's music, most notably in the film's infamous

staircase scene.

Analysis of Jazz Aug 13 2022 *Analysis of Jazz: A Comprehensive Approach*, originally published in French as *Analyser le jazz*, is available here in English for the first time. In this groundbreaking volume, Laurent Cugny examines and connects the theoretical and methodological processes that underlie all of jazz. Jazz in all its forms has been researched and analyzed by performers, scholars, and critics, and *Analysis of Jazz* is required reading for any serious study of jazz; but not just musicians and musicologists analyze jazz. All listeners are analysts to some extent. Listening is an active process; it may not involve questioning but it always involves remembering, comparing, and listening again. This book is for anyone who attentively listens to and wants to understand jazz. Divided into three parts, the book focuses on the work of jazz, analytical parameters, and analysis. In part one, Cugny aims at defining what a jazz work is precisely, offering suggestions based on the main features of definition and structure. Part two he dedicates to the analytical parameters of jazz in which a work is performed: harmony, rhythm, form, sound, and melody. Part three takes up the analysis of jazz itself, its history, issues of transcription, and the nature of improvised solos. In conclusion, Cugny addresses the issues of interpretation to reflect on the goals of analysis with regard to understanding the history of jazz and the different cultural backgrounds in which it takes place. *Analysis of Jazz* presents a detailed inventory of theoretical tools and issues necessary for understanding jazz.

Music Education: An Artificial Intelligence Approach Jun 30 2021 The research fields of "artificial intelligence and music" and "cognitive musicology" are relative newcomers to the many interdisciplinary groupings based around the centre of AI and cognitive science. They are concerned with the computational study and emulation of human behaviour with respect to music, in many aspects, and with varying degrees of emphasis on psychological plausibility. Recent publications

have included work in such diverse areas as rhythm and pitch perception, performance, composition, and formal analysis. Music shares with language the property of giving access to human mental behaviour in a very direct way. As such, it has the potential to be a very useful domain for AI work. Furthermore, in the course of time, AI related work will surely throw light back onto some or all of the fields to which it is applied. Indeed, we are already beginning to feel the benefits of the application of AI techniques to music technology. It is not surprising, therefore, that one of the first areas interest for of musical AI study is that of music education. There are many ways in which an artificial intelligence or cognitive science approach to music education may be applied - for example, to automate tuition, to explain learning processes, to provide metaphors for human computer interaction, and so on. This collection of papers, which is intended to give an impression of both the breadth and depth of the field, originated from a workshop entitled "Music Education: An Artificial Intelligence Approach".

Freedom Sounds Sep 02 2021 An insightful examination of the impact of the Civil Rights Movement and African Independence on jazz in the 1950s and 60s, Freedom Sounds traces the complex relationships among music, politics, aesthetics, and activism through the lens of the hot

button racial and economic issues of the time. Ingrid Monson illustrates how the contentious and soul-searching debates in the Civil Rights, African Independence, and Black Power movements shaped aesthetic debates and exerted a moral pressure on musicians to take action. Throughout, her arguments show how jazz musicians' quest for self-determination as artists and human beings also led to fascinating and far reaching musical explorations and a lasting ethos of social critique and transcendence. Across a broad body of issues of cultural and political relevance, *Freedom Sounds* considers the discursive, structural, and practical aspects of life in the jazz world in the 1950s and 1960s. In domestic politics, Monson explores the desegregation of the American Federation of Musicians, the politics of playing to segregated performance venues in the 1950s, the participation of jazz musicians in benefit concerts, and strategies of economic empowerment. Issues of transatlantic importance such as the effects of anti-colonialism and African nationalism on the politics and aesthetics of the music are also examined, from Paul Robeson's interest in Africa, to the State Department jazz tours, to the interaction of jazz musicians such as Art Blakey and Randy Weston with African and African diasporic aesthetics. Monson deftly explores musicians' aesthetic agency in synthesizing influential forms of musical expression from a multiplicity of stylistic and cultural influences--African American music, popular song, classical music, African diasporic aesthetics, and other world musics--through examples from cool jazz, hard bop, modal jazz, and the avant-garde. By considering the differences between aesthetic and socio-economic mobility, she presents a fresh interpretation of debates over cultural ownership, racism, reverse racism, and authenticity. *Freedom Sounds* will be avidly read by students and academics in musicology, ethnomusicology, anthropology, popular music, African American Studies, and African diasporic studies, as well as fans of jazz, hip hop, and African American music.

Multimedia Interface Design in Education Apr 16 2020 What the book is about This book is about the theory and practice of the use of multimedia, multimodal interfaces for learning. Yet it is not about technology as such, at least in the sense that the authors do not subscribe to the idea that one should do something just because it is technologically possible. 'Multimedia' has been adopted in some commercial quarters to mean little more than a computer with some form of audio or (more usually) video attachment. This is a trend which ought to be resisted, as exemplified by the material in this book. Rather than merely using a new technology 'because it is there', there is a need to examine how people learn and communicate, and to study diverse ways in which computers can harness text, sounds, speech, images, moving pictures, gestures, touch, etc. , to promote effective human learning. We need to identify which media, in which combinations, using what mappings of domain to representation, are appropriate for which educational purposes . . . The word 'multimodal' in the title underlies this perspective. The intention is to focus attention less on the technology and more on how to structure different kinds of information via different sensory channels in order to yield the best possible quality of communication and educational interaction. (Though the reader should refer to Chapter 1 for a discussion of the use of the word 'multimodal' .) Historically there was little problem.
